

VALUE & BENEFITS

DOWNSTREAM BENEFITS

With faster creation of production information, that is more accurate and arriving in a digital manner, comes the opportunity for valuable time to be returned to technical staff and management.

PRICE POINT

LiveMine is designed and priced to ensure all companies large and small can experience the benefits of a cost competitive production data management system

REMOTE IMPLEMENTATIONS

Flexible and cost-effective access to important business information from any location, improving collaboration and decision-making capabilities. Allows for remote teams to work together seamlessly and securely, increasing productivity and improving data security.

IMPROVED REPORTING

Operators are able to create production records in-field. This improves reporting quality and speed as supervisors use our web-app for simple review and approval to generate reports.

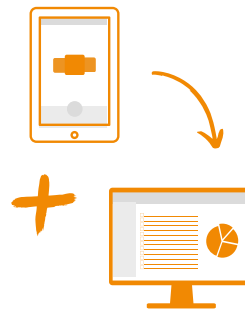

USABILITY

The tablet application has minimal buttons with an easy to follow process to ensure operators enter their information correctly which creates clean validated data.

CUSTOM SUBSCRIPTIONS

Only pay for the services you need, reducing overall costs. Additionally, you can get more flexibility in terms of scaling up or down as business needs change. Have more control over the features and functionalities, giving you a competitive advantage in the market.

ESTABLISHED PRODUCT

With a significant presence in the mining industry, users are likely to be familiar with the LiveMine product suite and productivity will be increased.
