

EXM INTRODUCTION

EXM OVERVIEW

EXM is LiveMine Solutions' latest product for the Paperless Mine. This Explosives Management system will ensure sites maintain accurate stock levels, create detailed records, and greatly improve other processes including restocking and chain of custody. EXM targets the improvement of both safety and efficiency on site.

Prevent inaccurate explosives stock levels

EXM's flexible and robust stock-keeping system enables sites to maintain accurate magazine stock levels at all times, greatly reducing the likelihood of magazine discrepancies. In the event an incident does occur, EXM can assist you in streamlining the investigation process.

DESIGNED-FOR-OPERATOR ROBUST STOCK KEEPING SYSTEM

END-TO-END SOLUTION FROM DRILL PLANS ALL THE WAY TO FIRING

RESTOCKING PROCESS IMPROVEMENTS INCLUDING PREDICTED USAGE AND BUILT IN MIN-MAX CAPACITY MONITORING

- ✓ Increased stock-keeping accuracy
- ✓ Improved safety as explosives are less likely to have discrepancies and easier to investigate
- ✓ Increased record-keeping quality and ease of analysis
- ✓ Peace of mind for site inspections and audits
- ✓ More efficient and automated restocking process
- ✓ Seamless end-to-end flow across drilling and charge operations, minimising effort and room for error
- ✓ Chain of custody tracking for improved investigation processes
- ✓ Extensive reporting tailored to different purposes
- ✓ Removes requirement for administrator to digitalise records
- ✓ Magazine information and stock levels always available to operators
