

Eclipse® GET Solution for 350T to 800T hydraulic machines

Bradken's Eclipse range is an evolution of our mining class GET product. This system is designed to fit onto Bradken cast lips and utilises Bradken designed and manufactured locking pins that are sealed to allow consistent effort during GET changes in all environments.

Eclipse® Point Styles

Eclipse® Versatility

Bradken's range of Eclipse adapters fit onto all Bradken noses and are available in three options. Adapters are available in standard or heavy-duty options with two choices for point sizes (12 or 22) depending on your machine class or dig severity. The Bradken Solid tooth options are also available to provide a complete GET solution no matter what your application or maintenance strategy is.

Our Innovation. Your Advantage.

Eclipse® Cast Lip Solution

Most streamlined cast lip on the market without compromising strength or durability.

Our new streamline design features:

Simulations across a range of machines indicate up to a 3% reduction in fill power achieved

Up to 1 tonne mass reduction.
*subject to cast lip size

Predicted increase in service life of up to 50%.

Improved bucket fill performance and cycle times

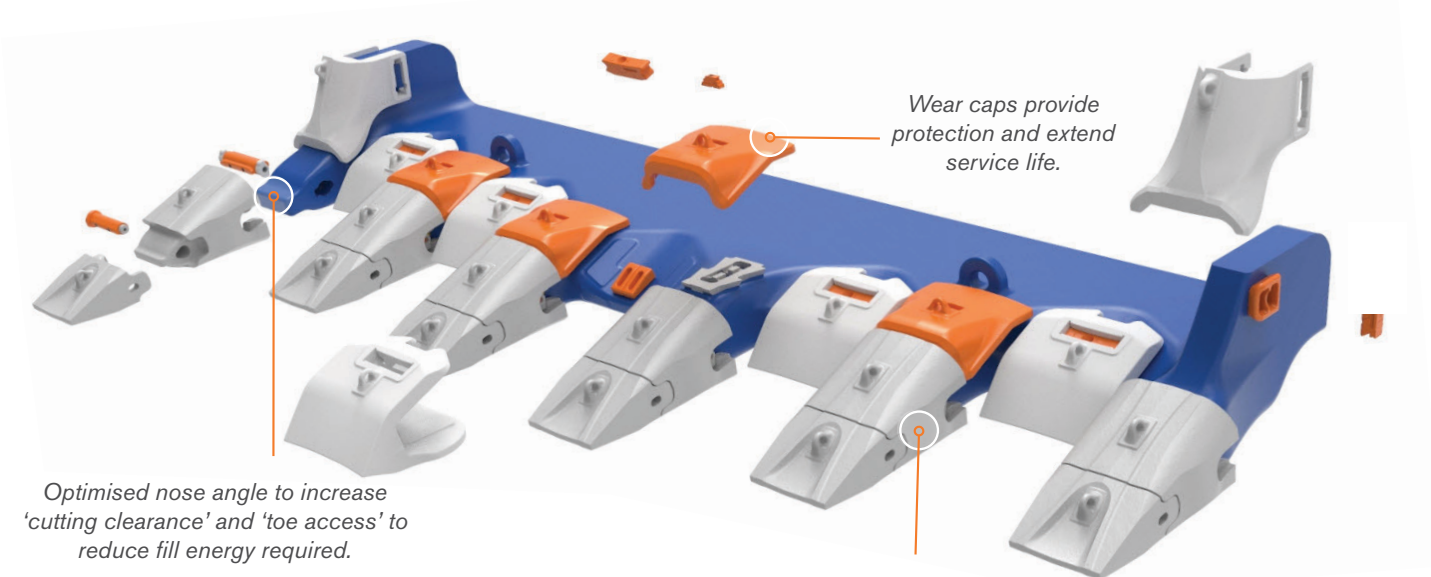

Improved design to extend maintenance intervals

Extensive range of GET options to suit your operational needs

Our GET system and streamline lip reduces the effort required of the operator to fill the bucket, helping achieve the target payloads and cycle times consistently.

Optimised nose angle to increase 'cutting clearance' and 'toe access' to reduce fill energy required.

Wear caps provide protection and extend service life.

Improved adapter design to reduce nose maintenance from uneven wear and general nose peening.

Our Innovation. Your Advantage.
