

Always stay connected

A voice-powered intelligent assistant, Ask Harry connects you to your teams and critical business information with a simple call to Harry. Ask Harry to find, locate or connect, using English, or in one of many languages.

**Ask Harry takes voice communication to the next level.
No complex systems or training needed.**

"Harry, hazard report water leak at level 2."

"Harry, where is the nearest power source."

Conéctame a primeros auxilios urgentemente."

"Harry, locate truck B6."

"Harry, send me the siteplan for 33 George Street."

"哈利，我的快递在哪里？"

"Harry, call the safety officer now."

Search and upload information

According to a Deloitte report, 72% of employees said they still cannot find the information they need within their company's information systems.

This is in addition to the time wasted typing out and submitting forms on a daily basis.

Ask Harry solves productivity vacuums. With one phone call, Harry can access buried information or guide you through logging an update.

Enhance workplace communication

Harry enhances workplace communication making it simple and fast to connect a call, send a group message or log an important change.

Using artificial intelligence, Harry can also translate critical information into many languages, avoiding expensive misunderstandings and creating a more inclusive environment.

Always up-to-date

Ready and easy access to the latest on-site information can mean the difference between a task running smoothly or disaster.

Streamline and simplify

Call Harry on the two-way radio for the latest site update, a site plan or to connect you to a lead on site. With one source of truth, Harry simplifies access to the right information immediately.

Improve compliance

Minimise the time spent on compliance requirements and form-filling. Remove the pain of illegible handwriting, misplaced forms or long typed out messages. Harry can instantly fill in a hazard report, log a call, or a lodge a near miss.

Break through language barriers

Harry solves language obstacles with advanced speech processing technology, giving your teams greater levels of communication and collaboration. Say or write a message in English, Harry will translate it into one of the many supported languages.

Our voice intelligent assistant learns more as it is used.

Harry helps solve small screen typing issues and frustrations when searching for the latest document version.

“Harry, send a hazard report.”

Tailored industry solutions

Construction

In the dynamic world of construction, Harry helps keep your teams up-to-date, connected and compliant with OH&S and operational policies. With many languages on site, Harry also bridges language communication issues.

Mining and Heavy Equipment

Speed up documenting critical information and reduce potential errors when using small screens or tablets. If your team still uses paper, Harry can be integrated quickly and accessed with just a phone call.

Healthcare

Keep your teams and contractors up-to-date, productive and compliant. With constant personnel changes, swapping in and out on rotating shifts, Harry makes communication between teams, departments and managers fast and simple.

Warehousing

Speeding up instant access critical to information, such as the whereabouts of fleet and assets, will have your personnel more productive throughout the day and improve the bottom line.

Security

When there is a critical issue, Ask Harry for an immediate status update, no matter where you are. Harry can also forward calls immediately, making sure you get through to the right person or group immediately. Stay compliant with a documented trail of events.

Entertainment

On location, crews and conditions are constantly changing. Ask Harry to instantly connect calls to the correct on-set crew, send messages to groups or access the latest call sheets. Harry also helps avoid disasters and delays due to missed critical change.

Smart and robust technology

Ask Harry uses conversational artificial intelligence technology to understand your requests, no matter how you phrase it. Harry is also connected to many different data sources, including your own business systems, making sure you get relevant and up to date information instantly. Harry is as simple to use as making a phone call.

Innovate with our team

Our team has delivered innovative tracking solutions for over a decade. We were the first to squeeze battery-powered Bluetooth technology inside a credit card, and we constantly seek new ways to innovate to help provide solutions for you.

Find Harry

Find Harry is our location and tracking technology, which integrates seamlessly with our Ask Harry technology. Ask us for more information on how this works.
