

# MAKE GOOD PUBLICITY FOR YOURSELF

If you want to ensure the proper presentation of your brand and make its promotion original, distinctive and warmly received, you should remember that effective advertising encourages not only with its content, but also with its form. It is easier to convince potential customers of the value, quality and innovation of your products or services if your advertisement is exactly that - refined, aesthetic and unique. At Bergmen, we believe in your brand, so using our experience and skills we will help you create a unique advertisement. How? See for yourself.

## Neon Flex - you can shape your advertisement by yourself

Remember the classic, nostalgic neon ads from years ago? This form is becoming fashionable again, and we have good news for you - we have managed to significantly improve this technology! Thanks to Neon Flex you can create texts, images or logos and shape them according to your needs. Thanks to this, you can be sure that your project will be one of a kind, and will be much cheaper and more environmentally friendly!

## Lightboxes – you'll be known in the city

Almost everyone knows what advertising on lightboxes is, but not everyone is aware of how much depends on them. Production material, construction, stability, resistance to weather conditions, ease of installation - the way your advertisement will look is influenced by many factors related to the lightbox itself. As a manufacturer of aluminum frames and lightboxes, we know it very well, so you can rely on us.

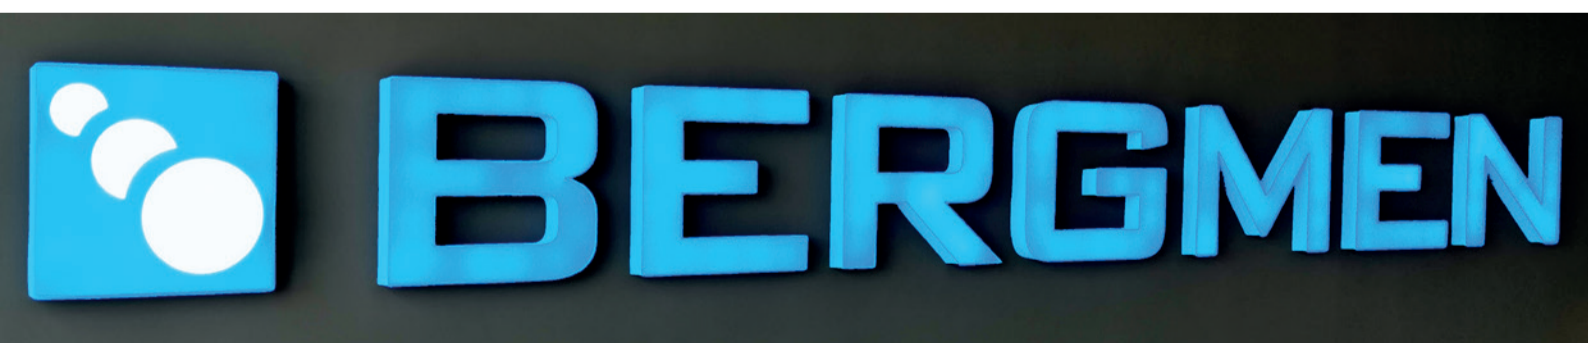

## Block letters - you will play with the classics

If you prefer modularly illuminated inscriptions and logos, and you also know that creating such a form of advertising requires precision, knowledge and experience, then you will surely like working with us. We also believe that it is something more than simply illuminating a piece of plastic, which is why we offer several dozen types of LED modules. All this to offer you the right solution. Our specialists are waiting for new challenges!

## Billboard lights - they'll spot you from afar

The largest advertising forms, such as billboards, banners or murals, are hard to miss - unless, of course, they are covered in darkness or illuminated in such a way so that even the best slogan and the most interesting graphics remain a real mystery. Your advertisement on such large surfaces cannot be invisible, and thanks to our LED illuminators you do not have to worry about it. Our offer includes many models that can be easily adapted to your needs.

## Why is it worth advertising with us?

At Bergmen, we know the advertising industry well, its needs and requirements, as well as the current trends - we have been providing ready-made solutions for it for years. We know that quality, durability, aesthetics and intuitiveness are very desirable features, which is why we place great emphasis on ensuring that our products are characterized by this. Thanks to this, you have the guarantee that your advertisement will be made in a way that will fully satisfy you. **You will stand out in the best way with us!**
