

neoStampa Delta *Print colors beyond your limits*

PDF/X Support

Reach the best colors using PDF/X files with the integration of Mako® from Global Graphics.

Reproduce colors

Print what you see from the screen to the printer

Best gradients

New modes to print smoother and more precise gradients.

Spot Colors

Support and automatic detection of spot colors

Fluor library

Integrates a special color library to be loaded into your design application.

Create colorways

Create different colorways directly in neoStampa, making them ready for print.

Up to 5 times faster

neoStampa Delta has been designed to rip and print up to 5 times faster than before.

Control Center

Organize your printing queues and be aware of production costs with the new control center.
