ABOUT US

TECHNOTAPE INTERNATIONAL

In this catalog you will find a variety of product inspiration for personalization, as Technotape is the sustainable wholesaler of the complete package. From unique blanks to all equipment needed to personalize them.

Our ever-expanding assortment allows you to always be in with the latest trends. We also have the ability to develop sublimation products in-house to serve your specific needs, such as our revolutionary 3D Oven Pro. With this oven you can easily sublimate larger 3D products like shoes and shin guards. It is unique as it gives you the ability to sublimate products with curved edges.

We believe it is important for us to have a safe and fair work environment. We believe in performing our work responsibly. Therefore, we are member of Amfori BSCI. This is the leading global business association for open and sustainable trade. Additionally, we work on a central warehouse in Asia, in order to maintain our stock locally. We will only ship once an order has been placed. The right number of products goes straight to the right place. This enables us to distribute more efficiently to you.

Want to make sustainable choices too? Take a look at our stainless-steel drinkware! By selecting reusable products for your assortment, you contribute to and promote sustainability. Together we can make a change.

GETTING STARTED

GET STARTED WITH PERSONALIZED GIFT MAKING

The amount of digital images is immense, as is the market of products to print these images on. Sublimation is one of the most effective methods for creating a wide range of customized and personalized products on demand.

We are very experienced with sublimation products and systems so if you are looking for a complete solution and supplies, or would like to start your own business in personalized gifting, we will gladly help you!

Sublimation printing is the best and most well-known printing solution for 100% polyester and other polymer-coated materials. Sublimation is a digital print technology that enables you to print images into everyday products, such as textile and mugs. The process is swift and cost efficient. All you need are printable products, sublimation ink, sublimation paper, an appropriate inkjet printer, and a heat press.

The heat press makes sure that the sublimation ink turns into a gaseous state (without turning solid first), which allows the ink to penetrate the polyester coating.

This leads to the image actually being inserted into the material, instead of being layered. The great advantage of this is that the quality of the image doesn't decline after time. Summarized, you're only five steps away from your personal business success!

Technotape International is your partner for creating the best personalized products! Together we'll take pictures to print. Our assortment is attractively priced and available in various quantities to suit the size of your business. We can guarantee a 98% availability rate on the best-selling items.

Sublimation and Photo Fun products will significantly boost your margin, as well as your customer's satisfaction. You can always contact our Account Managers for questions, advice on your assortment, to receive a demonstration or to get your equipment up and running smoothly so you can start profiting from sublimation as soon as possible.

FIVE REASONS TO START

- Personalization is popular.
- Low start-up costs.
- Easy to learn.
- Very profitable, high margins.
- Fun to do and create.

SUBLIMATION PRODUCTS

The Story

The ceramic of our mugs is crafted in a renowned factory that handles every step of the process with the utmost care. They take the quality check very seriously: a special team selects the mugs and inspects them on the finest quality. The mugs with small pinholes or a slight difference in size are kept apart. These mugs are still of high quality, however, they are more unique. After the mug is finished and the selection is done, the mugs are sent to a factory in order for them to receive coating. This process is also handled with a focus on quality.

After the coating has been applied, the mugs are checked again on pin holes and its size. The mugs that are perfect without any deviations become our .001 mugs and the mugs that are perfect with a potential small deviation, become our .002 mugs.

DRINKWARE

STAINLESS & ALUMINIUM

- Sustainable and environmentally friendly
- Insulated to keep your drinks chilled (or hot)
- Safe to use and touch
- No spilling or leaking
- Great options for personalization or branding

Stainless Sustainability

hot, cold, eco-friendly and ready to personalize!

Between 8 and 12 million tons of plastic are dumped in the world's seas each year. According to statistics from the United Nations, if current levels of pollution continue, there will be more plastic than fish in the seas by 2050. Opting for a reusable stainless steel bottle will help cut down waste from single-use plastic - as well as save you money in the long run. Technotape provides a wide variety of stainless steel bottles with unlimited sublimation options to personalize your bottle!

Solar Shirts

The Vapor Solar shirts are unique as they offer UPF 50+ solar protection. The protection actually increases with washing, after 25 washes 99,92 % of UV-B transfer are blocked! This means that your customer can be stylish with a personalized, high quality shirt and at the same time be protected from UV radiation. Ideal for the summertime! You can choose from a broad variety of colors, types and sizes.

3D SUBLIMATION

SUBLIMATION IN 3D

3D Sublimation is a unique and exciting type of sublimation. This technique makes it possible to print around the edges, which means that every side can be decorated! You can print durable full color images on polyester-coated surfaces.

Since being active in 3D Sublimation, we learned a lot about the process and the infinite possibilities that 3D sublimation has to offer. One of the most popular applications is the production of 3D phone and tablet cases. We wanted to make this process more comfortable than what you were used to.

“A complete system with endless possibilities.”

Therefore, we developed and engineered the fast and very easy to use oven with a drawer system. The drawer offers a unique working experience since the operation only inserts the blank products and 3D foil. During the entire process the LCD display shows the progression.

Please contact us and be convinced of all the possibilities 3D sublimation has to offer! We are pleased to give you more information and a product demonstration.

Technotape 3D Sublimation Oven

Features

- Designed and built in-house
- Desktop model, small footprint
- PLC driven system, precise temperature control
- 5 minutes cycle time, no after polish
- Direct and stable heating
- No errors in placing the products for printing
- Built-in vacuum pump, low noise operation
- Low power consumption
- CE - certified
- Baseplate with 8 jig pins included

LASER TRANSFER

Transfer

If you are looking for an alternative to Sublimation, you may choose the method of Laser Transfer. An advantage of this technique is that you can print on light and dark textiles, but also on hard substrates like wood, metal, glass and ceramics.

This technique gives you many color options, you can print standard, neon, metallic and multi-colored images. The colors will turn out bright and beautiful. We offer the complete package for Laser Transfer: Printers, Heat Presses, Transfer Paper and Software.

Starter Set OKI White Toner A4

The set includes a set of toners, media and software

The OKI Pro 7411WT starter set consists of:

- OKI Pro 7411WT White Toner Printer
- 1 year Factory Warranty
- TransferRIP Software (Full Version)
- OKI CMY-toner
- OKI White-toner
- Forever Transfer A Foil A4 (50 sheets)
- Forever Transfer B Paper A4 (50 sheets)
- Forever Finish A3 Matte (250 sheets)

FOREVER FLEX-SOFT NO-CUT

Forever Flex-Soft - No-Cut

Forever Flex-Soft (No-Cut) produces self-weeding transfers. You can print any image in black onto the foil. The result will be the color of the transfer paper! As there are many colors available, there are many options. You may also choose neon or metallic colors. The great advantage of this paper is that you will only need a laser printer. It's as easy as that!

Epson quality, with you in mind

Ideal for producing small promotional goods and hard substrates, the SureColor SC-F500 is a new, compact dye sublimation printer that doesn't compromise on quality or performance.

By utilising high-performance dye sublimation inks, prints from the SureColor SC-F500 are not only more vivid, they're faster drying too.

KEY FEATURES:

Ease of use

Wi-Fi, with 4.3" touchscreen and Epson Edge support

Practical

Compact size, with automatic media changeover, intelligent print delivery and optional stand

Cost tracking

Built-in accounting tool keeps you in control

Convenience and capacity

Refill ink during printing

PRINTERS & CONSUMABLES

Epson SureColor SC-F500

Sublimation Printer

The Epson SureColor SC-F500 sublimation printer is an indispensable all-in-one printer. It's perfect for personalizing both soft and hard substrates. From phone cases and mugs, to mouse pads, T-shirts and pillows.

This 24-inch dye sublimation printer is perfect for both starters and professionals of promotional agencies, photo labs, clothing producers and copy shops. The printer offers fast lead times, is very reliable, and has low investment costs. It also requires no specialist knowledge for installation, use, and maintenance.

Features:

- Refillable ink solution using 140ml CMYK ink bottles
- Anti-dust design prevents misprints due to nozzle clogging
- Auto switch between cut sheets and roll media with ease
- Wi-Fi connectivity
- Accounting software tool to accurately calculate print costs

Sawgrass Virtuoso VJ 628 8-Color

Inkjet Sublimation Printer

Featuring the Sawgrass VJ 628, the Virtuoso 630 mm HD Product Decorating System is the industry's first fully integrated sublimation printing solution of this size. Utilizing a best-in-class print engine, ink set, software and support, this 8-color system is designed for high-volume, high-definition printing - and is built to last, even in the most demanding production environments.

Features:

- Full-bleed printing on 610 mm products
- Engineered and manufactured in Japan by Mutoh
- Industrial-grade printhead
- i2 print technology virtually eliminates banding
- Dual CMYK and 8-color ink configurations
- Up to 1440 x 1440 resolution
- One year parts and labor warranty
- Powerful and Easy-to-Use Print and Management Software

HARDWARE & CONSUMABLES

TURBO wrapper

If you are into saving time and money, choose the TURBO wrapper for your mug production. This revolutionary device wraps mugs more easily, efficient and faster than any other device. It is designed for your convenience. It works perfectly with our 10 oz. and 11 oz. mugs straight away, therefore we recommend this combination to you.

Features:

- Increased productivity
- Consistent alignment
- Requires minimal training
- Low operator fatigue
- Clamp forms steady base for processing
- Convenient separation of clamp and wrap
- Dutch design, built in-house
- Patented system

Description

Module Mug Press - 4 Modules

This convenient mug press has 4 modules, which you can operate individually from each other. It is an ideal solution for both high and low volume users. With this mug press you can use several heat mats; the 11 oz., 6 oz. and conical heat mats. The 4 modules do not need to be exactly the same, so vary with these mats if you wish to do so.
