## About Us

**MOUSE-PS Ltd was founded in 1991.** Since then the company has rapidly grown and developed and only 5 years later, in 1996, it commenced operation on the foreign markets as well.

MOUSE-PS own production and warehouse buildings are located in Bulgaria, **one plant in Sofia with 15,000 m<sup>2</sup>** covered area and second plant in **Botevgrad with 24 200 m<sup>2</sup>** covered area.

We use modern european machines for more than **15 million euro**.

In 2014 we established sales company Sign & Store Solutions GmbH in Gummersbach, Germany.

**Our undisputed advantages that win the trust of our customers are:**

- High quality products
- Fully closed production cycle;
- Short production timing;
- Big versatility of technologies;
- A team of over 350 highly qualified specialists;
- Long established professional experience;
- Competitive/Advantageous prices.

## Our activities

**MOUSE-PS Ltd** offers a wide range of products and services for **outdoor and indoor advertising**, as well as **visual communication, light signs and illuminated letters, desktop publishing, printed matter and tailor made non-standard solutions.**

In 2006 MOUSE-PS acquired part of Plastchim AD's assets in Botevgrad, a company with experience in polystyrene and acrylic sheet extrusion of more than 30 years. Following a large-scale modernization, **the plant starts production of polystyrene/PS/, ABS, PMMA, polypropylene /PP/ and SAN sheets.** A year later, the production of polystyrene films begins, as well as of co-extruded sheets. In 2019 we installed new co-extrusion line for **ESD electrically conductive plastic films.**

From 2018, using our modern equipment we started **production of different aluminium and steel parts for buildings**, as facade panels, isolated panels with Rockwall inside, fences and other decorative elements. We have the most modern powder coating and company have QUALICOAT and QUALISTEELCOAT painting certificates.

## Our products

MOUSE-PS Ltd is famous as advertising products manufacturer, but we also start to operate in different other sectors as:

- sheet extrusion;
- automotive parts;
- building facade elements;
- isolated building panels;
- plastic recycling;
- powder coating;
- packaging;
- steel fences;
- ESD electro-conductive films, sheets and transport trays.
- welding steel and aluminium industrial parts, using our CLOOS 7 axis welding robot;
- paper bags;
- textile frames and die-sublimation textile printing.

Sofia plant 15 000 m<sup>2</sup>

Sofia administration building

Botevgrad plant - 24 200 m<sup>2</sup>

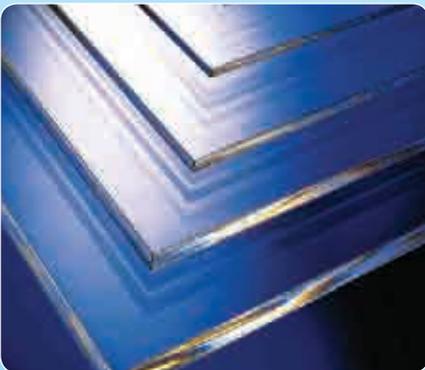

## 1. EXTRUSION & FORMING

Our modern plastic processing factory is located in Bulgaria, the town of Botevgrad and is located on an area of 35000 m<sup>2</sup>.

Following large scale of modernization in the plant, now we have 3 sheets extrusion lines, 2 films extrusion lines, EREMA granulating line, shredder, grinders and vacuum forming machines and other equipments.

In our factory we produce:

- Extruded sheets from:
  - PMMA,
  - ABS,
  - HIPS,
  - GPPS
  - SAN
- Extruded ESD (electro conductive) HIPS films and sheets
- Vacuum formed trays, made from foils
- Vacuum formed parts, made from sheets
- Recycling of industrial waste from HIPS, ABS, PP and PE

## 2. ADVERTISING & PRINTING

From the date of establishing in 1991 Mouse-PS Ltd. operate as company for production of different products in advertising industry. Now a days with our more than 300 employees we are the biggest signs and displays manufacturer in Bulgaria and one of the biggest in Europe.

Our high qualified employees and closed production cycle, including all kind of technologies give to our customer opportunity to order complicated products in series or in single production.

Our main products are:

- Illuminated and façade signs
- Channel illuminated letters
- Totems, pylons, billboards
- Click frames and engraved signs
- Plastic displays
- Leaflets, catalogues, brochures
- Textile frames
- Paper bags

## 3. METAL WORKING

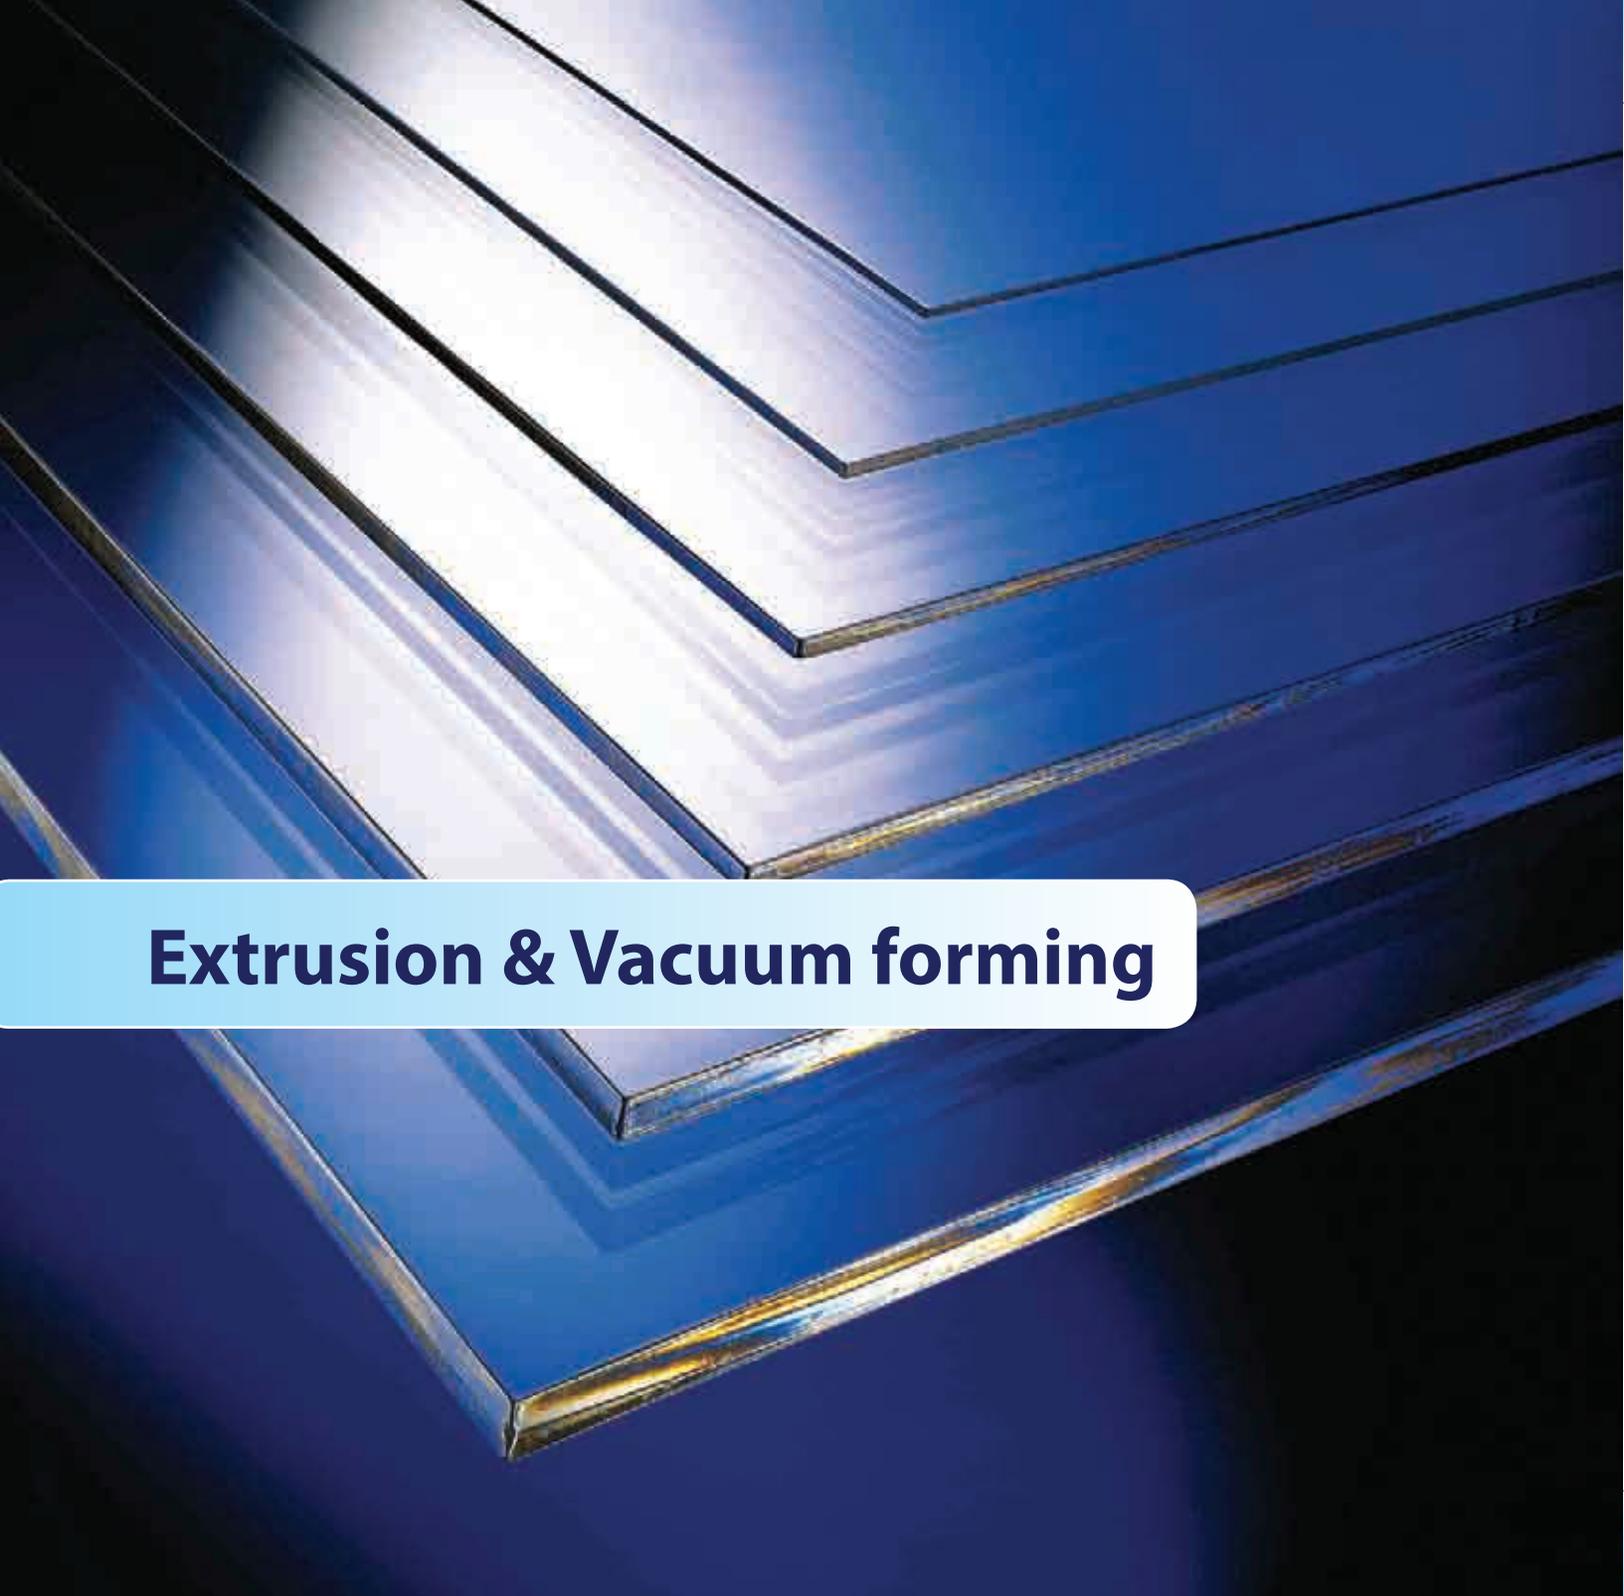

Using our modern sheet metalworking machines and powder coating line we establish new division in our company. In this division we start to produce different industrial parts or products, which application is for outdoor use.

We certified our powder coating line by Qualicoat and Qualisteelcoat, as we can achieve 1500 hours Salt Spray Test on steel parts and 2000 hours acetic Salt Spray Test for aluminum parts.

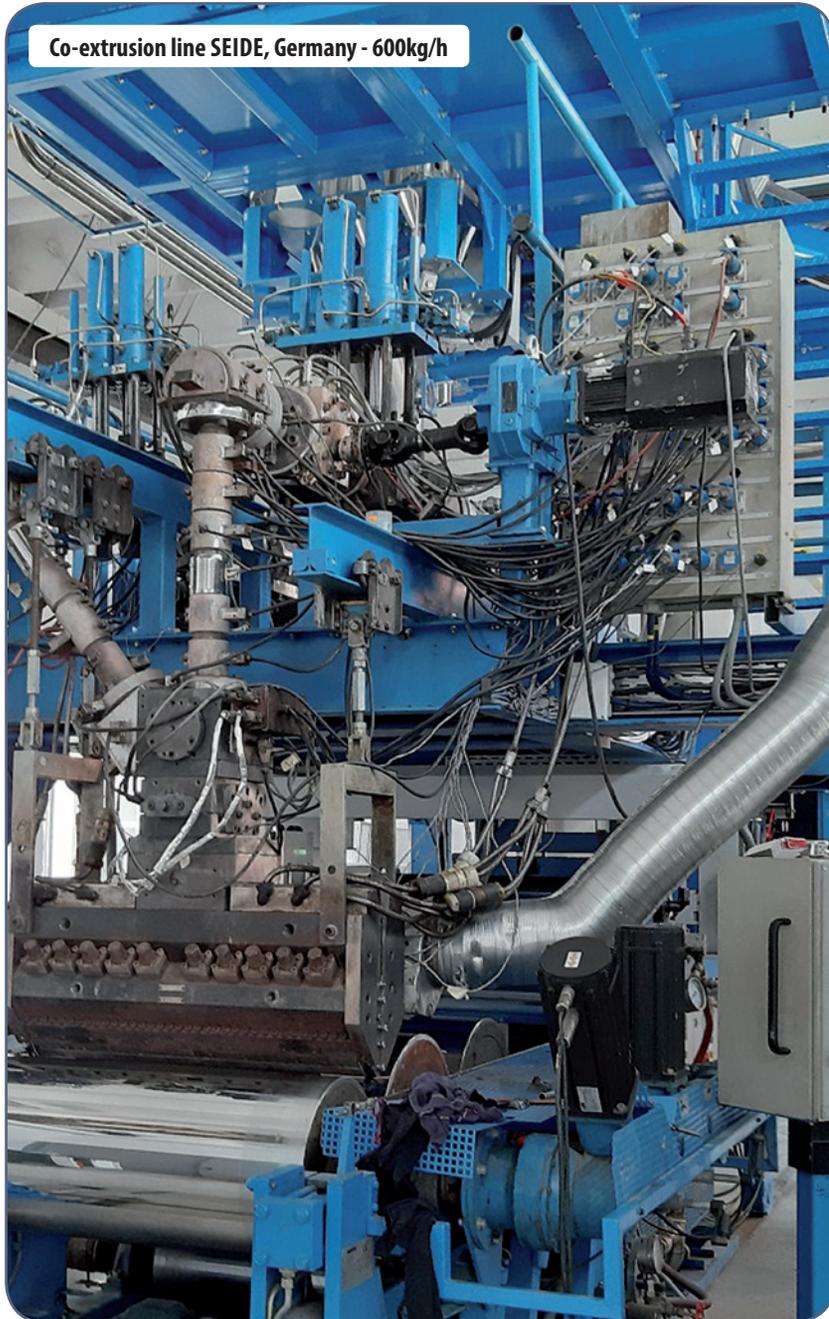

This opportunity to offer quality powder coating gives us the opportunity to produce the following products:

- Aluminum façade panels
- Building aluminum structures
- Steel fences
- Steel railings
- Aluminum ceiling and roofing
- Perforated decorative elements

# **Extrusion & Vacuum forming**

# Electrically conductive HIPS films and sheets

**General** - High Impact Polystyrene (HIPS) is a general-purpose opaque material that has a good balance of stiffness and toughness. It has good impact strength and is an excellent all-purpose material.

**Mouse-PS Ltd. produce conductive material in rolls and sheets. This material is created for production of transport trays for packaging electronic components, which are very sensitive to Electro Static Discharge (ESD).** It has permanent conductive properties, without the dependence of the humid atmosphere.

State-of-the-art technology for dosing and mixing gives us the ability to offer different products to provide the exact degree of conductivity required for your application, whether anti-static, static dissipative, ESD protection, conductive, or EMI/RFI shielding.

Special compounds that we use in the production of the sheets and films can be custom tailored to offer different surface or volume resistance in range from  $10^3$  to  $10^{12}$  ( $\Omega$ .cm)

Applications - **Trays for electronic devices, handling trays and areas sensitive to ESD**

Colour - **Black only.**

Finish - **Matt/matt.**

**Types of Conductive Materials** - they are divided into 4 major classifications based on their electrical properties and decay rates for static charges.

*Anti-Static materials - volume resistance  $10^{10}$  to  $10^{12}$   $\Omega$ .cm*

*Static Dissipative materials - volume resistance  $10^6$  to  $10^{12}$   $\Omega$ .cm*

*Conductive materials - volume resistance  $10^3$  to  $10^6$   $\Omega$ .cm*

*EMI/RFI Shielding materials - volume resistance  $10^1$  to  $10^4$   $\Omega$ .cm*

## TECHNICAL INFORMATION

### FILMS

#### Technical parameters for our extruded HIPS ESD films

*Extrusion technology:* Mono-extrusion or Co-extrusion

*Co-extrusion layers:* A, AB, ABA

*Surface resistance:*  $10^3$  –  $10^{12}$   $\Omega$ .cm

*Volume resistance:*  $10^3$  –  $10^{12}$   $\Omega$ .cm

*Thickness:* 200 - 2000 microns

*Rolls width:* up to 820 mm

*Rolls diameter:* up to 1200 mm

*Rolls weight:* up to 540 kg

*Cardbord core:*  $\varnothing$  76,  $\varnothing$  152,  $\varnothing$  254 mm

### SHEETS

#### Technical parameters for our extruded HIPS ESD sheets

*Extrusion technology:* Mono-extrusion or Co-extrusion

*Co-extrusion layers:* A, AB, ABA

*Surface resistance:*  $10^3$  –  $10^{12}$   $\Omega$ .cm

*Volume resistance:*  $10^3$  –  $10^{12}$   $\Omega$ .cm

*Sheet thickness:* 1.0 - 10.0 mm

*Sheet width:* up to 1480 mm

*Sheet length:* up to 3000 mm or cut to size

## Technical specifications for our 3 models conductivity foils

Properties	Unit	Standard	Method	Conductivity	High	Medium	Low
				Model	FESD	PF3ESD	PF5ESD
				Value	Value	Value	Value
Density	g/cm <sup>3</sup>	ISO 1183	A	1.14	1.12	1.10	
Surface Conductivity on face side	Ω.cm	DIN EN 61340	5-3	1x10 <sup>3</sup> -1x10 <sup>6</sup>	2x10 <sup>4</sup> -5x10 <sup>6</sup>	1x10 <sup>6</sup> -1x10 <sup>9</sup>	
Volume Conductivity	Ω.cm	DIN EN 61340	5-3	1x10 <sup>3</sup> -1x10 <sup>6</sup>	2x10 <sup>4</sup> -5x10 <sup>6</sup>	1x10 <sup>6</sup> -1x10 <sup>9</sup>	
Surface Conductivity on back side	Ω.cm	DIN EN 61340	5-3	1x10 <sup>3</sup> -1x10 <sup>6</sup>	2x10 <sup>4</sup> -5x10 <sup>6</sup>	1x10 <sup>6</sup> -1x10 <sup>9</sup>

Elongation at Break	%	ISO 527	50mm/min	23	23	23	
Vicat Softening Point	°C	ISO 306	B50/oil	100	100	100	
Heat Distortion Temperature	°C	ISO 075-1	HDT/A 1.8MPa	65	65	65	

### ADDITIONAL INFORMATION

**Thermoforming** - HIPS ESD films and sheets are easy to thermoform. Typical forming temperatures vary between 150°C to 180°C. Normally no pre-drying is not required if the material is kept in dry conditions.

**UV Resistance** - in outdoor or strong UV light condition, natural HIPS will discolour and become brittle in a matter of months. Being black will greatly improve its UV stability. For UV stabilised grades (additives), please refer to the relevant technical data sheet or contact the sales office.

**Fabrication - ADHESIVES:** When gluing, make optimum use of the good solubility of the polystyrene by using either a solvent or a solvent-based adhesive. Examples of solvent-based adhesive are as follows: toluol, methylene chloride, and tetrahydrofurane. The adhesion of polystyrene to other materials occurs by using either a permanent or two-component glue.

**WELDING:** Ultrasonic welding is preferable, but not gas welding, hot plate and heat impulse welding methods are also possible. High frequency welding, due to its small dielectric losses, is not suitable. **CUTTING:** Semi-finished products made from polystyrene are easily cut and processed, i. e. punched, sawed, drilled, milled, cut with a rotary saw etc. Moreover, processing tools normally used for metal and woodwork can be utilised. Because of the poor heat conductivity and the relatively low softening temperature, it is recommended that the parts must be cooled with blown air or water. **PRINTING/PAINTING:** Typical printing techniques used are silk-screen, offset litho and flexographic. In silk-screen printing if using solvent based inks, they can reflect negatively on surface conductivity. In contrast, offset printing on polystyrene can sometimes require corona treatment of the semi-finished material to improve ink transfer and adhesion. When using solvent based paints, it is always advisable to test for suitability, as significant levels of solvents may chemically attack the polystyrene.

**Clening and Maintenance** - typical detergents and soaps dissolved in warm water can be used to effectively clean surface contamination from the surface.

**Chemical Resistance** - it is influenced by many factors, including concentration, temperature, exposure time and material stress. Therefore, the data below should only be used as a guide.

Reagent	Chemical Resistance
Acetone	Poor
Acid - (Weak)	Very Good
Acid - (Strong)	Poor
Apple Juice	Very Good
Beef Fat	Very Good
Butter	Good
Base (Weak)	Excellent
Base (Strong)	Poor
Carrrot Juice	Excellent
Chloroform	Poor
Citric Acid Solution	Good
Common Salt	Excellent
Detergents	Good
Dairy Products	Good
Diesel	Poor
Ethyl Alcohol	Good
Fertilisers	Good
Petrol	Poor

## Vacuum formed electrically conductive HIPS transport trays

Our extruded conductive polystyrene film is an effective solution for the production of different kinds of vacuumformed transport trays, which are used in electronic industry for packing components.

This films and trays prevent electronic components from electrical discharge damage.

We can offer you to make mould design, 3D sample printed tray, production tests and serial production, according to our customer needs.

### Technical parameters for our vacuum formed HIPS ESD trays

*Maximum forming size from foil:* 700x500x50 mm

*Maximum foil thickness:* 2.0 mm

*Maximum forming size from sheet:* 1000x660x150 mm

*Maximum sheet thickness:* 4.0 mm

*Maximum surface resistance :*  $1 \cdot 10^4 - 1 \cdot 10^9 \Omega \cdot \text{cm}$

*Maximum volume resistance :*  $1 \cdot 10^4 - 1 \cdot 10^{12} \Omega \cdot \text{cm}$

## ABS SHEETS

Our serie of ABS sheets is known as high quality products. They have very good impact-strength and impressive thermal properties. These sheets are easy to thermoform and fabricate.

We use high quality raw materials from leading global producers. Our workers are well qualified and have more than 30 years of experience in plastic extrusion.

We work together with our customers and suppliers to develop new products according to the market and adjust our production to our customer's specific requirements.

Sheet structure, sheet sizes, colour matching, masking, packaging, pallets and transportation are arranged to fit all needs.

Corona treatment or Dual colouring on both sides of our ABS sheets is possible if requested. If needed we can add UV stabilizers to improve weather resistance.

Our sheets can be used for food contact products.

### TECHNICAL INFORMATION FOR OUR EXTRUSION LINES

#### CO-EXTRUSION SHEET LINE - BREYER 340

- Materials: HIPS, ABS, GPPS, PMMA, SMMA
- Production capacity: 300 kg/hour
- Sheet thickness: 1.00 mm - 6.00 mm
- Maximum sheet width: up to 1200 mm
- Maximum sheet length: up to 4050 mm
- 3 layer co-extrusion
- Any colour is available for minimum quantity of 300 kg
- We can produce one side embossed sheets

#### EXTRUSION SHEET LINE - REIFENHÄUSER E/H EH 2100

- Materials: PMMA, HIPS, GPPS, ABS, PP
- Production capacity: 420 kg/hour
- Sheet thickness: 1.4 - 11.4mm
- Maximum sheet width: up to 2050 mm
- Maximum sheet length: up to 6050 mm
- Any colour is available for minimum quantity of 300 kg
- We can produce one side embossed sheets
- Additional option: corona treatment

Colours: RAL 1018, 2004, 3003, 5002, 7004, 7040, 8011, 9001, 9003, 9005, 9006, 9010, 9022

## HIPS FILMS

We have 2 film extrusion lines on which we extrude HIPS films

#### FILM CO-EXTRUSION LINE - model - SEIDE

- Production capacity: 600 kg/hour
- Film thickness: 200 - 2000 microns
- Maximum film width: up to 820 mm
- Maximum roll diameter: up to 1000 mm
- Core diameter: 76 - 200 mm

#### FILM EXTRUSION LINE - model - EKK 120-30 V

- Production capacity: 220 kg/hour
- Foil thickness: 180 - 900 microns
- Maximum foil width: up to 1200 mm
- Maximum roll diameter: up to 650 mm
- Core diameter: 76 mm

Any colours are available for minimum quantity of 300 kg

#### Special Features:

- food contact version
- film with good cold-resistance
- film with good impact resistance
- UV protection - increase weatherability
- any colour by RAL and Pantone
- suitable for vacuum forming

**EXTRUSION SHEET LINE - REIFENHÄUSER**

## ACRYLIC SHEETS

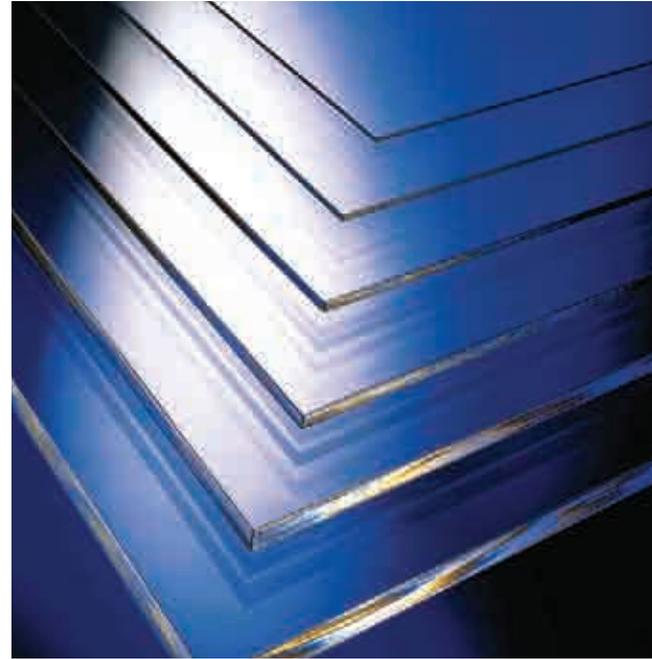

Our acrylic sheets have good optical properties and surface. We are producing clear and white opal or opak sheets, and other colours are available if requested. PMMA sheets are used in advertising industry for the light signs and illuminated letters or other industrial parts.

### PMMA sheets have the following benefits

- Excellent transparency
- Very good weathering and chemical resistance
- Easy to handle and thermo forming
- High impact strength
- They can be machined using all the usual methods, such as sawing, drilling, laser or router cutting and polishing. Screen or flatbed UV digital printing is possible to be made.

### Delivery program of acrylic /PMMA sheets

- Sheet size: 3050 x 2050 mm
- Other sizes - on request
- Thickness range 1.80 – 6.00 mm
- Colors - clear, opal, white opaque
- Embossed sheets in few designs - 13, 15, 17, 22, 23, 25, 34, 35, 39

## PACKING INFORMATION FOR PMMA (ACRYLIC SHEETS)

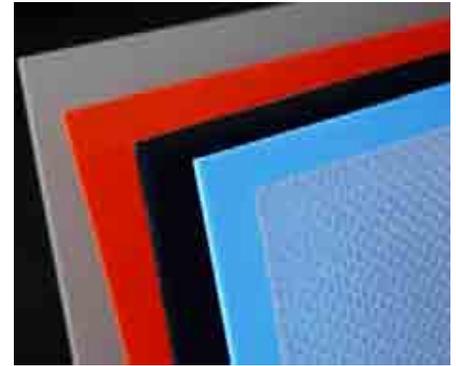

Model Name	Material	Thickness	Color	LT	Surface	Sheet size	kg/pallet	Quantity sheets on pallet
AC-0000	PMMA	1.80 mm	clear	92 %	gloss/gloss	3050x2050 mm	1071 kg	80

# Polystyrene sheets

Mouse-PS Ltd produces extruded clear and coloured polystyrene sheets. Clear sheets with light transmission 89% have excellent transparency for interior glazing usage, lamps and ceiling light fittings. For this application we can provide clear, opal white, or one side embossed sheets.

Low water absorption of polystyrene sheets determine their use as bath or shower cabin doors. For this application we have different sheets with modern designs.

Polystyrene sheets can be produced with or without UV stabilization and with or without masking film.

## Delivery program of HIPS and GPPS sheets

- Standard size: 2050 x 1250 mm
- Maximum Length: 6050 mm
- Maximum width: 2050 mm
- Thickness range: 1.00 - 11.40 mm
- Cut to size: available on request, no minimum quantity
- Surface texture: gloss/gloss, gloss/mat, embossed/gloss, embossed/mat

## HIPS benefits:

- Easy for thermoforming
- High impact strength
- Good thermal qualities
- Possible food contact approval
- Low water absorption
- Easy to recycle
- Low price

## GPPS / Crystal sheets benefits:

- Good surface hardness and scratch resistance
- Excellent transparency
- Good thermal stability
- Low water absorption
- Possible food contact approval
- Easy to recycle
- Low price

## PACKING INFORMATION FOR GPPS SHEETS

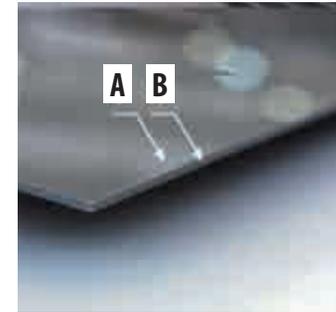

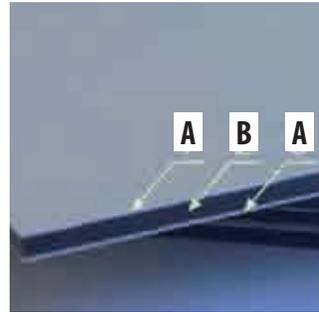

Model Name	Material	Thickness	Color	LT	Surface	Sheet size	kg/pallet	Quantity sheets on pallet
GS-0000	GPPS	2.50 mm	clear	89 %	gloss/gloss	3050x2050 mm	985 kg	60
GS-0000	GPPS	3.00 mm	clear	89 %	gloss/gloss	3050x2050 mm	985 kg	50
GS-0000	GPPS	4.00 mm	clear	89 %	gloss/gloss	3050x2050 mm	998 kg	38
GS-0000	GPPS	5.00 mm	clear	89 %	gloss/gloss	3050x2050 mm	985 kg	30
GS-0000	GPPS	6.00 mm	clear	89 %	gloss/gloss	3050x2050 mm	985 kg	25
GS-0000	GPPS	2.00 mm	clear	89 %	gloss/gloss	2050x1250 mm	538 kg	100
GS-0000	GPPS	2.50 mm	clear	89 %	gloss/gloss	2050x1250 mm	538 kg	80
GS-0000	GPPS	3.00 mm	clear	89 %	gloss/gloss	2050x1250 mm	525 kg	60
GS-0000	GPPS	4.00 mm	clear	89 %	gloss/gloss	2050x1250 mm	538 kg	50
GS-0000	GPPS	5.00 mm	clear	89 %	gloss/gloss	2050x1250 mm	538 kg	40

# Co-extruded HIPS and GPPS Sheets

These sheets can be extruded in 2 layers (AB) or 3 layers (ABA).

The co-extrusion of crystal polystyrene (GPPS) over HIPS or ABS core makes the colours look glossier, brighter and nicer.

The co-extrusion with virgin material on A layer and recycled material in the middle B layer of the sheet gives to our customers sheets with low price, brilliant surface and good opacity.

## DELIVERY PROGRAM OF 2 OR 3 LAYERS CO-EXTRUDED HIPS SHEETS:

- Standard size: 2050 x 1200 mm
- Maximum Length: 4050 mm
- Maximum width: 1200 mm
- Thickness range: 1.00 - 6.00 mm
- Any RAL colour for upper (1) and lower (3) layers
- Middle layer (2) - virgin HIPS in ANY RAL colour or 100% recycled HIPS in grey or black

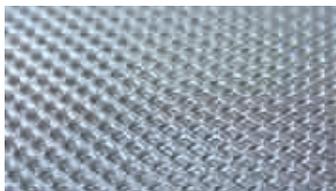

## DELIVERY PROGRAM TO ONE OR BOTH SIDES CO-EXTRUDED POLYSTYRENE SHEETS WITH GLOSS LAYER:

- Standard size: 2050 x 1200 mm
- Maximum Length: 4050 mm
- Maximum width: 1200 mm
- Thickness range: 1.00 - 6.00 mm
- Thickness of upper (1) and lower (3) layers 0.05 - 0.2 mm
- Middle layer - virgin HIPS in ANY RAL colour

## Standard colours for both extruded and co-extruded sheets

### Available embossing designs:

13, 15, 17, 22, 23,  
25, 31, 34, 35, 39, 41

Maximum sheet thickness:	4.0 mm	10.0 mm

# Vacuum formed egg-trays

We produce eggs trays from HIPS/GPPS for 2x6 and 1x10 eggs.  
If requested we can apply label on these eggs trays.

PACK DIMENSIONS

# Recycling and Environment

Nearly 30 years ago when we started our production, we saw the enormous impact of plastic waste on the environment.

That's why we try to give another life to all of our waste.

We have developed a program for recycling. We introduced co-extrusion production in our factory and have started taking back polystyrene and ABS waste from our customers to produce sheets using this technology.

The virgin material was co-extruded on top and bottom of the sheet with recycled material in the middle of the sheet. This gives our customers cost-effective sheets with high quality surface.

**We have introduced a new recycling division for sorting, grinding, purification and granulation of industrial plastic waste.**

At the moment, we are recycling and granulating a wide range of plastics: polypropylene, polyethylene, polystyrene, ABS, and we even found a way to put PMMA waste back into use.

Recycling of plastic waste reduces costs for our customers and at the same time decreases the amount of disposed waste. Our ambition is to continue recycling materials as much as possible in order to minimize the environmental impact of the planet.

**Embossed sheets****DESIGN 41 MAT****Delivery program:**

Sheet width:  $\leq 1200$  mm

Sheet length: 700 mm - 6050 mm

Thickness: 1.5 - 4.0 mm

Polymers: GPPS, HIPS, ABS

Colours: any transparent, translucent and opaque RAL colours in request

Minimum order for sheet size, colour or thickness: 300 kg

Production time: up to 2 weeks

# Diffuser sheets for LED lighting

Our company has the technology and know-how to produce diffuser sheets specialized for the lighting industry, which have brilliant optical properties and surface.

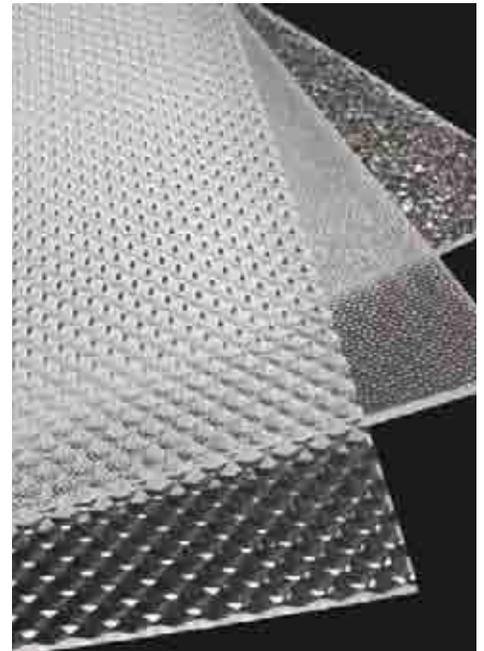

We have the ability to mix with precision different masterbatches and additives to produce sheets with controlled LT and Haze percentage ratio according to the needs of our customers. This lets our clients control the glare of the luminaires UGR (Unifide Glare Rating).

We have developed a specialized series of diffuser sheets, which guarantee equal light distribution over the full surface of the diffuser while the lighting source remains hidden and there are no light spots on the diffuser.

Special thickness, sheet sizes and Light transmittance are possible.

On request one or both sides of sheet surface can be gloss, matt or embossed.

**Cut to size:** Available on request, no minimum quantity.

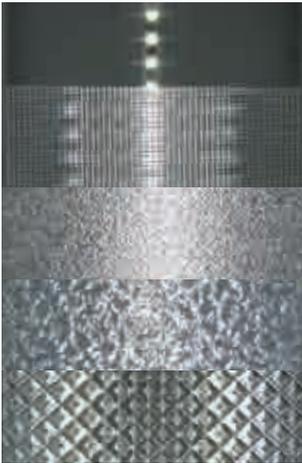

## PACKING INFORMATION FOR DIFFUSER SHEETS

Model Name	Material	Thickness	Color	LT	Surface	Sheet size	Quantity sheets on pallet
P2541-D080	GPPS	1.50 mm	diffuser	80 %	matt/embossed	1830x1220 mm	200

**Delivery program:**GPPS sheet weight in thickness 2.4 mm – 1.55 kg/m<sup>2</sup>

Sheet width: ≤ 1200 mm

Sheet length: 700 mm - 4050 mm

Thickness: 2.4 - 5.0 mm

Polymers: GPPS, SAN, PMMA

Colours: any transparent and translucent colours in request

Minimum order for sheet size, colour and thickness: 300 kg

Production time: up to 2 weeks

**Embossed sheets****DESIGN 23****Delivery program:**

GPPS sheet weight in thickness 2.4 mm – 1.55 kg/m<sup>2</sup>

Sheet width: ≤ 1200 mm

Sheet length: 700 mm - 4050 mm

Thickness: 2.4 - 5.0 mm

Polymers: GPPS, SAN, PMMA

Colours: any transparent and translucent colours in request

Minimum order for sheet size, colour and thickness: 300 kg

Production time: up to 2 weeks

### Delivery program:

GPPS sheet weight in thickness 2.0 mm – 1.94 kg/m<sup>2</sup>

Sheet width: ≤ 2000 mm

Sheet length: 700 mm - 6050 mm

Thickness: 1.2 - 10.0 mm

Polymers: GPPS, HIPS, ABS, SAN, PMMA

Colours: any transparent, translucent and opaque

RAL colours in request

Minimum order for sheet size, colour and thickness: 300 kg

Production time: up to 2 weeks

#### **Delivery program for designs 13, 15 and 17:**

Sheet width:  $\leq 1200$  mm

Sheet length: 700 mm - 4050 mm

Thickness: 1.8 - 5.0 mm

Polymers: GPPS, SAN, PMMA

Colours: any transparent and translucent colours in request

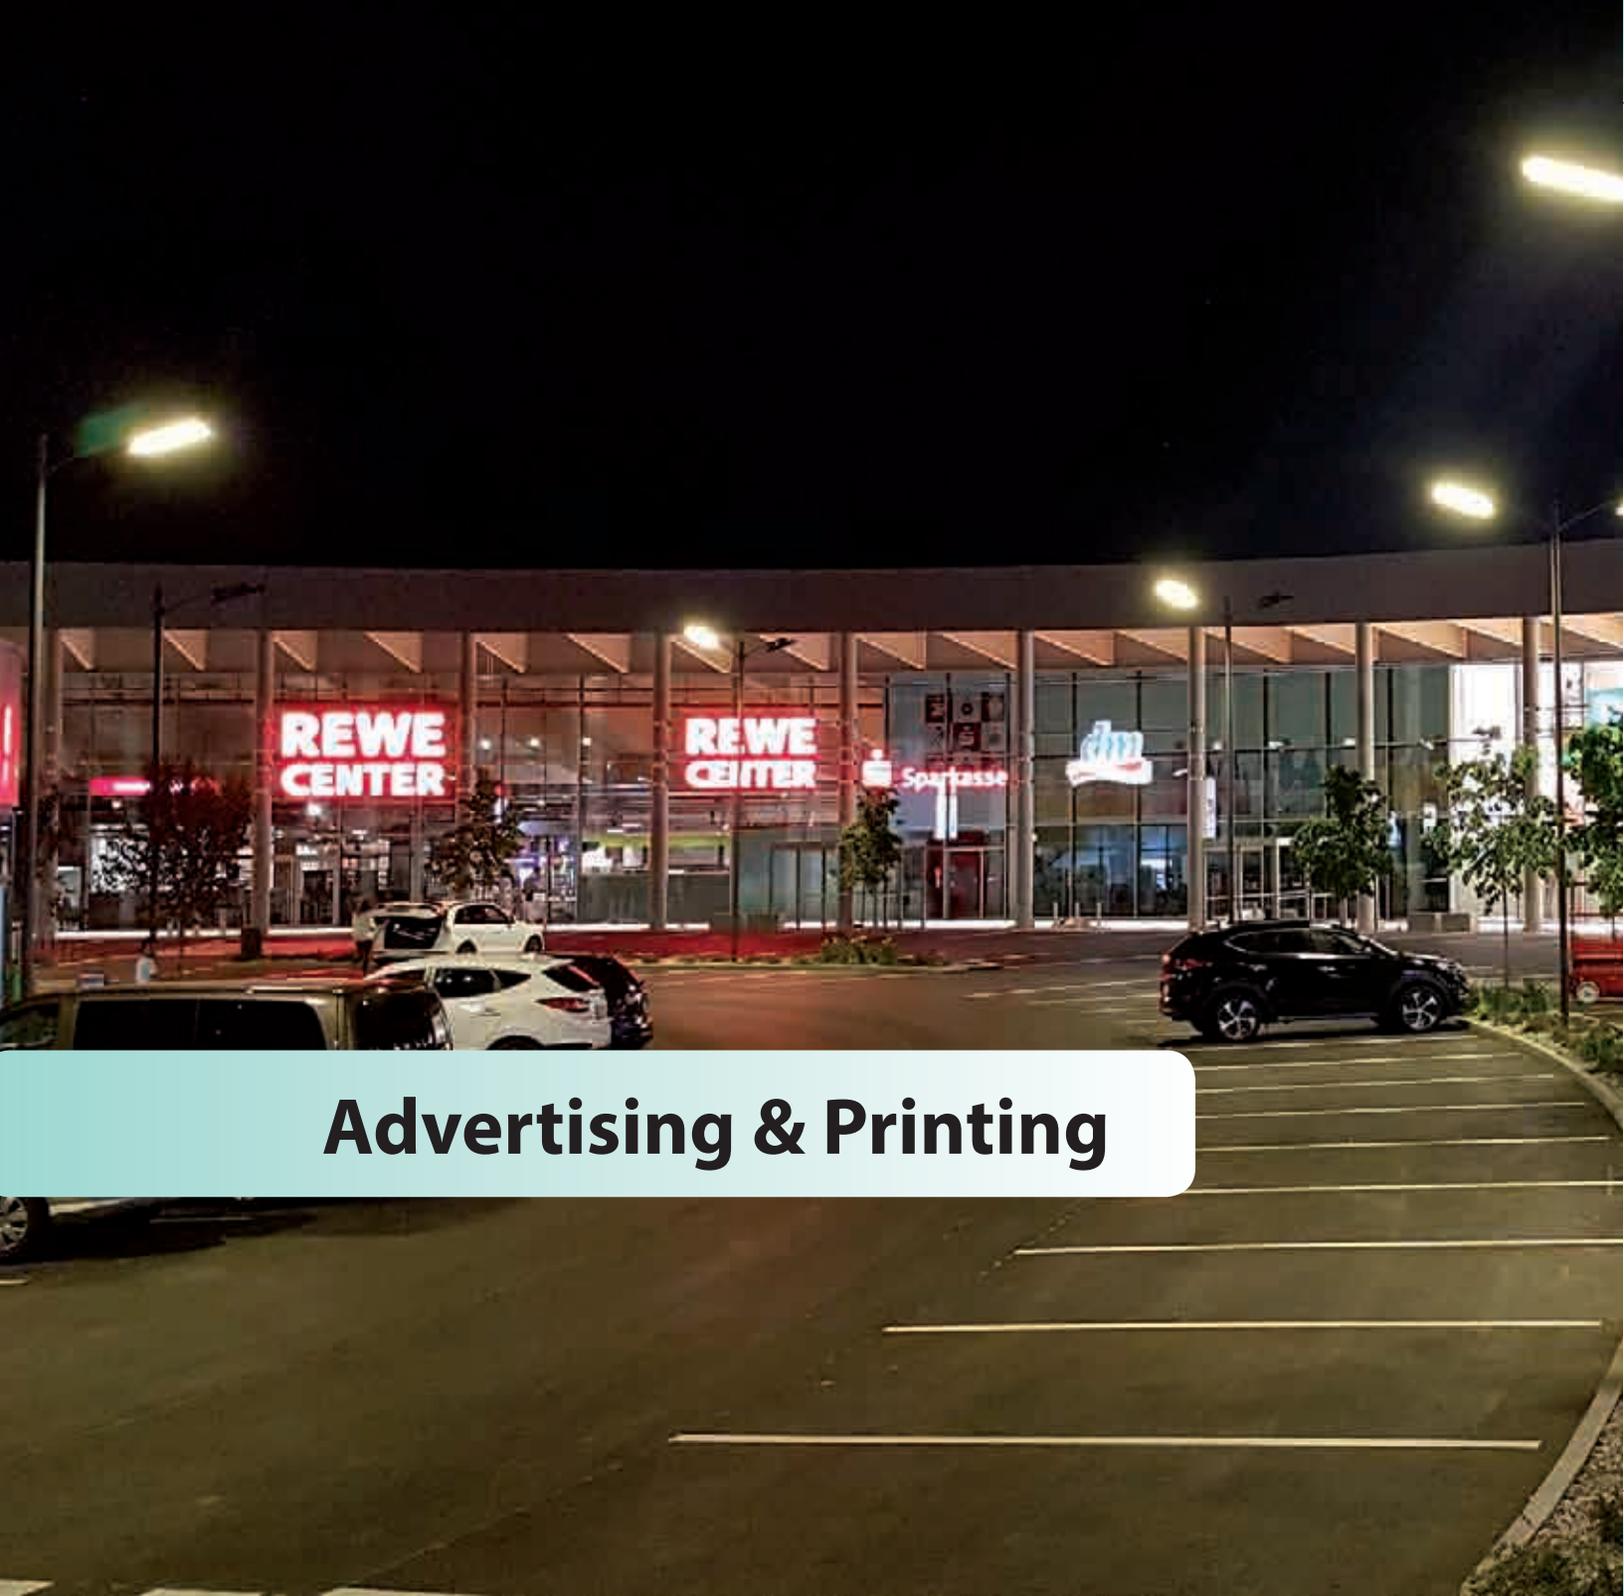

Minimum order for sheet size, colour and thickness: 300 kg

Production time: up to 2 weeks

GPPS sheet, design 13 weight in thickness 2.0 mm – 1.97 kg/m<sup>2</sup>

GPPS sheet, design 15 weight in thickness 2.0 mm – 1.95 kg/m<sup>2</sup>

GPPS sheet, design 17 weight in thickness 2.0 mm – 1.87 kg/m<sup>2</sup>

## Advertising & Printing

Mouse Print Ltd. is the leading manufacturer of paper bags in Bulgaria. More than 80 % of our production is for export to West Europe. We have team with more than 50 workers, who are specialized in production of different models of paper bags. Printing, lamination, die cutting, special effects are done 100 % in our factory.

#### **COTTON Ropes**

To your attention, here we present 18 different rope colours in 6 mm diameter.

Following the rainbow from left to right: black, dark grey, light grey, white, light yellow, yellow, orange, beige, brown, bandeaux, red, light green, dark green, magenta, pink, dark blue, royal blue, turquoise.

#### **POLYPROPYLENE Ropes**

Made of polypropylene material in 6 mm diameter.

We offer 14 different rope colours, which are arranged from left to right as follows: black, silver, white, yellow, red, gold, beige, light green, dark green, bordeaux, pink, light purple, dark blue, royal blue.

#### **SATIN Ribbons**

Double-sided satin ribbons in 20 mm width.

Available in 27 different colours.

#### **PAPER Ribbons**

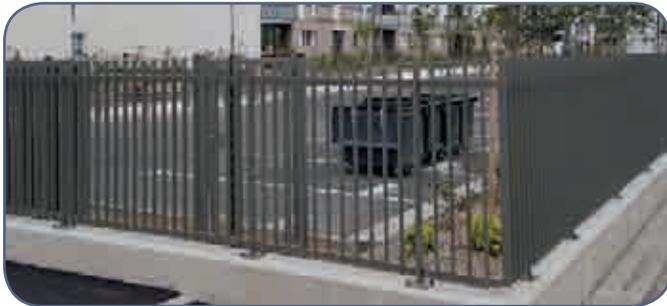

We can produce our bags with a few different types and colours of paper ribbons.

Recycled paper is very common use as a material for their production.

**Metal working**

METAL WORKING

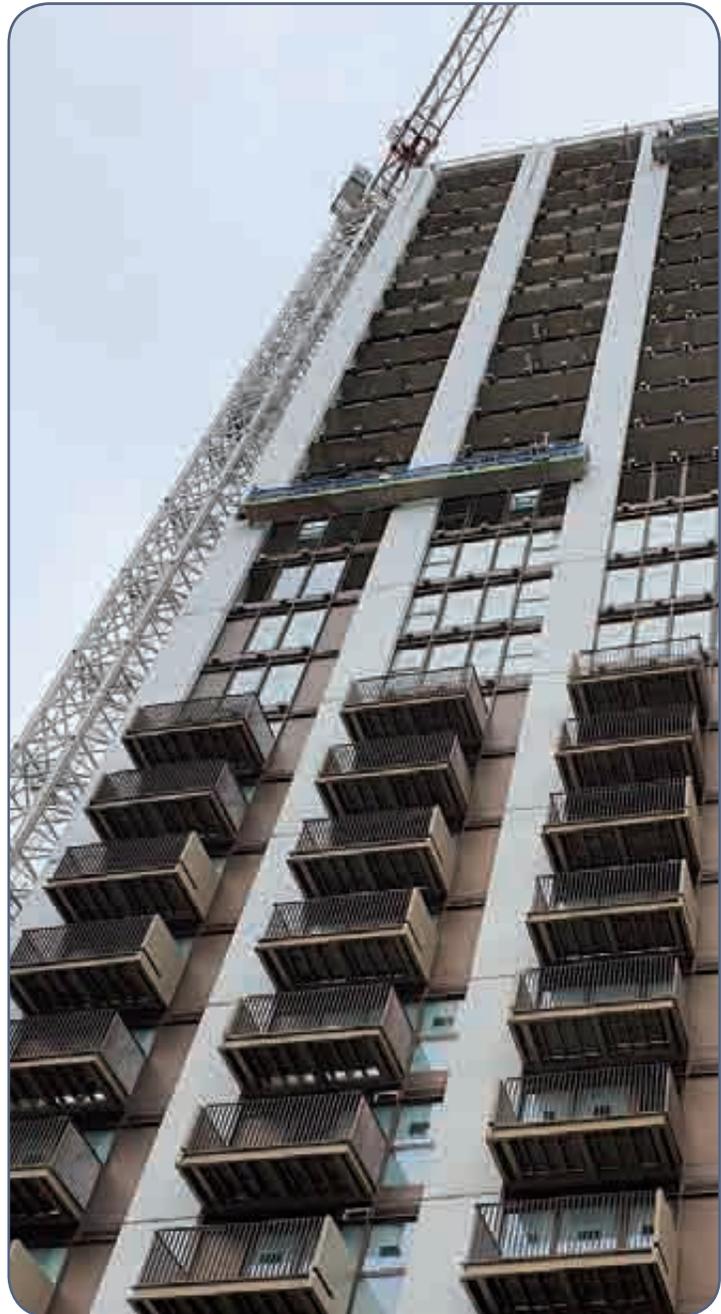

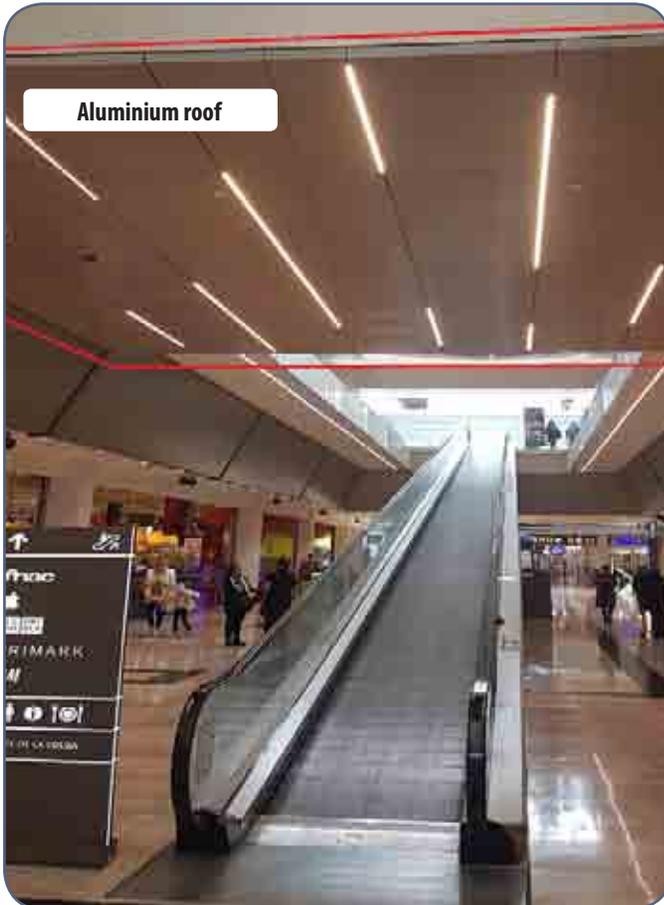

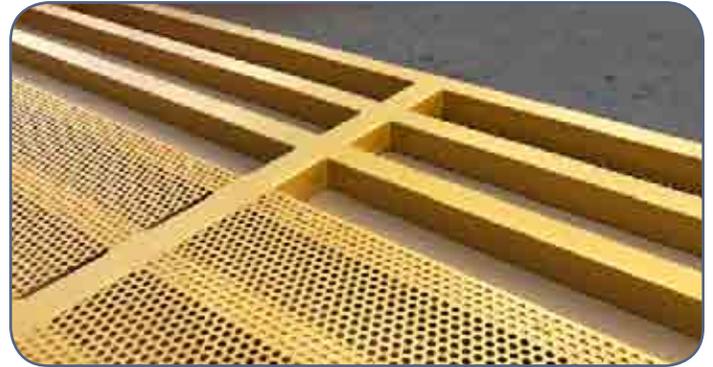

mouse

Using our high quality machines as lasers, routers, folding and welding machines and our powder coating line, Mouse-PS Ltd starts to produce special panels with or without isolations for building facades.

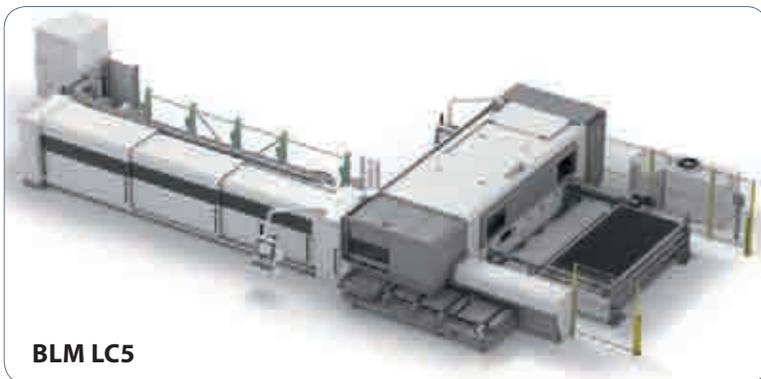

QUALICOAT and QUALISTEELCOAT certificates gives guarantee to our customers for reliable powder coating process and long outdoor warranty.

With our new CLOOS 7 axis welding robot we have the capacity and constant quality during production of for all welded parts.

**BLM LC5**

With our 4 modern laser cutting and combo laser/punching machines we can cut steel, aluminium, INOX, brass, copper, PMMA, PETG sheets or steel and aluminium profiles.

- **BLM LC5, fiber laser 4000 W**
  - sheet cutting size 4000 x 2000 mm
  - automatic tube loading for length up to 6500 mm
  - rectangular profiles up to size 100x100 mm
  - oval tubes with diameter - 120 mm
- **TRUMPF TRUMATIC 1000 FIBER, fiber laser 3000 W**
  - sheet cutting size 3000 x 1500 mm
- **SEI LASER MERCURY 609, 400 W, cutting size 3080x2060 mm**
- **CUTLITE PENTA PLN3020, 2200 W, cutting size 3040x2020 mm**

We can make engineering and production drawings using SolidWorks Premium software and our high qualified team with long experience in the company can produce any kind of steel or aluminium structures. With new installed 7 axis welding robot CLOOS, we can make big series of parts with reduced cost and constant quality.

- **7 axis welding robot CLOOS** for parts with size 4000x2000x800 mm
- **MIG-MAG CO<sub>2</sub> welding** - 8 teams
- **TIG welding with FRONIUS MAGIC WAVE 2600-4** teams

METAL WORKING

We have all needed equipment to process plastic sheets and al.profiles-as cutting, milling and turning.

- **EMMEGI PROMAC** - CNC milling machine
- **EMMEGI 650 SCA/E** - saw blade
- **MECAL SW453** - saw blade with 2 heads
- **DMG TWIN65**-CNC turning-milling center
- **MECANUMERIC Mecaplus** -size 4030x2010 mm
- **MECANUMERIC MF2515** - size 2520x1520 mm
- **MULTICAM 3000** - cutting size 3000x2000 mm
- **GEISS 5 axis** - size 2000x1000x600 mm
- **ALBERTI 6 axis** - size 3000x1500x600 mm

**TRUMPF TRUMATIC 1000 FIBER**

mouse

With our folding and bending machines we produce various aluminium, INOX, steel and galvanised steel or folded panels or folded parts.

- **SCHRÖDER SPB Evolution UD** - up/down panel bender with automatic tool changer, sheet length 4000 mm, steel thickness up to 3.0 mm, bending height 415 mm
- **SCHRÖDER Power Shear Professional** - cutting length 4040 mm, steel thickness up to 6.0 mm
- **Shear LVD HSL 40-6** - cutting length 4000 mm, steel thickness up to 6.0 mm
- **Shear URSVIKEN** - cutting length 2500 mm, steel thickness up to 7.0 mm
- **RAS 74/40** - bending machine, length 4000 mm, steel thickness up to 3.0 mm
- **URSVIKEN 160t and URSVIKEN 100t** - bending machines, width up to 3100 mm and many other machines

With our modern powder coating line, **produced by RIPPERT, Germany** we can cover the highest worldwide standards for painting parts for outdoor use, as we are certified from QUALICOAT and QUALISTEELCOAT, using **all chemicals from HENKEL**.

- **Maximum permissible part dimensions** - Length - 4000 mm, Height - 2000 mm, Depth - 600 mm
- **Maximum loading capacity** - 350 kg/per bar
- **9 stage Innovative Pretreatment Technology for Steel Parts** with separately alkaline cleaning, acid pickling and nanoscale corrosion resistance layer. Salt spray test corrosion resistance up to 1440 hours.
- **6 stage Innovative Pretreatment Technology for Aluminium Parts** with separately cleaning, acid pickling and nanoscale corrosion resistance layer. Salt spray test corrosion resistance up to 2000 hours.
- **The process is free of hazardous ingredients** and has an excellent environmental and low toxic profile.

With our three 4 colours litho printing machines Heidelberg we cover printing sizes 1000x700 mm, 700x500 mm and 500x350 mm. This give us flexibility to print optimally products with different sizes and quantities.

#### Our offset printing machines are:

- **HEIDELBERG SM102 VP+L** - 102x72 cm 4c+varnish
- **HEIDELBERG SM74 4H** - 74x52 cm 4c
- **HEIDELBERG SM52 ANICOLOR** - 52x34 cm 4c
- **HEIDELBERG GTO46** - 45x32 cm + numbering
- **NEBIOLO PERFECTA 102** - 1c offset UV coating machine

#### Our finishing machines are:

- **STAHL KD56 and KD66** - folding
- **POLAR 92ED, POLAR 137ED, POLAR 76** - paper cutting
- **HEIDELBERG CYLINDER + AUTO-DUX** - die-cutting
- **UNION MACHINE** - die-cutting 100x70 and 70x50 cm
- **HORIZON BQ440** - hot-melt binding
- **POLYGRAPH MOD 822/2-18** - gathering machine
- **HARRIS SP455 + HEIDELBERG PROSETTER**- saddle stitcher

Our digital printing department is equipped with modern machines, which give us the opportunity to print on wide variety of substrates, such as self-adhesive vinyl, banners, textile, backlit or rigid materials as PVC, Dibond, PMMA, HIPS and others. Our machines are:

Roll to roll machines - **HP XL1500**- 5.0 m, **HP Latex 3100** - 3.2m , **HP Latex 375** - 1.65 m

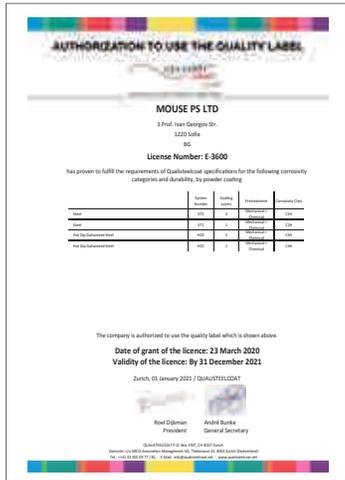

UV flatbed machines - **OCE ARIZONA 6160**-3.0x2.5m CMYK+LcLm, **OCE ARIZONA 360XT**-3.0x2.5m CMYK+White

Textile printing machines - **DURST RHOTEX 320** - 3.2 m + **Calander TRANSMATIC** - 3.2 m

Finishing machines - **ZUND G3 3XL** - 3.2x3.5m, **KONGSBERG XL44** 3.1x2.1m ,**SEAL 62PRO** - 1.6m

The Quality Management of our company is committed to the highest level of production quality.  
This product quality is ensured by operating in accordance with:

QUALISTEELCOAT
