

## ROQ: Everything you need for the printing market

ROQ is a vertically integrated European industrial company that focuses on the development of the entire creative and production process of its activity, from design to the manufacture and commercialization of screen and digital printing machines, as well as drying, folding and packaging solutions.

The company has about 700 employees and facilities in Portugal, the United States and Brazil, and also a network of agents spread around the world whose function is to ensure product distribution and after-sales service in all markets in which it operates.

With an irreverent and innovative DNA, ROQ always seeks to be at the leading edge of technology and, in order to provide its customers with the most excellent, precise and reliable equipment on the market, uses only the best components on the market.

This capacity that the company has in terms of engineering know-how, the degree of proximity to customers and the excellent after-sales support are essential and differentiating, making ROQ a reference in the market.

ROQ, together with its commercial partner ACHITEX MINERVA, will be present at FESPA Global Print Expo 2022, which will take place from the 31st of May to the 3rd of June 2022 at Messe Berlin, in Germany.

This event is one of the main exhibitions at European level regarding the screen and digital printing market focused, more precisely, on large format and textile printing.

In the booth will have exposed a ROQ Eco, a screen-printing machine, and a ROQ Sahara, a dryer. This will allow the visitors to see the machines in full operation and witness the high performance of ROQ machines.

In addition to the presence in international trade shows, ROQ is always available to receive visitors in the ROQ Tech Center, where is possible to see the machines and equipment developed by ROQ in all its splendor and prove its degree of excellence and quality.

This trade show is a great occasion to celebrate print's rich potential to continue to evolve and develop new creative and functional capabilities offering, at the same time, a unique printing experience to visitors.
