

Valiani Cutting Machines

Excellence since 1974

Valiani is the perfect expression of Italian Engineering. From the invention of the first mat cutting machine for the framing industry to recent **machinery for printing, packaging, sign and apparel industries**, our goal is providing you an everyday partner, capable of processing the widest range of materials.

Know-how, Integrity, Passion and Sense of Accountability are the values guiding our long-standing company. These features have led us to be a reference point in the finishing industry. We are committed to meeting and exceeding our customers' expectations, anticipating their needs, and ensuring high-quality service.

We have been exporting our cutting machines to **more than 80 countries**, where we have been carrying out **over 4,800 installations**, ensuring first-class service.

All Valiani machines are designed and developed with the aim to make them **last forever**. We use Italian mechanics and thanks to zero defects lean management methodology we have increased the reliability of our flatbed plotters, so that we are able to offer a **5-year warranty** on our machines. Repeatability and reliability are two factors that summarize the concept of quality asseverated in Valiani.

Another key feature of our digital machines is their **versatility**. They can be used for cutting a wide range of materials, with different thicknesses, always guaranteeing maximum precision and impeccable quality both on prototypes and from small to medium runs.

During **FESPA Global Print Expo 2022** Valiani will show three of its best machines of the Sign, Print & Packaging flatbed plotters: **Omnia 100**, auto feed die cutting machine designed to automatically feed and contour cut media size up to 75*105 cm; **Integra 160**, flatbed cutting system which may be equipped with a 1kW router; **Invicta 120**, ideal for packaging prototyping and sampling.

Come and discover them at **Hall: 2.2 - Stand 2.2 - B62.**
