

THINKAMBIENT

Who we are and what we offer

- Founded in 2005 in the UK
- Think Ambient produces, plans and implements marketing and display solutions
- Distributor of unique printable materials
- Expertise and knowledge of specialist materials, including electrostatic and damage free materials
- Short lead times

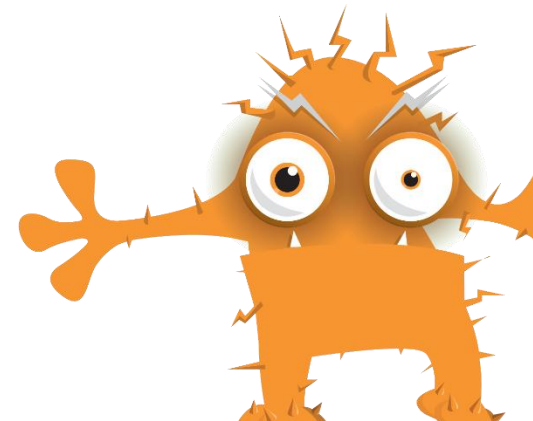

About Think Ambient

Think Ambient Ltd is the exclusive (UK & Eire) retailer of CLINGZ, as well as a number of other unique printable graphic materials.

We have a wealth of experience in unique, damage free materials and the associated printing technologies. We can offer impartial advice on the most suitable products for your project.

In addition to printing unique materials, we also offer the following services:

- Artwork amendment and editing
- Advice on different print technologies
- Distribution and fulfilment service
- Venue auditing

How to apply CLINGZ

See how easy it is to apply CLINGZ!

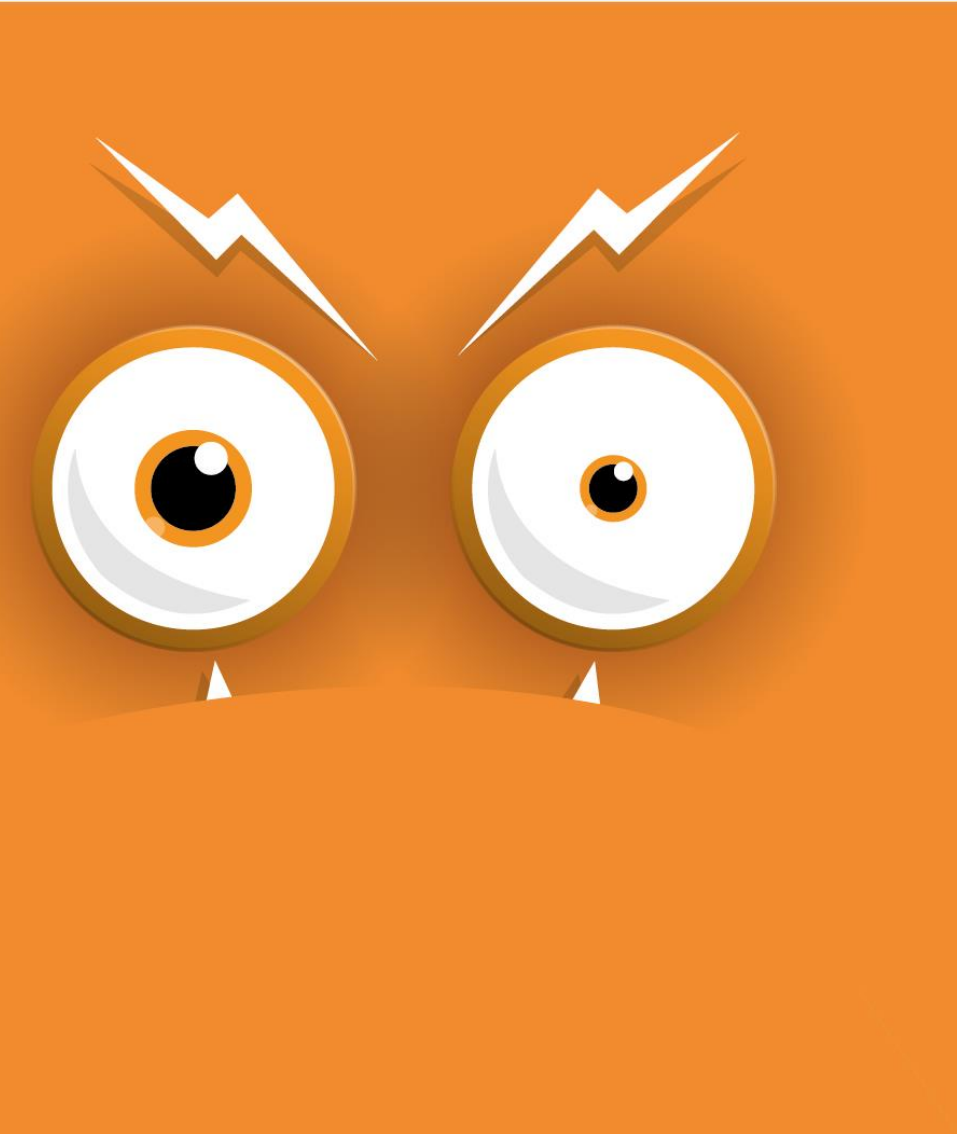

How to apply your graphics with care!

How to apply and reposition ADTAC!

Products

THINKCLINGZ

ELECTROSTATIC
ADHESIVE FREE
DAMAGE FREE ON REMOVAL

A unique electrostatic printable film that clings on both sides to virtually any clean surface without the need for tape, tacks or adhesive. CLINGZ can be applied to brick, wood, plastic, metal, glass, marble, plaster, cardboard, vinyl and more! Just peel off the backer and stick.

ADVANTAGES

- Easy to apply - no expensive installation required
- Easy to remove - no damage or sticky residue
- Repositionable & bubble-free
- Does not tear or stretch
- Fully recyclable - made from a type 5 plastic with a paper backer

Seasonal CLINGZ

THINKADTAC

BUBBLE FREE
DAMAGE FREE
EASY TO APPLY

A unique, high performance, low tack film graphic that can stick to a wide range of smooth indoor surfaces, including glass, metal and polished stone. It has an advanced coating which enables easy and bubble free installation that can be repositioned and reused. ADTAC can be easily removed leaving no adhesive residue even after exposure to extreme low and high temperatures.

ADVANTAGES

- Bubble free
- Easy to apply
- Easy to remove – no damage or sticky residue
- Removable and repositionable
- Can be die cut, kiss cut, scored, folded and tiled to form large graphics
- No need for wet application

THINKSKINZ

MICROSUCTION MATERIAL
ADHESIVE FREE
WEATHERPROOF

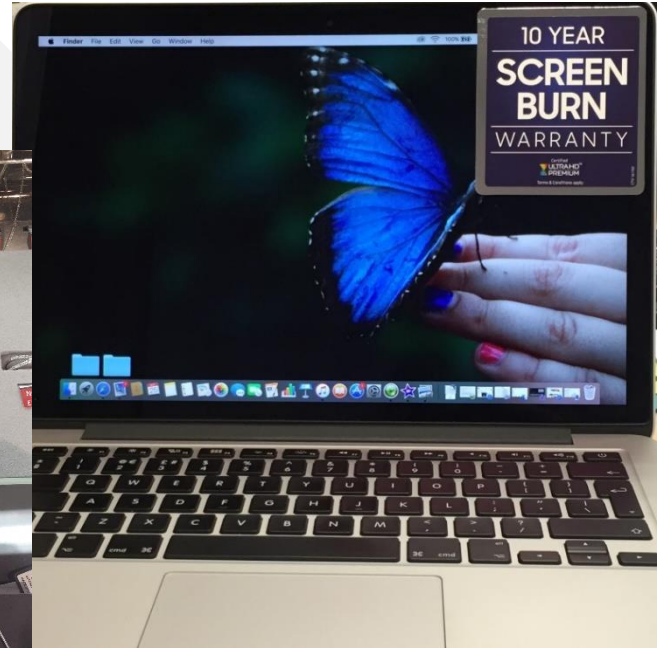

SKINZ is made from a unique, adhesive-free substrate that literally “sucks” on to smooth surfaces, whilst remaining removable and repositionable. SKINZ can be used on gloss surfaces where higher adhesion properties are required including smooth floors and areas exposed to moisture.

ADVANTAGES

- Unique micro suction technology
- Sticks to smooth surfaces without the need for tape, tacks or adhesive
- Removable and repositionable
- Damage free on removal
- Easy to apply and to remove
- Moisture resistant
- Available in white and in clear
- Recyclable

THINKSKINZ

ANTI-SLIP FLOOR GRAPHIC
UNIQUE MICRO-SUCTION TECHNOLOGY
100% DAMAGE FREE ON REMONAL

SKINZ Floor is a unique, adhesive free substrate that literally 'sucks' on to smooth surfaces, whilst remaining removable and repositionable. SKINZ Floor can be used on gloss surfaces where higher adhesion properties are required. SKINZ Floor has an anti-slip laminate for additional safety.

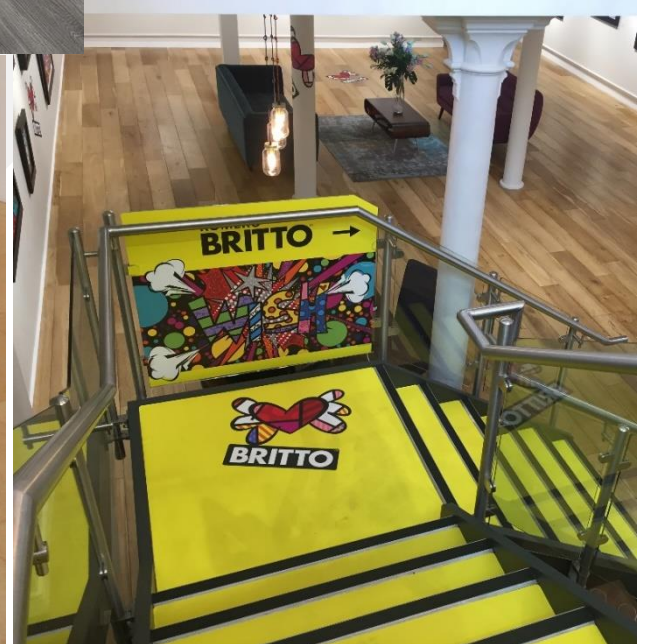

ADVANTAGES

- Unique micro suction technology
- Anti-slip laminate for additional safety
- Sticks to smooth floors without the need for tape, tacks or adhesives
- Damage free on removal
- Removable and repositionable
- Moisture resistant
- Recyclable

SKINZ Floor

THINKVIBO

DOUBLE SIDED STICKER
OPAQUE
RESIDUE FREE ON REMOVAL

VIBO is a double sided window sticker made from polypropylene with a dead opaque barrier film which is damage & residue free on removal. The special adhesive ensures that the product remains removable and repositionable but strong enough to enable it to remain in place for years.

ADVANTAGES

- Printable on both sides
- Ultra-Low tack adhesive
- 100% opaque
- Removable and repositionable
- Damage free on removal
- Message visible from outside and inside
- Recyclable

VIBO

THINKSTX

3D STICKER
NON AGGRESSIVE ADHESIVE
REMOVABLE WITHOUT TRACE

STX is a self adhesive vinyl with a low tack removable adhesive. It is suitable for high quality interior and exterior graphics for applications requiring good clarity. It is easy to apply and easy to remove, with no adhesive residue.

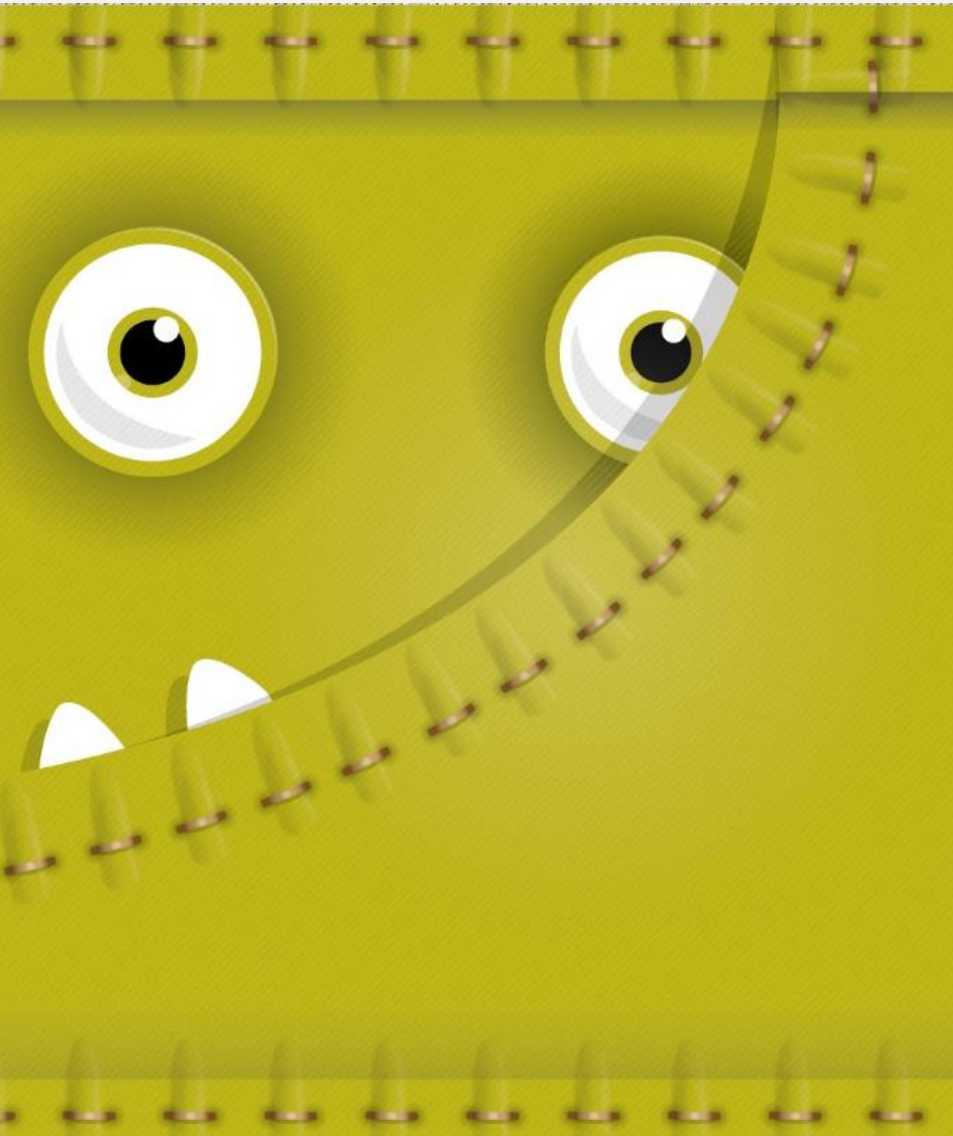

ADVANTAGES

- Sticker and backer both printable
- 3D effect can be achieved through a scored backer
- Can also be used as a normal sticker
- Available in white and clear
- No aggressive adhesive
- Removable and repositionable
- Leaves no damage
- Easy to use
- Available in different sizes

STX

THINKPHLEX

NO AGGRESSIVE ADHESIVE
REMOVABLE AND REUSABLE
SUITABLE FOR CURVED OR UNEVEN
SURFACES

PHLEX is a unique fabric media with a special adhesive designed to not leave any residue when removed. PHLEX does not tear or crease and can be reused several times. It can be placed on any non-porous flat surface and it can be used for both indoor and outdoor applications.

ADVANTAGES

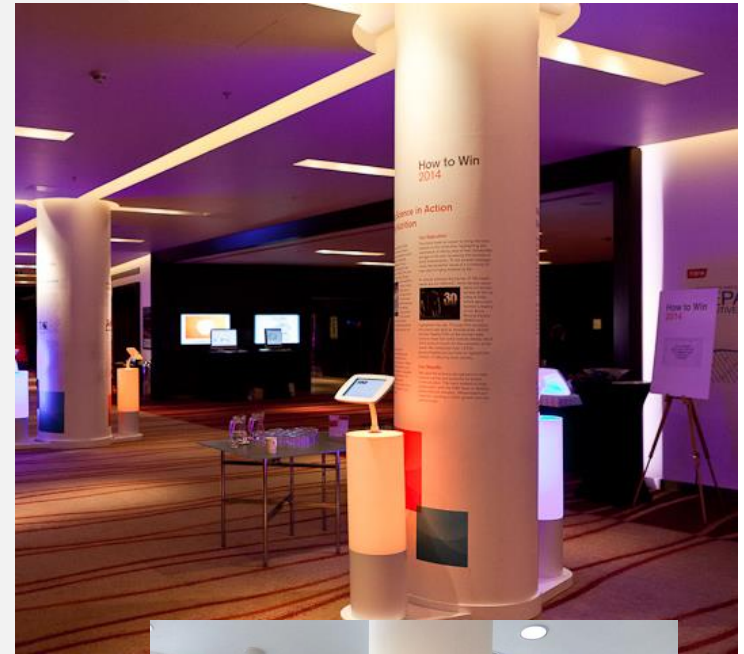

- Low tack self-adhesive
- Removable, repositionable and re-useable
- Easy to apply and easy to remove without leaving any residue or damage
- Will not tear, wrinkle or stretch
- Will stick to non-porous walls, windows, doors, floors and many other surfaces
- Available in standard, opaque and extra strength

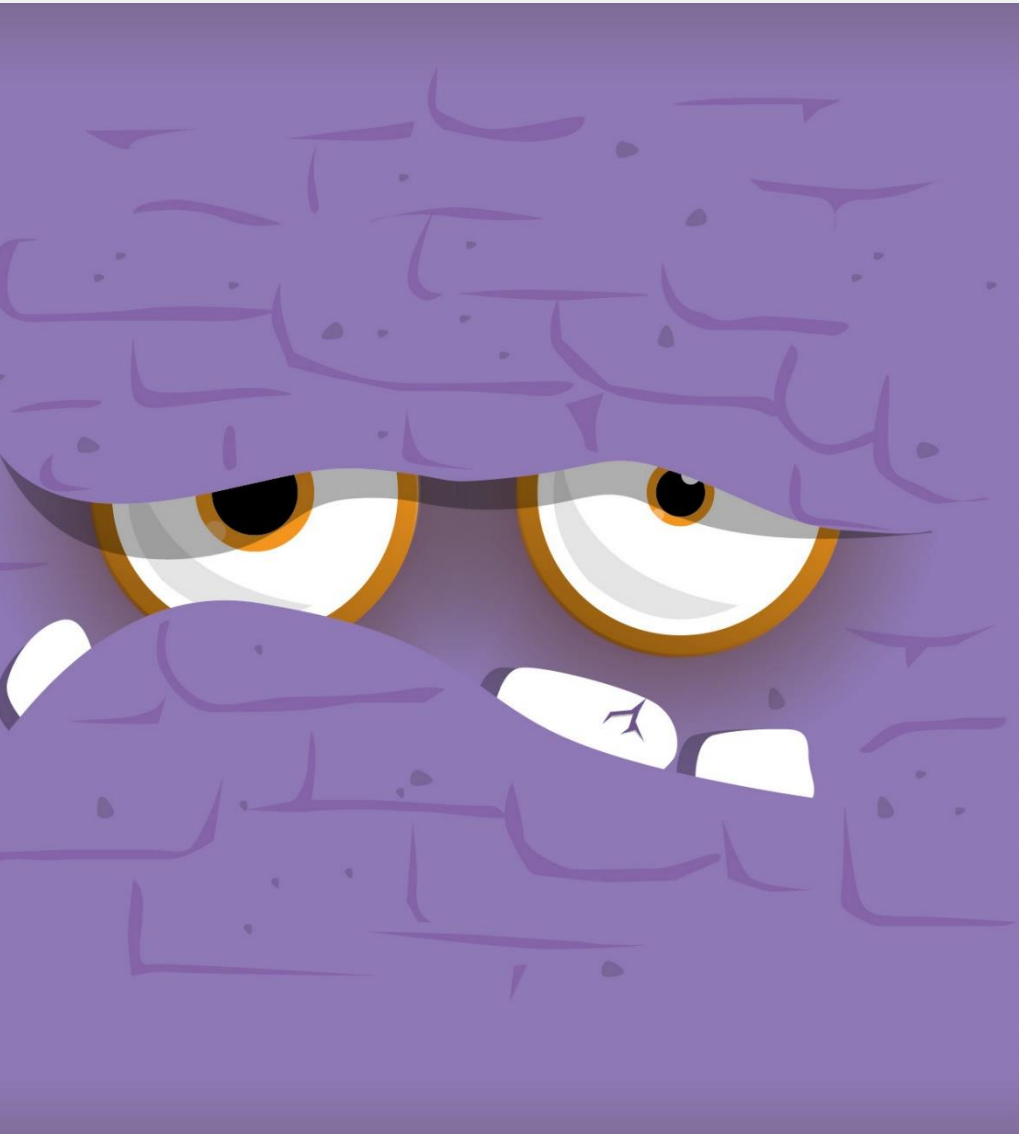

PHLEX

PHLEX for Events

THINKEPIC

PREMIUM WALL GRAPHIC
NON AGGRESSIVE ADHESIVE
DAMAGE FREE ON REMOVAL

EPIC is a high quality ultra removable interior graphic for use on flat, painted wall surfaces (non textured walls only), wallpaper and wood panelling. The special ultra removable adhesive which EPIC uses allows it to retain the essential qualities of being easy to apply and remove but still residue and damage free.

ADVANTAGES

- Smooth premium finish
- Ultra low tack removable adhesive
- Available in different thicknesses
- Will not tear, wrinkle or stretch
- Removable and repositionable
- Damage free on removal, perfect for wall graphics

THINKVIEW

COST EFFECTIVE
STATIC CLING VINYL
EASY TO APPLY

VIEW is a high quality static cling vinyl specially designed for variable data printing. It holds a major advantage over other static cling vinyls available in the market as it can be printed with multiple designs and in small quantities whilst still remaining cost effective.

ADVANTAGES

- Suitable for interior applications
- Sticks to smooth, glossy surfaces without tape, tacks or adhesives
- Easy to apply
- Easy to remove
- Damage free on removal
- Available in white and clear

THINKHEX

UNIQUE FLOOR GRAPHIC
ANTI-SLIP
REMOVABLE WITHOUT TRACE

HEX is our unique adhesive coated floor graphics, suitable for applying to a wide range of floor surfaces, even carpets. It is easy to apply and remove without leaving any residue and has an anti-slip laminate for additional safety.

ADVANTAGES

- Easy to apply and remove
- Anti-slip laminate
- Damage free on removal
- Bubble-free
- Can be applied to floors and all smooth surfaces

FAQ

Is there a minimum order quantity?

With the majority of our products there is no minimum order quantity. We can print anything from 1 unit onwards. Simply speak to us.

Is there a minimum value of order?

We do have a minimum order value, please call us for more details.

What's the maximum size you can print?

All sizes are printable! In large format printing, our product can normally be printed up to a width of 1.3m wide by any length. Multiple graphics tiled together can create larger graphics

Can you die cut?

Of course! It doesn't always have to be a standard size! Circle shaped? Bottle shaped? No Problem!

Can CLINGZ be printed double sided?

Unfortunately, no. But we have a great product that can be printed double sided! Simply ask us for VIBO, our opaque and double sided material.

What is the difference between CLINGZ and Static Cling Vinyl?

- CLINGZ is NOT THE SAME as SCV. SCV will only stick to smooth or glossy surfaces and is usually used on glass facing out. CLINGZ will stick on both sides to most surfaces.
- CLINGZ is really easy to apply whereas SCV usually requires wet application.
- CLINGZ is 100% damage free on removal whereas SCV often leaves ink on the glass or surface.

An abstract graphic design featuring a white background with a large, vibrant splash of multi-colored paint in the upper right quadrant. The colors include green, blue, purple, yellow, orange, and red. The paint splatters are irregular and dynamic, with some colors bleeding into others. The overall effect is energetic and artistic.
