

Application Overview Graphics Industry

Your first choice in digital cutting.

Distinctive means successful

Offer your customers something your competition cannot. With the world's most advanced digital cutters – the champions from Zünd.

In today's competitive environment, eye-catching shapes and unusual materials are in high demand. Zünd's latest camera-guided cutting and routing technologies are capable of meeting these requirements better than ever. Structural designs, contour-cut displays – Zünd cutters will finish all varieties of common and newly developed materials easily, efficiently, and economically.

1 Shelf signage
Contour-cut polypropylene shelf talkers for in-store promotions and window displays.

2 Hanging signs
Contour-cut acrylic mobile, routed at unprecedented speeds thanks to optimized vacuum hold-down.

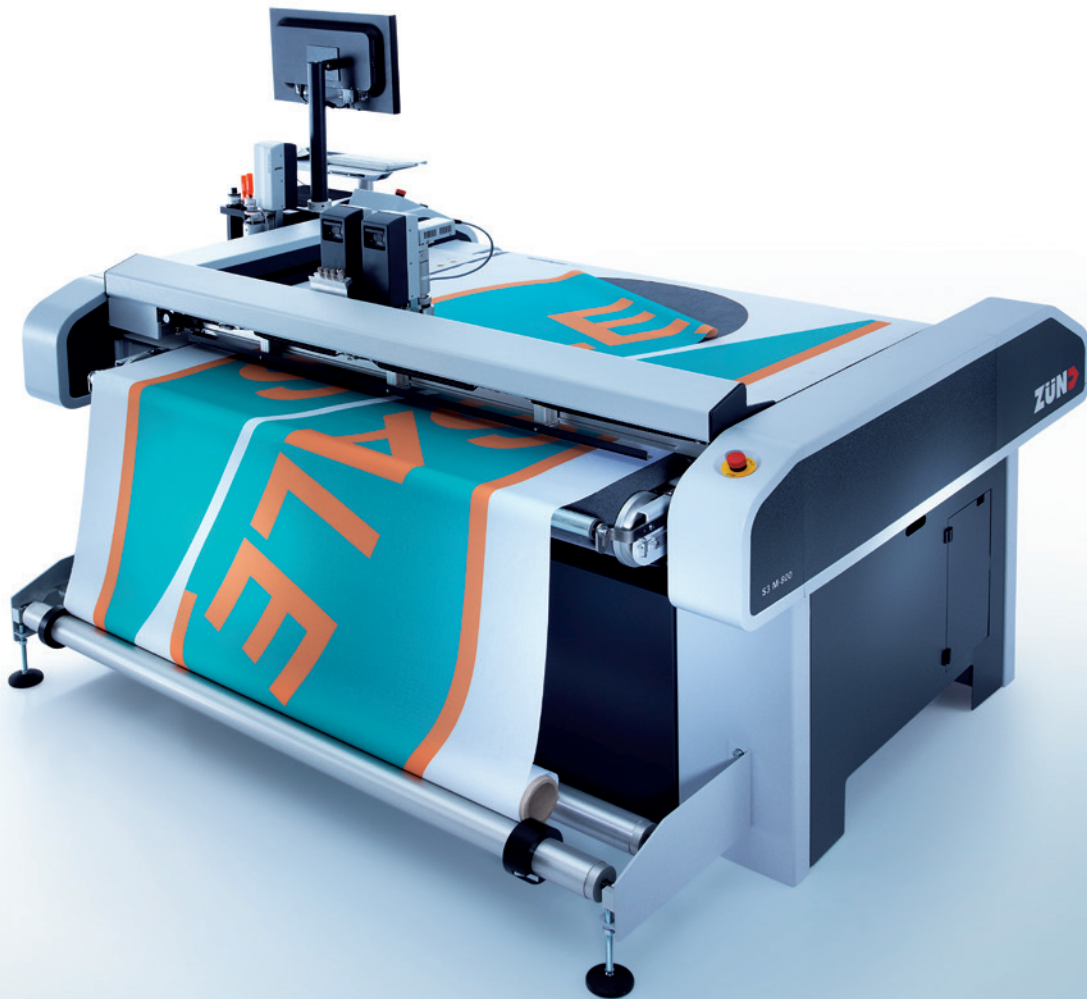

3 Floor graphics
Laminated adhesive-backed vinyl, kiss-cut and through-cut, for floor decals and floor mats.

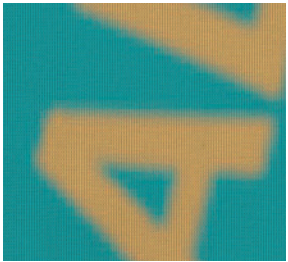

4 Displays
Cut or routed lightweight POP/POS materials up to 50mm/2" thick. Ideal for in-store decorations.

Efficiency provides a decisive finish

Productivity generates profit. Zünd champions generate productivity.

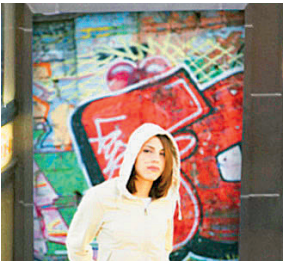

With ever-increasing print speed and quality, digital printers have made many things possible – and even more, in combination with Zünd Cutters. The world's fastest and most accurate cutting system is at your disposal for automatically trimming and contour-cutting banners, posters, flags, and many other flexible materials faster and more productively than ever.

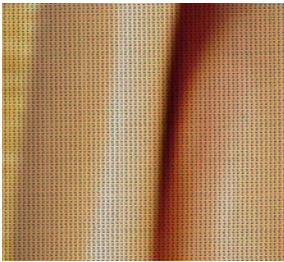

1 Textile, fabric banners
Porous flexibles for flags, banners, roll-ups. Cut perfectly using high-speed tooling and material transport.

2 Vehicle graphics
Pressure-sensitive vinyl for fleet graphics, vehicle wraps, and decals. Kiss-cut and contour-cut.

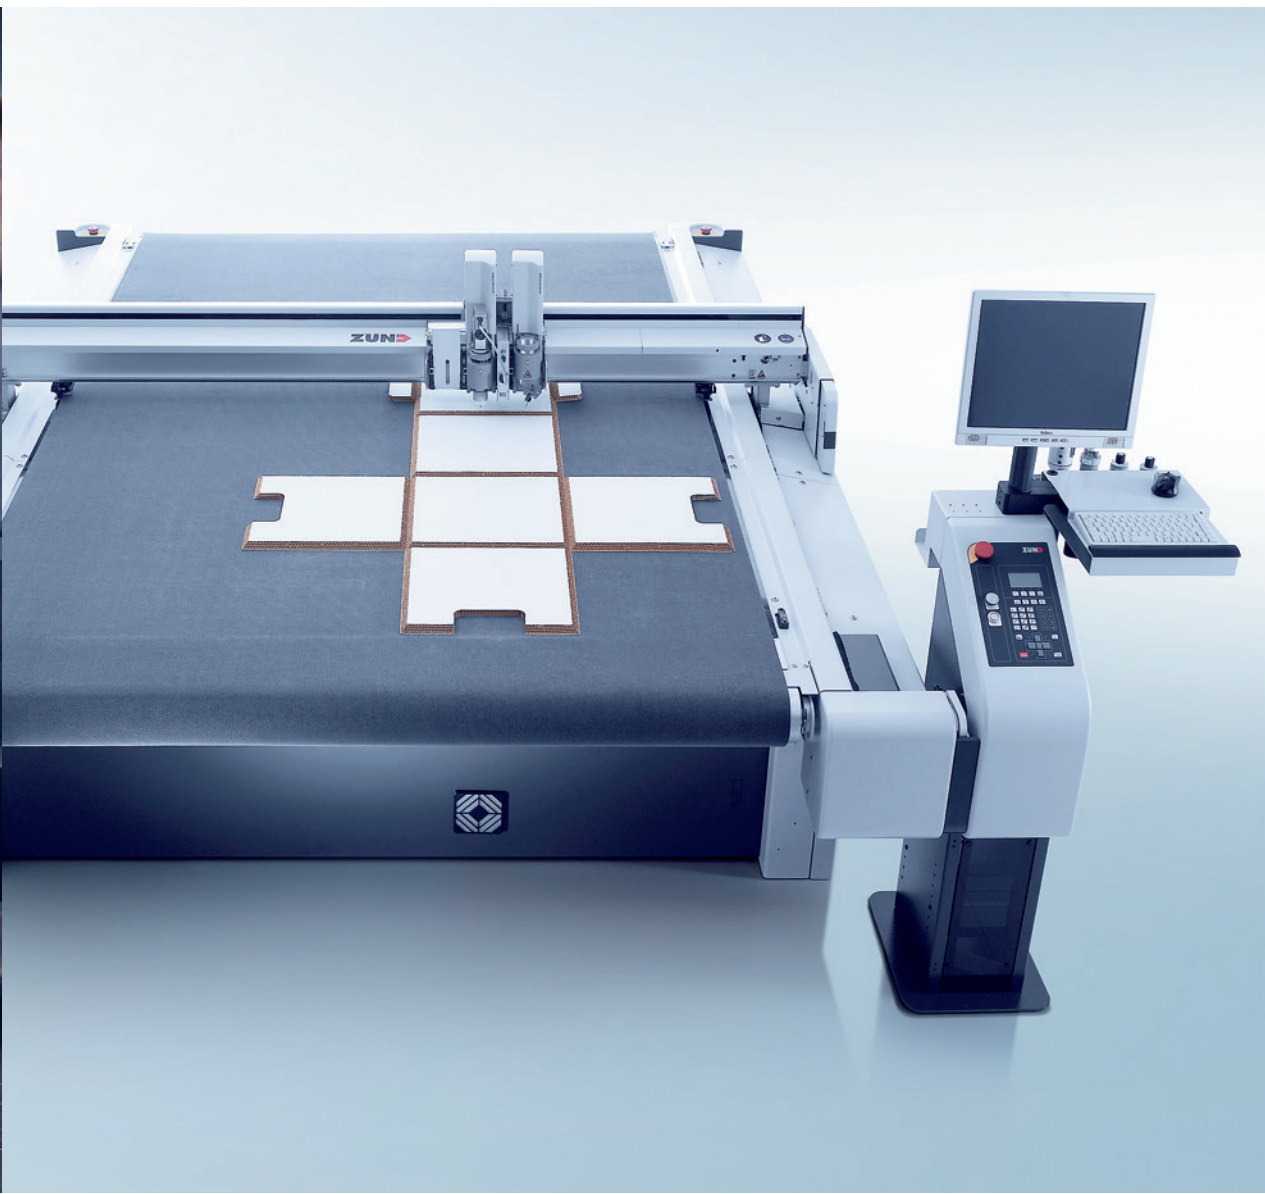

3 Light boxes
Scrolling light boxes and backlit displays trim-cut perfectly at high speed.

4 Transparent graphics
Oversized mesh banners and building wraps cut at high speeds with motor-driven rotary tool.

Attracting customers with creativity

New solutions drive the market. Zünd champions get you there.

Creative and low cost – these are vital attributes in designing displays for retail, showroom and exhibit applications. The Zünd cutter puts new ideas in overdrive, removing all limits to creativity and choice of materials. Rigid, flexible, and folding stock offer endless possibilities. With Zünd, finishing becomes both easy and profitable.

1 Floor display
Pop-up, roll-up and cardboard displays cut and creased. Perfect for folding panel displays in showrooms.

2 Store decor & furnishings
Thick corrugated and composite board made foldable. The Zünd V-Cut Tool at its best.

3 Presentation kit
Polypropylene case and packaging. Example of structural design, with contour-cuts and creases.

4 Brochure holder
Cutting, creasing and V-Cuts – all in one. Brochure holders, presentation systems and shelf displays.

Finishing with Zünd

Just in time, cost effective, and with uncompromising quality

Steadily decreasing delivery times and ever shorter production runs tend to create bottlenecks in the finishing department. Cutting by hand or using outdated technology leads to poor quality control, is prone to errors, time consuming, and expensive. Since finishing is the last step in just-in-time production, reruns tend to be very costly.

The Zünd digital cutter keeps labor and risk to a minimum while maximizing quality and productivity. Increase your capabilities exponentially with automatic, precise, and efficient processing of a wide range of rigid, flexible, and foldable materials. With such varied applications as high-speed cutting, routing, creasing/scoring, and complex kiss-cutting/through-cutting, Zünd delivers ultimate production flexibility and throughput. Boost your capacity for innovation. Convince your customers with extraordinary solutions. The champions from Zünd make it all possible.
