

High Performance

Signmaking Adhesives

PENLOC®

Fast curing (3 to 5 mins) structural adhesive for bonding locators, channel, rail, monoliths, most plastics, metals, Dibond, modern composites, GRP, glass, stone, Corian, marble, concrete and wood. Available in 12ml, 25ml, 50ml and 400ml cartridges. Penloc® 1:1 (advanced pink & green), Penloc® 1:1R (non odour/ non flammable), Penloc VT Plus (powder coating grade), Penloc® GTi Clear.

FLEXIFIX®

Flexible slower curing (30 mins) structural adhesive for bonding locators, mirror finish Dibond, channel, rail, sign trays, built up letters, most plastics, metals, Dibond, modern composites, GRP, glass, stone, Corian, marble, concrete and wood. Available in 50ml cartridges.

FLEXIBLE ADHESIVE

Slow curing (24 Hrs) highly flexible structural adhesive & sealants. Will bond most plastics, metals, Dibond, modern composites, GRP, glass, stone, Corian, marble, concrete and wood. Can be used in wet conditions bonding directly onto walls. Non Hazardous, Non Odour, Non Flammable. Available in 300ml cartridges. Eurobond Solo (high strength fast grade), Eurobond Multiseal (high strength & excellent sealant), Safe Fix (flame retardant). Eurobond Quickfix (fast curing high strength).

CLEARFIX®

Slow curing (24 Hrs) Transparent, highly flexible structural adhesive & sealant. Will bond most plastics, metals, Dibond, modern composites, GRP & glass. ClearFix® can be used in wet conditions bonding directly onto walls. Non Hazardous, Non Odour, Non Flammable. Colour Transparent. Available in 300ml cartridges. Ideal for back lit lettering. No shadowing.

High Performance

Signmaking Tapes

METAL & PLASTIC BONDING TAPE

EB6110G

High strength tape for bonding most metals and plastics. Ideal for mounting flat cut letters, channel, rail. Available in 12mm, 19mm, 25mm and 50mm widths.

VERY HIGH TEMPERATURE TAPE

EB4525C

High temperature tape for bonding most metals and plastics. This tape can bond metals and be put in a powder coat oven up to 200°C

BANNER TAPE

EB392P

Fast acting, strong tape for bonding banner hems and seams. Non crease, highly flexible and durable. Available in 12mm, 19mm, 25mm and 50mm widths.

CLEAR TAPE

EB4050C

High strength, clear tape for bonding clear plastics, acrylic and glass and metals. Available in 12mm, 19mm, 25mm and 50mm widths.

THERMALLY CONDUCTIVE TAPE

EB7064W

For bonding back light strips and LED lighting systems. Excellent thermal conductivity. Available in 12mm, 19mm, 25mm and 50mm widths.

LOW TEMPERATURE TAPE

EB3120G

Using tape in cold conditions can affect the bond strength and joint integrity. But, Eurobond have a special tape that is designed to be used in temperatures approaching freezing. So no more problems fixing or installing signs in winter. It can also be used on low surface energy surfaces such as polypropylene, nylon etc.
