The Face Fix Key Safe

The new IDACS Digital Face Fix Key Safe by Loxal Security is the ideal solution for remote on site key management and access control.

The multi installation key safe drawer can hold a number of keys, access tokens and or swipe cards.

The 'IDACS' system operates on unique six digit codes. These can be permanent (up to 200 named authorised users) or temporary codes in the form of weekly or daily codes. Weekly and daily codes self expire after use. Codes can be added or deleted. The unit can also be used for guard attendance without access.

The key safe operating 'IDACS' technology incorporates a full audit trail that can be easily downloaded onto an SD card.

The unit can be installed a number of ways.

Traditional fix-spy hole or S-Trap. To find out more please contact us. All IDACS products are compatible with our Videofied Alarm System.

All of the common and costly problems associated with key management are eliminated, including having to meet attendees on site, lost keys, looking for keys, waiting for keys or arrivals and having to re cut keys.

Included amongst the many applications for this versatile product are void properties, construction sites, care homes, hostels, student accommodation, holiday lets etc.

Tested and accredited by 'Secured by Design'.
