

# Gas & Fluid Control

FT Pipeline Systems has supplied bespoke pipeline solutions to the water industry for over 30 years. We have now increased our range of products to include a Gas and Fluid Control division offering a range of flanges and fittings, pipes and accessories for this sector.

Pipes (coated and uncoated), valves, fittings and flanges are available to all accreditations and all recognised grades of material in the gas and fluid control market. H2S removal and metering requirements can also be met. Alternatively, if you simply need specific items, they can be quickly sourced and delivered swiftly and reliably, worldwide.

## Gas to power design and supply from Class 900 down

Gas to power and gas to industry skids designed, built and commissioned

## Gas and Biogas control, isolation, safety and distribution valves
