Mobile Solutions

The future of security

Security technology evolves rapidly. To stay ahead of the game and meet changing needs, security solutions must be adaptable, intuitive and importantly, they need to be mobile.

Gallagher puts the power in your hands.

Combining our world-class Command Centre site management platform with the agility of mobile technology, the Gallagher solution extends security across your site and beyond the security control room.

Mobile badging, automated SMS messaging, and seamless integration between mobile control and building management systems, is just some of the functionality delivered by Gallagher's award-winning mobile solution.

Mobile technology

The Gallagher range of mobile solutions is comprehensive, and always expanding.

Mobile Connect

Gallagher's Mobile Connect solution gives you greater certainty at every door. Harnessing Bluetooth® wireless technology and the flexibility of smart phones, we've developed an access application that connects to the secure power of Gallagher Command Centre, with the trusted authentication of FIDO (a globally recognized open-standard).

Command Centre Mobile

The Command Centre mobile app allows you to manage day-to-day security issues from anywhere on-site. Whether your security staff are on guard or on patrol, the app allows them to spend more time away from their desk - while still maintaining complete awareness of what's happening on-site.

Mobile Reader

The Gallagher Mobile Reader extends the range of your card reading capabilities; enabling operators to verify a cardholder's credentials, or remotely authorize a cardholder's access to a zone.

SMS notifications

Ensure important information reaches your staff by broadcasting notifications from Gallagher Command Centre.

The Gallagher difference

We're not a standard security company. Gallagher was born from the need to solve problems.

We create and deliver integrated security solutions which meet your varying needs, from basic access control right through to critical sites with some of today's highest security requirements.

Mobile Connect

Our security access app transforms your mobile device into an access card, using Bluetooth® wireless technology*.

Extra secure - With optional two-factor authentication, you can add an additional security step to gaining access (use your fingerprint or enter a PIN).

Easy provisioning - Access can be set up remotely in advance of site visits, and can even be scheduled to begin and expire when needed.

More range options - With the Mobile Connect solution, you can adjust read ranges to suit your requirements.

Simple to manage - Our subscription model allows credentials to be issued and reissued as needed. New phone? No problem.

Greater convenience - No need for separate access cards, now you can access multiple sites, all from one mobile device.

Trusted authentication - Mobile Connect uses FIDO+ open-standards powered by Nok Nok, a globally recognized method of authentication.

Complete control - From the app you can interact with your building systems, manage alarms, and much more with triggered outputs.

*Requires Gallagher readers equipped with Bluetooth® wireless technology, Gallagher Command Centre v7.60+, and a suitable mobile device.

*To learn more about FIDO visit www.fidoalliance.org

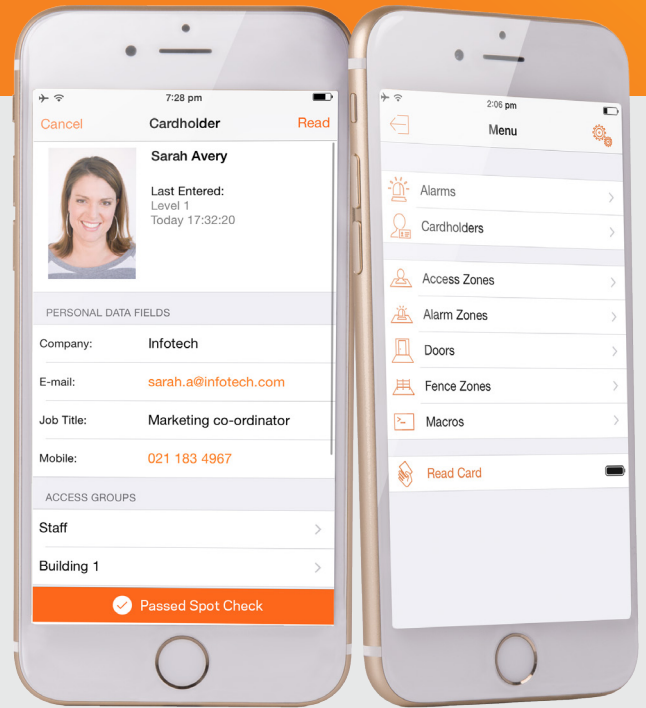

Command Centre Mobile App

The Gallagher Command Centre Mobile App enables you to extend your security and access control directly to where you need it. Downloadable from the Apple App and Google Play stores, this software provides you with the ability to manage your security from your mobile device. The Mobile App interfaces directly with Gallagher Command Centre, providing a secure link to the site management capabilities that already bring security and business efficiency to your site.

iOS and Android

The Mobile App is available on both iOS (8.0+) and Android devices (5.0+). The optional products such as the Mobile Reader and Access Reader feature are only available on iOS.

What can the Mobile App do for you?

Unlock doors

Changing the status of access zones and doors is simple, allowing you to instantly open doors or lockdown zones.

Check credentials

Search cardholders details via a card read or a QR/barcode scan. Ensure cardholders are authorized, and record that these checks are accurately implemented by security staff via the Spot Check feature.

Move cardholders through zones

The Access Reader feature allows operators to 'move' a cardholder into a zone from their mobile. Use it at muster points to 'move' people out of the building allowing you to generate accurate evacuation reports.

Customized actions can be triggered when a cardholder badges at a mobile reader - e.g., open boom gates automatically, or unlock turn-styles.

Manage alarms

All alarms generated on-site can be viewed, annotated and processed via the mobile app - with all actions instantly synchronizing with your Command Centre system.

Control the lights

Use macros to trigger events within your building automation system - e.g., turn lights on or off, open the windows, or start the air conditioning.

Mobile Reader

Capable of reading Gallagher encoded Mifare Classic, Plus and DESFire cards, the Gallagher mobile reader allows you to replicate the functionality of a wall mounted card reader, wherever you need it. Designed to work with the latest iPhone's* and the Command Centre Mobile App, the Mobile Reader brings the Gallagher mobile solution together in a complete package.

* Mobile Reader supports: iPod 5th Gen, iPhone 5/5S, SE, 6, 6 Plus.
