Bekina® Boots
footbeds

STEPLITE® XCi

the lightweight insulating boot

FEATURES

1. robust, yet lightweight
2. 100% waterproof
3. flexible material for easy walking
4. cold insulation down to -40°C/-40°F for extra warm feet
5. metal-free toe cap and midsole (S5): corrosion free
6. excellent grip, increased slip resistance SRC
7. shock absorbing heel to soften the impact from walking on hard surfaces
8. resistant to oils, fats and chemical products

NEOTANE®
TECHNOLOGY

safety first

value for money

increase your comfort

easy to clean

the lightweight insulating boot

**a unique blend
of ingredients
and its innovative
processing**

NEOTANE[®] Technology is the combination of a unique blend of materials and the innovative way of processing it. The high performing NEOTANE[®] material has been developed based on over 55 years of experience and the feedback from millions of end users. For decades we have been working together with the best equipment suppliers guaranteeing us high quality products made with NEOTANE[®] Technology.

Steplite[®]XCi green - ref. XC900/9173

Steplite[®]XCi orange - ref. XC900/6253

METAL DETECTORS

In some niche markets metal detectors are used, for example in the mine clearance service and archeology. A metal detector is a valuable device to track archeological finds. Our safety boots with non-metallic toe cap will never interfere with the metal detectors.

- 1 Sealed front: strong and impermeable on the outside
- 2 Tiny air bubble structure: light and insulating
- 3 Self-regulating thermal process on the inside

**for dirty and
heavy work
guaranteeing
optimal safety
& comfort**

COMFORT: LIGHTWEIGHT

Our boots made with NEOTANE[®] Technology are significantly lighter than boots made of other materials. The weight of boots has a direct impact on the comfort one experiences whilst wearing. Standing a significant part of the working day, industry workers can experience an intense feeling of fatigue in the lower back and legs at the end of the day. In the long term this is negatively influencing their productivity. It is proven that industry workers with lightweight safety boots are experiencing significantly less fatigue.
