

SWS

sws-group.co.uk

Solutions developed for Utilities by Utilities people

sws-group.co.uk are the UK's leading independent utility focused software and services business

sws-group.co.uk provides high quality, innovative, highly functional, easy to use integrated works management software, along with market leading services, training and technical support.

sws-group.co.uk understand the pressures that the Utility sector faces.

Regulators are driving rules that means utility organisations and their contracting service delivery partners will need to focus on driving greater efficiencies in their operations. They will need to reduce their operating costs and continue to deliver good quality of service whilst remaining profitable

Our tools deliver greater efficiency, higher productivity, reduced risks and optimised costs.

Prepare for the upcoming demands in the utilities sector with sws-group.co.uk, we understand you and your needs now and, in the future,

The human factor

Every organisation in the utility sector's complex environment requires a large, well trained human workforce.

That workforce includes gangs with different task capabilities and particular expertise working across a multitude of locations. From new project installation, planned maintenance and repair actions for extending the life of equipment, to emergency jobs when asset failure is causing problems; these teams of people are absolutely critical for any utility focused organisation.

sws-group.co.uk's technology delivers appropriate support to allow all these people to be more efficient at their tasks.

The critical nature of having the right people, with the right tools in the right place at the right time drives all we do.

sws-group.co.uk's solutions have been built for the utilities sector by deeply knowledgeable and experienced utilities people.

Our scalable and flexible solutions enable organisations with any size of workforce continually working on complex and ever dynamic tasks to ensure they are being managed in the most logical and efficient way.

Invigorate your human resources with sws-group.co.uk, we understand you and your needs now and, in the future.

Sustainable utilities activities

sws-group.co.uk – sustainability through increased integration

sws-group.co.uk take our responsibility to the environment seriously.

The tools that we develop and provide to our clients focus on the management of complex, safety critical, time focused, expensive and disruptive essential utilities services environment.

Our utility works management systems, SWIMS and CORONA provide effective, integrated tools that support the delivery of continued and enhanced sustainability goals across the sector.

SWS' approach, harnesses innovation, technology and people to create transparency across the environment. We deliver value for our clients, their teams and our tools enable them to contribute positively to the communities in which they work.

At SWS we are deeply focused on providing works management tools that:

- Reduce the amount of raw materials consumed by the utilities sector during their essential network repair, maintenance and renewal programmes.
- Minimise traffic congestion
- Reduce journeys required
- Delivers huge gains on "right first time" reinstatement
- Stores and manages key data to provide for efficient maintenance of the network in the future
- Ensures the optimisation of materials, reducing waste, increasing efficiency

SWS provides industry leading tools to our clients that help to protect the environment and enable key aspects of the "circular economy" across our key sectors, it makes both societal and business sense.

SWS

sws-group.co.uk

Solutions developed for Utilities by Utilities people

sws-group.co.uk engage with unmatched flexibility, we are committed to provide a high level of personal service coupled with professional and flexible customer service and support.

This capability is coupled with a focus centred on flexible customisation of the implementation of the software to meet organisations' needs for specificity aligned to their requirements.

We equip all sizes of organisations with powerful and scalable solutions.

The work done is becoming increasingly complex and sophisticated, due to the challenges of increased legislation, customer service standards, reporting and delivery requirements, safety, quality and compliance demands.

Our tools to support the work are equally sophisticated and easy to use, no matter what size your organisation happens to be.
