The background of the advertisement is a photograph of three men in orange high-visibility workwear at a construction site. One man is kneeling and working on a manhole cover, while two others stand nearby. A large, textured concrete block is visible. The "ULTRA CRETE" logo is overlaid in the top right corner.

Testimonials

I attended the UCARS course recently along with other Yorkshire Water colleagues who are involved in raising Street Furniture repair for clean water assets. We all really benefited from attending the course, it was well structured and the technical information was explained clearly by Nick, and was far easier to interpret than the SRoH. The practical element was of great use to us and will help us when promoting work in the future. We would definitely recommend the course to anyone who undertakes or supervises Street Furniture repairs.

A brilliant day at Instarmac on their UCARS course. If you deal with any aspect of Highway Maintenance and you use any of the products, this is a brilliant course. I learnt a great deal, despite having worked on the Highway for 9 years now.

**AIDAN FITZGERALD, OPERATIONS
SUPERVISOR, RINGWAY JACOBS**

I highly recommend the UCARS course. The training content and delivery is first-class, and is of benefit to many. The knowledge gained from attending is priceless and provides great, all-round detail into access cover installation.

What a brilliant day myself and my team have had with you all at Instarmac. Thank you very much. I can't recommend this course enough for companies/crews undertaking frame and cover replacements.
