Making energy and water more accessible, affordable and sustainable for all

Accelerating the drive to net zero

As our global population increases, demand for energy and water is rising rapidly. Climate change makes the responsible, sustainable use of these precious resources critical. Across the world, utilities need to be smarter, more efficient and more innovative than ever before.

Specialising only in energy and water, Enzen is a global knowledge enterprise which believes in the power of innovation and collaboration to change our world for the better.

Our mission is to make these two life essentials more affordable, accessible and sustainable to all by addressing the utilities industry's three core challenges of decarbonisation, decentralisation and digitalisation.

Through our deep domain knowledge and passion for challenging the status quo, we're developing cutting-edge solutions that accelerate the drive to a net zero world and leave a cleaner, healthier planet for future generations.

Global innovation in energy and water

Enzen was founded in 2006 at Blythe Valley Park near Solihull in the UK, which remains our corporate headquarters today.

Since then, we've become an international success story with offices in Australia, India, Portugal, Spain and Turkey, from where we deliver positive outcomes for power, water, gas and renewables utilities across six continents.

Since our inception, we estimate that around the world Enzen has:

Transforming UK utilities for the energy transition

In the UK, Enzen is driving positive change in the energy and water sector across four key areas:

enzen

Smart Networks

Accelerating the DNO-DSO transition by enabling faster and timely access to power to all participants in the energy ecosystem.

Transformation

Developing creative models that mean our customers can improve performance, increase efficiency and reduce expenditure in the long term.

Advisory

Harnessing our deep domain knowledge and strategic expertise to deliver sustainable value and global best practice.

Digitalisation

Empowering power, water and gas companies to become digital utilities through innovation, architectural governance and leading-edge applications.

Long-term partners focused on value

Our customers consist of large transmission and distribution power and gas companies, plus major regional providers of water and wastewater treatment.

Enzen currently works for all four of the UK gas distribution networks and all six UK electricity distribution networks. We work across the value chain, offering

solutions from production, generation, transmission and distribution to distributed generation, retail, metering and consumption.

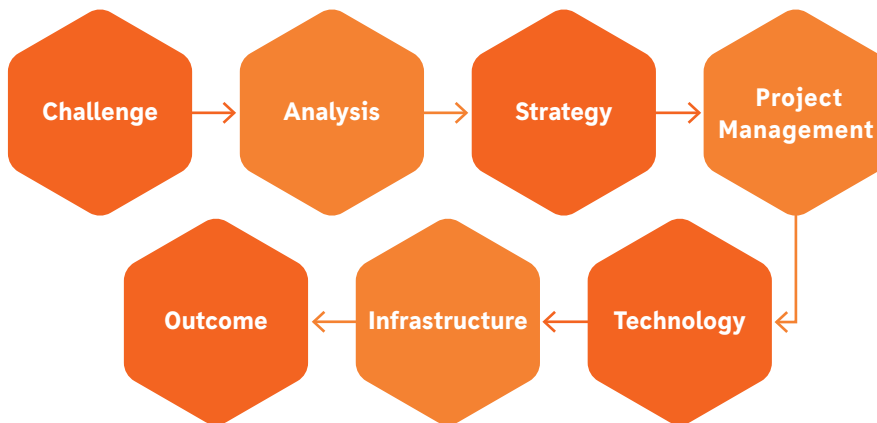

Delivering end-to-end excellence

Enzen people are 'knowledge practitioners', specialising in long-term strategy and the delivery of tangible outcomes for our customers.

Through our deep domain knowledge, we create innovative solutions that are truly end-to-end, encompassing strategy, transformation, operations, advisory and technology.

By combining visionary thinking and exceptional execution, Enzen unlocks value, deliver greater efficiencies and drives positive, long-term sustainable change across our industry.

In the UK, we've received industry recognition for our innovation:

- Signature Awards 2020 – Business of the Year
- Solihull Chamber of Commerce Awards 2020 – Large Business of the Year
- Greater Birmingham Chambers of Commerce Awards 2021 – Excellence in Sustainability
- Energy Innovation Awards 2022 – Social Impact
- Education Awards 2022 – Sustainability

A worldwide network of partners

Enzen's group companies are all domain experts in their respective fields. Sharing our passion for innovation, they combine pioneering technology with real-world application to deliver value.

Bombora

A wave energy specialist, Bombora uses its patented mWave™ product to release the environmental and economic potential held within our oceans.

Enertest

Developing innovative engineering and consultancy solutions for the power industry, Enertest maximises value across all areas of the sector from production to consumption.

MX Reality

Through Virtual Reality, Augmented Reality and Mixed Reality solutions, MX helps companies boost safety, increase productivity and lower costs.

NNNCo

NNNCo is one of Australia's leading IoT and LoRaWAN® specialists providing solutions for businesses and government.

Optimitive

Optimitive offers AI-driven development, maintenance and services for the real-time improvement of industrial processes.

On Device

An SAP specialist, On Device creates enterprise asset management and enterprise mobility solutions.

Skylark

Skylark is an India-based drone services and solution company focusing on unlocking the economic potential of the skies.

Wellness Techgroup

An IoT company focused on efficiency, sustainability and interconnectivity for smart cities, Wellness Techgroup delivers solutions for 60 countries worldwide.
