

# BAR HOLE PLUGS

Permanent and reusable bar hole plugs, specifically designed to fill bar holes, which can lead to potholes if left untreated. **NO COSHH!**

GAS

ELECTRICITY

OIL

WATER

The permanent and reusable pre-formed plugs are cured, non-toxic and made of injectable polymer.

The cured plugs are designed to be flexible and removed from the road surface if required to be. Additionally, they will not stick together when hot or become brittle in cold weather.

The 3D designed plug can be cast in any diameter or shape.

**X NO COSHH!**

## FEATURES

- High quality and durable - the plugs and sealant are hardwearing and do not become sticky when hot, or brittle when cold.
- Cutting-edge technology - MW Polymers uses 3D printers during the mould manufacturing process to ensure consistency across its range of plugs.
- Flexible - the plugs are easily inserted and removed if required.
- Environmentally friendly - due to the material used.
- Easy application - the injectable solution comes in cartridge form and is ready to be fitted to a handheld applicator - it doesn't require any additional tools.
