

JULESFIT

FIT ADMINISTRATION SOFTWARE

Our Feed in Tariff Application allows Energy Suppliers and FIT Licences to administer their FIT obligations via our online portal. Licensees can upload meter readings and invoices via the Platform directly to the Energy Supplier, reducing both administrative time and costs as well as creating a paperless process.

FUNCTIONALITIES

KEY FUNCTIONALITIES

Energy Suppliers can fully administer the entire FIT process from the Creation of Statement of Terms to the self-billing option. The Platform also automates the OfGem reporting element by electronically producing the Periodic and Annual Levelisation reports for submission to OfGem.

MISCELLANEOUS FUNCTIONALITIES

- Automatically issue Statement of Terms contracts
- Automated meter reading requests
- Ability to upload meter reading pictures
- Customers able to upload invoices to the Supplier via the Application

BENEFITS

BACK OFFICE

- Automated requests for meter readings (via email)
- Readings entered directly onto the Application by users
- Automated creation of Statements, including credit statements
- Customers able to upload invoices to the Supplier via the Application
- Customers able to track payments via the Application
- FIT invoices can be managed electronically reducing admin times

CUSTOMER/CONSULTANT
