

Noggin Emergency

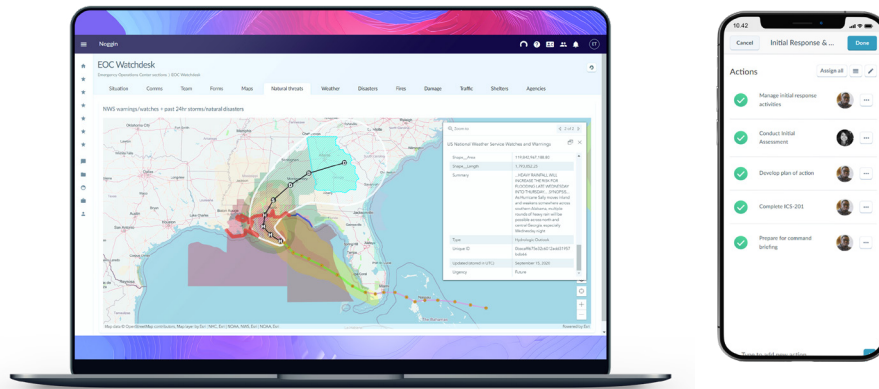

Emergency Management Solution

Manage every aspect of emergency management in the world's leading platform for integrated safety & security management. Noggin Emergency provides you all the information and tools that you need to effectively manage all emergencies, through the entire lifecycle of preparation, response and recovery, as well as business-as-usual operations for emergency preparedness and critical infrastructure resilience.

Use Noggin Emergency to:

- Manage all your emergency information, communications, plans and tasks in a single, flexible platform
- Establish incident management teams, manage emergency assets and resources including credentials and certifications
- Gather intelligence and situational awareness for each event and steady state operations
- Activate facilities, dispatch teams, mobilise resources, and manage resource requests and expenses
- Collaborate with, command and coordinate teams and resources, through plans, checklists and actions
- Assess damage and log all activities, updates, and decisions
- Produce reports and briefings, and communicate alerts, notifications and updates via email, SMS, voice or the Noggin mobile app
- Manage critical infrastructure asset information and risks
- Visualise locations of incidents, risks, people, and assets using the fully integrated mapping features
- Automate and lead people through your procedures, with fully configurable workflows

Key Features:

- Establish incident management teams including cell structures, roles, capabilities required and on-call resources
- Track the latest Community Lifeline status or any other metrics key to your organisation as an incident progresses
- Gather intelligence and situational awareness via field personnel, data and GIS feeds, email or SMS, displayed on comprehensive dashboards for each event, and for watch desk and steady state operations
- Activate emergency operations centres and dispatch teams
- Prepare and distribute incident action plans, incident objectives, strategies and considerations
- Dashboards and collaboration spaces for emergency teams – command, operations, planning, logistics, finance & administration, and public information
- Command and coordinate teams and resources with a library of plans, checklists, work instructions and actions
- Assess and report on damage, raise related actions to respond or recover
- Log activities, updates, decisions, events, facts, or assumptions
- Produce situation reports, briefings, situation summaries and intelligence reports
- Communicate alerts, notifications and updates via email, SMS, voice or the Noggin mobile app
- Mobilise and demobilise resources and manage resource requests and mutual aid assistance requests
- Record expenses and procurement information, supply and travel requests
- Incorporate Esri ArcGIS and other map sources to view your asset locations in the context of live weather threats, critical infrastructure, and other local features

Noggin Emergency Library:
