# Noggin for Safety

Safety Solution Module

Manage every aspect of environmental health and safety in the world's leading integrated safety and security platform. Noggin Safety provides you all the information and tools that you need to effectively manage all environmental, health and safety incidents, risks and hazards, saving you time, helping you make informed decisions, enabling you to reduce risks and incidents, and respond more effectively.

Use Noggin Safety to:

- Drive your safety KPIs in the right direction with best-practice management of incidents, injuries, risks, and controls

- Action tasks from incident 'lessons learned' and related risk reviews to achieve continual improvement of your organization's processes and procedures

- Report and manage all environmental, health and safety incidents, and hazards in a single flexible platform

- Track and manage all your safety information, key documents, tasks, checklists, and corrective actions in one place

- Initiate and track investigations using best-practice standard methodologies

- Manage safety assurance activities such as audits, inspections, non-conformances, and actions

- Visualize locations of incidents, hazards, people, and assets using the fully integrated mapping features

- Increase team collaboration and efficiency using the in-built communications for e-mail, SMS, voice, app notifications, broadcasts, alerts, and reminders

- Manage key details of staff, contractors, volunteers, and external parties, including competencies, compliances, and site inductions

- Easily relate incidents, risks, and hazards to your own organization structure, buildings, sites, plant and equipment, materials, and other assets

- Display key information where it is needed using flexible dashboards, analytics, and reporting that caters for all your stakeholders

- Automate and lead people through your procedures, with fully-configurable workflows

Key Features:

- Incident reporting and management for environmental, health, and safety

- Investigations using ICAM and 5 Whys approach

- Injury and illness management, including treatments, expenses, and return-to-work planning

- Action management, including due date and completion tracking

- Risk management using Bow Tie, SWMS, Permit to Work, and JSA approaches, with a configurable risk matrix

- Contractor management and site-specific inductions

- Visitor Management

- Staff training and competency management

- Global and site-specific dashboards

- Hazard and near-miss reporting

- Safety meetings and follow-up action alerts

- Safety Engagements using behavior-based observations

- Lessons learned register

- Real-time KPI/KRI reporting and analytics

- Industrial hygiene and hazardous substance management

- Customizable access and security policies based on role type

- Safety inspections and compliance audits generated from a user-defined library

- Compliance breaches, obligations, and plans

- Employment health checks and drug/alcohol tests

- Controlled document management, including confirmation of understanding

- Asset management, including plant, equipment, and PPE

- Sustainability management

- Emergency and evacuation drills

- Mobile-first application (iOS and Android)

- All features are user-configurable using a no-code design
