Infrastructure

# Topographical Surveys

We create highly detailed plans and digital ground models of all physical features on each site.

## 3D Modelling

We use Laser Scanners to capture and prepare 3D Models and Point Clouds of Buildings for use in BIMs.

**WHY CHOOSE 40SEVEN?** Our team of highly experienced surveyors are accustomed to working in many different environments.

**CASE STUDY:** LE MANS CRESCENT. 3D interior and exterior model with a topographical and PAS128 Survey.

# Underground Utility Surveys

It's critical to know where existing buried services lie, so you can proceed safely and eliminate unexpected costs.

**WHY CHOOSE 40SEVEN?** We are experts in the application of PAS128, helping our clients specify surveys correctly to attain the data they require.

**CASE STUDY:** NINE ELMS REGENERATION. GPR, underground utility and clearance survey for TFL.

# Gas Asset Surveys

We provide asset protection, leakage monitoring and risk analysis surveys, using industry leading technology, which we have developed in-house.

## WHY CHOOSE 40SEVEN?

- Single largest supplier of MRPS surveys in the gas industry.
- Leakage survey of over 2,500km.
- Experienced plant patrol surveyors protecting Gas pipelines on key infrastructure projects
- Our team of surveyors are strategically located around the country to provide surveying services in all Gas networks.

**CASE STUDY:** THAMES TIDEWAY. leakage surveys for the water industry's largest infrastructure project.

“

40SEVEN engage with their clients to understand the project scope and provide tailormade survey solutions.

They always consider contractor safety standards and are capable of planning works around complicated site, logistical and operational requirements.

Their Surveyors deliver the works professionally and their Project Managers always provide support and respond to additional survey requirements rapidly and efficiently.
