Emergency rescue and response

We have been keeping people safe since 1902 and have harnessed the specialist skills, experience, and knowledge developed during that time, to ensure the safety of all those who work in difficult and dangerous environments.

Offering confined space, working at height and water rescue, we are trusted by many of the UK's most recognised brands.

We are still the largest private sector rescue company in the UK and are recognised within the mines regulations 2014 as a specialist rescue services provider. No other rescue company, in the public or private sector, can compete with our knowledge and experience.

Our rescue teams are highly trained, competent health and safety experts, who have the real-life skills and expertise of working in hazardous environments – skills they maintain through continual training and assessment.

With the best equipment, drone technology and specialist vehicles, we are fully equipped to deliver industrial emergency services when and where you need it. 24/7. UK and worldwide.

MRS Training and Rescue | Units 1-3 Marquis Drive | Rawdon Business Park | Moira | Swadlincote Derbyshire | DE12 6EJ

Before performing any work on-site, we will arrange a site visit to discuss specific requirements and allow us to finalise our rescue plan/risk assessments and method statements. In the planning stages, we will be available to offer support and help to consider the safety elements that can be incorporated ahead of work starting, which all can help to achieve desired objectives.

Whilst our main role is to respond to emergency situations, we can also provide training on site, as well as managing contractor inductions, permits, risk assessments and a range of other practical health and safety advice.

So, no matter what your project requires, our tailored services mean you can be assured you will be safe in our hands.
