Boris

Meet BORIS

Let me introduce BORIS, the app that will revolutionise your business.

Start your digital transformation today - no more lost paperwork, no more unnecessary processes, and no more duplicated effort. Take back control and put your business in the palm of your hand.

BORIS is a mobile management solution that is easy to implement, simple to use and customised specifically to your organisation so that you can transform any paper and pen procedure into a digital process to help your business be more productive.

Accessible for users with all levels of technical expertise, you and your teams can instantly record, upload and access information without having to type it up later. BORIS provides information and insight that makes understanding business performance effortless.

"We have found it extremely helpful with all aspects of running our business and it has certainly made us far more efficient.
This system lets us keep a better eye on the works being carried out even when we can't get to site."
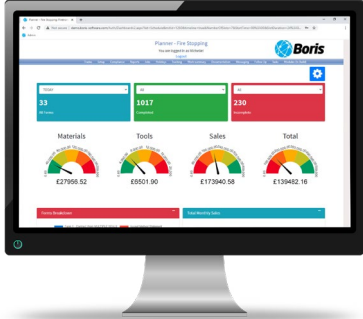

GSI Contract Services Ltd

Why choose BORIS

Our unique system features the BORIS app - available for use on both smartphones and tablets - supported by a comprehensive host portal:

- Works both online and offline, any changes made via the app will upload to the main system as soon as you get signal

- Compatible with Android with iPhone/iOS in development

- Government Crown approved / G-Cloud approved

- Suitable for any business size, from 5 user to 5000+

- Access control; create user profiles and access permissions, including access for your clients

- Centralised document storage, access critical information wherever you are

- Extensive template library so you don't always have to start from scratch

- Real-time information and reporting, customised to your requirements and branded to your business

- Instant data capture in a variety of formats (text, photos, media, signature capture, date stamp, GPS location, barcode/QR code/ NFC)

- KPI dashboard for an instant snapshot of your business operations

- Live pricing engine; instantly calculate job costings and gain financial control over your operations

How BORIS can help you

As BORIS is a completely customisable system and tailored to your specific needs the possibilities are endless! However, here are some examples of how BORIS can be used to help your business:

People Management

BORIS provides both clock card and timesheet management as well as expenses and holiday facilities so that you can review the costs, performance and productivity of your business and your teams.

Asset Management

Turn any item into a digital asset and use BORIS to record the product specification as well as life-time service history, providing accurate information to be able to manage and locate your assets.

Compliance Management

From health and safety to quality control, live data means your records are always up to date – and with supporting evidence. Examples include toolbox talks, fire risk assessments, employee induction procedures and handover.

Operations Management

BORIS will help you schedule your workload, coordinate your people and monitor your productivity. Create jobs, schedule a time and allocate resources for instant deployment to your teams wherever they may be. Includes live drawing support.

GPS & Fleet Management

BORIS features GPS tracking to help you support individuals involved in lone working, as well as vehicle maintenance recording to ensure your teams safety and manage the quality of your vehicles.

What you can expect

Working with Boris Software isn't simply a transaction, we see it as a partnership between your business and ours to ensure that you have both the product and the support that you need:

- Tailor-made to your business with the flexibility to continue development as your business changes

- Full training to introduce your new system and how to make the most of it

- Dedicated technical support – phone, online and via our ticketing system

- Video training guides and regular webinars to demonstrate new features and best practice

- Ongoing account management support should you have any queries when using your system

- Online hosting

"Since deciding to use Boris, they have been with us every step of the way tailoring the software to our own requirements.
Our time spent in the office writing up reports and quoting projects has been dramatically reduced and because of this we have been able to take on more contracts."

Nene Valley Fire and Acoustics

Boris

Industry Examples

Construction

Schedule your works and allocate your resources dependent on the materials, skills and experience needed, then deploy directly to your teams on-site. BORIS contains a live drawing solution to record works to a pin icon and drop onto the drawing for accurate location. Photo capture records before and after scenarios, accompanied by date stamping and GPS tagging for sign off.

Fire Protection

Health & Safety

Diamond Drilling

Highways

Highways England ditched their paperwork at the roadside and adopted BORIS - paperless incident forms, watchman reports and recovery satisfaction surveys means that traffic officers can gather and send better quality information more quickly, enabling them to spend more time helping their customers.

"This app is so simple, even the least tech savvy people will be able to pick it up very easily"
*Neil York, Highways England*

Asset Management

Using NFC tags or pins as a manufacturer you can turn your products into a digital asset. Record their specification, manage their deployment, record their service history, and track their current location - all data is instantly available on the product itself and accessed using the BORIS app.

Utilities

Manufacture

Housing Association

From property asset management and defect management to scheduling works, BORIS offers bespoke forms and templates to ensure all problems are recorded and appropriate remedial works implemented where necessary, supported by photo and signature capture to evidence their completion. The information needed to keep your properties in the best condition.

Facilities Management

NHS
