

Fixer 10 High Speed Pipe Cleaning Machine

The FIXER 10, the mid sized unit in the range, is a high-speed pipe cleaning machine. The unit can be used for grinding, drilling and cutting in pipes.

With its 23.5 meter, 10mm diameter shaft, it can be used in DN50-200 diameter pipes. Its big puncture-proof wheels make the FIXER 10 easily movable in every environment, even on stairs.

The FIXER 10 is more powerful, faster, lighter and safer than other similar products on market. Why not give it a go and see for yourself?

Available to purchase or hire from Renoline.
