

# FLI Precast Solutions

## Attenuation Tank - Datasheet

# Overview

FLI Precast Solutions design and manufacture award-winning modular precast stormwater attenuation tanks.

We are the proud founders of the most recognisable precast attenuation tank on the market.

These attenuation tanks are the most widely used flood alleviation methods across the UK and Ireland. At FLI Precast Solutions, we have a proven and unrivaled track record of over 1,900 attenuation tank installations.

Our attenuation tanks are a robust answer to flood prevention and have been protecting communities for almost 20 years.

The FLI Precast Solutions stormwater attenuation tanks are recognised throughout the industry as the precast tank of choice by Designers, Engineers, and Local Authorities.

## Features

- Modular semi-precast components provide an infinite number of design combinations to suit any site conditions.
- Off-site manufacturing reduces installation time and increases efficiency.
- The unsung hero in flood prevention – be it small or substantial quantities of storage volume.
- Buried underground and loadable to suit all circumstances be it in POS or highly trafficked environments.

## Our process at a glance

Our precast storm attenuation tanks are available in depths of 0.6m up to 5m and can easily be configured to suit any volume and site specific requirements.

All designs are bespoke and made to order depending on the project requirements.

## Product Benefits

- Maximum design flexibility to suit any size and configuration requirements
- Off-site manufacturing reduces installation time and increases efficiency.
- 100 year + design life and straightforward to maintain.
- The “Carlow Tank” is the tried and tested answer to stormwater management.
- Approved by all water authorities for straightforward adoption.

### Accreditations

## Why Choose Us?

**1,900+**  
Installations

**20+** Years  
Experience

## Our Attenuation Tank Specialist

Andrew MacDonnell  
**Technical Sales Manager - UK & IRE**

**Phone:** [07921 480597](tel:07921480597)

**Email:** [amacdonnell@fliprecast.com](mailto:amacdonnell@fliprecast.com)

Andrew has worked on largescale stormwater projects across the UK & Ireland over the past 10 years. He is our leading specialist in all attenuation tank installations and is on hand to answer any questions you may have.
