## Pipeline Tapes and Coatings

Chase Corporation is a leading manufacturer of protective coatings and water proofing membranes for high reliability applications in the pipeline and the construction industry.

For over 60 years we have made a material difference by developing high performance Industrial Coatings, Tapes, Adhesives and Sealants that are marketed under brand names recognised as the most trusted in their respective industries.

Chase Corporation is a leading supplier of field applied coatings and tapes for the global oil, gas, water and wastewater industries. When anti-corrosion and protection are paramount in applications that involve pipelines, Chase has the products and experience to offer superior solutions through its highly recognised and respected brands.
