

Polyurethane based two-part Foam for use on abandoned mains. 50 YEAR LIFE!

GAS

ELECTRICITY

OIL

WATER

Quick Foam is a CFC free two-part PU based expanding foam. The foam is a cost-effective alternative to the mechanical fittings used on abandoned gas mains.

Quick Foam is easy to apply and is universal in the size and type of pipe and fitting.

The unique feature of the cartridge is that it can be resealed allowing for multiple applications.

The easy to use cartridge method give the user full control of the foam allowing for a full 360° application.

Quick Foam is extremely low in odour and once the cartridge has been fully dispensed can be disposed of as general waste.

FEATURES

- Fast reacting and expands quickly.
- Cost effective.
- Proven no adverse reaction to the surface.
- Easy to apply.
- Universal in size.
- It can be resealed allowing for multiple applications.
- Controlled.
- General waste disposal.
- Full control of the foam allowing for a full 360° application.
- Provides a gas tight seal.
- Can be used on gas or water mains.

PIPE MATERIALS

- Ductile Iron
- Cast Iron
- P.E. (Polyethylene)
- Gas
- Water

APPLICATIONS

- Gas
