

Introducing Sweco

UK & Ireland

We are Sweco

Specialist expertise

Our specialists have the capability, determination and responsibility to solve the challenges of today with tangible positive results.

We are future planners, city shapers, urban innovators, digital transformers, compliance advisors, net zero chasers, community connectors, social enterprisers, lifestyle improvers and **difference makers**.

Our purpose

Transforming society together

22,000

DIFFERENCE MAKERS
ACROSS EUROPE

Transforming society together

Together with our clients and the collective knowledge of our 22,000 architects, engineers and other experts, we co-create solutions that address urbanisation, capture the power of digitalisation, and make our society more sustainable.

We are experts in...

Building collaborative relationships

Whether we are delivering strategic infrastructure, providing digital advice or conducting a building survey - if it matters to our clients, it matters to us.

Understanding our clients' needs

We are committed to understanding our clients' needs better than anyone else and creating forward-thinking solutions that deliver successful outcomes.

#SwecoDifferenceMakers

We are involved in more than 120,000 ongoing projects, with collaboration lying at the heart of every single one.

Empowered to deliver

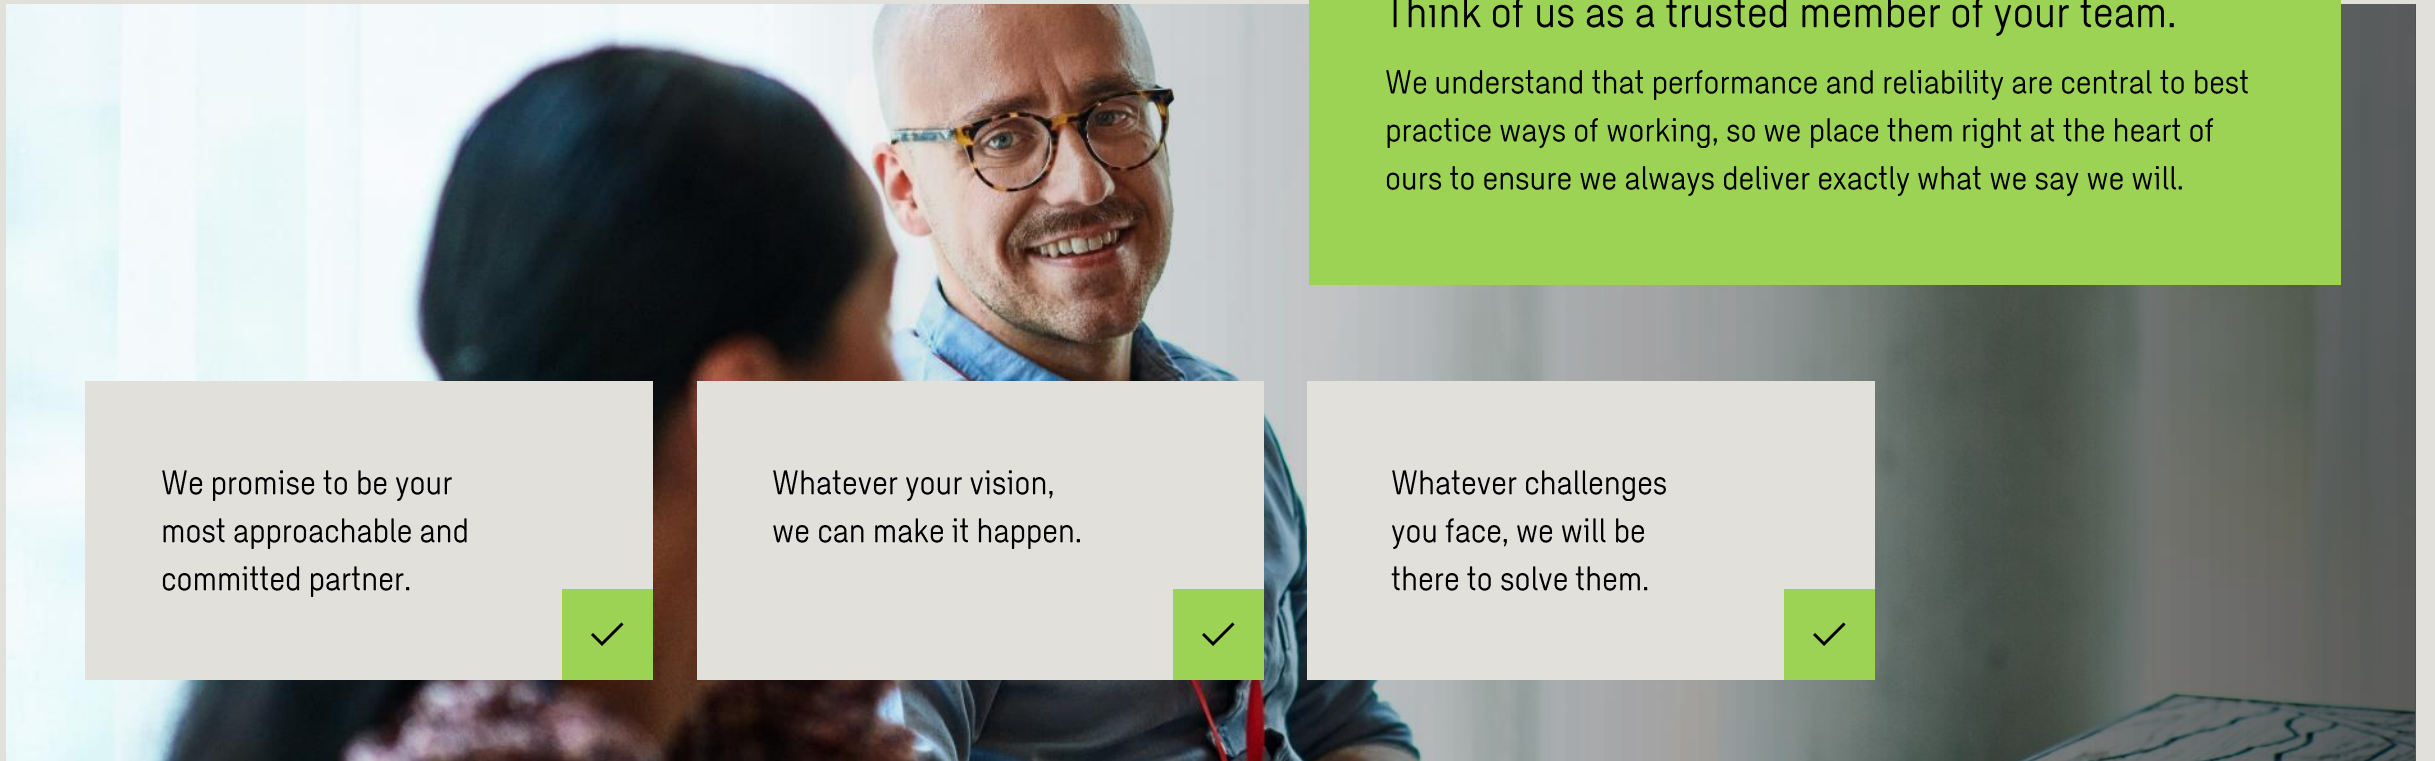

Diverse and inclusive culture

Our culture is open and supportive, which creates a working environment where our colleagues can thrive and where strong client partnerships are fostered and maintained.

We celebrate that everyone has different strengths and abilities. We ensure that all skill sets are embraced and maximised to benefit our people and our clients. Ultimately, at Sweco, we know that talented people coming together are stronger together.

Our promise to our clients

Don't think of us only as consultants.
Think of us as a trusted member of your team.

We understand that performance and reliability are central to best practice ways of working, so we place them right at the heart of ours to ensure we always deliver exactly what we say we will.

We promise to be your most approachable and committed partner.

Whatever your vision, we can make it happen.

Whatever challenges you face, we will be there to solve them.

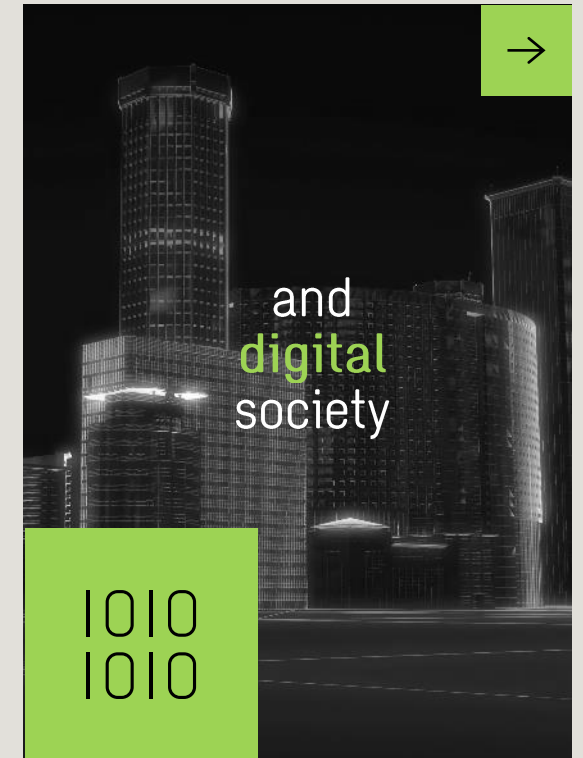

Team of teams

At Sweco, we work as an interconnected ecosystem of specialists – sharing knowledge and expertise to create true value for our clients.

#TeamOfTeams

What we do... is more important than ever before

We combine transformational perspectives and expertise to solve the most pressing challenges of our time.

Our commitment to sustainability

2030

OUR JOURNEY
TO NET ZERO

At Sweco, we aim to be a role model in sustainability, taking responsibility for, and being part of the solution, to society's sustainable and carbon reduction challenges.

Social value

Corporate social responsibility is central to our organisation.

We partner with stakeholders to improve job accessibility, provide access to training programmes, offer apprenticeships, and encourage people to consider STEM subjects.

Shaping meaningful change

We work with charities, government organisations, and policy makers to drive genuine and lasting change.

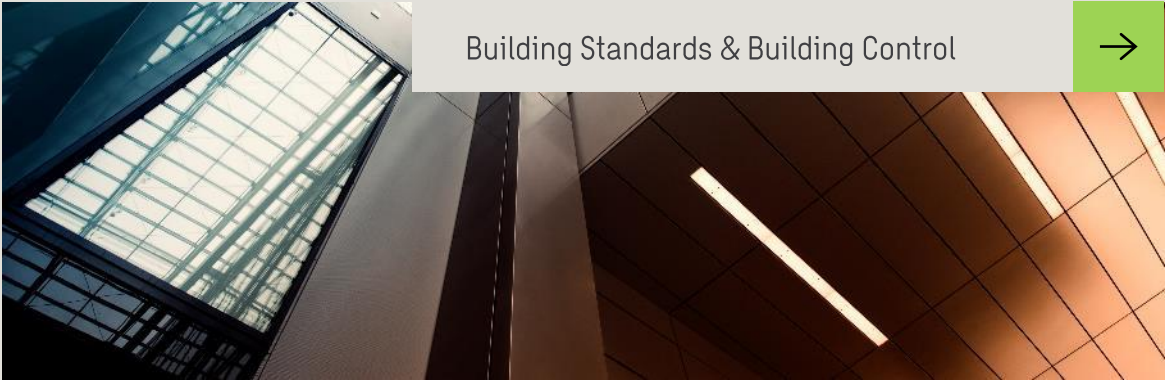

Joined-up solutions

With our multi-disciplinary skills, we can call on the right knowledge and technical capability to deliver the right solution at the right time.

What makes us proud...

Velum Sky

A 'breathing building' concept to reduce energy consumption

Providing a sustainable building design which met the client's and local authority's expectation to produce a visually appealing building that complemented the surrounding landscape. The design concept agreed with the planners was for a glazed design, and this proved to be a challenge to optimise for sustainable design.

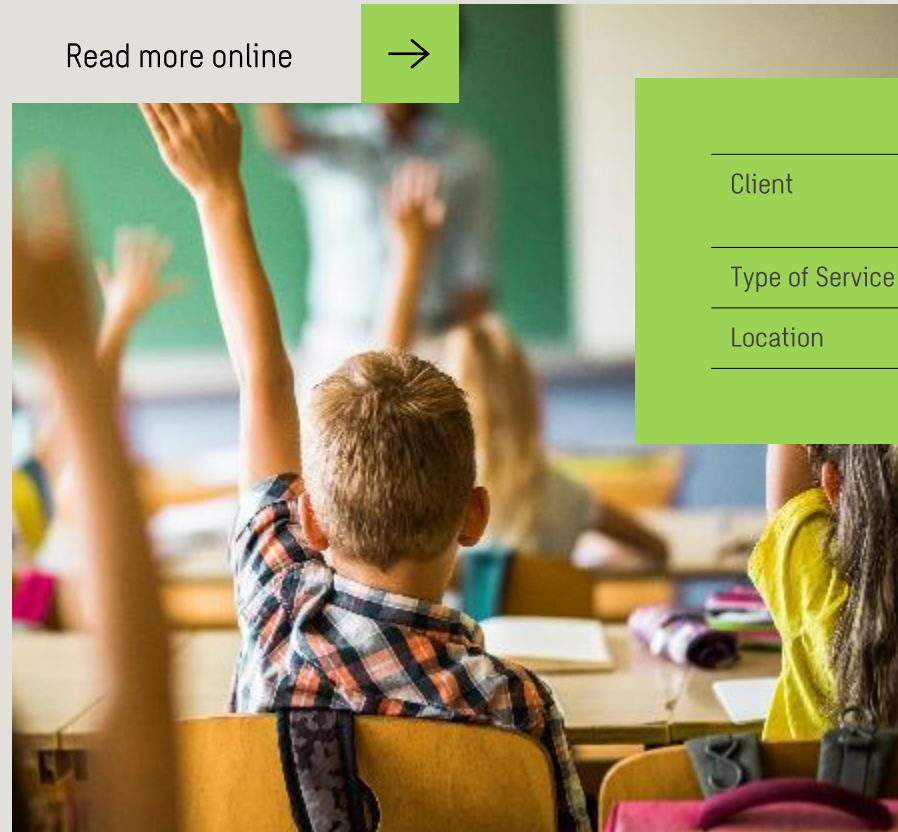

Bloom Schools

Heat Decarbonisation Plans

Surveying of 100 schools in two months to support DfE's net zero ambitions

The commission includes the liaison with the schools, surveys of facilities and the production of Heat Decarbonisation Plans (HDPs) for 107 of the 200 schools in this phase.

Supporting world-changing polar science

We are proud to work with our partners at British Antarctic Survey (BAS), BAM Nuttall, Ramboll, Hugh Broughton Architects, Norr Architecture and Turner & Townsend as we help to transform polar science through innovative engineering in one of the most remote parts of the planet.

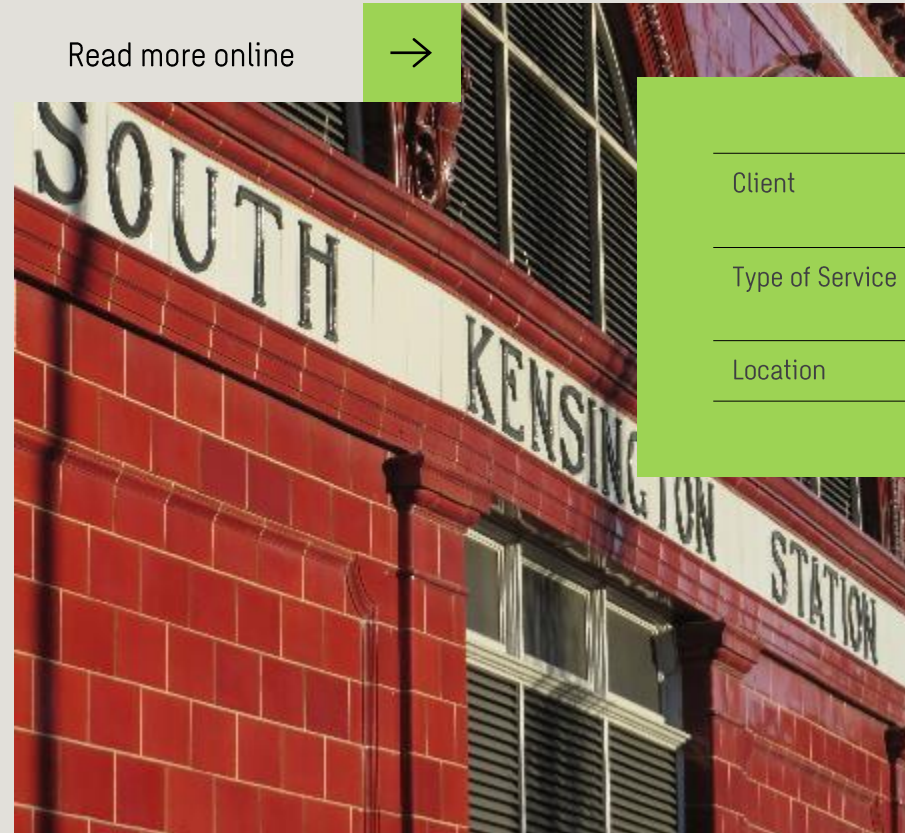

Together, across multiple projects, we are transforming how British Antarctic Survey enables and supports frontier science projects.

South Kensington tube station development

Provision of air quality and acoustics expertise for South Kensington tube station development

Sweco carried out air quality and acoustics assessments with comprehensive modelling and reporting to determine site suitability for plans for a £150m mixed-use revamp of this historic Grade II-listed building.

Client	CIT
Architect	Foster+Partners
Type of Service	Building Services
Location	London Bridge, London

Driving down carbon and operational energy usage for a net zero mixed-use redevelopment

In addition to net zero carbon, Colechurch House has a predicted CO₂ reduction of 55% below a typical office building, and a 75% reduction in operational energy. Embodied carbon targets are also set to fall well below industry expectation.

One Exchange Square

Setting the standard for 'reuse and recycle' at One Exchange Square in London

One Exchange Square centres around the reimagining of an existing, post-modern office building as it seeks to become a contemporary and sustainable workspace in one of London's liveliest districts. Bringing together some of the world's leading sustainability, wellbeing and technology assessment experts, it is aiming for the highest performance targets and setting standards for future builds.

Digital sustainability: NABERS UK Design for Performance at Aldermanbury Square

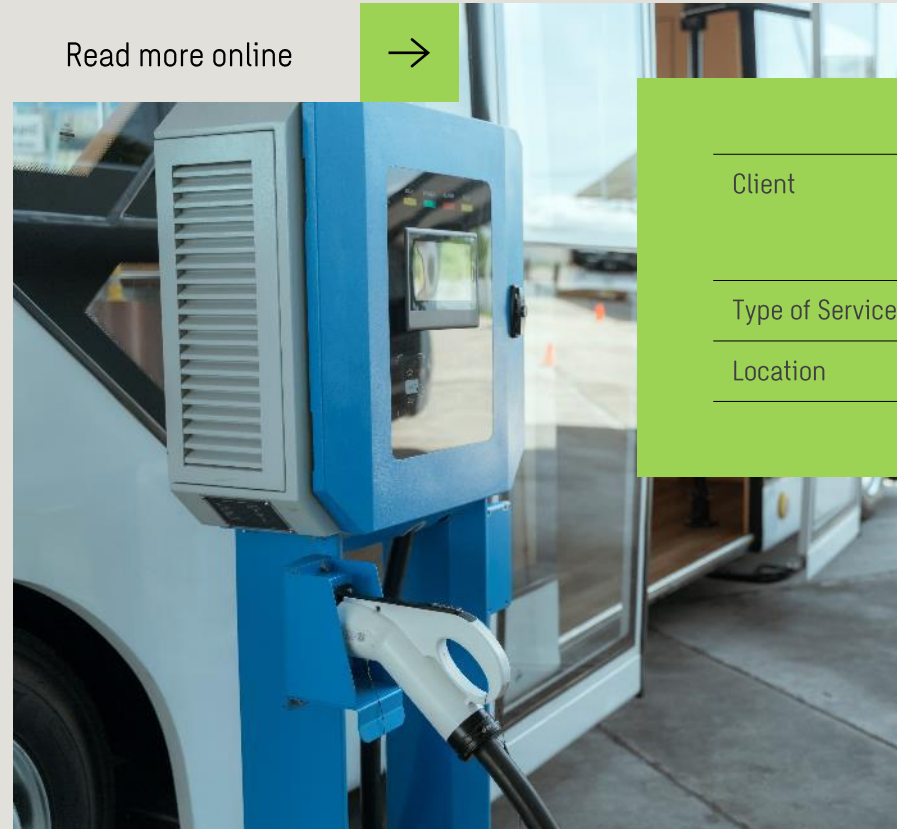

To ensure buildings are sustainable for their owners, operators and occupants, our Building Sustainability team focuses on designing buildings for better performance using an integrated approach and leveraging digital tools, processes, rating systems and frameworks. Their approach enables our clients to create efficient buildings that are affordable to build and operate, comfortable and enjoyable to inhabit, and suited to their wider context.

Peterborough EV Bus Depot Relocation

Next step: climate adaptation – Sweco evaluate sites for £4m EV bus depot relocation

Sweco is proud to have provided evaluation studies to drive plans forward for the relocation of Peterborough's bus depot, which will lead to the electrification of the city's fleet, power eco-friendly travel and ultimately unlock a future-proofed, accessible and sustainable public transport system.

Sweco Building Control supports award-winning Roots In The Sky project

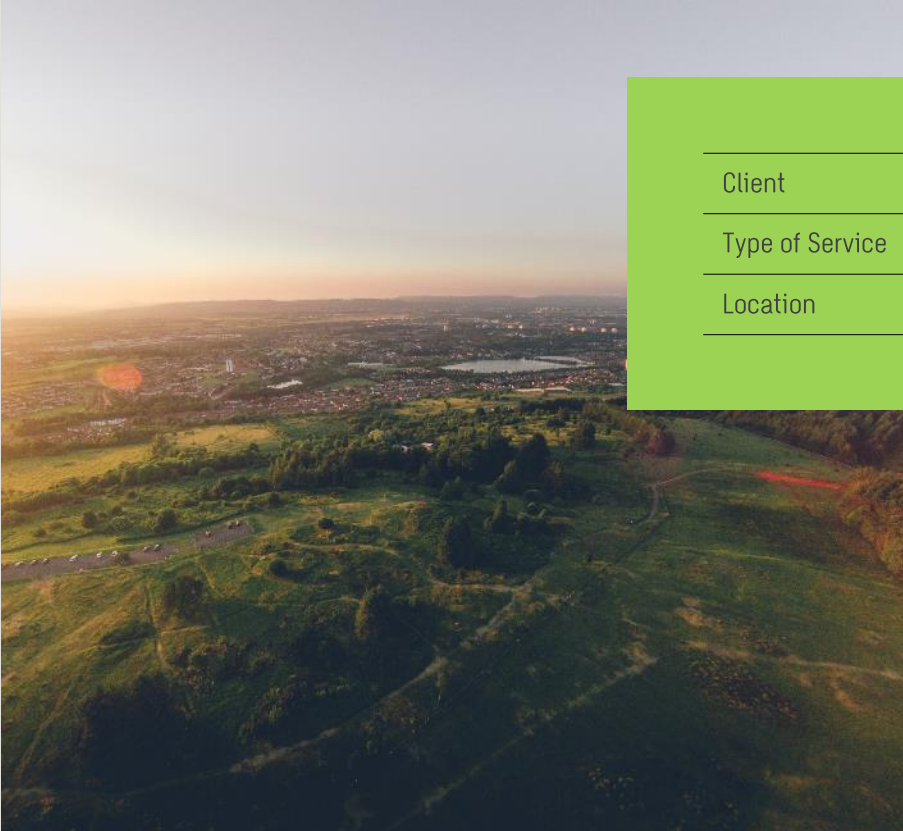

We're proud to have supported this fantastic development as Approved Inspectors, ensuring all proposals comply with Building Regulations – from fire safety and building services to accessibility approvals. Providing critical regulatory support to innovative projects is key to enabling the success of forward-thinking design which is conceived to help address the climate emergency through sustainable thinking.

Renfrewshire Net Zero

Community-led strategy for low/zero carbon heating and improved energy efficiency

With Renfrewshire Council's Local Heat and Energy Efficiency Strategy (LHEES) set to be developed alongside its #RenZero plan for net zero, we are excited to lead on a strategy report that will be a critical document for identifying a range of projects and actions to be taken forward by The Scottish Government and wider partners.

(Walking & Cycling
Infrastructure)

Location Scotland

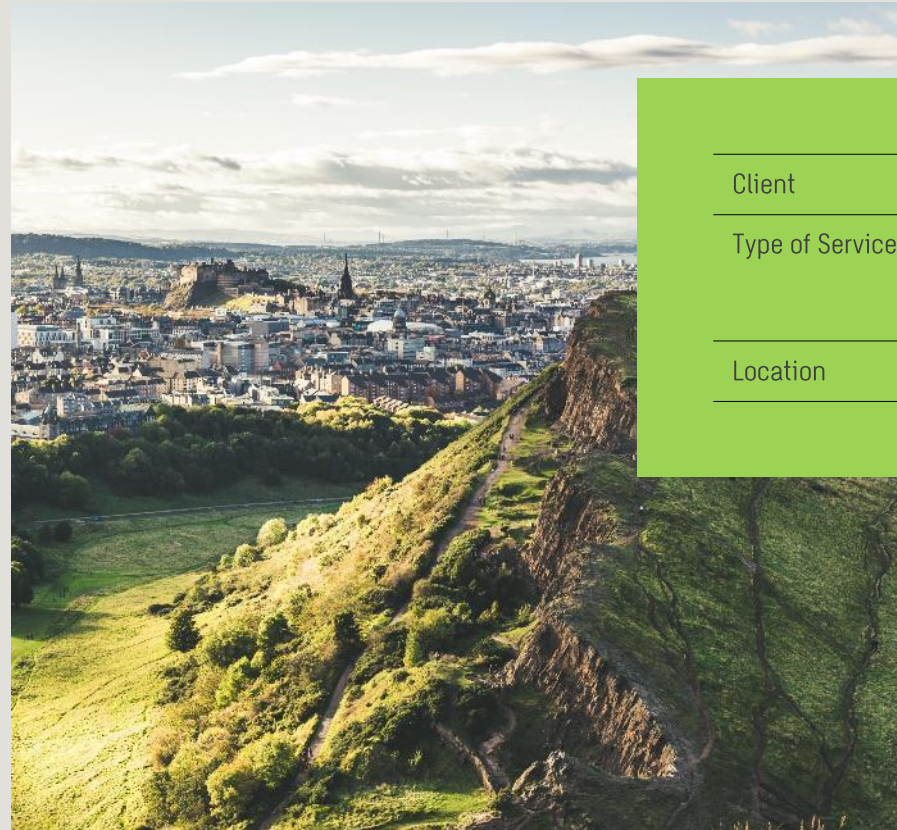

In-house innovation for planning sustainable community connections

Sweco's 'Build Your Bike Route' tool is a new web-based toolkit currently being developed with South of Scotland Enterprise and Scottish Government. Our aim is to help deliver better Active Travel routes across our rural regions, through data-led evidence, and in doing so promote circular economy in construction.

Scottish Government Climate Change Plan

Helping the Scottish Government achieve net zero emissions by 2045

The Scottish Government's Climate Change Plan (CCP), and Energy Strategy and Just Transition Plan (ESJTP), are part of a long-term commitment to tackling climate change. Sweco is proud to be playing a key role in carrying out various Impact Assessments to gauge how Scotland's net zero future may affect different sectors of the population in different ways.

Client	Scottish Government

Location	Scotland

Ayrshire Roads Alliance

Client	Ayrshire Roads Alliance
Type of Service	Sustainable Transportation Landscape Architecture Placemaking
Location	Ayrshire, Scotland

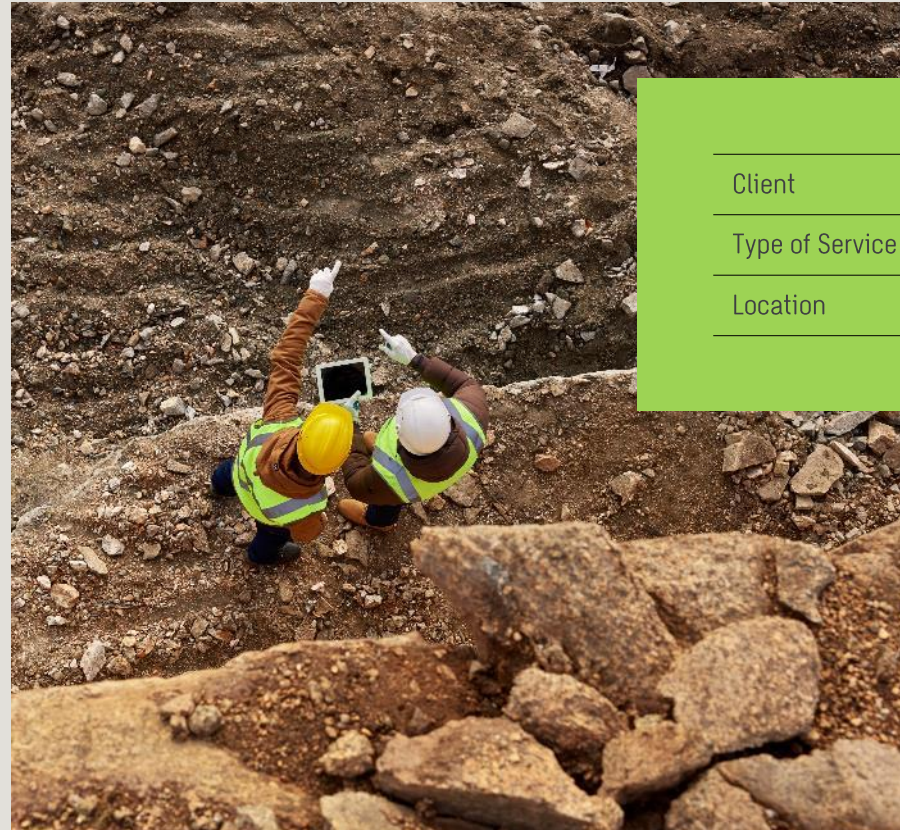

Approaching sustainable Placemaking from every angle

We're proud to be partnering with Ayrshire Roads Alliance on a range of sustainable transport and Placemaking projects, from city centre mobility modelling and transformative landscape architecture to community space design and active travel infrastructure planning.

Northern Gas Networks

Clearing the way for an enhanced infrastructure

Sweco has been appointed to support an ongoing programme of managing environmental land quality liabilities across the NGN property portfolio - with land quality assessment services including site investigation, human health and controlled waters risk assessment, assessment of statutory liability, estimate of remediation costs, detailed remediation design and regulatory engagement.

Client	Northern Gas Networks
Type of Service	Land Consultancy
Location	Northern England

Shinfield Studios

Setting the stage for a UK film industry boom

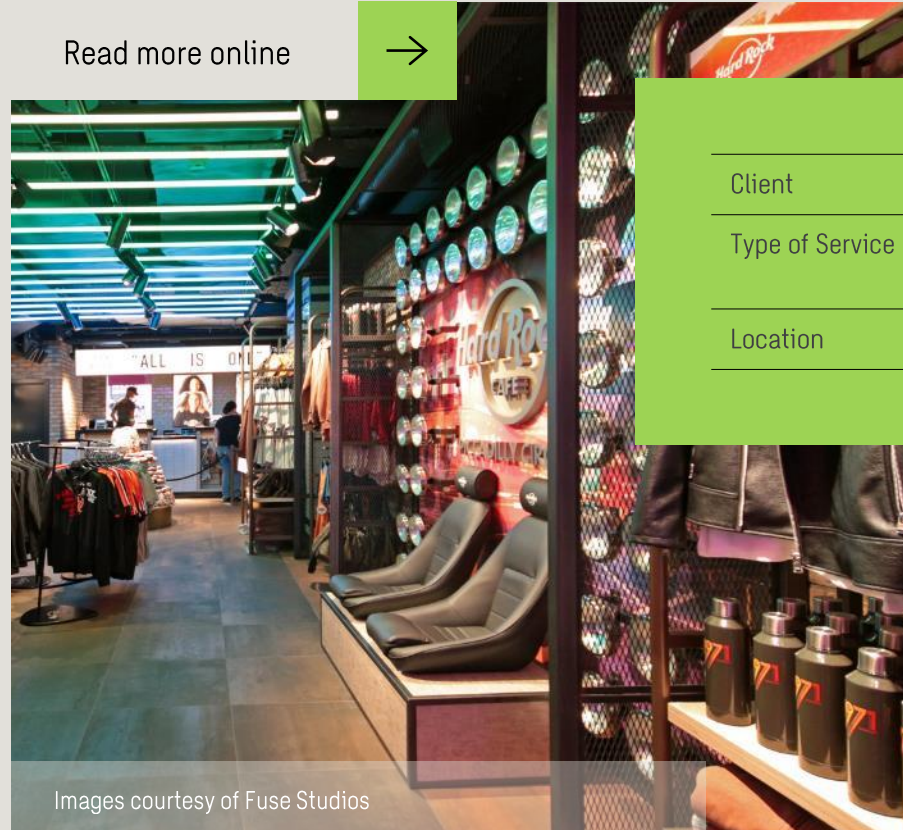

Building on the UK's global reputation for producing world-class content, Shinfield Studios will offer film and television producers nearly 1 million sq ft of studio space. Sweco is providing Civil & Structural Engineering and Geo-environmental Consultancy.

Hard Rock Café

Serving up class-leading Building Control for global clients

After almost 50 years of providing high quality dining experiences around the world, the Hard Rock Café opted to relocate and revive its flagship store in the UK capital with a complete internal fit out to accommodate a new bar, restaurant and retail space. We were appointed as the Approved Inspector for the scheme.

Navigating the complexities of compliance for a historic listed landmark

Sweco is providing Approved Inspector and building control services to a £294m development involving Manchester City Centre's historic and much-loved Grade-II listed Great Northern Warehouse.

Northumbrian Water Pilot Studies

Shaping AMP8 strategies through sustainable processes and innovation

Sweco undertook a number of Pilot Studies for Northumbrian Water, to assess the viability of alternative and nature-based solutions that could reduce spills from combined sewer overflows - with a view to providing data and direction to identify and validate activity and ways of working for projects to be undertaken during AMP8.

The art of complex construction

An iconic building, celebrating an iconic art duo in collaboration with Gilbert & George themselves.

Sweco oversaw a fascinating building services project that was a complex work of art in its own right when it came to the structural engineering involved in the repurposing of a former brewery in Brick Lane.
