

ENVIRONMENTAL PRODUCT DECLARATION (EPD)

Fast, easy, scalable, environmental product declarations for products and materials

Automate the **life-cycle assessment & EPD generation** for your products. Meet market requirements globally and locally with tailored compliance solutions.

- ✓ EPD Generator to create EPDs for **any product in any industry**, with access to the world's largest construction LCA database
- ✓ Pre-verified EPD Generator for EPDs compliant with **ISO 14040, ISO 14044, EN 15804+A1+A2, ISO21930, and ISO 14025**
- ✓ Measure product carbon footprint and report on emissions **from cradle-to-grave**. Streamline carbon footprint calculation and comply with ISOs 14040, 14044, 14067, CBAM and EN 15804
- ✓ Fully-automated **creation and verification** through EPD Hub, plus access to comprehensive benchmarking tool
- ✓ **150+ templates** for core construction and general manufacturing products, including luminaries and concrete products

What is a EPD?

An **environmental product declaration (EPD)** is a third-party verified document which reports the environmental impact of a product. EPDs are published via EPD program operators.

How do EPDs work?

EPDs use life-cycle assessment (LCA) to **estimate resource use and emissions** throughout the product's life, from raw material extraction to end-of-life disposal.

Why do manufacturers need EPDs?

EPDs help you to:

- Meet **customer demand** for sustainable material options.
- Get your products specified in a **carbon-conscious market**.
- Make it simple for customers to **achieve green building certifications**, e.g. BREEAM or LEED.
- Market the **sustainability** of your portfolio.
