

“ Storage King have always been pleased by the service, professionalism, and knowledge of the team at SRE. SRE have assisted us on a variety of projects over the years and provide clear, cost-effective advice for our schemes. We look forward to continuing our relationship with SRE on future Storage King projects. ”

**Emma Chesterton-Kay**

Head of UK Property, Storage King

“ We have worked with SRE since 2007. They are a consistently safe pair of hands in respect of identifying and managing environmental risk on projects, keeping to timetables and keeping to fees, so for every job they give me at least three less problems to worry about. ”

**Greg Dowden**

Director, WSP

“ I have appointed SRE on many of our projects and will continue to do so. They are highly professional, deliver on time and always make the whole experience seamless – an exception in the industry. As L&R hotels regular go-to consultant for sustainability and energy advice, we would highly recommend SRE. ”

**Henrik Foster**

Construction Director, London and Regional

“ Huf Haus have been using SRE since 2005 when their help and guidance was pivotal in us achieving our first carbon neutral Code for Sustainable Homes Level 6 certificate. We have continued to use them for all our energy performance requirements as their support and advice is second to none. ”

**Peter Huf**

Chief Architect, Huf Haus

“ I would highly recommend SRE. I think they are a very collaborative firm. Often sustainability can be overlooked because it is a cost and SRE have always challenged that and put forward cost-effective solutions. ”

**Olly Wood**

Director, Ayre Chamberlain Gaunt

“ SRE have regularly proven that they have a comprehensive knowledge of both current and emerging policies relating to sustainability. SRE guided the design team to achieve excellent BREEAM and EPC results and advised on Whole Life Carbon for the refurbishment scheme at Cathedral Hill Industrial Estate, Guildford. ”

**Karl Broome**

Director, Savills

Building for the Future

# We are SRE

## Sustainability and Building Physics Consultancy for the Built Environment

# Why work with SRE?

SRE is one of the UK's leading sustainability consultancies. Founded in 2005, with a vision to ensure the built environment enhances life without costing the earth, SRE has been at the forefront of the drive to raise the environmental performance of buildings for 18 years.

SRE's building physics and sustainability specialists have advised more than 500 clients on over 3,000 commercial, mixed-use and residential projects across the UK. Our loyal client base includes architects, planners, developers and surveyors.

- In the last 12 months SRE has worked with 175 clients.
- 85% of SRE's current clients are return or referral.
- 56 of our current clients we've worked with for over 6 years.
- We deliver over 60 sustainability and building physics services.
- Our Executive Team has over 100 years' experience in sustainability in the built environment!
