TIME	The Festival of Genomics & Biodata • Day 1 Agenda • June 24th 2025							
	Plenary Keynote Sessions							
08:55	**Opening Remarks**							
09:00	**At The Forefront of Genomics: Making Genomic Medicine a Reality** **Eric Green**, Director, **NHGRI**							
09:30	**More details to be announced shortly**							
10:00	**From Algorithms to Advancing Care: Lessons Learned Innovating in Diagnostics & Discovery** **Jack DiGiovanna**, Chief Science Officer, **Veliana** Sponsored by Veliana							
10:30	**Fireside Chat: From Sequencing to Sailing – A Journey of Genomics** **J. Craig Venter**, Founder, Chairman, and CEO, **J. Craig Venter Institute**							
11:00	**NETWORKING BREAK**							
	INNOVATION STAGE	**MULTI-OMICS STAGE**	**AI IN DRUG DISCOVERY STAGE**	**BIODATA STAGE**	**SINGLE-CELL & SPATIAL STAGE**	**PROTEOMICS STAGE**	**CANCER DIAGNOSTICS STAGE**	**GENOME COMBI**	**ROOM 50**
11:30	**PANEL: Sequencing in 2025 and Beyond** **Niall Lennon**, Senior Director, Genomics Platform, **Broad Institute** **Clarke Hartman**, Assistant Professor, Clinical Genetics, **Harvard University** **Barry Kumar**, Director of Operations, Yale Genome Analysis Center, **Yale University**	**How to Effectively Integrate Multi-Omic Data Into a Model Core Regulatory Network** **Kimberly Glass**, Assistant Professor, Systems Chemistry, Division of Network Medicine, **Brigham and Women's Hospital and Harvard Medical School**	**Leveraging Advanced AI/ML to Accelerate Drug Discovery: from Target Identification to Disease Indication and Patient Stratification** **Emanuele di Rinaldis**, VP, Global Head of Precision Medicine & Computational Biology, **Sanofi**	**PANEL: Scaling Up Genomic Data to Support Drug Development Strategy** **Alvis Zhang**, Investor, Data Science, **Google Ventures** **Hafid Ait**, Associate Director, Data Science, **Novartis** **Nate Gong**, Head of Bioinformatics Data Engineering, **Alexion Pharmaceuticals**	**Identifying Novel Targetable Pathways Driving Drug Cell Viruses** **Saurabh Vishnu Lakkha**, Principal Computational Scientist, **Johnson & Johnson Innovative Medicines**	**PANEL: Frontiers of Next-Gen Studies, Big Data and Bigger Opportunities** **Benjamin Ian**, Director and Head of Population Health Omics, **Bristol Myers Squibb** **Melissa Miller**, Senior Director, Tumor Biology, **Pfizer** **Gary Hess**, Senior Director, Center of Genomic Medicine, **Regeneron Genetics Center**	**Application of AI and Multi-Omic Data Science to Detect Early Carcinogenic Signatures of Metastasis and Tumour Response** **Shanthi Sarangchea**, Senior Lecturer & Group Leader, Computational Biology & Genomic Data Science, **Imperial College London**	**ROUNDTABLE DISCUSSION:** **Building inclusivity and Trust in Genomics** - How can we improve inclusivity in Omics research and address trust issues in minority populations, while enhancing genomics education at the community level? - What are the barriers preventing diverse participation in genomic research and clinical trials, and how can we address them to ensure a more inclusive future? - How can we rebuild trust in genomics research within minority populations, especially considering past ethical violations and current challenges? - What are the best practices for educating communities about genomics, and how can we foster engagement on a grassroots level? - What steps can be taken to maintain inclusivity and trust in genomics research over time, ensuring sustained, intentional involvement? **Elizabeth Ofili**, Professor of Medicine, Morehouse and Emeron Associate Dean, **Morehouse School of Medicine** **Angelica Tavera Berrio**, Lupus Center San Juliano, **Massachusetts General Hospital** **Maria Chahrour**, Associate Professor, **UT Southwestern Medical Center** **Anna Lewis**, Research Scientist and Associate, **Harvard Medical School and Brigham and Women's Hospital**	**ROOM 50** **WORKSHOP:** **Mastering Spatial Data Analysis: From Basics to Cutting Edge Innovations** This workshop is designed to provide a comprehensive introduction to spatial data analysis, with a focus on its applications in genomics and biodata. Participants will learn about the fundamental concepts, methodologies, and tools used in spatial data analysis, including the latest advancements in the field. The workshop will feature hands-on exercises, enabling participants to apply the concepts learned to real-world datasets. **Mihir Vasant Gadre**, Postdoctoral Research Associate in Psychology, **Baylor College of Medicine** **Ilya Kovalenko**, Principal Investigator, **Brigham and Women's Hospital** **Allison Hao**, Assistant Professor of Urology, **University of Virginia**
12:00	**More details to be announced shortly** Sponsored by: Illumina Speaker: TBC	**More details to be announced shortly** Sponsored by: Illumina Speaker: TBC	**Sponsored slot available**	**A Modern Data & Compute Solution for Biological R&D** **Kyle Gilde**, Chief Operating Officer, **LatchBio** Sponsored by: LatchBio	**More details to be announced shortly** Sponsored by: Parse Biosciences	**More details to be announced shortly**	**More details to be announced shortly** Sponsored by: Illumina2		
12:30	**Reliable Detection of DNA Modifications Using Long Read Sequencing** **Gang Fang**, Professor, Department of Medicine, **Mount Sinai**	**AIR: A Method for High-Dimensional Multi-View Data Integration and Prediction Accounting for Subgroup Heterogeneity** **Sandra Safo**, Associate Professor of Biostatistics, Division of Health Data Science, **University of Minnesota**	**Target Identification and Validation with One Research Pill Fails Lakes** **Marvin von Grotthuss**, Director, Data Science & Analytics, **Takeda Pharmaceuticals**	**Using Million Veterans Program Data to Improve Health Care in the Real Master of Veterans** **Jason Vassy**, Associate Professor, **Harvard University, Genome of Veterans**	**Identifying Novel Targetable Pathways Driving Drug Cell Viruses** **Saurabh Vishnu Lakkha**, Principal Computational Scientist, **Johnson & Johnson Innovative Medicines**	**Precision Proteomics: Advancing Mechanisms with Next-Gen Protein Sequencing** **Steve Gygi**, Professor, Cell Biology, **Harvard Medical School** **Winston Timp**, Associate Professor, Biomedical Engineering, **Johns Hopkins University** Sponsored by: Quantum-Si	**Advancing Precision Medicine in Breast Cancer: Targeting Resistance Mechanisms and Metastasis** **Adrian Lee**, Director, Institute for Precision Medicine, **UPMC, University of Pittsburgh**		
13:00	**LUNCH & LIVE LOUNGE TALKS**								
13:05	**More details to be announced shortly** Sponsored by: Beckman Coulter								
13:20	**More details to be announced shortly** Sponsored by: Single Cell Discoveries								
13:35	**Rare Variant Alzheimer Detection from Urinary cfDNA by Droplet Digital PCR** **Aravind Ziemanis**, Product Manager, **Omega Bio-tek** Sponsored by: Omega Bio-tek								
13:50	**More details to be announced shortly** Sponsored by: Takara Bio								
14:05	**DNA5: easy high-throughput extraction from transcriptomics-forward generation compound screening** **Ricardo Gutmar**, CEO and Co-Founder, **Biblaze Genomics** Sponsored by: Biblaze Genomics								
	INNOVATION STAGE	**MULTI-OMICS STAGE**	**AI IN DRUG DISCOVERY STAGE**	**BIODATA STAGE**	**SINGLE-CELL & SPATIAL STAGE**	**PROTEOMICS STAGE**	**CANCER DIAGNOSTICS STAGE**	**GENOME COMBI**	**ROOM 50**
14:25	**Exploration of Transcriptome Diversity Using Long Read Sequencing** **Daniel Le**, Principal Bioinformatics Scientist, **Genentech**	**How to Use Directional Multi-Omics Data to Identify Novel Therapeutic Drug Pathway Enrichment Analysis** **Jiri Hulcr**, Principal Investigator of Computational Biology, **The Interior Institute of Cancer Research (ICR) &** Associate Professor, **University of Toronto**	**Applying Foundation Models and Generative AI for Drug Design and Discovery** **Andrei Kotelnikov**, Director, Computational Chemistry, **AstraZeneca**	**Advancing the Landscape of Clinical Actionability in Cancer: Architecture-based Framework from the INFORAZE Oncology Consortium** **Jeremy Chenard**, Director, Clinical Genomics, **Brigham and Women's Hospital**	**Single-Cell Sequencing to Evaluate ARRV-C45 in Vitro, First-in-Human Administration if FIH/LTI Initiative Driving Patient Just-Lumor Immunity** **Kyle Hatliestl**, Group Lead, **AbbVie**	**Using High Throughput Affinity Proteomics to Develop a Proteomic Aging Clock** **Steve Sofer Chin**, Assistant Professor, **University of Connecticut**	**Discovering cfDNA Methylation Biomarkers for Rapid Blood-based Cancer Detection and Monitoring** **Robert Gallia**, Inaugural Director of Liquid Biopsy, **University of Southern California**	**ROUNDTABLE DISCUSSION:** **AI in Healthcare Transformation** AI is transforming the realm of healthcare to become a crucial component in modern medicine. It has the potential to revolutionize diagnostics, treatment recommendations, and even forecast future health complications before they manifest. With advancements in AI technology and explosive growth in sophisticated AI model particles, the transformative power of AI promises to revolutionize healthcare delivery, making it more precise, efficient, and effective. This roundtable will delve into the latest advancements in AI technology and explore their profound implications for the future of healthcare. **David Ouken**, Professor of Medicine, **Harvard Medical School** **Jeriel Ree**, Associate Professor Computational Medicine & Genetics, **University of Washington-Seattle** **Zhaoming Liu**, Clinical Computational Scientist, **Texas Children's Hospital &** Endowed Chair, Associate Professor in Pediatrics, **Baylor College of Medicine** **Jeremy Lee**, Senior Vice President, Chief Data and Analytics Officer, **Swiss Value Creation Institute**	**WORKSHOP:** **Computational Biology Upskilling** As we are seeing many people pivot their career and step into the exciting world of data science, our Computational Biology Upskilling discussion aspires you to share your experiences, challenges, and tips to help translate into this high-demand field. You will be able to ask your burning questions to professionals who have successfully made the career transition and build a strong portfolio and network effectively. **Tommy Tang**, Director, Bioinformatics, **AstraZeneca** **Dean Lee**, Senior Director, Bioinformatics, **Novartis**
14:55	**More details to be announced shortly** Sponsored by: Oxford Nanopore Technologies	**Sponsored slot available**	**Sponsored slot available**	**More details to be announced shortly** Sponsored by: DNAnexus	**More details to be announced shortly** Sponsored by: Scale Biosciences	**More details to be announced shortly** Sponsored by: Olink Proteomics	**Sponsored slot available**		
15:25	**Long-Read Sequencing for Brain Tumours** **Amelia Rodriguez**, Vice Chair of Research, **University of Arkansas Medical Sciences**	**Applying Multi-Omics Data Integration with Knowledge Graphs and Network Analysis to Identify New Targets** **Bin Li**, Senior Director, Computational Biology, **Takeda**	**Utilizing Foundation Models to Evaluate Immunotherapy Resistance Mechanisms in Cancer** **Gaurav Kumar**, Associate Director, Computational Biology, **Teva Pharmaceuticals**	**Automated Real-World Data Integration Improves Cancer Outcomes Research** **Nicholas Schultz**, Director, Cancer Data Science Initiative, **Memorial Sloan Kettering Cancer Center**	**Single-Cell Sequencing to Evaluate ARRV-C45 in Vitro, First-in-Human Administration if FIH/LTI Initiative Driving Patient Just-Lumor Immunity** **Kyle Hatliestl**, Group Lead, **AbbVie**	**Prolonged Deep Proteomics Analysis of Human Colon To Identify Druggable Targets** **Sahaa Vaidya**, Assistant Director, **Pfizer**	**Modulating the Biology of cfDNA to Improve Liquid Biopsies** **Viktor Adalsteinsson**, Director, Genome Center for Cancer Diagnostics, **Broad Institute**		
15:55	**NETWORKING BREAK**								
	INNOVATION STAGE	**MULTI-OMICS STAGE**	**AI IN DRUG DISCOVERY STAGE**	**BIODATA STAGE**	**SINGLE-CELL & SPATIAL STAGE**	**PROTEOMICS STAGE**	**CANCER DIAGNOSTICS STAGE**	**GENOME COMBI**	**ROOM 50**
16:25	**Revealing Complex Genotype-Phenotype Correlations using Population-Scale Long-Read Sequencing** **Fritz Sedlazeck**, Associate Professor, **Baylor College of Medicine**	**Leveraging Deep "Omics" and ML Integrations to Uncover Disease-Relevant Signatures** **Deepak Pai**, Senior Scientist, **Genome Sciences**	**The Promise of AI/ML for Preclinical Drug Discovery** **Brandon Peters**, Vice President, Biology, **Recursion**	**Harnessing Multi-Omic Cancer Data with Graph Neural Networks: Insights from the Impactful Discovery Tool for Cancer Progression and Response to Therapy** **David Joseph**, Project Officer, Genomic Data Commons, **NCI**	**Finding Actionable Therapeutic Vulnerabilities in Breast Cancer Using Proteogenomics** **Jake Leng**, Co-leader of the Breast Cancer Programme, **Cleveland Clinic**	**Leveraging a Multi-Omic Approach to Liquid Biopsy Cancer Detection and Profiling** **Ankit Chaudhuri**, Vice Pres. Translational Research, **Mayo Clinic**			
16:55	**Sponsored slot available**	**Sponsored slot available**	**Sponsored slot available**	**Sponsored slot available**	**A Scalable Platform for Simultaneous Single-Cell Imaging and Sequencing** **Caroline Gaten**, Director, Applications Development, **PhenoSwift** Sponsored by: PhenoSwift	**Sponsored slot available**	**Sponsored slot available**	**ROUNDTABLE DISCUSSION:** **Transforming Diagnosis in the Digital Age: Digital Pathology & AI** This session will explore the opportunities and challenges associated with implementing digital pathology and AI-powered discovery and patient selection tools at how these advances can reshape translational research. We will address potential hurdles in integrating this technology into clinical practice, consider the evolving role of pathologists in delivering precise diagnosis and assessing biomarkers for companion diagnostics. **Liron Caseria**, Digital Pathology Technical Biology, **Bristol Myers Squibb** **Glingzi**, Director, **Moderna** **Jin Gulzelmeyer**, Associate Director, Computational Biology, **Broad Institute of MIT and Harvard**	**More details to be announced shortly**
17:25	**Integrating Data to Uncover Molecular Mechanisms of Cancer Development and Genotype-Phenotype Insights** **Mona Nafisi**, Bioinformatics Manager, **Children's Mercy Research Institute**	**How to Use Machine Learning Approaches to Interpret the Tumor Microenvironment Using Spatial Immune Profiling & Spatial Transcriptomics Data** **Arvind Rao**, Professor of Computational Medicine and Bioinformatics, **University of Michigan Ann Arbor**	**PANEL:** **Empowering Your AI Applications in the Therapeutics Target Discovery** **Manoj Sandyal**, Director of Research, Bioinformatics, Center for Clinical and Translational Science, **BostonMed** **Michael Steinbaugh**, Director, Data, AI & Genome Science, **Merck** **Shannon Klauber**, Executive Director, Precision Medicine and Computational Biology, **Sanofi** **Simona Cristea**, Head of Genomics and AI, **Dana-Farber Cancer Institute** **Rivas di Lenhart**, Director of Therapeutics Data Science and Professor of Genomic Medicine, **The University of Texas MD Anderson Cancer Center**	**Advancing Alzheimer's Research through Genomic Insights from ADNI and NIAGADS** **Li Sun Wang**, Co-Director, Penn Neurodegeneration Genomics Center, **University of Pennsylvania**	**Map Events and Non-Genetic Disease Drivers through Single-Cell Multi-Omics** **Anna E. Sam**, Assistant Professor, **Weill Cornell Medicine and New York Presbyterian Hospital**	**Computational Methods for Large-Scale Proteogenomic Data Analysis** **Ali Saber**, Director of Computational Proteomics, **Broad Institute**	**Leveraging a RNA-Only Approach to Liquid Biopsy and Minimal Residual Disease Detection** **Lucas Ferreira**, Head of Translational Genetics, Hematology R&D, **AstraZeneca**		
17:55	**DRINKS RECEPTION**								
19:25	**CLOSE**								

TIME	The Festival of Genomics & Biodata • Day 2 Agenda • June 25th 2025							
	Plenary Keynote Sessions							
08:55	**Opening Remarks**							
09:00	**Catching the Floating DNA Around Us** **Carl Zimmer**, New York Times Columnist and Author **The Power of Nanopore Genomic Screening** **Ruben Groen**, Professor of Medicine, **Harvard Medical School**							
09:30	**More details to be announced shortly**							
09:45	**Unlocking Data, Unlocking Treatments: AI in AIS** **Caroline Pavitte**, Head of Health, **Challenge Works** **Pat Brownelly**, CEO, **SF'000 Brain Project**							
10:00	**Using Advanced Molecular Diagnostics to Improve Risk-Aligned Patient Care and Outcomes** **Matthew Goldberg**, Senior Vice President, Medical, **Castle Biosciences** *Sponsored by Castle Biosciences*							
10:30	**PANEL: Reimagining Healthcare through Bridging Innovation and Patient Impact** **Nicole Renaud**, Director - Global Co-Lead of Human Genetics & Tx Mgmt, **Novartis** **Jeff Reid**, Vice President, RGC Chief Data Officer, **Regeneron** **Joseph Matarasso**, Executive Director, **Bristol Myers Squibb** **Melissa Miller**, Senior Director, Human Genetics, **Pfizer**							
11:00	**NETWORKING BREAK**							
	INNOVATION STAGE	**MULTI-OMICS STAGE**	**AI IN DRUG DISCOVERY STAGE**	**BIODATA STAGE**	**SINGLE-CELL & SPATIAL STAGE**	**PROTEOMICS STAGE**	**CANCER DIAGNOSTICS STAGE**	**GENOME COMBI**	**ROOM 50**
11:30	**The Development of Aging Related DNA Methylation Clocks and Applications of Phenotypic Clocks** **Andrea Cardenas**, Assistant Professor, **Stanford University**	**Clinical Proteomics and Metabolomics in Biopharma Drug Discovery and Development** **Sanja Dacic**, Senior Director, Centers of Genomic Research, Discovery Science, R&D Biotherapeutics, **AstraZeneca**	**Genomics, Stem Cells, and AI for Drug Discovery** **Joseph Wu**, Director, Stanford Cardiovascular Institute, **Stanford University**	**TraDeOmics: A Multi-Modal Omics Data Management and Analytics Platform** **Tulio Pereira**, Senior Manager, Data Management and Analytics, **Takeda** Sponsored by: Exscalia	**Harnessing Multi-Omic Insights: Integrating Genomics, Proteomics, and Clinical Data for Precision Medicine** **Wesley Tansey**, Principal Investigator & Assistant Attending, Computational Oncology, Memorial Sloan Kettering Cancer Center	**Supporting Clinical Trials with High-Throughput Proteomic Profiling** **Andrea Rodriguez**, Associate Director, **Novartis**	**PANEL: Facing the Way Towards Liquid First: Challenges, Opportunities and Reality** **Lauren Lehman**, Executive Director, **BioioMed** **Raissa Bello-Pontesi**, Director of Precision Medicine, **ZERO4** **Aleksandra Markowska**, Director, **AstraZeneca**	**ROUNDTABLE DISCUSSION:** **Driving Innovation in Precision Medicine for Broader Implementation** In this roundtable discussion, uncover answers to your most pressing questions, including: What genomic and data analytics advancements are needed to accelerate precision medicine? How is clinical genomic staging personalized treatment strategies? What barriers must be overcome to expand precision medicine to underserved populations? What are the emerging opportunities in clinical genomics for cancer care and care diseases? **Simon Hanks**, Assistant Professor, Breast & Gynecologic Medical Oncology, **MD Anderson Cancer Center** **Miriam Kim**, Director, Precision Medicine Core, **Beth Israel Deaconess Medical Center** **Kathrine Wiesmayyadi**, Associate Director, Clinical Genomics & Molecular Diagnostics, **NYU Langone** **Jon Heng**, Assistant Professor of Pathology, **Harvard Medical School &** Director, Genetics Unit, Precision Risk Medicine Core, **MGHC**	**WORKSHOP:** **Enhancing Variant Analysis and Interpretation** Clinical interpretation of DNA sequence variants is a crucial part of reporting results from genetic testing. The goal of this workshop is to provide an overview of the genetic standards in clinical settings. However, the vast number of DNA sequence variants identified in samples, as well as the lack of data for many variants, present a challenge for clinical interpretation. This workshop will help develop and improve attendees' skills and knowledge for interpreting genetic variants, including identification, classification, clinical relevance and utilizing relevant tools and resources. **Heidi Rehm**, Co-Director, Medical and Population Genetics, **Medical** Director, Clinical Sequencing Platform, **Broad Institute** **Liz Worthey**, Director, Clinical Genomics Laboratory, **UAB School of Medicine** **Sugeeth Balasubramanian**, Director, Computational Biology, **Regeneron**
12:00	**Sponsored slot available**	**Sponsored slot available**	**Sponsored slot available**	**Unlocking the Secrets of Data: Challenges and Solutions in the Discovery Value Chain** **Sponsored by: Exscalia**	**Advancing Tissue Biology Research with Visium software for Spatial Multi-omics** **Nina Cabezas**, CSO, **Aspect Analytics** Sponsored by: Aspect Analytics	**Sponsored slot available**	**Sponsored slot available**		
12:30	**Harnessing Epigenetics to Combat Chemoresistant Cancer Cells** **Neha Shrestaj**, **Dr. Jude's Research Hospital**	**The Power of Scaling and Deepening Genomics to Drive Medicines of the Future** **Gonçalo Abecasis**, Vice President, Human Genetics and Chief Genetics Officer, **Regeneron**	**Phenomic Foundation Models for Drug Discovery** **Safiye Celik**, Associate Director of Data Science, **Recursion**	**Where Quantum Computing Meets Clinical Trials—in the Age of AI** **Jonas Grauly**, Senior Scientist, **Amgen**	**Novel Spatial Molecular Pathology Approaches to Understand Disease Pathophysiology and Improve Drug Discovery** **Silvia Cho**, Associate Director, **AbbVie**	**Exploring Organ Crosstalk in a Model for Pharmacokinetic Studies** **Carlo Cogle**, Director of Translational Research, **Brigham and Women's Hospital**	**Multi-omics Analyses of CTCs for Cancer Profiling and Diagnostics** **David Miyamoto**, Physician-Scientist and Radiation Oncologist, **Massachusetts General Hospital**		
13:00	**LUNCH & LIVE LOUNGE TALKS**								
13:05	**More details to be announced shortly**								
13:20	**More details to be announced shortly**								
13:35	**More details to be announced shortly**								
13:50	**More details to be announced shortly**								
	INNOVATION STAGE	**MULTI-OMICS STAGE**	**AI IN DRUG DISCOVERY STAGE**	**BIODATA STAGE**	**SINGLE-CELL & SPATIAL STAGE**	**PROTEOMICS STAGE**	**CANCER DIAGNOSTICS STAGE**	**GENOME COMBI**	**ROOM 50**
14:10	**The Genomes Are Here: Harnessing Whole Genome Sequencing to Redefine Target Discovery in Complex Disease** **Paola Bronson**, Associate Director, Target Genetics, Human Genetics and Genomics, **GSK**	**Multi-Modal Spatial -Omics Characterization and Determination of Cell Identity in Pancreatic Cancer** **Eugene Drokhlyansky**, Associate Scientific Director, **Bristol Myers Squibb** **Brian Raby**, Director, **Bristol Myers Squibb**	**Biological Sequence Learning at GSK.ai** **Ali Alijar Fraser**, Director of Data Science, **GSK**	**Large Scale Population Genetics Influencing Genomics & Rare Disease Drug Discovery** **Guillermo del Angel**, Executive Director, Rare Genomic Hunt, Centre for Genomic Research, **AstraZeneca**	**Real-Naming: A Fundamental Single-Cell and Spatial Data Strategy for Predicting Disease Signatures** **Dean Lee**, Senior Scientist, **Novartis**	**Developing a Spatial Analysis Toolbox for Early Drug Discovery using Targeted Proteomics and Transcriptomics** **Vineeth Raghavan**, Senior Scientist I, **AMGEN**	**More details to be announced shortly** **Alex Rai**, Professor of Pathology and Cardiology, **Columbia University**	**ROUNDTABLE DISCUSSION:** **Exploring the Future of Genomic Sequencing: Innovations and Impact** In this roundtable discussion, join peers and panelists as we consider questions, such as: What is the current state of play of the genomic sequencing field? What are some new innovations and sequencing technologies that are progressing the field and allowing forms of genomic sequencing, and how are those impacting genomic research and drug discovery? How are new sequencing technologies changing the landscape? How is genomic sequencing enabling personalized treatments for cancers and rare diseases? How is genomic sequencing influencing early detection, diagnosis and prevention? Can CRISPR-based gene editing tools be integrated into genomic sequencing for early disease detection and diagnosis? What does the future of genomic sequencing look like? Can we use genomic sequencing techniques to learn more about epigenetics and epigenomics? **Josh Fiorenza**, Senior Scientist, Genomics Discovery Immunology I, **Pfizer**	**WORKSHOP:** **How to Better Computationally Analyze Your Single Cell RNA Sequencing (scRNA-seq) Data** This workshop will present an overview of the computational analysis of single cell RNA sequencing data. It will hand hands on demonstration of the most common tasks and the tools available for addressing these tasks. Attendees will learn the theory and provide guidelines regarding best practices for performing computational analysis. This tutorial assumes attendees have a basic knowledge of genomics and some working skills on data analysis and overview for bioinformaticians seeking to leverage new computational methods. **Gracie Gordon**, Computational Scientist I, **Genentech** **Mary Flynn**, Senior Principal Scientist, **Pfizer** **Dhaivik Sakhiya**, Principal Machine Learning Research Scientist, **AMGEN**
14:40	**Applying Molecular Genetics and Epigenetics to Study Cancer Susceptibility** **Heather Mason-Suares**, Associate Professor in Pathology, **Brigham and Women's Hospital**	**Lasting Multi-Modal Strategies for Integrative Radiomics** **Heiko Peinsenthaer**, Director - Radiomics & Computer Vision, Oncology R&D Data Science, **Astrazeneca**	**Biologics AI Movement: Applying Foundation Models and Generative AI to Industrialize Drug Design and Discovery** **Donna Hicks**, Product Owner Digital R&D, **Sanofi**	**Using Integrative Proteogenomic Analysis to Identify Novel Therapeutic Vulnerabilities for Colorectal Cancer** **Gabrielle Vasiliji**, Assistant Professor, **McGill University**	**Single-Cell and Spatial Transcriptomic Analysis to Understand Mechanisms of Progression to Ovarian Cancer** **Kristin Beaumont**, Assistant Professor, Obstetrics & Gynecology, Division of Gynecologic Oncology, Department of Obstetrics and Gynecology, **Johns Hopkins University School of Medicine at Johns Hopkins**	**Multimodal Imaging Methods for Understanding Cellular Biological Processes** **Elizabeth Hermsen**, Assistant Professor, **UC Davis**	**Comparison Diagnostic Development for TCR Tx** **Elaine Joseph**, Director of Precision Medicine, **AstraZeneca**		
15:10	**Assessing Genome Integrity of Gene Therapy Vectors Using Long Read (SMRT) Sequencing** **Prasad Kovamukati**, Scientist - Next Generation Sequencing, **Pfizer**	**Decipher Responses to Infections using Multi-Scale Multi-Omics Approaches** **Christian Penn**, Associate Professor in the Department of Biochemistry and Molecular Biology, **Johns Hopkins Bloomberg School of Public Health**	**PANEL: How to Optimize Data Strategies & Trends to Improve AI for Drug Discovery?** **Drew Dolgitzki**, Head of Computational Biology, Data Science & Digital Technologies, **Sanofi** **Emanuela di Rinaldis**, VP, Global Head of Precision Medicine & Computational Biology, **Sanofi** **Robb Jones**, Innovation Lead - Data Science & AI/ML, **Novo Nordisk** **Charles O'Donnell**, Vice President, Head of Computational Biology, Data Science & Informa, **Design Therapeutics**	**Harnessing Population-Scale Biobank-Leveraging Data from the All of Us Research+ Worldwide+ and NIAGADS + RADC3R Programs for Precision Health** **Eric Greene**, Director, Clinical Genomics, Human Genomics Sequencing Center, **Baylor College of Medicine**	**Rebecca Matthews**, Principal Scientist, Discovery Biology, Group Lead Neuro/Immunology Stem Cell Model Development, **Merck** **Alpha Kulkarni**, Associate Director, **Single-Cell Genomics, Broad Medical School** **Priya Choudhuryan**, Vice President, Head of Computational Biology & Bioinformatics & **Scan Therapeutics** **Vinesh Raghuram**, Director, **AbbVie**	**Spatial Proteotranscriptomic Integration to Reveal Therapeutic Resistance Mechanisms in Cancer** **Martin Hemberg**, Associate Professor, Neurobiology, Brigham and Women's Hospital	**Using Immunotherapy Earlier to Target a Genetic Mutation: Most Promising Experimental Rectal Cancer Treatment** **Andrea Cercek**, Medical Oncologist, Founder and Co-Director, Center for Young Onset Colorectal and Gastrointestinal Cancers, **Memorial Sloan Kettering Cancer Center**		
15:40	**CLOSE**
