TIME	The Festival of Genomics & Biodata • Day 1 Agenda • June 24th 2025
08:55	**Plenary Keynote Sessions**
09:00	**Opening Remarks** **At The Forefront of Genomics: Making Genomic Medicine a Reality** **Eric Green**, Former Director, **NHGRI**
09:30	**More details to be announced shortly**
10:00	**From Algorithms to Advancing Care: Lessons Learned Innovating in Diagnostics & Discovery** **Jack Dibianca**, Chief Science Officer, **Veliana** *Sponsored by* Veliana
10:30	**Fireside Chat: From Sequencing to Sailing – A Journey of Genomics** **J. Craig Venter**, Founder, Chairman and CEO, **J. Craig Venter Institute**
11:00	**NETWORKING BREAK**

	INNOVATION STAGE	MULTI-OMICS STAGE	AI IN DRUG DISCOVERY STAGE	BIODATA STAGE	SINGLE-CELL & SPATIAL STAGE	PROTEOMICS STAGE	CANCER DIAGNOSTICS STAGE	GENOME DOME	ROOM 50
11:30	**PANEL: Sequencing in 2025 and Beyond** **Niall Lennon**, Senior Director, Genomics Platform, **Broad Institute** **Claire Kamm**, Director of Genomic Core, **Harvard University** **Rony Kumar**, Director of Operations, Tide Genome Analysis Center, **Yale University**	**How to Effectively Integrate Multi-Omic Data to Model Gene Regulatory Networks** **Kimberly Glass**, Assistant Professor of Medicine, Channing Division of Network Medicine, **Brigham and Women's Hospital and Harvard Medical School** **Yuguang Ban**, Head of Bioinformatics Data Engineering, **Alexion Pharmaceuticals**	**Leveraging Advanced AI/ML to Accelerate Drug Discovery: Insights from Industry Leaders** **Innovation and Patient Stratification** **Emmanuelle el Khoueiry**, VP, Global Head of Precision Medicine & Computational Biology, **Sanofi**	**PANEL: Scaling Big Genomics Data to Support Drug Development Strategy** **Victor Zhang**, Associate Director, Data Science, **Alx** **Heidi Ke**, Associate Director, Data Science, **Novartis** **Yuguang Ban**, Head of Bioinformatics Data Engineering, **Alexion Pharmaceuticals**	**Identifying Novel Targetable Pathways Driving Alzheimer's Disease** **Gareth Victoria Lashley**, Principal Investigator, **Johnson & Johnson Innovative Medicine** *Sponsored by* Parse Biosciences	**PANEL: Proteomics at Scale: Big Studies, Big Data and Even Bigger Opportunities** **Benjamin Sun**, Director and Head of Population Health Omics, **Bristol Myers Squibb** **Melissa Miller**, Senior Director, Human Genetics, **Pfizer** **Sonja Hess**, Senior Director, Centre of Genomic Regulation, Proteomics Core Facility, **EMBL Barcelona** **Joinn2Know**	**Application of AI and Multi-Omic Data Science to Extract Early Carcinogenic Patterns: Detection of Cancer Tumour Responses** **Shanthi Sankaralingam**, Senior Lecturer & Group Leader, Computational Biology & Genomic Data Science, **Imperial College London**	**KEYNOTE SESSION** **Building Inclusivity and Trust in Genomics** How can we improve inclusivity in Omics research and address trust issues in minority populations, while enhancing genomics education at the community level? - What are the barriers preventing diverse communities from engaging in genomic research, and how can we address them to ensure equal inclusion/future? - How can we rebuild trust in genomics research within minority populations, especially considering past ethical violations and current challenges? - What are the best practices for educating communities about genomics, and how can we foster engagement at a grassroots level? - How can researchers, educators, and community leaders work together to increase participation in genomics and ensure that data is truly representative of diverse populations? - What steps can be taken to maintain inclusivity and trust in genomics research, over time, ensuring continued participation and engagement? **Elizabeth Ofili**, Professor of Medicine, Morehouse School of Medicine **Angelina Torres-Borrello**, Lead Cancer Car Guides, **Massachusetts General Hospital** **Maria Chahrour**, Associate Professor, **UT Southwestern Medical Center** **Anna Lewis**, Research Scientist and Associate, **Harvard Medical School and Brigham and Women's Hospital**	**WORKSHOP** **Make-ing Spatial Data Analysis: From Basics to Cutting Edge Innovations** This workshop is designed to provide a comprehensive introduction to spatial data analysis, with a focus on its practical applications in biological research. Attendees will learn the fundamental concepts, methodologies, and tools used in spatial data analysis, including the latest advancements in the field. The workshop will feature hands-on sessions, enabling participants to apply the concepts learned to real-world datasets. **Fidel Hernan Cuevas**, Associate Professor of Medical Physiology, **Rush College of Medicine** **Ilya Kuzovkin**, Principal Investigator, **Brigham and Women's Hospital** **Allison King**, Assistant Professor of Urology, **University of Virginia**
12:00	**More details to be announced shortly** *Sponsored by* Xenium	**More details to be announced shortly** *Sponsored by* Jasmine	**More details to be announced shortly** *Sponsored by* Elucidata				**Embracing the Power of Liquid Biopsy through Data Science and Bioinformatics** **Clarence Li**, Postdoctoral Fellow, **National Cancer Institute** *Sponsored by* Intersect		
12:30	**Reliable Detection of DNA Modifications Using Long-Read Sequencing** **Gang Fang**, Professor, Department of Medicine, **Mount Sinai** **NIH-AI-Hothead for High-Dimensional Multi-View Data Data Integration and Prediction Accounting for Subgroup Heterogeneity** **Sandra Safo**, Associate Professor of Biostatistics & Health Data Science, **University of Minnesota**	**Target Identification and Validation with Omic Research Skill Data Lakes** **Gavin Crooks**, Director, Research and Analytics, **Takeda Pharmaceuticals**	**Using AI/ML to Increase Program Data to Improve Health Care in the Healthcare of Veterans.** **Jason Carey**, Associate Professor, Director, **Harvard University: Genomics/Veteran**	**Redefining Single-Cell RNA Sequencing Limits with Ultra-Deep and Combinatorial Barcoding** **Charlie Roco**, CTO and Co-Founder, **Parse Biosciences** *Sponsored by* Parse Biosciences **How to Repurpose Drugs using Single-Cell and Spatial Transcriptomic Data** **Lucas Ferreira**, Assistant Professor, **University of Michigan**	**Mass Spectrometry-based Proteomics From Single Cells to Clinical Applications** **Judith Sierra**, Director of the Nanoproteomics Laboratory, **Boston Children's Hospital**	**Advancing Precision Medicine in Breast Cancer: Targeting Resistance Mechanisms and Metastasis** **Ashlee Lee**, Director, Institute for Precision Medicine, **UPMC, University of Pittsburgh**		
13:00	**LUNCH & LIVE LOUNGE TALKS**								
13:05	**More details to be announced shortly** *Sponsored by* Beckman Coulter								
13:20	**More details to be announced shortly** *Sponsored by* Single Cell Discoveries								
13:35	**Rare Variant Allele Detection from Urinary cfDNA by Droplet Digital PCR** **Vinamrat Saraswat**, Product Manager, **Omega Bio-tek** *Sponsored by* Omega Bio-tek								
13:50	**More details to be announced shortly** *Sponsored by* Solaris Bio								
14:05	**SMAL-seq: high throughput extracellular RNA transcriptomics for next-generation compound screening** **Ricardo Ramirez**, CEO and Co-Founder, **Atlibra Genomics** *Sponsored by* Atlibra Genomics								

	INNOVATION STAGE	MULTI-OMICS STAGE	AI IN DRUG DISCOVERY STAGE	BIODATA STAGE	SINGLE-CELL & SPATIAL STAGE	PROTEOMICS STAGE	CANCER DIAGNOSTICS STAGE	GENOME DOME	ROOM 50
14:25	**Exploration of Transcriptome Diversity Using Long-Read Sequencing** **Sweta Vu**, Principal Bioinformatics Scientist, **Genentech**	**How to Use Directional Multi-Omics Data to Identify Novel Therapeutic Pathway Enrichment Analysis** **Jiri Reinwand**, Principal Investigator of Computational Biology, **The Ontario Institute of Cancer Research (OICR)** Associate Professor, **University of Toronto**	**The Promise of AI/ML for Preclinical Drug Discovery** **Brandon Frederick**, Vice President, Biology, **Recursion**	**Advancing the Landscape of Clinical Accessibility in Genomics: An Evidence-based Framework from the HAPPIER3D OmeHage Consortium** **Jeremy Ellwood**, Director, Clinical Genomics, **Brigham and Women's Hospital**	**Single-Cell Sequencing to Evaluate ABBV-CLS-484 in Pre-Clinical Mechanism of Action (MOA) Studies Using Patient Antitumor Samples** **Rishi Puri**, Group Lead, Translational Research, Immatics Biologicals GmbH *Sponsored by* **AbbVie Biotherapeutics**	**Using High-Throughput Affinity Proteomics to Develop a Proteomic Aging Clock** **Steve Salas-Dias**, Senior Scientist, **University of Connecticut**	**Discovering cfDNA Methylation Biomarkers for Liquid Biopsy-based Cancer Detection and Monitoring** **Rakhee Vaidya**, Bioinformatics Research Biology, **University of Southern California**	**KEYNOTE SESSION** **AI in Healthcare: Bridging Innovation and Implementation** AI is transcending the realm of buzzwords to become a crucial component of modern medicine. It has the potential to uncover intricate disease patterns, personalize treatments, and revolutionize healthcare. However, significant challenges remain before they manifest. With innovations ranging from LLC-enhanced diagnostics tools to predictive analytics for patient outcomes, AI is transformative power of AI promises to revolutionize healthcare by making it more efficient, accessible, and effective. This roundtable will delve into the latest advancements in biotechnology and explore how continued investment in the future of healthcare. **David Haines**, Director, Digital Pathology, **Harvard Medical School** **Arvind Rao**, Associate Professor, Computational Medicine & Bioinformatics, **University of Michigan Ann Arbor** **Zhenlong Li**, Chief of Computational Sciences, **Texas Children's Hospital & Co-Director, Center for Medical Artificial Intelligence**, Baylor College of Medicine **Jason Johnson**, Senior Vice President, Data Science and Analytics Officer, **Gene.Parker Cancer Institute**	**WORKSHOP** **Workshop#2: Computational Biology Upskilling** As we are seeing many people pivot their career and upskill to computational biology, this workshop on Computational Biology Upskilling discusses regular gaps with the knowledge and strategies to make a seamless pivot. Attendees will learn the essential skills they need to add your learning journey to professional skills and have made the transition. Learn how to upskill and build a strong portfolio and network effectively. **Tommy Tang**, Director, Bioinformatics, **Astrazeneca** **Drew Lee**, Senior Expert I, Data Science, **Novartis**
14:55	**More details to be announced shortly** *Sponsored by* Oxford Nanopore Technologies	**More details to be announced shortly** *Sponsored by* vigenics.bio	**Sponsored slot available**	**More details to be announced shortly** *Sponsored by* Oblivious	**More details to be announced shortly** *Sponsored by* Zoom Biosciences	**More details to be announced shortly** *Sponsored by* Olink Proteomics	**Sponsored slot available**		
15:25	**Long-Read Sequencing for Brain Tumours** **Josefa Rodriguez**, Research Associate, **University of Johannes Kleinhof Sciences**	**Applying Multi-Omics Data Integration and Network Biology Approaches to Genomic Analysis to Identify New Targets** **Xin Li**, Senior Director, Computational Biology, **Takeda**	**PANEL: Empowering Your AI Applications in Therapeutics Target Discovery** **Manoj Hariharan**, Director of Research Bioinformatics, Center for Clinical and Translational Science, **Rutgers Cancer Institute** **Simona Cristea**, Head of Genomics and AI, **Gene.Parker Cancer Institute** **Rituan El Lashkari**, Director of Therapeutics Data Science and Professor of Genomic Medicine, **The University of Texas MD Anderson Cancer Center**	**Automated Real-World Data Integration Improves Cancer Outcome Prediction** **Nicholas Schultz**, Director, Cancer Data Science Initiative, **Memorial Sloan Kettering Cancer Center**	**Map Genetic and Non-Genetic Disease Drivers through Single-Cell Multi-Omics** **Anna C. Belkina**, Associate Professor, **Multi-Cancell Medicine & New York Presbyterian Hospital**	**Predicting Immunotherapy Outcomes from Circulating Tumor DNA Methylation Profiling** **Gavin Ha**, Member, **Fred Hutchinson Cancer Center**	**Modulating the Biology of mRNA to Improve Liquid Biopsies** **Viktor Adalsteinsson**, Director, Cancer Genome and Epigenetics Diagnostics, **Broad Institute**		
15:55	**NETWORKING BREAK**								

	INNOVATION STAGE	MULTI-OMICS STAGE	AI IN DRUG DISCOVERY STAGE	BIODATA STAGE	SINGLE-CELL & SPATIAL STAGE	PROTEOMICS STAGE	CANCER DIAGNOSTICS STAGE	GENOME DOME	ROOM 50
16:25	**Assessing Complex Genotype-Phenotype Correlations using Population-Scale Long-Read Sequencing** **Kim Gokkum-S**, Associate Professor, **Baylor College of Medicine**	**Leveraging Deep "Omics" and MAL Integration to Uncover Disease-Relevant Signatures** **Deepak Jha**, Senior Scientist, **Genome Sciences**	**Applying Foundation Models and Generative AI for Drug Design and Discovery** **Anshul Kundaje**, Director of Machine Learning, **AstraZeneca**	**Harnessing Multi-Omic Cancer Data with the Genomic Data Commons (GDC): An Impactful Discovery Tool for Cancer Prognostics and Response to Therapy** **David Haussler**, Project Officer, Genomic Data Commons, **NCI**	**How to Apply Novel Single-Cell and Spatial Genomic Techniques to Study Aging and Aging-Related Diseases** **Junyue Cao**, Assistant Professor, **The Rockefeller University**	**Finding Actionable Therapeutic Vulnerabilities in Breast Cancer Using Proteogenomics** **Jelle Lang**, Co-creator of the Clinical Proteomic Tumor Analysis Consortium	**Leveraging a Multi-Omic Approach to Liquid Biopsy Cancer Detection and Profiling** **Rahil Chaudhari**, Vice Chair, Translational Research, **Mayo Clinic**	**KEYNOTE SESSION** **Transforming Diagnostics in the Digital Age: Digital Pathology & AI** This session will: - explore the opportunities and challenges associated with implementing digital pathology to biomarker discovery and clinical diagnostics - look at how these advancements can be leveraged to address patient needs - discuss the role AI plays in integrating this technology into clinical practice - consider the evolving role of pathologists in advancing precise diagnosis and assessing biomarkers for companion diagnostics **Uma Sarma**, Digital Pathology, Computational Biology, **Bristol Myers Squibb** **Qing Li**, Director, **Bladderon** **Eric Schmieding**, Associate Director, Computational Biology, **Broad Institute of MIT and Harvard**	**WORKSHOP** **More details to be announced shortly**
16:55	**Sponsored slot available** *Sponsored by* Illumina	**Sponsored slot available** *Sponsored by* Illumina	**Sponsored slot available** *Sponsored by* Illumina	**More details to be announced shortly** *Sponsored by* Illumina	**A Scalable Platform for Simultaneous Single-Cell Imaging and Sequencing** **Caroline Gaiteri**, Director, Application and Assay Development, **PacBio** LLC *Sponsored by* PacBio Inc. LLC	**Sponsored slot available** *Sponsored by* Olink Proteomics	**Sponsored slot available** *Sponsored by* Illumina		
17:25	**Integrating Data to Uncover Molecular Mechanisms of Cancer Development and Genotype-Phenotype Insights** **Irina Pastor**, Bioinformatics Manager, **Children's Mercy Research Institute**	**Utilizing Foundation Models to Evaluate Immunotherapy Resistance Mechanisms in Cancer** **Gaurav Kumar**, Associate Director, Computational Biology, **Tera Pharmaceuticals**	**Advancing Alzheimer's Research through Genomic Insights from ADSP and Beyond** **Li Gan Wang**, Co-Director, Penn Neurodegenerative Genomics Center, **University of Pennsylvania**	**How to Use Machine Learning Approaches to Identify Novel Therapeutic Targets Using Spatial Transcriptomics and Drug Signature Transcriptomics for Personalized Medicine** **Jun Ding**, Professor of Computational Medicine and Bioinformatics, **University of Michigan Ann Arbor**	**Computational Methods for Large-Scale Proteogenomic Data Analysis** **Gil Mor**, Director of Translational Research, **Reveal Institute**	**Leveraging ABB in Clinical Development for Solid and Hematologic Cancers** **Duane Hassane**, Head of Translational Omics, Hematology R&D, **AstraZeneca**		
17:55	**DRINKS RECEPTION** *Sponsored by Diamtech Corporation*								
19:25	**CLOSE**								

TIME	The Festival of Genomics & Biodata • Day 2 Agenda • June 25th 2025
08:55	**Plenary Keynote Sessions**
09:00	**Opening Remarks** **Catching the Floating DNA Around Us** **Carl Zimmer**, New York Times Columnist and Author **The Power of Preventative Genomic Screening** **Robert Green**, Professor of Medicine, **Harvard Medical School**
09:30	**More details to be announced shortly**
09:45	**Unlocking Data, Unlocking Treatments: AI in AIS** **Caroline Puckett**, Head of Health, **Challenge Works** **Pat Brancatelli**, CEO, **SETDB Brain Project** **Using Advanced Molecular Diagnostics to Improve Risk-Aligned Patient Care and Outcomes** **Matthew Goldberg**, M.D., FAAD, Senior Vice President, Medical, **Castle Biosciences** *Sponsored by* Castle Biosciences
10:00	**PANEL: Reimagining Healthcare by Bridging the Gap between Innovation and Patient Impact** **Nicole Renaud**, Director - Global Co-Lead of Human Genetics & Therapies, **Novartis** **Jeff Reid**, Vice President, NGC Chief Data Officer, **Regeneron** **Joseph Maximus Mc**, Executive Director, **Bristol Myers Squibb** **Melissa Miller**, Senior Director, Human Genetics, **Pfizer**
10:30	**NETWORKING BREAK**
11:00	

	INNOVATION STAGE	MULTI-OMICS STAGE	AI IN DRUG DISCOVERY STAGE	BIODATA STAGE	SINGLE-CELL & SPATIAL STAGE	PROTEOMICS STAGE	CANCER DIAGNOSTICS STAGE	GENOME DOME	ROOM 50
11:30	**The Development of Aging-Related DNA Methylation -Derived Predictors of Phenotypic Traits** **Andres Cardenas**, Assistant Professor, **Stanford University**	**Clinical Proteomics and Metabolomics in Biopharma Drug Discovery and Development** **Sonja Hess**, Senior Director, Centre of Genomic Research, Discovery Sciences, R&D, Biopharmaceuticals, **AstraZeneca**	**Genomics, Stem Cells, and AI for Drug Discovery** **Joseph Wu**, Director, Stanford Cardiovascular Institute, **Stanford University**	**SeqOmics: A FAIR Multi-Omics Data Management and Analytics Platform** **Felix Franke**, Senior Manager, Bioinformatics and Analytics, **Takeda** *Sponsored by* Qiagen	**Harnessing Multi-Omic Multi-Sample, Multimodal Spatial to Model the Tumor Microenvironment and Response to Therapy** **Wesley Tansey**, Principal Investigator and Assistant Attending Computational Oncologist, **Memorial Sloan Kettering Cancer Center**	**Supporting Clinical Trials with High-Throughput Proteomic Profiling** **Irvine Midwinter**, Associate Director, **Novartis**	**PANEL: Fusing the Any Towards Liquid First: Challenges, Opportunities and Results** **Lauren Linnen**, Director, Genomics, **BioMarkIC** **Raluca Radita Predoi**, Director of Precision Medicine, **AbbVie** **Aleksandra Markowska**, Director, **AstraZeneca** **Next-Generation NGS Assays: Or We Have the Tools to Evaluate Them** **Hugh Russell**, Director of Clinical Development, Clinical Biomarkers, **AstraZeneca**	**KEYNOTE SESSION** **Driving Innovation in Precision Medicine for Broader Implementation** In this roundtable discussion, we will explore how to overcome barriers to equitable genomic testing, including: - What genomic and data analysis advancements are needed to accelerate precision medicine? - How is clinical genomic testing personalized treatment strategies? - What barriers must be overcome to expand precision medicine access for underserved populations? - What are the emerging opportunities in clinical genomics for cancer and rare disease? **Simon Noble**, Assistant Professor, Medicine, **Dartmouth** **Heidi Rehm**, Co-Director, Medical Genomics, **Broad Institute** **Christen Klein**, Director, Precision Medicine Core, **Dartmouth Cancer Center** **Katherine Wawrzynski**, Associate Director, Clinical Genomics & Molecular Diagnostics, **NYU Langone** **Lin Ying**, Assistant Professor of Pathology, **Harvard Medical School** Director, Canadian Core, Precision RNA Medicine Core, **BCMC**	**WORKSHOP** **Workshop#3: Enhancing Variant Analysis and Interpretation** Clinical interpretation of DNA sequence variants is an crucial part of reporting results from genetic testing. The use of NGS has greatly advanced the diagnosis of genetic disorders. However, interpretation of a large number of DNA sequence variants identified in samples, including many that are novel, presents significant challenge for clinical interpretation. This workshop will help develop and improve attendees' skills and knowledge for interpreting genetic variants, including identification, classification, clinical relevance and utilizing relevant tools and resources. **Harsh Sahni**, Co-Director, Medical Genomics Genetics, Medical Director, Clinical Sequencing Platform, **Broad Institute** **Liz Worthey**, Senior Head, Director, and Associate Professor, **UAB School of Medicine** **Sugeeth Balakumaran**, Director, Computational Biology, **Regeneron**
12:00	**Sponsored slot available** *Sponsored by* Element Biosciences	**More details to be announced shortly** *Sponsored by* Olink Proteomics	**More details to be announced shortly** *Sponsored by* Insilico Medicine	**Unlocking the Secrets of Data Challenges and Solutions in Multi-Omics Value Chain** **Abel Kho**, Director, Center for Genetic Medicine, **Northwestern** *Sponsored by* Illumina	**Advancing Tissue Biology Research with Xfaster software for Spatial Multi-omics** **Dawn Classon**, CEO, **Aspect Analytics** *Sponsored by* Aspect Analytics	**Sponsored slot available** *Sponsored by* Olink Proteomics			
12:30	**Harnessing Epigenetics to Combat Chemoresistant Cancer Cells** **Sarita Chandra**, Research Fellow, **St. Jude's Research Hospital**	**The Power of Scaling and Sequencing Datasets to Drive Medicines of the Future** **Gareth Wilensky**, Vice President and Chief Genomics and Data Science Officer, **Regeneron**	**Phoremost: Foundation Models for Drug Discovery** **Zaven Kondo**, Senior Director, Data Science, **Recursion**	**Wave Quantum Computing Meets Clinical Trials: Use-Case of AI** **Zaven Kondo**, Senior Director, Data Science, **Deep.t**	**Novel Spatial Molecular Pathology Approaches to Understand Disease Pathophysiology and Drug Discovery** **Silvia Eva**, Associate Director, **AbbVie**	**Exploring Organ Crosstalk in a Model for Alternatives using Comprehensive Plasma Proteomics** **Sasha Singh**, Director of Proteomics Research, **Bigfoot Biomedical**	**Multi-omic Analyses of CTCs for Cancer Profiling and Diagnostics** **Daniel Haber**, Physician Scientist and Radiation Oncologist, **Massachusetts General Hospital**		
13:00	**LUNCH & LIVE LOUNGE TALKS**								
13:05	**More details to be announced shortly**								
13:20	**More details to be announced shortly**								
13:35	**More details to be announced shortly**								
13:50	**More details to be announced shortly**								

	INNOVATION STAGE	MULTI-OMICS STAGE	AI IN DRUG DISCOVERY STAGE	BIODATA STAGE	SINGLE-CELL & SPATIAL STAGE	PROTEOMICS STAGE	CANCER DIAGNOSTICS STAGE	GENOME DOME	ROOM 50
14:10	**The Genomics Are Here: Harnessing Whole Genome Sequencing to Refine Target Discovery in Complex Disease** **Paola Bronson**, Associate Director, Genetics, Human Genetics and Genomics, **GSK**	**Elevating Tumor Immune Dynamics in Metastatic Triple-Negative Breast Cancer Through Multi-Omic Integration** **Giuseppe Tarantino**, Innovator in Medicine, Computational Biology, Computational Biology, **Gene.Parker Cancer Institute & Broad Institute of MIT and Harvard**	**Biological Sequence Learning at GSK.ai** **Ani Aliper Poser**, Director of AI Product, **GSK**	**Large Scale Population Genetics Influencing Common & Rare Disease Drug Discovery** **Guillermo del Angel**, Director, Computational Biology, Centre for Genomic Research, **AstraZeneca**	**Real-Timing: A Fundamental Single-Cell and Spatial Data Strategy for Prioritizing Disease Hypotheses** **Dean Lee**, Senior Director, **Novartis**	**Developing a Spatial Analysis Toolbox for Early Drug Discovery using Targeted Proteomics and Transcriptomics** **Vineeth Raghuveer**, Senior Scientist, **Abbvie**	**More details to be announced shortly** **Alex Ng**, Professor of Pathology and Cell Biology, **Columbia University**	**KEYNOTE SESSION** **Exploring Innovations in Liquid Biopsy Sequencing: Innovations and Impact** In this round-table session, join your peers and get answers to crucial questions, such as: - What is the current state of play of the genomic sequencing field? - What are some new innovations and sequencing technologies that are progressing the field and improving the accuracy of liquid biopsy tests? How are these impacting genomic research and drug discovery? - How are new sequencing technologies changing the landscape? - How is genomic sequencing enabling personalized treatments for cancers and rare diseases? - How is genomic sequencing influencing early detection, diagnosis and prevention? Can CRISPR-based gene editing tools be integrated into genomic sequencing for early disease detection and diagnosis? What does the future of genomic sequencing look like? Cancer and genomic sequencing techniques to learn more about epigenetics and epigenomics? **Josh Forman**, Senior Scientist, Genomics (Targeted Immunology), **Pfizer** **Michael Lerwill**, Director, Molecular Oncology & Professor of Pathology, **University of Missouri Kansas City School of Medicine** **Milan Lalic**, Assistant Professor of Engineering & Physics, **Rollins College**	**WORKSHOP** **Workshop#4: How to Better Computationally Analyze Your Single Cell RNA Sequencing (scRNA-seq) Data** This workshop will present an overview of the computational workflow to extract in-processing scRNA-seq data. Attendees will learn the principles of the most common tasks and the tools available for addressing central biological questions. The workshop will be a combination of lectures and hands-on labs, delivering computational analyses. The tutorial provides a hands-on guide for experimentalists interested in analyzing scRNA-seq data as well as an overview for bioinformaticians, seeking to develop new analysis methods. **Cranie Gardner**, Computational Biologist, **Genentech** **Mary Piper**, Senior Principal Scientist, **Altos** **Zhalen Safikhani**, Principal Machine Learning Research Scientist, **AbbVie**
14:40	**Applying Molecular Genetics and Cytogenetics in the Clinic for Variant Reporting** **Heather Mason-Suares**, Associate Professor in Pathology, **Brigham and Women's Hospital** **Assessing Genome Integrity of Gene Therapy Vectors Using Long Read (LRS) Sequencing** **Pawel Kordowski**, Scientist - Next Generation Sequencing, **Sanofi**	**Single Multi-Modal Strategies for Integrative Substrates** **Xavier Fernandez**, Director, Computational Biology, Oncology R&D Data Science, **Astrazeneca** **Deciphen Responses to Infections using Multi-Scale Multi-Omics Approaches** **Christian Perez**, Associate Professor in the Department of Genetics and Genomic Sciences, **Icahn School of Medicine at Mount Sinai**	**Biologics AI Movement: Applying Foundation Models and Generative AI to Industrialize Drug Design and Discovery** **Hera Vlimki**, Director, Data Science, Digital R&D, **Sanofi** **PANEL: How to Optimize Data Strategy & Trends to Improve AI for Drug Discovery?** **Elena Dolgikh**, Head of Computational Chemistry US Site, **Atomic Force Therapeutics** **Emanuela el Khoueiry**, VP, Global Head of Precision Medicine & Computational Biology, **Sanofi** **Rohit Arora**, Innovation Lead - Data Science & AI/ML, **Novo Nordisk** **Charles O'Donnell**, Vice President, Head of Computational Genomics and Data Science, **Omega Therapeutics**	**Harnessing Population-Scale Ocular Genomics to Drive Target Discovery and Accelerate Mendelian and RUMS-Related Program for Precision Health** **Eric Jorstad**, Director, Clinical Informatics, Human Genome Sequencing Center, **Baylor College of Medicine**	**Single-Cell and Spatial Transcriptomic Analysis to Understand Mechanisms Responsible for Ovarian Cancer** **Mridul Bhanumathy**, Associate Professor & Associate Director of Translational Research Laboratory, **Northwestern Medicine** Associate Professor & Associate Director of Translational Research Laboratory, **Robert H. Lurie Comprehensive Cancer Center of Northwestern University** **Satoshi Hada**, Assistant Professor, **Weill Cornell Medicine**	**Multimodal Imaging Methods for Understanding Complex Biological Phenomena** **Elizabeth Neumann**, Assistant Professor, **UC Davis**	**Computer Diagnosis Development for TCR-T** **Elaine Joseph**, Director, Computational Biology, **AstraZeneca**	**KEYNOTE SESSION** **Multi-Omics Approaches in Cancer Research** **Jack Freeman**, Director, Molecular Oncology & Professor of Pathology, **University of Missouri Kansas City School of Medicine** **Milan Lalic**, Assistant Professor of Engineering & Physics, **Rollins College**	
15:10	**Assessing Genome Integrity of Gene Therapy Vectors Using Long Read (LRS) Sequencing** **Pawel Kordowski**, Scientist - Next Generation Sequencing, **Sanofi**	**Deciphen Responses to Infections using Multi-Scale Multi-Omics Approaches** **Christian Perez**, Associate Professor in the Department of Genetics and Genomic Sciences, **Icahn School of Medicine at Mount Sinai**		**Harnessing Population-Scale Ocular Genomics to Drive Target Discovery and Accelerate Mendelian and RUMS-Related Program for Precision Health** **Eric Jorstad**, Director, Clinical Informatics, Human Genome Sequencing Center, **Baylor College of Medicine**	**PANEL: How to Integrate Single-Cell and Spatial Multi-Omics Data into Challenges and Solutions** **Rebecca Mathews**, Principal Scientist, Bioinformatics, Group Lead Nuvq Immunology Gen Cell Solid Tumor, **Novartis** **Arpita Kulkarni**, Associate Director, **Single-Cell Core, Harvard Medical School** **Vinay Swamy**, Vice President, Head of Clinical Bioanalytics & Computational Genomics, **Roam Therapeutics** **Vineeth Raghuveer**, Senior Scientist, **Abbvie**	**Spatial Proteotranscriptomic Integration to Reveal Therapeutic Resistance Mechanisms in Cancer** **Martin Hemberg**, Associate Professor of Immunology, **Brigham and Women's Hospital**	**Using Immunotherapy Earlier to Target a Cancer's Weakest Point: Insights from Experimental Renal Cancer Treatment** **Andrea Cercek**, Medical Oncologist, Founder and Co-Director, Center for Young Onset Colorectal and Gastrointestinal Cancer, **Memorial Sloan Kettering Cancer Center**		
15:40	**CLOSE**
