BEGINNING OF THE END? OR END OF THE BEGINNING?

EVERYTHING ELECTRIC SOUTH

If you've paid close attention to the electric vehicle sector over the past 2 years, you might be concerned by a 'perceived' lack of progress, but it's much more complicated than that.

We can confess that it has been a 'shocking' two years for businesses and consumers alike in the UK, and yet, our **Everything Electric** expos in countries like Australia and Canada are expanding rapidly. So what's going on? While the UK hasn't been the only struggling market, it is one of those that has been buffered by matters economic and political, as well as by a rising tide of misinformation. So even if the global EV industry isn't really experiencing a slowdown, the UK has certainly had a harder time than some markets. While we can't control matters economic and political, we are doing everything in our power* to tackle misinformation and drive demand, and we are optimistic that a new Government and recent new and used EV sales growth hints at the end of the beginning for this fragile market.

This includes the formation of our new cross-industry initiative **Electric Vehicles UK.*

Anyway enough scene-setting; what a show we've got for you at **Everything Electric SOUTH!** As always, our team has been working tirelessly to pull together a world-class line-up of cleantech and electric transport and while some think that the cars are the stars, and for those guests, we have *almost* **'Everything Electric'**, including a world-beating line-up of car companies, numerous EVs you're unlikely to have seen before, and another huge all-electric test drive program. And it's electric vehicles of all shapes and sizes* so we have everything from bikes and boards to commercial EVs for you to check out. We've also got an array of clean energy solutions and experts to help you navigate your way from fossil fuels to fossil free, as well as our Energy Advice Zone, so you can discuss your personal requirements with the best in the business. We cater for commercial and business attendees on the Friday, and then for families with children on the Saturday and Sunday. So whether you're a big kid with big responsibilities, or a little kid with aspirations for a better world, you won't find an expo with more positive energy anywhere on the planet! And from £10 per person to attend it's incredible value too with an array of entertaining and educational visitor attractions laid on especially for you:

- EV Test Drive Experience
- Commercial Vehicle Zone
- Giga & Mega Theatre live panel discussions
- LIVE EV Arena
- Mini Eco Explorers
- Energy Advice Zone
- Electric & Eclectic
- Electric Cafe
- Zero Carbon Kitchen
- Micro Mobility Test Track

And then of course there's the two stages, where stars of YouTube lead entertaining and educational discussions with dozens of experts across an amazing mixture of important topics. Of course we have the familiar faces of **Fully Charged SHOW**, including founder Robert Llewellyn, allied to the incredible talents of several other world-class content creators Dave Borlace, of Just Have a Think!, ex-Top Gear star Quentin Willson, Nicola Hume of Electrifying, and big business leaders like Bono Ge from BYD and Greg Jackson from Octopus.

This is our 17th exhibition worldwide, and we aim to have created a feelgood, family-friendly festival of electrification that you'd like to spend several days at, and that you will visit year on year.

Finally, we would like to offer our sincere thanks to you, our attendees, the people that make this exhibition a reality, to our exhibitors, to our sponsors. We can't wait to welcome you all!!

Dan Caesar | CEO | Fully Charged

IMPORTANT INFORMATION

Opening Times – the show opens from 10am – 5pm on Friday & Saturday and 10am – 4pm on Sunday. We would ask for your patience as you enter the show; queues are likely.

How To Get Here – Everything Electric SOUTH takes place at Farnborough International. Free car parking is available on-site at the venue. Please use sat nav post code: GU14 6TQ and follow the event signage as you enter Farnborough.

Accessible parking – is available close to the main entrance of the venue. Please note: mobility scooters and wheelchairs are not available but you are welcome to bring your own.

Test Drives & Rides – Whether it is electric cars, or other electric vehicles, access to test drives in a supply constrained market is competitive. If you are unable to access the electric vehicles, our exhibitors will help facilitate opportunities after the event.

Farnborough presenting team: Robert Llewellyn, Helen Czarski, Jack Scarlett, Imogen Bhogal, Elliot Richards, Dave Borlace & Dan Caesar.

EV TEST DRIVE EXPERIENCE

ALL TEST DRIVES MUST BE BOOKED VIA EXHIBITOR STANDS AND ARE SUBJECT TO LICENSE CHECKS AND MANUFACTURER' REQUIREMENTS. FULL DETAILS ARE AVAILABLE ON PAGE 13

PLEASE REMEMBER TO COMPLETE YOUR DVLA LICENSE CODE FORM ONLINE: WWW.GOV.UK/VIEW-DRIVING-LICENCE YOU WILL NEED THIS CODE TO PARTICIPATE IN A TEST DRIVE

Goodbye Gas, Oil and LPG

Hello renewable heat

Heat and cool your home sustainably with Daikin

Whether you're worried about rising energy costs today, or protecting the planet for tomorrow, you can make a difference.

Kickstart a positive change, by making the switch to a Daikin heat pump.

By using an energy-efficient heat pump to warm or cool your home, you'll enjoy the comfort and control you expect, and save energy, too. All while minimising your impact on the planet.

You can benefit from Government boiler upgrade schemes with up to £7,500 of incentives and for a limited time, 0% VAT on installing energy efficient systems.

Whatever type of property you live in, we have a range of solutions designed to suit your needs, and our Sustainable Home Network experts are on-hand to guide you at every stage.

So you really can achieve total comfort without compromise.

For every climate.

Visit daikin.co.uk/residential to find out more.

EVERYTHING ELECTRIC?

We make it our mission to get 'almost' everything electric to our shows, and our South show is no exception. There are so many cars at this show, and as we add vehicles into the final few days, it's impossible to list them all. Keep your eyes peeled for the weird and the wonderful, and if you arrive early enough enjoy the test drive options too!

Papilio3[®]

The solar EV charging hub

Driving On Sunshine[®]

Papilio3, the solar EV charging hub provides fast and reliable EV charging for fleets, workplaces and destinations.

Key features

- ▶ Up to 12 fast EV charge points at 7, 11 or 22kW
- ▶ Powered by 42 solar panels & local mains electricity
- ▶ Up to 250kWh battery storage capacity
- ▶ Made in the UK using recycled shipping containers
- ▶ Deployed & commissioned within 24 hours
- ▶ Approvals and permissions fully managed
- ▶ Customer set tariff
- ▶ Waterproof shelter with integrated LEDs
- ▶ CCTV security cameras
- ▶ Smart charging & back-office billing system
- ▶ Branding & advertising opportunities
- ▶ Sale & rental agreements
- ▶ Visible commitment to net-zero targets
- ▶ Full operation & maintenance

Papilio3 has an installed capacity of 19.3kWp and can produce up to 18MWh of electricity in year one, equivalent to 64,343 EV miles, saving 3.6 tCO₂e.

Papilio3 operates across the UK, including at Silverstone Circuits, Wiltshire Council, Surrey County Council and the NHS.
