# Fine Art by Innova

## Inkjet Digital Fine Art Papers for Fine Art and Photographic Printing

The Innova Fine Art collection represents a range of matte papers specially coated for use with water based (Aqueous) inkjet printers. The extensive selection of weights and surface textures enables the artist to bring out the best in their imagery by matching the paper to their style of work.

These digital fine art papers have been coated with formulations created by our own team of chemists. They provide consistent colour reproduction through a wide gamut and exceptional d-max ratings, whilst still maintaining the look and feel of true artists papers.

Each material has been specifically developed with the artist in mind. Suitable for giclée printing, applications include; limited or open editions of artwork created in traditional or digital mediums, restoration or exhibition prints and more. Traditional techniques, such as watercolour or acrylic paintings, etchings, pastel or charcoal drawings can be accurately reproduced on a surface similar to the original artwork. Textures range from super smooth to cold press rough textured and include both bright white and natural white base tones.

# Fine Art Range

## Smooth Cotton High White 100% Cotton 215gsm IFA-004

This archival quality paper is the go to option for photographers seeking a texture-free, clean finish to their images.

Compatible with aqueous (water-based) pigment and dye inkjet printers, the high white, smooth surface is coated with Innova Art's own inkjet fine art formula. A matte finish means there are no distracting reflections on the surface of your print and a 100% cotton base provides flexibility. This paper is ideally suited for reproducing fine details.

## Cold Press Rough Textured Natural White 315gsm IFA-013

Modelled after a true old world watercolour paper the natural white, OBA free base of this archival quality 'cold press' paper lends a traditional feel to your archival inkjet fine art prints.

The rough textured surface is coated with our own matte coating, compatible with both pigment and dye inkjet printers. Whether you are making art reproductions or printing editions of original digital artwork, this popular grade will provide a stable base for your images and ensure they last for years.

## Smooth Cotton High White DS 100% Cotton 225gsm IFA-005

Pigment and dye aqueous inkjet compatible, this double sided digital fine art paper is ideal for creating your own photo books or portfolios.

A 100% cotton base is flexible and strong, creating clean folds and creases. Whilst the smooth surface lets your image quality shine, without any distracting surface texture. With excellent print quality, the cotton base gives a softer feel to your prints and the archival properties of this inkjet fine art paper means your work will last for years to come.

## Smooth Cotton High White 100% Cotton 315gsm IFA-014

Soft, luxurious texture with a world class inkjet fine art coating.

This paper is one of the most popular Innova archival digital fine art papers. A smooth, texture free matte finish lets your images speak for itself without imparting unwanted character to your final prints. A high white shade assures saturated colours pop when printed and a precision coating, compatible with both pigment and dye based inkjet printers, makes it ideal for many professional print work flows.

## Soft Textured Natural White 315gsm IFA-012

OBA free and produced using pure alpha cellulose fibre, this paper features a natural white base with a light texturing similar to traditional etching papers.

The pleasing tactile quality is designed to replicate cotton based papers and is ideal if you are seeking the feel of a cotton based print at a more cost effective price point for production. This archival paper is coated using the same aqueous pigment and dye inkjet compatible technology as the rest of the Innova Fine Art range so your images come alive.

## Soft White Cotton 280gsm IFA-015

The slightly textured surface of this paper replicates a traditional etching paper.

Coated with the latest pigment and dye inkjet receptive technology, the cotton content in the base gives a high quality feel whilst providing flexibility. With an excellent colour gamut and exceptional d-max, this paper is the ideally for reproducing a wide range of tones. This paper is also acid and lignin free; making it the perfect option for creating archival quality digital reproductions of your art.

# Fine Art Range

## Décor Watercolour Art 245gsm IFA-023

The generous watercolour type texturing and lightweight of this archival digital fine art paper make it ideal for producing open editions of art prints aimed at the décor art market.

Compatible with both pigment and dye aqueous inkjet printers, this paper is the perfect addition to the range available from your print shop. The rough textured surface gives a level of substance to your finished prints and is still lightweight enough to be easily mounted and framed.

## Soft Textured Bright White Cotton 315gsm IFA-026

A subtle surface texture lends this acid and lignin free, archival quality paper the feeling of traditional prints.

The 100% cotton base provides the softness and quality feel associated with papers for traditional mediums whilst the bright white matte coating supplies a modern twist. Compatible with aqueous dye and pigment inkjet printers, this paper is ideal for digital reproductions of your work in more traditional mediums such as watercolour or charcoal.

## Décor Smooth Art 210gsm IFA-024

The velvet smooth finish and appealing natural white tone of this paper make it ideal if you are producing open edition prints for the mass market.

This lightweight alpha cellulose paper is great for print shops specialising in poster reproduction and restoration as the smooth surface ensures that even the finest details in your artwork are preserved. Our aqueous (water based) pigment and dye inkjet compatible matte coating ensures superb print quality and meets international archival standards.

## Cold Press Rough Textured Bright White Cotton 300gsm IFA-027

Rough textured with a 'cold press' watercolour feel the cotton content in the base of this inkjet fine art paper oozes quality.

With an exceptional d-max and excellent colour gamut, you can rest assured that the matte surface of this paper is capable of reproducing even the subtlest tonal transitions in your work. The bright white base is compatible with both pigment and dye based inkjet printers and creates a bright white point to contrast with the deepest blacks.

## Print Embellishment

Many artists are now using giclée printing to create limited or open edition prints of their traditional artwork. There is also a whole new generation of artists who utilise purely digital tools to create their artwork. For some of these artists a print of their work is enough, however, for others they feel there is something missing when comparing their giclée print to the original piece. This may be the lack of tactile texture provided by layers of paint or, in the case of digital artwork, the image looks different because it is no longer displayed on a backlit computer screen.

If you have ever experienced this, it is possible to restore some of the original paint texture or give added oomph to an original digital piece by embellishing over the top of the print.

Print embellishment is the addition of another material to a giclée print. This can be done by painting over areas using acrylic paint, highlighting details by screen printing a gloss varnish over the top, or even adding gold leaf or stitching details - creating a true mixed media piece of artwork. By embellishing print editions, each image becomes unique and has a personal touch to it. No longer are your prints a carbon copy of the original; they are pieces of stand alone art!

The papers in the Innova Art range are ideally suited to adding embellishment details - why not experiment for yourself and share the results with us.
