JETMASTER

PHOTO PANEL

Print - Stick - Display

Designed for use with resin coated photo papers, the JetMaster® Photo Panel creates effortless impact for your images.

A lightweight alternative to solid MDF display blocks, this photo mount has a pressure sensitive adhesive face and is available in a range of sizes with a choice of two smart matte edge finishes.

JetMaster® Photo Panels are simple to create

and can be wall mounted or used as an attractive addition to any desk. The finished Panel size is slightly smaller than the media size required. This enables a clean edge finish without needing to set up custom page sizes.

- Stylish frame free photo mount
- Choice of black or white matte edge finish
- Permanent pressure sensitive adhesive

PHOTO PANEL
ACRYLIC

Tools that can be used time and time again to create multiple styles of self adhesive image display.

For use primarily with the JetMaster® Photo Panel and JetMaster® Acrylic, these tools will help you get the perfect finish every time.

Use the alignment frame to ensure your image is positioned perfectly. A silicone roller on your JetMaster® Photo Panel or squeegee on your JetMaster® Acrylic will ensure that all air bubbles are removed. The rotary cutter is a safer alternative to using a craft knife and a cutting matt will protect your work surface from accidental damage.

JetMaster® Roll To Roll Media

JETMASTER®

PAPER

JetMaster® Paper Canvas Effect 165gsm IFA-129

Compatible with pigment and dye (aqueous) inkjet printers, JetMaster® Paper Canvas Effect 165gsm has been specifically developed to replicate a woven canvas surface.

A great alternative to canvas printing. The flexible base and coating combine to ensure that the printed surface does not crack when folding - even if stretching over wooden bars.

Previous applications for this paper have even included an alternative to traditional wallpaper applied with PVA based adhesive.
