Explore Your Xtra Life

- Smartphone Stabilizer -

Explore Your Xtra Life

The rotatable structure in palm size that allows you to toss in a backpack conveniently, an extendable grip made for exploring bigger vision, and a handy App - ZY Cami, for making videos rock everybody!

Meet Smooth X and explore your EXTRA life!

FEATURES

Rotatable Design into Palm Size

No longer have to choose between high-quality video and lightweight travel. Get both at once! A palm-size rotating gimbal weighing only 246g easily fits into your bag or even pocket, and provides surprisingly stable footage with your phone.

Telescopic Grip for Perfect Angles

SMOOTH-X features a telescopic grip which can be extended to 260mm, allowing more space for you to find the best shooting angle. Plus, its uniquely-designed flexible axis can be folded and can stay in its position at multiple angles. See what you can get now! More friends, more views, more fun!

Gesture Control on Your Camera

Get control of your gimbal whether in hands or not. Now taking a photo or recording a video is as easy as showing a V gesture or waving to camera with your palm. Combined with the newest intelligent object tracking, everyone can be a solo film director of their lives.

Instant Transition from Landscape to Portrait Mode

No matter you're a TikTok, Instagram talent or a Streamer, SMOOTH-X can meet your needs in different scenarios. Double click on the M button, you will be switching between Landscape and Portrait mode in no time.

Unlimited Creativity Packed in New App - ZY Cami

No more tedious filming and editing. The new App-based SMART Mode offers a plethora of built-in templates integrated with customized movements, music, and other special effects. Now, everyone can be a master of filmmaking.

- Intelligent Object Tracking
- Multiple App-Based Editing Features
- Direct Control to Native Camera
- Creative Time-lapse, Panorama, Slow-Mo and etc

SMOOTH 5

Film Like A Pro

- Smartphone Stabilizer -

Powerful Motor

Professional magnetic steel motors with upgraded algorithm and strong compatibility. The wider phone clamp ensures safer and easier filmmaking with most of the smartphones.

Industry-Standard 3-Axis

A standard 3-axis design with motors at the rear to prevent any blocking while filming, offering free movements from all perspectives even in low and super-wide angles.

Controls Within Reach

Round-cap joystick and optimized control panel for users to check gimbal status and adjust parameters on the fly.

Great Brightness Guaranteed

Can be attached with two 300-lumen fill lights at most at the same time to even light up a 15-square-meter room.

SmartFollow

Keep your object within the center of the frame. Activate SmartFollow by pressing the button or marking on the phone screen.

Professional Anti-shake

Preserves the original video quality of the smartphone and offer cinematic movements for the video. Now you can make smartphone films like the cinema films.

Advanced Dolly Zoom

Create your own Dolly Zoom masterpiece with the focus/zoom control wheel and switch at ease or just have your ZY Cami app generated for you.

PACKAGES & ACCESSORIES

Six Gimbal Modes

Pan Following Mode

Camera pans left/right following the movement of the stabilizer handle while the tilt and roll axis motors are locked.

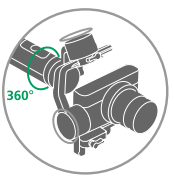

Following Mode

The roll axis motor is locked while the camera pans and tilts following the movement of the stabilizer handle.

Locking Mode

All three axes are locked. Push the joystick to control the orientation of the camera manually.

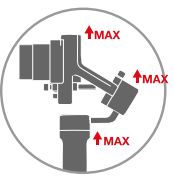

Vortex Mode

Tilt axis turns upward 90 ° automatically and realize 360° barrel shots by controlling the joystick.

Full-Range POV Mode

All three axes synchronously follow the movement of the stabilizer handle.

Go Mode

The camera pans left/right and tilts up/down following the movement of the stabilizer in fast speed while the roll axis motor is locked.

CRANE M2

Compact 3-Axis Stabilizer for Multiple Devices

What makes a good product? Is it user-friendliness or bold innovations?

CRANE-M2 is an integration of both. Featuring a unique locking pin and latch design, scale mark and memory lock as well as a whole new quick release system, CRANE-M2 is super user-friendly; With unprecedented all-in-one design, CRANE-M2 offers great compatibility to multiple devices, such as compact cameras, light mirrorless cameras, smartphones, and action cameras; 6 operating modes are offered by CRANE-M2 to empower filmmakers and to meet their needs in every specific situation.

LIVE . CREATE . ANYWHERE

FEATURES

One, Is More than Enough

CRANE-M2, with unprecedented all-in-one design, offers great compatibility to multiple devices, such as compact cameras, light mirrorless cameras, smartphones, and action cameras.

Small Body. Bigger Vision

With a sleek body and compact size, CRANE-M2 offers great comfort to your hand and unrivalled control over your camera. CRANE-M2 easily goes wherever you go, so you will never miss capturing that perfect moment again.

Easy Setup. Get Ready Anytime

CRANE-M2 is designed with a whole new quick release system - Lite. You can quickly mount or dismount your camera with a single press of the lock button. And with a unique scale mark and memory lock, balancing can be easily finished and preserved, once and forever, saving much trouble of readjustment every time.

Intuitive OLED Display

The intuitive OLED display will show the gimbal mode, Bluetooth & WIFI status, battery level and various gimbal parameters.

Expanded Functionality

With one 1/4 threaded hole at bottom and another one on the side, CRANE-M2 can be mounted to various filmmaking rigs to open up more creative possibilities for you.

Smooth Zoom at Fingertips

A single push of the slider on side of the handle, you can zoom in/out to capture smooth footage at a distance.

Full-Range POV Mode

Break through the limits of traditional 45°POV, Full-Range POV allows 360°synchronous movement on all three axes of the gimbal, offering an immersive experience like never before.

Seamless Camera Control via WIFI & Bluetooth

Adopting a WiFi-and-Bluetooth control module, CRANE-M2 allows you to control your camera wirelessly through the gimbal handle. Once paired via ZY Play, your camera and the gimbal will automatically pair again when turned on.

Tiny Body. Great Power

CRANE-M2 features an impressive runtime of up to 8 hours to keep you powered throughout your adventures. Besides charging your phone, CRANE-M2 can also be charged with a power bank.

TINIER BUT NO LESS MIGHTY

- Professional 3-Axis Stabilizer -

Tiny Body, Mighty Power / All-New Sleek Design / Quick Release 4.0

CRANE-M3

Professional 3-Axis Stabilizer

Portable yet professional with great compatibility - That's what describes CRANE-M3 the best. Compact body design and optimized axis arms deliver a better gripping and user experience. With the brand new dual-color-temperature lighting and professional audio solution, CRANE-M3 presents an outstanding filming experience in an all-in-one design.

TINIER BUT NO LESS MIGHTY

FEATURES

Tiny Body, Mighty Power

Optimized axis arms and compact structure with upgraded motor performance and algorithm. CRANE-M3 offers sufficient room to carry different kinds of cameras.

All-New Sleek Design

Multiple composite materials with trendy colors for elegant appearance and excellent gripping. Enjoy amazing user experience with the innovative built-in fill light and excellent intuitive performance.

Quick Release 4.0

Advanced balance and quick release system. Use universal quick release plate for easier operation with no rebalance needed.

*Universal quick release plate is sold separately.

Built-in Fill Light

Built-in fill light with high-level cooling technology to improve low-light performance while reducing image noises. Color temperature level and brightness can be adjusted with the control wheel.

Professional Audio Solution

Audio port supports connection with wired professional microphones for clear audio performance in scenes like interviews.

1.22" Touch Screen

Introducing the touch screen with all-new UI design and intuitive interface. It's tiny and portable like a smartphone that you can operate with just one hand at ease. Supports Chinese/English menu.

Battery Swapping without Detaching

Universal quick release plate has reserved an entrance for quick batteries swapping without rebalancing the camera.

Fast Charge

Supports Fast Charge protocol. Consuming time to fully charge can be minimized to 2 hours. Runtime up to 8 hours. Can be charged with a power bank while operating at the same time.

Selected Accessories

Dedicated backpack with advanced surface to resist spill. A great option for storing your camera and gimbal when you're out filming.

Install & Detach in a Flash

Quick Release 4.0 and dual safety locks ensure utmost safety and efficiency. A quicker transition between installing and detaching can better suit the run-and-gun scenarios.

Dedicated Quick Release Plate

No rebalance needed with the dedicated quick release plate. Features dedicated slots for mainstream cameras.

*Dedicated quick release plate is sold separately.

Power Up Fast. Creation Non-stop

Supports PD Fast Charge protocol with runtime up to 10hrs. You can also operate the gimbal while charging it with a power bank.

FEATURES

Portable Yet Powerful

CRANE-M2 S is compact as always and easy to carry with a super light body that weighs only 549g.

An Upgraded Gimbal for All

Combined with stronger motors and extended axes, the gimbal is compatible with various cameras, like your phones, actioncams, and mirrorless cameras.

Extra Bright in A Tiny Light

The fill light adopts Lumen Amplifier technology to offer 1000 lumens of brightness. The adjustable 5-level light and color filters give you unlimited possibilities in creation.

Feels Just Right In Your Hands

Handy and intuitive, the ergonomic product design guarantees a comfortable user experience for controlling and shooting.

Unleash Your Creativity

Let your creativity flow by applying various shooting modes in your videos. Give the best shot to record your wonderful life.

Trendy Bag For Your Gear

Well-produced with advanced technology to resist spill. Different layers to pack your set of gears.

Tiny Giant

WEEBILL-S easily handles mainstream mirrorless and DSLR cameras & lens combos with top-notch performance. Thanks to its neat lightweight body and a unique Sling mode, WEEBILL-S brings an effortless shooting experience like never before. Featuring an upgraded algorithm and stronger motors, an intelligent ViaTouch 2.0 system as well as an ultra-low latency HD image transmission module, WEEBILL-S pushes the limit of filmmaking even further.

FEATURES

Supreme Power. Superior Compatibility

WEEBILL-S comes with the newest motor unit and upgraded algorithm, with 300% improvement in motor torque and 50% increase in responsiveness. With better power comes stronger compatibility, WEEBILL-S can easily handle mainstream mirrorless and DSLR camera & lens combos.

ViaTouch 2.0: Your Finger-Touch Vision World

ViaTouch 2.0 seamlessly connects your smartphone, camera and gimbal. Various gimbal and camera settings can be adjusted in real time. SmartFollow and Sync Motion give you unprecedented control over your camera just at fingertips.

Compact as a piece of A4 paper

The unique structure and minimum design of WEEBILL-S make it super compact as a piece of A4 paper. With the ergonomically designed Sling mode, WEEBILL-S provides an effortless shooting experience for anyone.

Responsive and Flexible than EVER

The upgraded 8th generation Instune algorithm provides high responsiveness and eliminates jittery in fast movement in any environment. Not only that, you can quickly adjust the speed and various parameters of each axis directly through the dial on the handle itself, giving you responsive and flexible control than ever!

Image Transmission Module: Step into Stride

The all-new TransMount Image Transmission Module (accessory), in its compact size, can be directly mounted under the quick release plate neatly. With 1080P 30fps highly synchronised transmission (100-meter distance) featuring LUT, Pseudocolor, Focus peaking, Zebra Stripes and etc, professional monitoring and livestreaming can be easily achieved on a gimbal.

WEEBILL 2
MOVE AND SEE DIFFERENTLY

- Professional 3-Axis Stabilizer -

Classic & Effort-saving Design / Powerful Infineon Chip / 2.88" Full-color Touch Screen

WEEBILL 2

Professional 3-Axis Stabilizer

Introducing a stabilizer with quick responsiveness, brand new touch screen and advanced operation logic. WEEBILL 2 - A stabilizer strives to create a better experience for users in filmmaking with its classic structure, powerful Infineon chip, upgraded algorithm and new image transmission experience.

MOVE AND SEE DIFFERENTLY

FEATURES

Powerful Infineon Chip

Introducing the Infineon two-filter interruption vector-splitting sensor in WEEBILL 2. The sensor will analyze the complex interruptions, improve stability with its core algorithm and precisely compensate any micro-jittery, providing a smoother follow and a quicker response for the stabilizer.

Unique Robust Build

Combines well-crafted lines with artistic structure to bring the new stabilizer into life. A creative rotatable flip-out touch screen to make every feature and operation easier.

Flexible Compatibility

Strong structure with upgraded motor torque and performance. Compatible with lens combos of mirrorless cameras and DSLR cameras while supporting extensions of professional accessories.

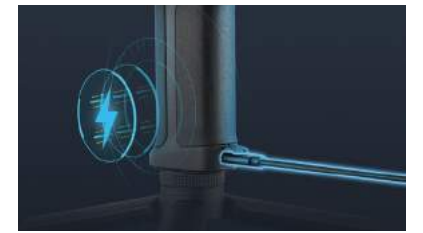

2.88" Full-color Touch Screen

Integrated 2.88" touch screen with brand new UI design. Tap to adjust parameters and other settings at any time. Use with image transmission system for high-quality monitoring, image transmission and SmartFollow.

Classic & Effort-saving Design

With the classic structure and sling grip design in WEEBILL series, an effort-saving sling mode is within reach with no extensions added and structure altering.

Convenient Fast Charge Battery

Supports USB Power Delivery Specification. Charging time can be minimized to 1.6 hours and the maximum runtime can reach 9 hours. The stabilizer can still work while charging.

Creative Shooting Features

Panorama, timelapse, hyperlapse, long-exposure hyperlapse, single-press portrait mode, full-range POV, Vortex and Go mode.

Versatile Focus Control Wheel

Focus control wheel supports adjustments on roll axis, aperture, ISO, electronic/mechanical follow focus and zoom.

Transmission & More

Use with TransMount Video Transmission Transmitter AI and ZHIYUN MasterEye Visual Controller VC100 for more features: footage monitoring and control, focus/focal length control, motion sensor control and high-quality screen recording. A satisfaction for professional teamwork.

CRANE 2
LEGEND CONTINUES

- Professional 3-Axis Stabilizer -

/ Crafted for Perfection
/ On-Site Efficiency Matters
/ Vertical Shooting Made Easy

CRANE 2

Professional 3-Axis Stabilizer

Widely recognized as the exemplar of 3-axis handheld gimbals for professional filmmakers, the CRANE 2 series is proud to present you a newest masterpiece that witnessed numerous hardworking days and nights of ZHIYUN R&D team—CRANE 2S. Featuring high load capacity and modular design, the CRANE 2S is keen on delivering reliable and excellent performance, even in the most challenging environments.

LEGEND CONTINUES

FEATURES

Crafted for Perfection

To meet the needs of different work tasks, videographers have to constantly switch among different cameras and CRANE 2S is ready to embrace the challenge. Highly optimized in motor control algorithms and motor power, CRANE 2S handles large cameras such as the BMPCC 6K, Panasonic S1H, Canon EOS 1DX Mark II with total ease. More than that, you can also mount multiple accessories on it.

On-Site Efficiency Matters

To make sure that you won't miss any decisive shots, CRANE 2S features brand new FlexMount System which greatly simplifies the setup process while at the same time secures your camera with a double safety mechanism. You can even adjust the tightness of the safety lock to suit your needs.

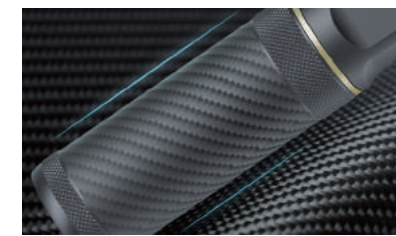

Vertical Shooting Made Easy

With mobile traffic gaining the upper hand, it's foreseeable that videographers will receive more work requests on vertical content. CRANE 2S comes standard with a vertical quick release mount and a safety knob for high-quality vertical shooting.

Axis Locking Mechanism 2.0

The upgraded axis locking mechanism 2.0 adopts a two-phase locking design that guarantees zero swinging of the gimbal during traveling or storage.

Maximized Payload Minimized Weight

To enhance the practicality of CRANE 2S as a reliable and sturdy workhorse, CRANE 2S's handle is built with carbon fibre, lightening the physical burden of videographers without compromising loading capacity of the gimbal.

Bigger Screen to Boost Your Productivity

The new 0.96" OLED screen offers a bigger vision. With it, you will be able to go through the entire menu within seconds and switch between different modes swiftly.

Expand for Limitless Possibilities

Designed for high-efficiency team collaboration, CRANE 2S is equipped with a dedicated slot for installing image transmission transmitters and multiple mounting points : One 1/4" screw hole on the back of the quick release plate for the camera to shift between different devices such as sliders and tripods; Two 1/4" screw holes with crown gear and one 3/8" screw hole on the gimbal for creative adaptation.

Precise Digital & Mechanical Focus Control

CRANE 2S is pushing boundaries not just in terms of loading performance, but also with its film grade focus control ability. With its upgraded built-in focus wheel and focus motors that feature ultra-low delay and high precision, you will never miss any decisive shots.

Removable Batteries for Maximized Runtime

The CRANE 2S is outfitted with 3 removable 18650 Li-ion batteries which offer a 12-hour runtime. For time-demanding tasks, videographers can easily prolong the runtime of the gimbal with backup batteries.

CRANE 3S Specs

Operation Voltage	9.8 V-25.2 V
Output Voltage	5 V
Operation Time	12 h
Operation Temperature	-10°C-45°C
Payload	600 g- 6500 g
Tilt Angle Range	360°
Roll Angle Range	330°
Pan Angle Range	360°

CRANE 3

Professional 3-Axis Stabilizer

From intense chasing shoot to studio filming, different types of shooting environment require both high capacity and flexibility of equipment. Bearing filmmakers in mind, ZHIYUN felt the Crane series can be even better to adapt to strict and unpredictable filming environment. Now introducing the new CRANE 3S, the legendary gimbal built on a heritage of innovation with magnificent motors and brand new modular design, which aims for wider application and intuitive control.

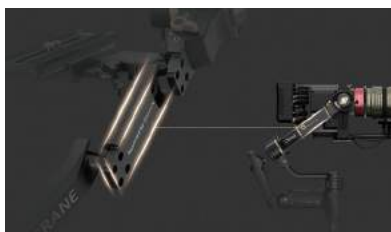

MISSION DELIVERED

FEATURES

Reengineered for More Ambitious Camera setups

It is not simply an upgrade but reconstruction. CRANE 3S is constructed with brand new SUPER motors which allow for Max. 6.5kg payload for a wide range of camera setups.

Extendable Arm. Greater Flexibility

An extension module which comes standard with CRANE 3S can be attached onto horizontal arm for mounting larger setups .

Modular Design. Versatile Shooting

You can either mount EasySling handle to extend the grip for more comfort upright & underslung operation, or choose to mount SmartSling handle featuring an intuitive control panel and OLED screen for intuitive control.

Properly Calculated 55°: Broader Vision

The properly 55° tilted roll axis is designed for unblocked view and allows enough space to mount large cinema camera combos.

Improved Zoom & Focus System

To meet the needs of cinematography, larger lens supports are added into the zoom & focus system. Zooming can be realized synchronously through SmartSling Handle.

SyncMotion: Visualized Control

For the first time in the industry, a visualized remote motion control system is introduced - ViaTouch 2.0. Filmmakers will be able to motion control the gimbal while monitoring shots via smartphones or monitors.

Cross-Compatibility. You can Imagine

With multiple thread holes of different sizes provided on both stabilizer and handle, CRANE 3S boasts cross-compatibility with a wide range of accessories such as motorized dolly, jib, cable cam, and Easyrig, satisfying various challenging shooting tasks.

Zero Swinging. Hero Security

The reinvented locking system can lock the three axes without noticeable swinging. The modular design is integrated with double locks to ensure the setup is 100% safe on the gimbal during traveling or storage.

Continuous Uptime Supported by PowerPlus

The DC-IN port supports up to 25.2V input for direct charging. PowerPlus Battery Pack can house 6*18650 batteries, giving more strength to your gimbal to adapt to constant intense motions, and serving as a compact yet fast-charging power bank for your devices.
