for large kits

Comfortable
harness system

Tripod
holder

Tough Weatherproof
build with rain cover

ALTA SKY

Planning to hike x-country with a heavy camera kit for that perfect shot? Then the **ALTA SKY Series** is designed for you.

THREE STYLES IN ONE SERIES

DUAL CAMERA/PERSONAL KIT COMPARTMENTS

Alta Sky 45D and **Alta Sky 51D** have an upper and lower compartment that allows you to tailor your kit to your trip. The upper compartment is the main camera space with full rear access and it can be set up for fast side or top access. The smaller lower compartment can be used for additional camera or personal kit to suit your needs.

TRADITIONAL CAMERA COMPARTMENT

Alta Sky 53 looks similar in appearance to the Dual Compartment models with the same tripod flap for a secure hold on a full sized tripod, but it has a more traditional internal setup for the largest kits, with full rear access and fast top access. It's also designed to carry a larger drone, such as the DJI Phantom style, though that has been widely replaced with the DJI Mini.

LARGE LENSES

Many photographers invest in a powerful lens like a 150-600mm lens for wildlife or sports photography. While many bags will fit a long lens, most solutions mean that you have to carry the body and lens separately, or have limited fast access to your camera for that fleeting shot. If you manage both, you're normally limited to carrying just that lens which may mean you miss that perfect sunset or macro shot. The Alta Sky Series addresses this with a choice of:

Alta Sky 42

Alta Sky 62

Alta Sky 66

Alta Sky 68

17 litres
Full frame body
on 150-600mm
plus 4 lenses

24 litres
Full frame body
on 150-600mm
plus 6 lenses

30 litres
Full frame body
on up to an
800mm lens

36 litres
Full frame body
on up to 800mm
plus 8 lenses
