

AirCastProTM 3

Learn more about the AirCastPro3

AirCastProTM allows you to utilize printers from your iOS® device that would not otherwise be accessible. Setup and configuration is easy— connect your printer(s), power it up, and connect to the “AirCastPro” wifi hotspot. AirCastProTM can be remotely configured with any computer, phone, or tablet that can use a modern web browser.

Wirelessly print to a large range
of photo printers including:

CITIZEN

DNP

FUJIFILM

hiti

 **MITSUBISHI
ELECTRIC**

**PRIMERA
TECHNOLOGY, INC.**

 **OSHINKO**

SONY

Connecting to printers couldn't be
easier. Plug your USB cable into the
ACP3 and printer, login to ACP3 on
tablet install and print

Key Features

Panoramic Printing - Print 2 and 3 panel continuous or Frame panoramic prints, from 6x14 to 8x36 (Citizen CX-02, CX-02W and DNP DS620a, DS820, and Primera IP60).

Guest Photo Upload - Allow your guests to upload and print photos via web page. AirCastPro3 lets you set your own upload limits for guests.

Print Size Override - Unlike other print servers, AirCastPro3 can be set to allow the user to print any size the installed media allows, without the need to reconfigure (iOS/iPadOS 16.x, 17.4 or later).

Dynamic Slideshow - Use the available HDMI port with any TV/monitor to display your photos as you print. AirCastPro™3 also lets you connect to its built-in slideshow from any tablet, computer, or Smart TV through a web browser.

USB Flash Drive Printing - Plug in your flash drive, media card, or just about any storage device. AirCastPro™3 will scan your storage device for images and automatically print them for you.

Lightning-fast HEIPr™ Engine - The fastest and most powerful imaging engine available in a compact print server configuration.

FTP Printing - AirCastPro™3 includes the ability to print via FTP. Connect your device through FTP, choose your print folder, and upload your images to print instantly.

User-selectable ICC profiles - Users can select a variety of colour profiles associated with their printer—or use their own custom ICCs.

Photo Archive Access - individual photos or choose to archive all photos into a downloadable zip archive.
