

# ANTIGRAVITY

## A1 8K 360 DRONE

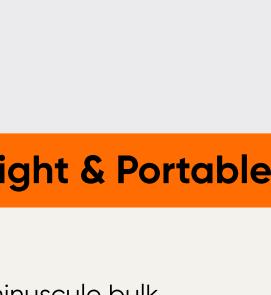

### One-sentence Intro

A1 is the world's **first 360 drone**. It can not only shoot 8K 360° panoramic videos, breaking through the limitation of the single - view of traditional aerial drones, but also offers a free and immersive flying experience.

Antigravity Vision

249g

### 8K 360° Invisible Aerial View

#### INVISIBLE DRONE

Shoot 360 without your drone photobombing. Antigravity A1's camera lenses are precisely positioned at the top and bottom of the drone, and an advanced 360 image-stitching algorithm powered by Insta360 makes the drone fully invisible.

#### 8K 360 VIDEO

Shoot once, explore endlessly. Our 8K 360 drone captures everything around it, letting you relive your footage from all angles in exceptional clarity.

### Ultra-Lightweight & Portable

#### FOLDABLE DESIGN

Extraordinary features, minuscule bulk.

#### UNDER 250g

Discover the world with a mini drone that is both feather-light and regulatory compliant almost everywhere.

### Immersive Flying Experience

#### 360 LIVE VIEW

Drone pilots can strap into a pair of goggles and experience a truly immersive 360 aerial view, looking freely in any direction with head tracking as if they are there.

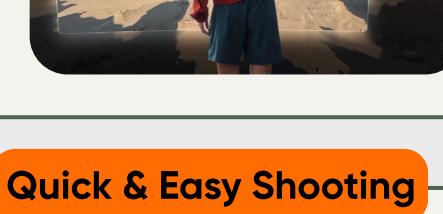

#### FREEMOTION MODE

While camera drones and FPV drones limit your view to the flight path, Antigravity A1 lets you freely explore your surroundings without changing course.

#### IMMERSIVE FLIGHT

The 360 live feed wraps around you, freedom to explore.

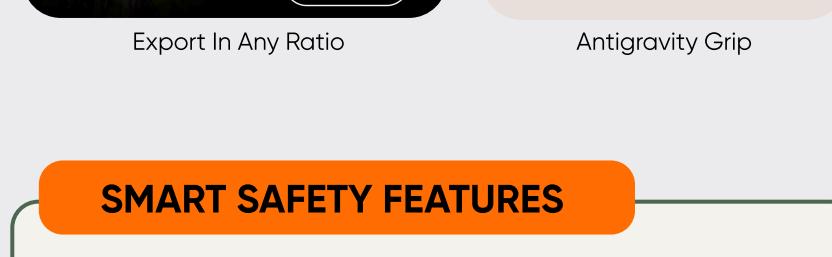

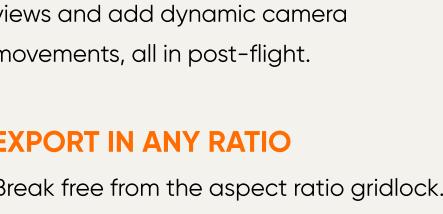

#### EXTERNAL DISPLAY

With Antigravity Vision's unique external display, your drone's journey becomes a shared adventure. Watch friends gasp as you dive over cliffs or chase sunsets – now everyone's part of the thrill.

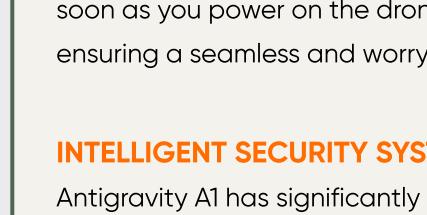

### Intuitive Motion Control

#### INTUITIVE MOTION CONTROL

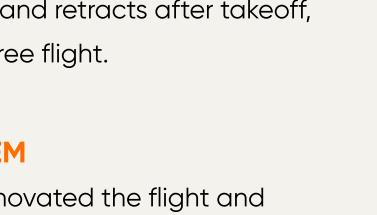

The Grip controller is your magic wand. Point it skyward, and the drone ascends like a shot. Swing it sideways to carve through canyons. It's a raw kinetic dialogue between your arm and the air.

One Fight, Any Perspective

Export In Any Ratio

Antigravity Grip

### Quick & Easy Shooting

#### FLY FIRST, FRAME LATER

Camera drones and FPV drones force you to nail the perfect angle mid-flight. Antigravity A1's 360 degrees of freedom captures every possible perspective in one take. Missed the shot? Rewind and reframe the footage. No second flights. No wasted battery. Just infinite flexibility.

#### ONE FLIGHT, ANY PERSPECTIVE

One flight fuels infinite edits. With Antigravity's 360 capture, you can extract forward, top-down, side or backward views and add dynamic camera movements, all in post-flight.

#### EXPORT IN ANY RATIO

Break free from the aspect ratio gridlock. Antigravity A1's 360 lens captures the full story, so that you can reframe your footage into 16:9 epics or 9:16 reels without compromising quality.

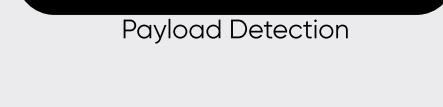

### SMART SAFETY FEATURES

#### AUTO LANDING GEAR

Antigravity A1 automatically extends the landing gear as soon as you power on the drone and retracts after takeoff, ensuring a seamless and worry-free flight.

Auto Landing Gear

Intelligent Security System

Payload Detection

#### INTELLIGENT SECURITY SYSTEM

Antigravity A1 has significantly innovated the flight and obstacle avoidance systems. The Grip controller swiftly directs the drone, ensuring it always flies forward. This way, the forward vision system can handle all obstacles.<sup>3</sup>

Additionally, smart features like return-to-home safeguard your flights, letting you fly free without worries.

#### PAYOUT DETECTION

Antigravity A1 features a payload detection system that flags excess weight to prevent misuse – keeping flight a

force for fun and creativity.
