

NATURAL + ARTIFICIAL GRASS
TECHNOLOGY APPLIED TO NATURE

mixto®
MORE POWER TO NATURE

NATURAL AND ARTIFICIAL TURF COMBINED TO
GIVE YOU A MORE STABLE, SAFE AND
TECHNICALLY HIGH-PERFORMANCE FIELD.

An artificial turf with very sparse filaments of artificial grass in which natural grass grows. The result?

Mixto®, a hybrid turf.

A technology designed to best promote the germination, cultivation and growth of natural grass in an artificial matrix.

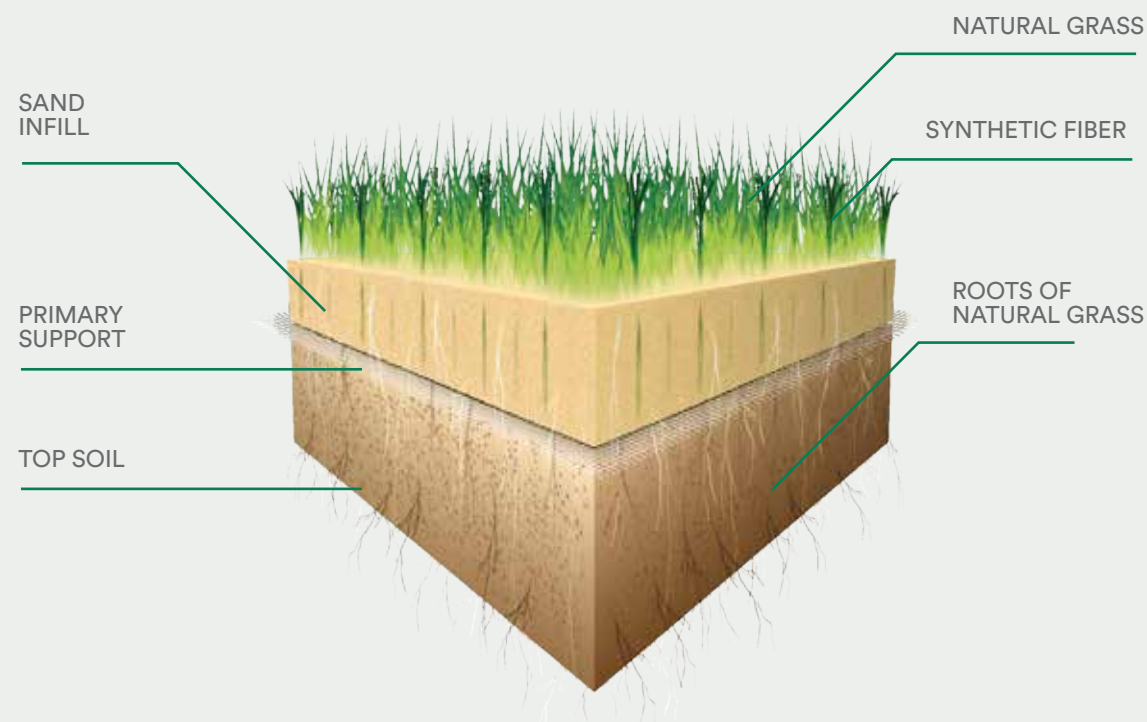

It is the result of 30 years of history. And, for sure, it is the best you can find on the market.

The perfect **oxygenation** and **permeability** of the surface layer and a perfect air-water-soil balance provides a sports field at the highest level **without muddy areas or waterlogging.**

Two options for installation:

on site seeding or Lay&Play method.

An innovation that guarantees **superior, long-lasting performance** and maximum safety for athletes at all times.

Mixto is a
Made in Italy technology

STRONGER ROOTS MORE PERFORMING GRASS

The special structure of the primary support layer, onto which the synthetic filaments are sewn, allows the root system of the natural grass to develop in depth, preventing tearing and lifting of turf.

Stability and safety of the playing field are guaranteed.

WHY CHOOSE MIXTO®

01

3 TIMES
MORE RESISTANT

Mixto® is **3 times** more durable than a natural grass field.

The protective action of the artificial grass reduces the natural grass wear and assures a fast recovery after the game.

3 TIMES HIGHER USE
THAN NATURAL GRASS

02

HOMOGENEOUS
AND SAFE

The stable and uniform playing surface **reduces the risks of accidents.**

The hardness value (Clegg hammer) can be managed and oriented.

100%
NATURAL
feeling

03

HIGH
PERFORMANCE

Smoothness, bounce, player and ball interactions are optimal.

The perception of the athlete is better than that of a completely natural terrain.

04

EASY AND FAST
TO BE INSTALLED

The installation is customised.

2-3 days with the laying of pre-cultivated turf in the nursery (Lay&Play), **7-8 weeks** with on-site seeding.

2-3
DAYS
Lay & Play

05

HIGH FLEXIBILITY
AND LESS WEAR

Reduced wear and tear on natural grass due to the strength and protection provided by the artificial element.

The playing field is also suitable for various uses, such as concerts and events (with appropriate preventive turf coverings).

Localised damage is easily repaired. Repairs are quick and immediate.

06

HIGH ECONOMIC
SUSTAINABILITY

Very competitive investment/hours-to-use ratio compared to a traditional field.

COMPETITIVE
INVESTMENT/HOUR
RATIO

WHY CHOOSE MIXTO®

07

NO MUD OR SLUDGE

Excellent drainage capacity.
Perfect oxygenation and permeability.
Air-water-soil balance.

The system prevents the formation of muddy areas or waterlogging.

08

GREAT WATER MANAGEMENT

The Mixto® hybrid system allows optimal water distribution in the top-soil thickness.

Wetting is therefore uniform, ensuring maximum turf quality and water savings.

09

SIMPLIFIED MAINTENANCE AND SEVERAL SEASONAL RENEWALS

The required maintenance is similar to that of natural pitches with a simplification and reduction in post-match/training restoration activities.

The system can be subjected to multiple seasonal renovations.

10

100% RECYCLABLE

Mixto® can be removed in only 2-3 days.

The plastics are 100% recyclable, are classified as 'recycled plastics' and are useful for creating new products.

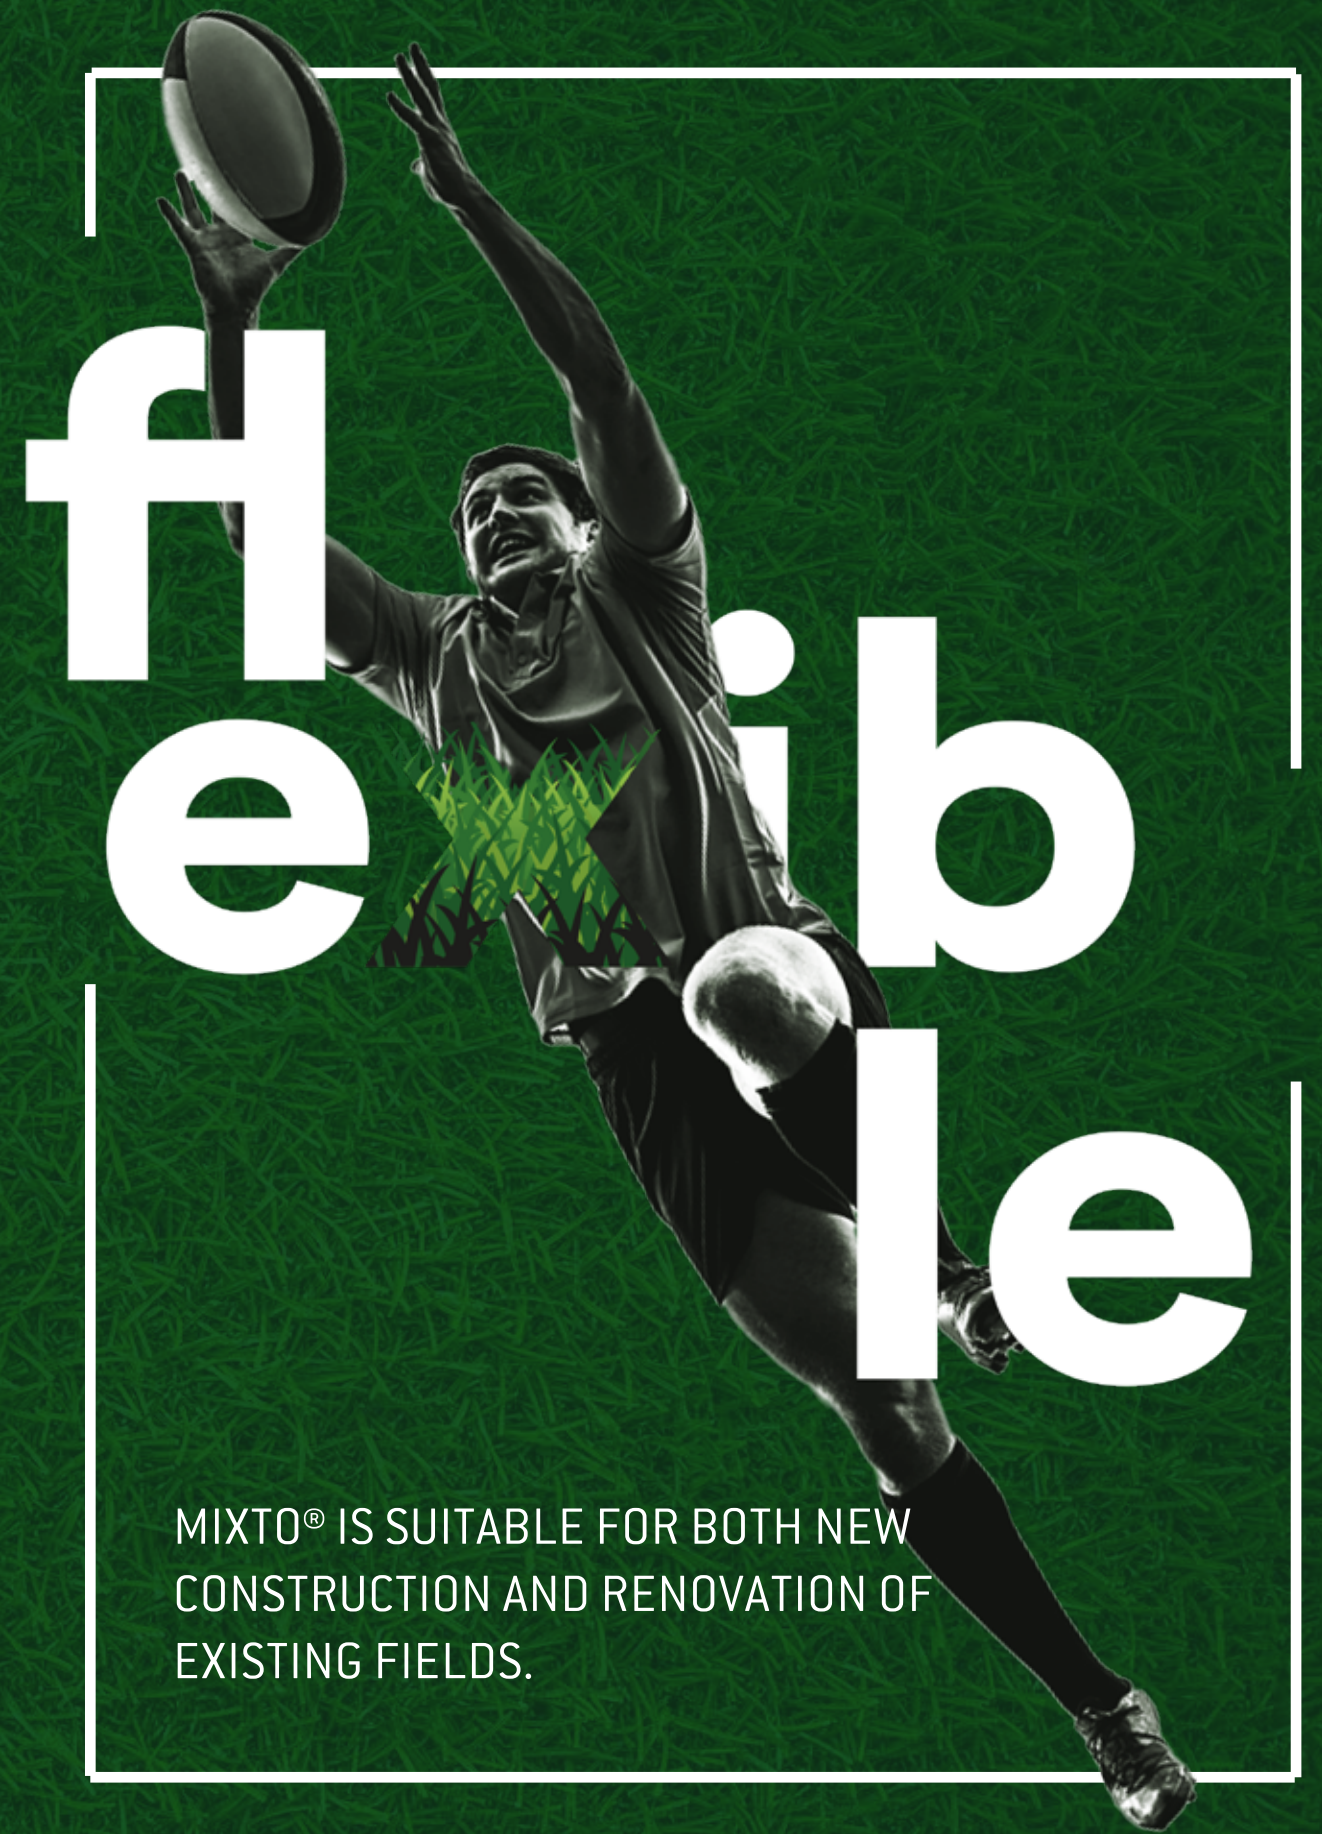

OLD TURF CAN GIVE LIFE TO NEW PRODUCTS.

extra

mixto®
MORE STRENGTH TO NATURE

MIXTO® TECHNOLOGY MAKES IT POSSIBLE TO
HAVE A TAILOR-MADE FIELD IN A VERY SHORT
TIME.

MIXTO® IS SUITABLE FOR BOTH NEW
CONSTRUCTION AND RENOVATION OF
EXISTING FIELDS.

MORE STRENGTH TO NATURE

DIRECTLY FROM THE NURSERY.
YOUR FIELD READY IN JUST 2-3 DAYS.

LAY & PLAY INSTALLATION

2-3
DAYS
Lay & Play

The pre-grown turfs in the nursery (big rolls) are easily transported and immediately laid in the playing field.

Thanks to the **Lay & Play** method, waiting times are completely eliminated.

Big-roll turfs are appreciated not only for their short laying times, but also for the possibility of partial turf replacement.

7-8

WEEKS
On site seeding

You can seed a Mixto® field directly on site, follow the growth of the natural grass inside the synthetic matrix step by

step, and have a ready-to-use playing field in **7-8 weeks**.

The use of certified materials in the realisation of the substrates, correct procedures and specialised operators allow for an unrivalled result.
