# Welcome to CeMAT AUSTRALIA 2022

It is with great pleasure that we welcome you to CeMAT Australia 2022. We are delighted to return to Melbourne with the event dedicated to supply chain management, warehousing, robotics and automation, materials handling and intralogistics at this time of great change – a time of both challenges and opportunities.

We have over 60 exhibitors on the show floor bringing you the latest technologies and equipment – for many, this is the first time they have been showcased at a live, in-person event.

We would like to thank all our exhibitors for the work and effort that they have put into their show floor presence. We encourage you to take the time to explore the stands, talk to exhibitors and gain an understanding of how they might benefit you. Particular thanks to our sponsors, Knapp, Dematic, WITRON, CMT, Big Ass Fans, Combilift and Addverb Technologies. Appreciation also must go to our supporting organisations, event and media partners – it is great to have you all on board.

Don't miss the fantastic conference program, featuring close to 40 speakers taking to the Knowledge Theatre stage. Enjoy this opportunity to hear insights and fresh ideas from a range of industry leaders and innovators.

From all of us at Hannover Fairs Australia, we hope that you are able to meet and re-connect with peers and leave enriched and inspired by your visit to CeMAT Australia 2022.

**Tim, Mike and James**  
Hannover Fairs Australia

## Exhibition Opening Hours

**Tuesday, July 19:** 9:00am to 4:00pm

**Wednesday, July 20:** 9:00am to 4:00pm \*

**Thursday, July 21:** 9:00am to 3:00pm

## Organisers Office

The Organisers Office is located at the front of the hall across the concourse. If you need to speak to a member of the CeMAT Team, please visit this room.

## MCEC Services Desk

The MCEC Services Desk is located on the Ground Floor near the Convention Centre Place entrance. Printing services are available here.

## Cloakroom

The cloakroom is located behind the MCEC Services Desk. Venue staff will be present should you have any questions about this service.

## Free WiFi

Free WiFi is available to all attendees. Simply log onto M Connect and accept the terms and conditions, and your connection should proceed as normal.

## CeMAT Bar

Located at the rear of the hall, the CeMAT Bar will serve cold drinks, coffee and alcoholic beverages. It will also serve a range of delicious food items, and feature an exclusive hot dog bar for you to enjoy.

\* The Industry Leaders' Drinks Reception will be held from 4:00pm to 6:00pm for exhibitors and invited guests only.

### KEYNOTE

9:30am **Rethinking, Reinforcing and Reconnecting the Supply Chain – An Innovator’s Perspective**

For decades efficiency has been the focus for the Supply Chain. The pandemic and its flow on effects, combined with a volatile geopolitical environment, has upended business as usual and organisations now have no choice but to rethink the Supply Chain. Societal and Policy issues are also at the forefront, with the demand for greater focus on climate, waste, emissions and ethical practices. At the same time, we have seen that organisations and individuals have been able to meet challenges through the use of digital and other technologies, surfacing the innovation capability that was always there but suppressed. The shift to online commerce, separating work and place, both working and accessing talent from anywhere and building new networks with a focus on flexibility has been breathtaking.

Pete Williams, a leading innovation thinker and doer, will set the scene on how you can rethink, reinforce and reconnect your supply chain with practical examples from the frontline.

### KEYNOTE SPEAKER

**Peter Williams**

Chief Edge Officer, Centre for the Edge, **Deloitte Australia**

10:00am **OzHarvest and the logistics behind the Fight Against Food Waste**

OzHarvest is Australia’s leading food rescue organisation. We save surplus food from ending up in landfill and deliver it to charities that help feed people in need.

We are constantly looking for new ways to inspire and educate people about food waste, food security and sustainability. Through our education programs and our advocacy work, we hope to inspire others to change behaviour and help reach the national target of halving food waste by 2030. Every \$1 donated to OzHarvest allows us to provide 2 meals to vulnerable Australians.

Join Bernardo Tobias, Vic & SA State Manager as he shares the OzHarvest story, who we are, the logistics behind our operations and the ways individuals can join the Fight Against Food Waste!

### SPEAKER

**Bernardo L. Tobias**

Vic & SA State Manager,  
**OzHarvest**

### 10:30am **The market trends driving retail change and how the supply chain can adapt to meet them**

Christine will talk about the macro market influences retailers are facing and how they are adapting their operations to meet changing conditions. She will then speak to how supply chain is adapting to these changing conditions.

- The influence of macro trends on the retail sector such as consumption, inflation and supply chain.
- Impact of ecommerce on physical retail and how this will transform the retail store of the future.
- The impact of technology and how experiential retail will define consumer demand.
- How supply chain disruption is impacting retailers behind the shop front.
- What responses are needed to counter the rising operational costs facing retailers.
- How can innovative property solutions support both retail and logistics needs.

#### SPEAKER

**Christine G. Miller**

Regional Director, Supply Chain  
Advisory – Pacific, **CBRE**

### 11:00am **MORNING TEA AND EXHIBITION**

### 11:30am **Digital Supply Chains – Opportunities and Use cases**

Digital supply chains are already creating exciting opportunities for businesses – offering end-to-end traceability and transparency that is pivotal for future resilient and sustainable supply chains.

In this talk, Prem will outline the key opportunities in digital supply chain and share specific use cases (and related experience) that the Factory of Future and Digital Innovation Lab at Swinburne University of Technology has jointly developed with various industry verticals.

#### SPEAKER

**Dr. Prem Prakash Jayaraman**

Associate Professor & Director  
of the Factory of Future &  
Digital Innovation Lab, **Swinburne  
University of Technology**

### 12:00pm **How COVID turned the Industrial property, and Third-Party logistics market on its head**

During this session, Marie will unpack both the state of the industrial property and Third Party Logistics industry. Typically, businesses and these industries are viewed in isolation; however, Marie will explain how these are intrinsically linked.

Marie will dive into the detail about the nuances and culture of each industry along with the types of industry players. Marie will give her opinions on where she sees the industry going based on 3PL and Industrial Property data, respectively. Marie will provide her tips and ideas to the audience on leveraging the best deal, whether for 3PL sourcing or industrial property procurement.

#### SPEAKER

**Marie Varrasso**

Chief Operating Officer,  
**uTenant**

### 12:30pm **LUNCH AND EXHIBITION**

### 1:00pm **Automation Strategies for Distribution Success**

Today's businesses are under increasing pressure from customer and market demands, challenges around labour costs and availability, and the rising costs of warehouse space in many cities. In addition, ongoing disruptions and volatility, both at home and overseas, are putting more pressure on supply chains to become more resilient and agile.

Pas will review the four big imperatives for business to optimise – processes, human activity, inventory and information – looking at the key supply chain solutions and technologies that optimise these four factors and drive resilience and agility, with real world examples of these solutions in action.

#### SPEAKER

**Pas Tomasiello BEng, MBA**

Senior Regional Director,  
Sales & Solutions Development,  
**Dematic Australia & New Zealand**

1:30pm

### Greenifying the supply chain with tech-led innovation

Carbon offsetting has been a low priority in the Australian shipping and logistics landscape. But with the climate crisis upon us, greenifying the supply chain has become no longer a choice, but a necessity. Tech innovation and sustainability must be embedded in every player's business model to drive real change in the industry.

Since arriving on the scene 7 years ago, Sendle has led the way as Australia's first registered technology B Corp and 100% carbon neutral small business shipper. As a leader in green shipping, Sendle has offset over 30 billion km of carbon in 7 years and set an ambitious target to reach NetZero by 2030. Join Sendle's Australian Managing Director, Laura Hill, as she discusses how the future of sustainable shipping and logistics will be found in tech-led innovation.

#### SPEAKER

**Laura Hill**

Managing Director, Australia,  
Sendle

2:00pm

### Partnering to end modern slavery

With over 40 million people in conditions of modern slavery and exploitation worldwide, and Australia's Modern Slavery Act now requiring large organisations to make annual public statements about their actions to assess and address modern slavery, what should organisations of every size be doing to be able to report, provide the right information to clients, listen to staff and encourage them to speak up, and collaborate with suppliers about human rights issues. Is modern slavery "just one more aspect of sustainability to struggle with", or are there easier ways to prioritise your actions?

Come along to this interactive session, learn from one of Australia's experts in supply chains and modern slavery, ask the questions you need to know, and find out what other organisations are doing.

#### SPEAKER

**Robin Mellon**

CEO, Better Sydney

2:30pm

### PANEL

#### Will shipping ever be the same? Women leaders in shipping discussion panel

Will shipping ever be the same again? Join this panel of leaders in shipping and freight as they discuss the post-covid state of play and potential impact for the supply chain.

- The realities of current bottlenecks
- Automation and digital technology
- The race to decarbonisation compliance
- The role of women in shipping
- The emerging generation of future industry leaders

### SPEAKERS

**Tonia du Preez**

Executive Manager,  
Xtreme Freight

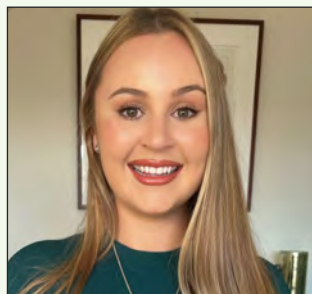

**Jacqui McCombie**

Managing Director, **Globelink**  
International Pty Ltd

**Danella Wilmschurst**

Partner, **Norton White Lawyers**

**Doreen Vrankar**

Sales & Customer Service  
Manager, **Globelink**  
International

3:15pm

#### The Era of intelligent DCs: a design strategy by COLES and WITRON

Data collection in the warehouses today is no longer a static component in the supply chain, but a smart transformation which empowers real-time visibility, makes decisions autonomously based on the live data, controls profiling of products and logistics operations in the most efficient ways possible to fulfil next day, same day deliveries.

COLES and WITRON will discuss a design strategy to meet the constant changing nature of supply chains and the technology capable of achieving error-free order fulfilments through smart distribution channels.

### SPEAKERS

**Johannes Meissner**

Technical CEO,  
**WITRON Logistik + Informatik GmbH**

**Kevin Gunn**

EGM Central  
Operations and  
Transformation,  
Coles

3:45pm **CLOSE OF DAY 1**

### 9:00am SHOW OPEN

#### 9:30am **Putting the customer first. Anything less is setting up for failure**

In this session, Kieran will delve into the importance of putting the customer first and how it returns tangible sales growth for online retailers. The biggest influence on customer satisfaction is a successful supply chain, fulfillment solution and last mile delivery experience – easy, right?

Kieran will explore the common mistakes that can easily be avoided in a back-to-basics reminder that all the best automation, efficient labour management, materials handling equipment and industrial real estate solutions are there to serve the ultimate goal of customer satisfaction. Lose sight of this, then you're not playing to win.

#### SPEAKER

**Kieran Boyce**

General Manager, Operations,  
**MyDeal**

### 10:00am LIVE CASE STUDY

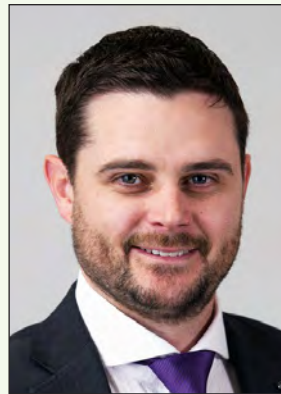

#### **Creating Snack Brand's mega 30,255 square metre automated facility**

In a rare and candid live case study presentation, join Snack Brands Senior Supply Chain Manager, Sion Westcott-Lewis, and Daifuku Oceania's Executive General Manager of Project Delivery, Cory Saunders, as they share their collective experience on creating Snack Brand's mega 30,255 square metre automated facility. Audience members will be able to peek behind the curtain as both presenters share their key learnings and insights into space optimisation, driving key partnerships and keeping the bigger picture in focus when making technology transitions.

Three key takeaways:

- Great expectations – creating a successful partnership
- Managing change in the transition towards automation
- Against all odds – delivery during a pandemic

#### SPEAKERS

**Cory Saunders**

Executive General Manager,  
Project Delivery, **Daifuku  
Oceania**

**Sion Westcott-Lewis**

Senior Supply Chain  
Manager, **Snack Brands**

### 10:30am **How to harness virtual technology today and realise game-changing benefits for your warehouse**

Discover how you can harness virtual technology today and realise game-changing benefits for your warehouse, including:

- Greater connectedness and borderless collaboration
- Experience-based learning and enhanced problem solving through unique perspectives
- Holistic visualisation enabling efficient solution development and decision making

#### SPEAKERS

**Tom Yang**

Design Manager, **TMX**

**Rob Turner**

Director, Warehouse Design and Optimisation, **TMX**

### 11:00am **MORNING TEA AND EXHIBITION**

### 11:30am **Creating Future Value Chains**

This session is dedicated to a remarkable fact: There has never been such a plethora of opportunities for innovation in our business area. However, the future holds many challenges. For example, our value chains need to become faster, more resilient, more sustainable, and less prone to error while offering customers a better and more convenient shopping experience. Besides, profitability continues to be an essential requirement. For all these reasons, the call for new concepts is growing louder – especially in urban areas.

As urban space and traffic concepts are being redesigned, streams of goods will also have to be changed accordingly. Intelligent adaptations will be required that allow consumers to be supplied in an environment where the line between online and offline shopping blurs and where delivery, pick-up, and return options suit their daily routines. This is essential as consumers' lives are likely to become significantly more flexible in the future.

The use of technologies will play a vital role in these developments. Choosing the right strategy and using state-of-the-art technology capable of integration will be a decisive factor in tying up the loose ends of the value chain: The goal is to control streams of goods and, more importantly, data streams to create smart value chains for the future.

#### SPEAKER

**Michael Kemeny**

Director of Sales and Engineering, **Knapp**

12:00pm

### PANEL

#### Warehouse safety: Who or what is the weakest link?

With workers sharing the warehouse with autonomous vehicles and automated systems, how do we keep people safe? What systems, training and equipment is needed to face the new challenges? Can technology create safer workplaces? Are humans the weakest link? Does automation spell the end of manual equipment or can the two types of machines work together safely and effectively?

#### CHAIRPERSON

Country Manager, Australia,  
Combilift

##### Kent Rogers

Global Product Development  
Manager – Inventory Robots,  
DHL Supply Chain

##### Max Reynolds

Director, DC Design and  
Optimisation, TMX Global

##### Jeff Triantafilo

Intralogistics Consultant,  
Warehouse and Logistics  
Improvement Engineering,  
FuzzyLogX

12:45pm

### LUNCH AND EXHIBITION

1:30pm

#### How to address labour shortages in the supply chain industry

Prior to Covid, it was all about lean, just-in-time operations with no redundancy in the market.

Covid caused a surge in demand and buying behaviour, creating a need for e-commerce fulfillment, omni-channel solutions and re-thinking of supply chains. Chief Supply Chain Officers are getting a seat at the boardroom table, new roles are created in inventory and demand planning and Amazon has recruiters standing in the street holding up signs “wherever you work, we pay \$5 more per hour”.

Three key takeaways:

- Leadership: interventions on how to lift people (encourage a career in supply chain, building a pipeline of future leaders)
- New talent: attracting new people into the industry (collaboration, we are connecting people in new ways, only 30% of women work full time in Australia – and they are natural organisers)
- Alternatives: driving continuous improvement and efficiency to do more with less people (data, systems, process, automation)

#### SPEAKER

##### Katharina (Kat) Attana

Executive Board Member,  
Women In Supply Chain

2:00pm

### Finding Sam – engaging employees in a meaningful way

Engaging employees has been the number one focus, over the past few decades, to shift organisation performance in a meaningful way. However, as Gallup data suggests this number has remained around the 15% since Gallup started measuring it in 2000, despite all our good efforts. Perhaps we are trying too hard.

In this session, Ishan will share a case study on how a seemingly 'disengaged' employee, Sam, helped to turn around the performance of one large manufacturing business. Ishan will help you find people like Sam in your business

#### SPEAKER

**Ishan Galapathy**

Productivity Expert, Speaker,  
Author

2:30pm

### Masterminding a Meerkat: the story of DHL's autonomous inventory management robot

Kent Rogers and Karl Brooks; colleagues with similar strengths in IT, created their inventory robot, Meerkat Inventory after witnessing so many go-live and operational challenges created by inventory problems. The new mobile robots opened the way for small platforms to deliver solutions never before possible.

At about the same time, DHL began a discovery journey in the innovation sphere. The global board launched a program in late 2017 called Start-up Lab. It was charged with identifying then support ideas, which may not have been visible in the traditional management structure. The net was cast globally across all the divisions of DHL and the idea was to see what in-house innovations could be found.

Join Kent Rogers as he shares the wild ride Meerkat Inventory has been on over the past five years – from inception to go live. He will share the complexity and personal challenges of designing, building, testing and certifying a purpose built industrial inventory management robot and why the finishing touches are so important. (You can't expect a local stores person or inventory manager to understand how to make it work – they need to see simplicity and value in each solution otherwise it may become an expensive ornament.)

Three key takeaways:

- Organisations need to have an active approach to identify and support innovation. There are many small players who have really good ideas and no knowledge of how to get traction with a supporting entry into industry.
- Failure should be seen as learning and the organisation should look at trying to fail cheaply before the perfect solution is found. Traditional cost evaluations often close the door on good ideas which may take time to embed in the operation.
- Employees are often excited about the ideas in their area of work and are able to do research using their existing knowledge. It doesn't have to be in their current role. The challenge is to empower them to work through the challenges as there will always be many.

#### SPEAKER

**Kent Rogers**

Global Product  
Development Manager –  
Inventory Robots,  
DHL Supply Chain

3:00pm

### The cost of heat stress in the workplace and how big fans make a big difference

The warehouse, manufacturing and distribution sectors operate in high labour and often heat intensive environments. This can lead to heat stress, which is proven to result in lost productivity through lowered cognitive functions, absenteeism and lowered physical capabilities.

With climate scientists predicting an increase in heat waves of greater intensity, government bodies and global health authorities are recommending companies adopt adaptation measures as a matter of urgency to avoid severe economic impacts from labour productivity loss.

Heat stress can negatively affect businesses and its people at all levels. Big Ass Fans has a commitment to safety and comfort and has researched and developed methods to overcome these issues. This research has been carried out at both their research and development facility in the US, the largest facility of its kind, as well as working extensively with NASA to better understand thermal comfort.

#### SPEAKER

**Matthew Wales**

Warehouse Projects Manager,  
Big Ass Fans

3:30pm

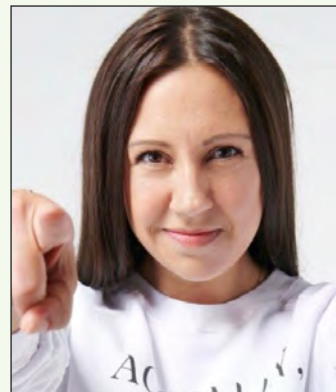

### Looking locally – the formation of a sustainable, ethical, all-Australian supply chain

One of the few positives to come out of COVID-19 lockdowns was the increasing awareness and support for local businesses that were struggling. At the same time, disrupted supply chains highlighted the dangers of relying solely on international providers.

During Melbourne's extended stay-home mandate, entrepreneur Kate Dillon was just one of many small business owners who feared for her livelihood. But, inspired by the community efforts to help local stores, Kate began work on a whole new range of products, in a whole new sector, and with a whole new mission.

Join Kate as she shares the She Lion journey and the challenges and benefits she has discovered while forming an end-to-end, all-Australian supply chain with an emphasis on sustainability and an ethical approach to supply partnerships.

#### SPEAKER

**Kate Dillon**

Founder, Creative Director,  
She Lion Group Pty Ltd

4:00pm – 6:00pm

# Networking Drinks Reception

BROUGHT TO YOU BY

WITH SPECIAL  
GUEST SPEAKER

**Paul Keisler**

Director of Product  
Operations & Site  
Delivery, Tennis Australia

CeMAT AUSTRALIA and Big Ass Fans are pleased to introduce the **Industry Leaders' Drinks Reception** that will be held in the CeMAT Bar from 4:00pm on Wednesday, 20 July.

The drinks reception brings everyone together in a relaxed atmosphere once the main show has closed for the day.

This is a great networking opportunity and the perfect environment to build relationships, meet new contacts or just relax with like-minded individuals.

Joining us as our special guest speaker for the evening will be **Paul Keisler**, Director of Product Operations and Site Delivery, Tennis Australia.

We are delighted to have Paul joining us, and look forward to the operational overview of what it takes to deliver the Australian Grand Prix he will share with us.

It is sure to be a fantastic gathering, and we hope that all delegates, speakers and exhibitors will be able to join us.

9:00am **SHOW OPEN**

9:30am **Disaster, disruption: the implications and our response**

Unprecedented events have taken place globally since 2019. Bushfires, floods, pandemics, blockages, and war disrupted supply chains and tested our resourcefulness. Logistics and material handling had to quickly evolve to cope with erratic forecasts, impossible deadlines, and uncertain capacity levels.

Businesses are moving from just-in-time to just-in-case, doubling efforts in a 'China plus one' strategy, and working on ways to mitigate inflation. What are the implications for our activities? What is the role of technology and the people behind it?

**SPEAKER**

**A/Prof Flavio Macau**

President, Western Australia Chapter, Australasian Supply Chain Institute

10:00am **Last year's wins are in the trophy cabinet. Supply Chain leadership is about what you do next**

Listening to the futurists this was always set to be a disruptive decade with the social, economic, and technological trends underway. Two years in and we have experienced more turbulence than anticipated. As business leaders look ahead, we see more waves to come.

Like a sports coach knows the trophy from last season will be put in a cabinet and everyone's focus quickly shifts to the performance in the upcoming season, so to for the Supply Chain leaders that have positively navigated the last two years.

This session is for you if you are accountable for performance within the supply chain today AND tomorrow.

Three key takeaways:

- Learn the 6 areas where Supply Chain reality is moving faster than leadership development. Given the interconnected world environment, we will explore this through a global and local implications lens.
- Map your leadership change-fitness – viewing current concerns, innovation, and on the other side of the industry transformation.
- Identify what you can do in the next 100 days to change yours and your business trajectory this decade.

**SPEAKER**

**Bernie Kelly**

Transformation Partner

10:30am MORNING TEA AND EXHIBITION

11:00am **Intelligent Urban Networks:  
New approaches to customer  
proximity and profitability**

Currently, we have considerable challenges to overcome. End customers want more and more services and smooth shopping experiences. However, the fulfilment of these wishes carries a hefty price tag. Furthermore, COVID-19 has fundamentally changed the basic conditions. How can these demands be satisfied, and can we simultaneously create added value?

Let's begin thinking end-to-end: It will be increasingly important to develop linked value chains that include production, distribution and the end customer. Here, smart technologies and processes will be critical in making this success possible. What are the benefits of having digitally driven value chains, and what role do agile networks play in urban areas? This session will provide answers to these questions ...

**SPEAKER**

**Michael Kemeny**

Director of Sales and  
Engineering, Knapp

11:30am

### PANEL

## Technology is necessary, but business is still personal

### Supply chain leaders panel discussion.

This panel will discuss:

- Socio-technical systems or how technology impacts people (and vice-versa).
- How could the 'Great Resignation' affect logistics?
- The importance of a high-impact culture in logistics.
- The key role of personal relationships during disruptions.
- The key role of collaboration to achieve sustainability.

# 250% Productivity Boost

## Automation at Asahi's DC achieves results worth raising a beer to.

When consolidating its multiple Brisbane sites into the new Heathwood DC, Asahi made the decision to upgrade from previously very labour-intensive operations to a fully automated warehouse solution, eliminating manual handling of pallets.

With the introduction of a satellite ASRS solution, Dematic helped Asahi maximise storage capacity, reduce operating costs, and improve efficiency and productivity to better meet the needs of its customers.

## Sustainability at WITRON

**Fruit baskets are not enough.  
Employees want their work to  
make sense.**

"We provide food for **40%**  
of Finland's population."

**Technology enables  
sustainability.**

"Today, we save **10%** on  
transportation and can track  
the canned milk back to the cow  
on the pasture."

**Logistics will not become more  
expensive.**

"But unsustainable delivery and  
logistics business models will  
disappear."

**Fridays for Future is  
a fire detector.**

"But, we have to look at the fire, not  
at the public presentation."

**Sustainability does not  
only mean environmental  
protection.**

"We reduce the workload of our  
employees – no one has to lift  
**12 metric tons** a day  
anymore."

**Sustainability means  
employee attraction.**

"Recruited specialists take a closer  
look, question developments and  
technologies. Companies have to  
manage their business in a reliable  
and sustainable manner."

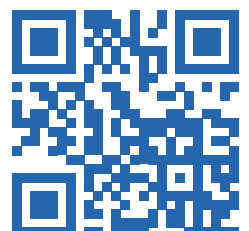

**Family companies are  
the winners.**

"We aren't quarterly thinkers –  
More than **5.100** people  
from **60** nations work for us."

**We need to talk about  
trade units.**

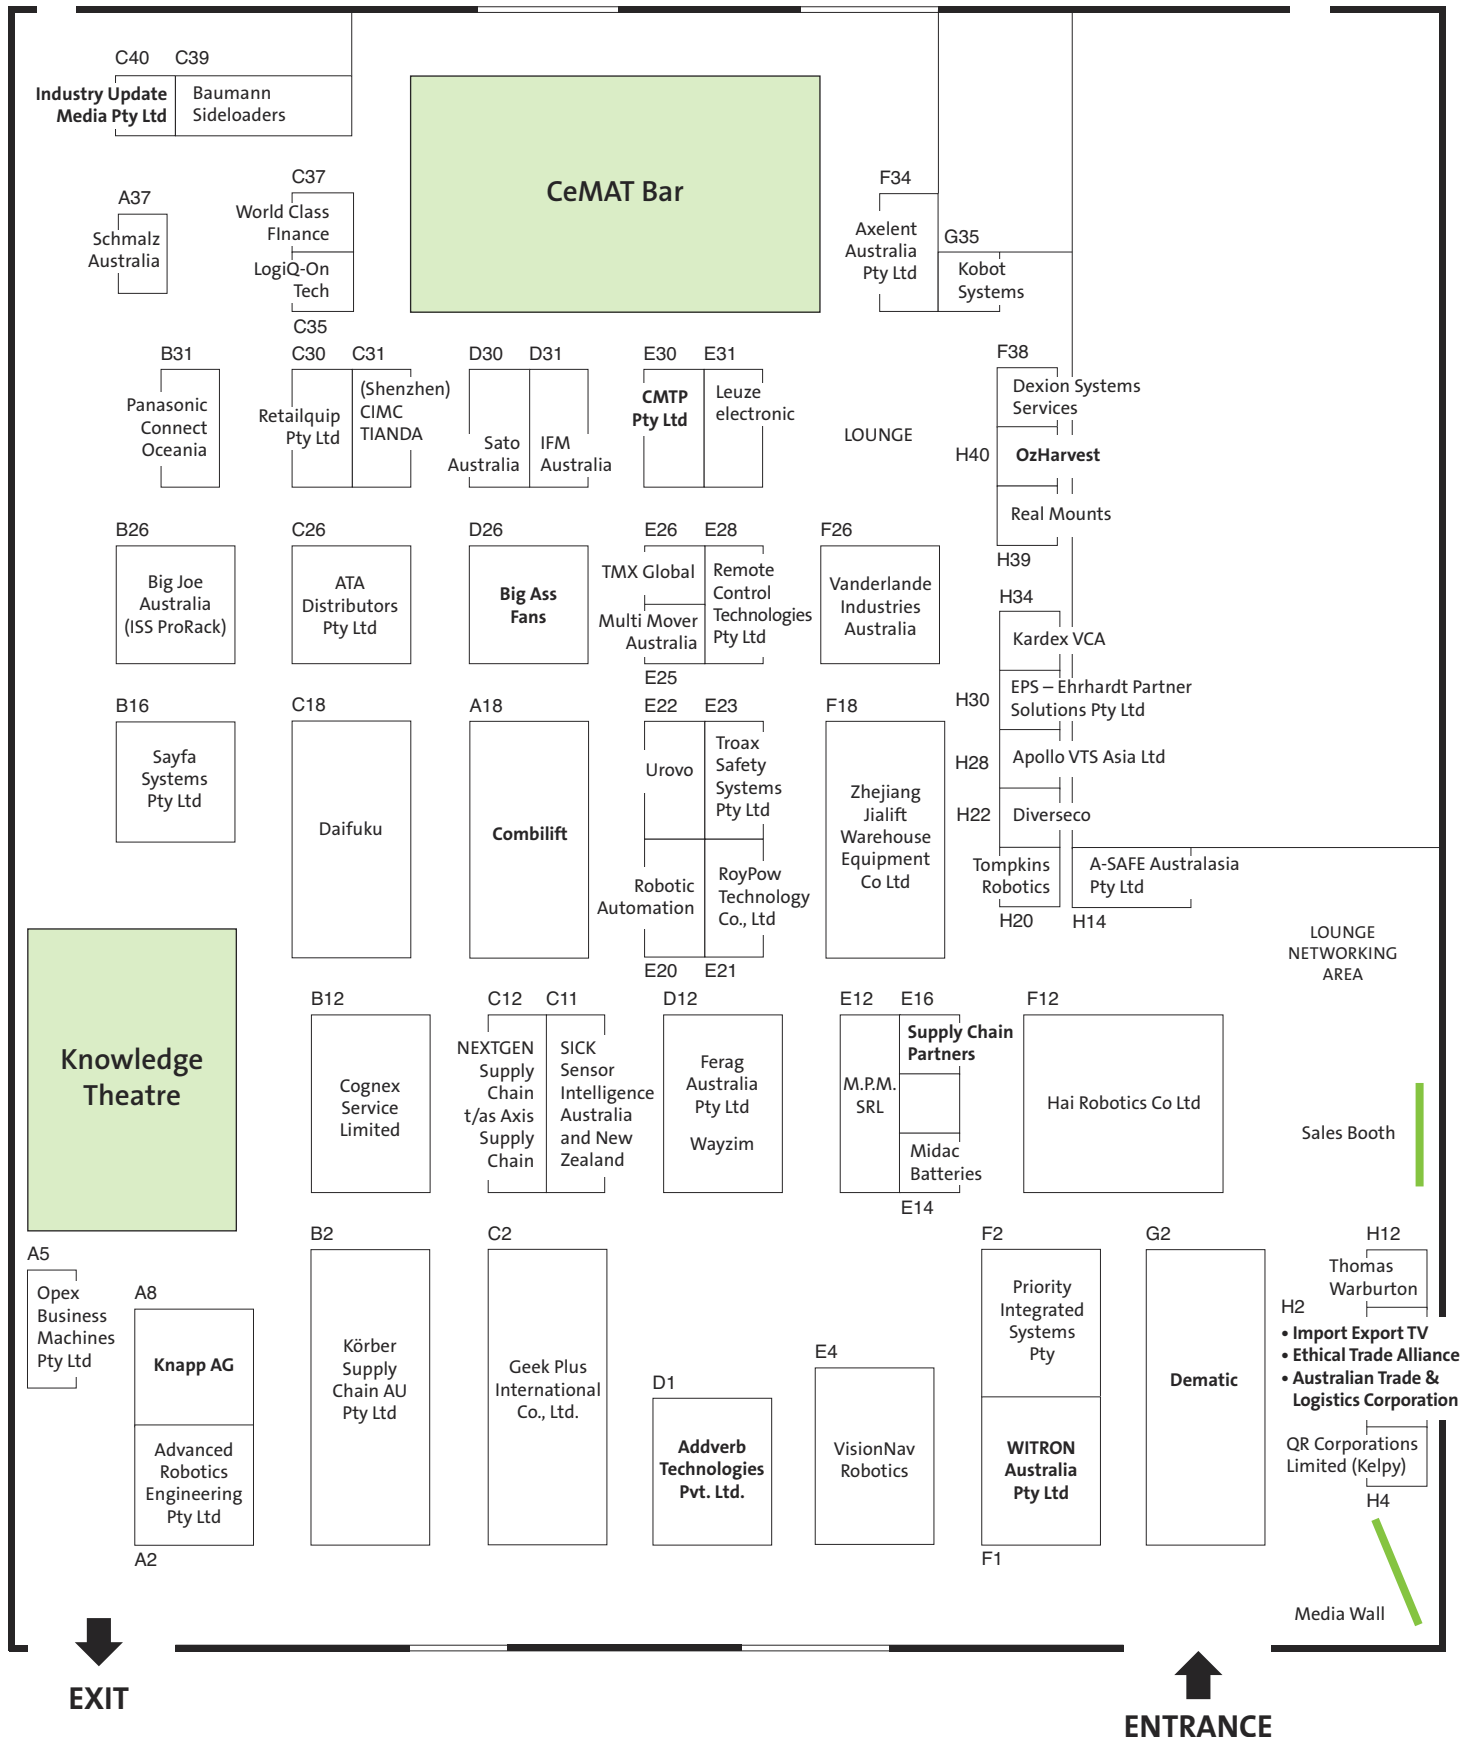

"Are our current packaging and  
shipping units sustainable?"
