Welcome to CeMAT AUSTRALIA 2024

We are thrilled to welcome you to CeMAT Australia 2024 at the Melbourne Convention and Exhibition Centre. This year, we are excited to announce our event partner, KNAPP, alongside our valued sponsors: Argon & Co, Dematic, Extolla, Kardex, Siemens, Swisslog, SSI Schafer, Big Ass Fans, Witron, Conveyor Logistics, Slimstock, Proactive Global, Hyundai, BHD Storage Solutions, Axellent Australia, Healthy Heads in Trucks and Sheds, and SCLAA.

Returning to Melbourne, CeMAT Australia 2024 is the premier event dedicated to supply chain management, warehousing, robotics and automation, materials handling, and intralogistics. As we navigate both challenges and opportunities, we have over 130 exhibitors eager to showcase the latest technologies and innovations shaping the future of our industry.

We would like to thank all our exhibitors for the work and effort they have put into their show floor presence. We encourage you to explore the stands, engage with exhibitors, and discover how their offerings can benefit you. Our appreciation must also go to our supporting organisations, event and media partners – it is great to have you all on board.

Be sure to attend our fantastic conference program, featuring over 70 speakers on the Knowledge Theatre stage, where you can gain insights and fresh ideas from industry leaders and innovators.

From all of us at Hannover Fairs Australia, we hope you enjoy the opportunity to connect with peers and leave enriched and inspired by your visit to CeMAT Australia 2024.

Exhibition Opening Hours

Tuesday, July 23: 9:00am to 5:00pm

Wednesday, July 24: 9:00am to 4:00pm

Networking Drinks: 4:00pm to 6:00pm (18+)

Thursday, July 25: 9:00am to 4:00pm

MCEC Services Desk

The MCEC Services Desk is located on the Ground Floor near the Convention Centre Place entrance. Printing services are available here.

Cloakroom

The cloakroom is available for CeMAT Visitor use and is located adjacent to the Goldfields Cafe.

Directions are available from the registration desk.

Free WiFi

Free WiFi is available to all attendees. Simply connect to the "MCEC Free WIFI" and enjoy access for light browsing.

CeMAT Bar

Located at the rear of Hall 5, the Big Ass Bar will serve a variety of hot and cold drinks.

Food is available from the kiosks in the centre rear wall within the Exhibition Hall.

PROGRAM AT A GLANCE

See page 10 for more information about sessions and speakers

9.15am	Open event – Welcome to Country
9.30am	KEYNOTE The road ahead: mapping the course for the future of supply chains Peter Jones – Managing Director & Founder, Prological
9.55am	Towards Cyber Resilient and Trustworthy Supply Chains Prof Robin Doss – Director, Deakin Cyber, Deakin University
10.20am	Supply Chain Analytics and why does it matter for your everyday success? Michael Kemeny – Managing Director, KNAPP Australia
10.45am	Break 30 mins
11.15am	Navigating the Next Era of Supply Chain Efficiency: A Fresh Perspective on Inventory Management Frank Bucolo – Country Manager, Slimstock Australia and New Zealand
11.40am	IN CONVERSATION Manufacturing Tech Australia podcast: Transformation in Supply Chain and Logistics – Deep diving into how cutting-edge technologies are reshaping the industry Hosted by: Shane Williams & Paul Mason Stephanie Krishnan – Associate Vice President, Manufacturing, Retail, and Energy Insights, IDC Asia/Pacifics, Abhijeet Verma – Head of Vertical – Intralogistics, Siemens and Peter Jones – Managing Director & Founder, Prological
12.25pm	Upskilling for the supply chain automation age Paul Childerhouse – Head of Department, Logistics and Supply Chain Management, RMIT University and Dr Shahrooz Shahparvari – Senior Lecturer in Supply Chain and Logistic, RMIT University
12.45pm	Lunch 40 mins
1.25pm	PANEL Intelligent intralogistics – experience the flow! CHAIRPERSON: Abhijeet Verma – Head of Vertical Intralogistics, Siemens Darryl Kaufmann – Executive General Manager, Siemens Digital Industries Australia & New Zealand, Luis De Jesus – Managing Director, Mexx Engineering and Martin Kramer – Head of Automation, Dexion Asia Pacific
1.50pm	PANEL Future fuel: What the considerations for moving to lithium-ion – and to hydrogen fuel cells CHAIRPERSON: Allan Leibowitz – Editor at Large, Forkliftaction.com Ian Christensen – Managing Director, iMove, Roy Zou – Managing Director, Alta Battery Technology, Dan Goodfellow – Group Manager, Products & Fleet Trading, Coates and Hans van Pelt – Director and Principal, Affairs of State
2.30pm	Break 30 mins
3.00pm	Upscale your warehouse: How will software be integral to driving your business innovations into the future? Thomas Elstner – Head of Product Management, SSI SCHAEFER, Brett Thirup – Managing Director Australia and New Zealand, SSI SCHAEFER, Airyn Ong – Head of Software APAC & MEA, SSI SCHAEFER and Jens Nikolai – National Sales Manager, SSI SCHAEFER
3.30pm	How to slay the peak demand dragon Karl Friesenbichler – APAC Managing Director and Head of the Region, Ferag
3.50pm	Exhibition 70 mins

PROGRAM AT A GLANCE

See page 10 for more information about sessions and speakers

9.30am	<p>KEYNOTE AI is equal parts exciting and terrifying but how can it add real value to the logistics and warehousing industries?</p> <p>David Francis – Co-Founder and CEO, Virtual Method</p>
9.55am	<p>Future Together: Collaborative Logistics for Australian Logistics Excellence</p> <p>Stephanie Krishnan – Associate Vice President, Manufacturing, Retail, and Energy Insights, IDC Asia/Pacifics</p>
10.25am	<p>Revolutionising Food Retail Logistics</p> <p>Win Tun – Director of Business Development APAC, WITRON</p>
10.45am	<p>Break 25 mins</p>
11.10am	<p>The benefits of robotic picking and palletising</p> <p>Steve Dimitrovski – Senior Sales Consultant, Retail and e-Commerce, Swisslog Australia and New Zealand</p>
11.35am	<p>PANEL As automation expands, is there still a role for people in materials handling</p> <p>CHAIRPERSON: Allan Leibowitz, Editor at Large, Forkliftaction.com Jason Wu – Business Development Manager, ANZ AutoStore, Jens Nikolai – National Sales Manager, SSI SCHAEFER, Tabitha West – Founder & Principal, Reimagine Talent and Peter Jones – Managing Director & Founder, Prological</p>
12.15pm	<p>PANEL Managing team wellbeing within an industry evolving with automation and AI. How to build resilience, understanding and adaptability.</p> <p>CHAIRPERSON: Tabitha West – Founder & Principal, Reimagine Talent Naomi Frauenfelder – Chief Executive Officer, Healthy Heads in Trucks & Sheds, Regan Brown – Managing Director and Owner, Labourforce Group and Jamie Dixon – Senior Director, Supply Chain, TMX</p>
12.55pm	<p>Lunch 40 mins</p>
1.25pm	<p>Zero Touch Fulfilment</p> <p>Tiago Oliveira – Business Development Manager, Knapp Australia</p>
1.45pm	<p>Cooling the Legal Heat of Work, Health and Safety Non-Compliance</p> <p>Matt Wales – National Sales Manager, Big Ass Fans</p>
2.00pm	<p>Decoding ESG: Compliance, Competitiveness, and the Catalyst for Business Success</p> <p>Dr. Richa Vijayraj – Environment Committee Lead, SCLAA / Executive Director, Impact HQ</p>
2.30pm	<p>PANEL Navigating the Metrics Maze: Strategies for Effective ESG Measurement and Reporting</p> <p>CHAIRPERSON: Archival Garcia – Founder and CEO, Ensemble Solutions Pat Cieri – Managing Director, Interroll Australia, Ron Pulido – Sector Lead, NABERS and Chloe Fischart – CEO, Sendable</p>
3.00pm	<p>Growing your commercial outcomes through opportunities in Australia's emerging social impact marketplace</p> <p>Toby Dawson – Principal, Tomorrow Together</p>
3.30pm	<p>Real world insights: Janus Electric used current electrical infrastructure to create a 100% carbon zero solution for electrifying its road transport fleet</p> <p>Lex Forsyth – Co-Founder and CEO, Janus Electric</p>
4.00pm	<p>Networking Drinks with special guest speaker Dr Sheila Nguyen</p>

PROGRAM AT A GLANCE

See page 10 for more information about sessions and speakers

9.30am	<p>PANEL</p> <p>Warehouse automation but make it scaleable – Making transformation more accessible for SMEs</p> <p>CHAIRPERSON: Rakesh Bandipelli – Director, Supply Chain & Logistics Association of Australia (SCLAA) Brett Thirup – Managing Director, SSI Schaefer, Amy Griffith – Senior Manager, Grant Thornton and Archival Garcia – Founder and CEO, Ensemble Solutions</p>
10.15am	<p>Order Fulfilment Automation: Navigating the Complexity</p> <p>Pas Tomasiello – Vice President Sales – APAC, Dematic</p>
10.35am	<p>Aligning data, automation, and operations objectives in system design</p> <p>John P Thorpe – Director of Business Development for Parcel Solutions, BlueCrest</p>
11.00am	<p>Break 30 mins</p>
11.30am	<p>IN CONVERSATION</p> <p>Panel Podcast by Manufacturing Tech Australia</p> <p>The Next Frontier in Automation and Robotics: Unpacking the Latest Advancements and What the Future Holds.</p> <p>HOSTED BY: Shane Williams & Paul Mason</p> <p>Michael Kemeny – Managing Director, KNAPP Australia, Sean Ledbury – Head of Sales and Consulting for Australia & New Zealand, Swisslog and Sean Hewat – Head of Operations ANZ, Tompkins Robotics of Australia</p>
12.15pm	<p>PANEL</p> <p>Is Automation the Key to Mastering Business Growth for SMEs?</p> <p>CHAIRPERSON: Grant Smith – ANZ Director of Business Development AutoStore, Kardex Francis Meier – Executive Director, Trios Consulting and Arthur Dardoumbas – Executive Director, ThreeSixty</p>
12.40pm	<p>BONUS KEYNOTE</p> <p>Debunking the Myths of Artificial Intelligence in Supply Chain Planning</p> <p>Elton Brown – Senior Business Consultant, DMS</p>
1.05pm	<p>Lunch 30 mins</p>
1.35pm	<p>Maximising G2P investment via the integration of robotic unit sortation</p> <p>C. Thompson Brockmann – EVP Customer Operations, Tompkins Robotics</p>
1.55pm	<p>Democratising Sorting + a case study of deployment in Regional Australia</p> <p>Dominic Lindsay – CEO / Co-Founder, Nexobot</p>
2.15pm	<p>Exhibition Viewing 2.15pm – 4.00pm</p>

Knowledge Theatre Chairpeople

DAY 1 | Tuesday 23 July

Richard Bycroft

Partner – Management Consulting
Grant Thornton

Richard is the lead Partner for the Management Consulting team in Sydney and supply chain solutions nationally. Richard has over 30 years retail industry experience coupled with 7 years in consulting, helping clients improve their businesses. Richard will chair the Knowledge Theatre on Day 1 – 23 July.

Richard is a well-qualified Retail Business Executive with extensive experience in leading global retail brands in the UK, United States and Australia, including Marks & Spencer, The GAP, Woolworths, Topshop and Coles.

Richard has held senior roles across Finance, Strategy, Marketing, Operations, Business Development and General Management, leading the development of profitable business growth across complex multi-site, Omni channel, consumer facing organisations.

Richard brings a highly engaging collaborative approach ensuring that the client's knowledge and expertise is successfully combined with the external consulting perspective.

DAY 2 | Wednesday 24 July

Jacqueline Brotherton

Chair
Transport Women Australia Limited

Taking on the role of Knowledge Theatre chair on Day 2 of CeMAT 2024, Jacqueline Brotherton is a consultant who has five decades' experience in the transport, logistics and warehousing industry.

She has held operational and management positions in various companies over the years – including as Director and General Manager of her own family's business - and been responsible for fleets of up to 2000 vehicles. Her roles have spanned livestock, general and refrigerated transport operations as well as fleet management, training, and compliance.

Jacqueline currently operates her own consulting firm and is passionate about championing the cause of women in the transport industry. She is currently the Chair of Transport Women Australia Limited, an independent organisation that supports women within the Australian transport industry, and is a member of Women in Trucking USA and the Women's Trucking Federation of Canada.

Her commitment to this issue has been recognised through awards she has received: in 2018, she won both the Excellence in Road Transport Award at the Women in Industry Awards and the Inaugural Female Leadership in Transport Award at the Australian Freight Industry Awards. In 2023, Jacqueline was awarded the Outstanding Contribution to the Australian Trucking Industry by the Australian Trucking Association.

Jacqueline is also an experienced orator, having spoken at many conferences in Australia and the USA on diverse topics such as women in the heavy vehicle industry, safety and compliance, diversity and inclusion, mentoring, the interface between warehouse and transport and automated guided vehicles.

DAY 3 | Thursday 25 July

Rakesh Bandipelli

Director
Supply Chain & Logistics Association of Australia (SCLAA)

Day 3 (25 July) Knowledge Theatre chair. A visionary leader with a unique blend of expertise in supply chain management, technology and a keen dedication to advancing the principles of the Circular Economy.

With over a decade of experience excelling in optimising processes, leveraging technology, and driving sustainable practices throughout the value chain by fostering innovative solutions that align business objectives with environmental stewardship.

9.15am – 9.30am Open event | Welcome to Country – Wurundjeri Man Colin Hunter Jnr

9.30am – 9.55am

KEYNOTE

The road ahead: mapping the course for the future of supply chains

Peter Jones, Managing Director at Prological, will present insights and trends on innovation in supply chain strategy during this session.

By analysing two years of data from the annual Prological Pulse Check Survey, Peter will reveal pivotal shifts in sustainability, technology, infrastructure, and warehouse design.

Attendees will gain insights to help guide strategy in an era of supply chain disruption.

Peter will explore automation, renewables, predictive analytics, real estate, and other critical innovations shaping the sector. He will provide recommendations for leveraging these developments to enable resilience and future readiness.

This session will deliver strategic foresight for senior leaders seeking to align business priorities with emerging supply chain trends.

By comparing the survey findings Peter will map out the road ahead, signalling key directions for supply chain leaders to master disruption and capitalise on new opportunities.

Peter Jones

Managing Director
& Founder
Prological

With over 25 years of consulting experience and founder of Prological, Peter is at the forefront of Australian supply chain, warehouse and distribution networks analysis and design.

With an intuitive understanding of the relationships and off-sets between manufacturing, international and domestic freight, networks and nodes, warehouse space and inventory levels, Peter has the unique ability to understand complex situations and quickly develop strategies and predict the likely outcome. He applies this '6th sense' to all areas of supply chain with uncanny accuracy.

Peter has completed over 200 supply chain projects with specialised expertise in logistics optimisation and engaging the transport industry to deliver bespoke client solutions.

9.55am – 10.20am

Towards Cyber Resilient and Trustworthy Supply Chains

The adoption of new and emerging technologies has improved the efficiency and visibility of modern supply chains. However, this integration has also resulted in an increase in the attack surface from a cyber security perspective.

How can the trustworthiness of supply chains be preserved and their resilience to cyberattacks improved?

Prof Robin Doss

Director, Deakin Cyber
Deakin University

Robin Doss is Professor of Cyber Security and Director of the Deakin Cyber Research and Innovation Centre (Deakin Cyber) at Deakin University. Professor Doss leads a team of 150+ multi-disciplinary researchers working with industry, business, and government to advance cyber security technology, strategy, policy, and governance.

In addition, he also leads the Development of Next Generation Authentication Technologies theme for the national Cyber Security Cooperative Research Centre (CSCRC). Professor Doss has an extensive research publication portfolio and in 2019 was the recipient of the Cyber Security Researcher of the Year Award from the Australian Information Security Association (AISA).

10.20am – 10.45am

Supply Chain Analytics and why does it matter for your everyday success?

It is an emerging area that aims to apply data analytics to supply chain management to generate a significant (social and/or economic) impact.

Example:

From a customer perspective, a well-functional supply chain can deliver diversified and fresh food to our tables from farms at reasonable prices.

A well-designed supply chain can deliver affordable and effective medicine to patients, pharmacies, and/or hospitals whenever and wherever it is needed.

Behind the scenes, the supply chain is a complex network of companies that meets demand by supplying goods through many stages, from factories and production facilities to warehouses and distribution centres to stores and demand fulfilment centres.

Effectiveness determines customer satisfaction, and by that revenue, the costs of goods sold and the operating costs for a company are determined.

Analytics and tools that interpret the vast amount of data generated daily provide you with those benefits and the opportunity to make decisions based on data rather than gut feelings.

Michael Kemeny
 Managing Director
 KNAPP Australia

Michael Kemeny started his business career in Austria with a targeted focus on telecommunications and software management and functionality implementation.

After Michael completed a bachelor's degree in marketing and international business relationships and a master's degree in Internet Technology & Software Design, he started at Knapp as a Solution Engineer and Project Manager, where he was able to further his skills and became responsible for the Chinese and Australian markets.

Currently Michael is the Director of Sales and Engineering for Knapp in Australia and New Zealand, where he is passionate about warehouse process optimisation and warehouse automation to stay level with rapidly growing and advancing expectations of customers and the market.

Professionally, Michael is known for identifying opportunities and rapidly converting into business results. With deep Supply Chain and Automation Solution know-how, Michael also has a proven record of accomplishment, developing Supply Chain strategies and execution of automation solution improvements.

11.15am – 11.40am

Navigating the Next Era of Supply Chain Efficiency: A Fresh Perspective on Inventory Management

In today's dynamic business landscape, mastering inventory management remains a cornerstone for supply chain optimisation and business success. There are evolving challenges and opportunities within the supply chain ecosystem.

Join Frank Bucolo as he delves into the latest insights and strategies to maximise efficiency and minimise waste through the five essential building blocks of inventory management.

1) Dynamic Portfolio and Assortment Management:

In an era defined by rapidly changing consumer preferences and market trends, maintaining a dynamic portfolio and assortment is paramount.

2) Precision in Master Data Management:

Accurate master data is the foundation of effective inventory management. Discover how harnessing real-time data insights can enhance forecast accuracy, mitigate risks, and drive strategic decision-making across the supply chain.

3) Parameter Determination:

Achieving optimal inventory levels requires a nuanced approach to parameter determination. Frank will showcase innovative methodologies and algorithms designed to calibrate reorder points, safety stock levels, and lead times dynamically.

4) Streamlined Inventory Management Processes:

Efficient inventory management hinges on streamlined processes and workflows. From order fulfillment to warehousing operations, this session will uncover best practices and automation solutions that drive operational agility and responsiveness.

5) Collaborative Supply Chain Management:

In an interconnected global supply chain ecosystem, collaboration is key to success. Explore how fostering closer partnerships with suppliers, distributors, and logistics providers can enhance visibility, resilience, and responsiveness.

As we navigate the complexities of the modern supply chain landscape, the importance of effective inventory management cannot be overstated. By embracing the latest technologies, methodologies, and collaborative practices, businesses can unlock new levels of efficiency, agility, and sustainability.

Frank Bucolo

Country Manager

Slimstock Australia
and New Zealand

Frank Bucolo is a highly skilled Supply Chain specialist based in Australia, with over 20 years of experience in the field. Throughout his career, he has worked in various industries, developing a deep understanding of logistics and inventory management.

Currently serving as the Country Manager at Slimstock Australia and New Zealand, Frank also has experience as the Senior Supply Chain consultant, he specialises in Inventory Optimisation, Demand and Supply Planning.

Prior to Slimstock, Frank has worked in various Inventory based roles for FMCG, Industrial and Aftermarket automotive industries.

Frank's passion for Inventory Optimisation has led from his work in DC design, optimal stock to Just in Time (JIT) practises. Frank's ability to be agile and adaptive provides him with the skills, knowledge, and leadership to assist growing businesses achieve success in the ever-changing world of supply chain.

11.40am – 12.25pm

HOSTED BY:

IN CONVERSATION

Manufacturing Tech Australia podcast: Transformation in Supply Chain and Logistics – Deep diving into how cutting-edge technologies are reshaping the industry

Shane Williams

Paul Mason

Shane Williams is a renowned tech advisor and Virtual Chief Technology Officer, specialising in aiding SME manufacturers to modernise their technology landscapes and embrace new platforms. His expertise lies in assisting business leaders to adopt advanced technology solutions to enhance efficiency and security in the manufacturing sector, a field known for its rapid pace and constant evolution. Shane excels in tailoring strategies to meet the unique needs and challenges of each small and medium-sized manufacturer.

As the co-host of the 'Manufacturing Tech Australia' podcast, Shane breaks down complex technology topics into easily digestible content, offering practical advice and insights pertinent to the manufacturing industry.

Paul Mason is a multifaceted professional with over 20 years of experience, excelling in product development and commercialisation.

Renowned for his proficiency in product development and commercialisation, Paul has a track record from start-ups to multinational corporations, showcasing his adaptability. His expertise spans hardware and software engineering, mechanical design, prototyping, and validation, contributing to his comprehensive approach to product development.

Paul is the Founder, Director and Technical Lead at Cyndeo, a Melbourne-based technology consultancy, specialising in Business, Product, Technology, and Manufacturing Strategy, Lean Manufacturing, and Operational Optimisation.

Peter Jones
Managing
Director
& Founder
Prological

With over 25 years of consulting experience and founder of Prological, Peter is at the forefront of Australian supply chain, warehouse and distribution networks analysis and design.

With an intuitive understanding of the relationships and off-sets between manufacturing, international and domestic freight, networks and nodes, warehouse space and inventory levels, Peter has the unique ability to understand complex situations and quickly develop strategies and predict the likely outcome. He applies this '6th sense' to all areas of supply chain with uncanny accuracy.

Peter has completed over 200 supply chain projects with specialised expertise in logistics optimisation and engaging the transport industry to deliver bespoke client solutions.

Stephanie Krishnan
Associate Vice President,
Manufacturing, Retail,
and Energy Insights
IDC Asia/Pacifics

Stephanie Krishnan is an Associate VP responsible for producing, developing, and growing the IDC Manufacturing, Retail, and Energy Insights programs in Asia/Pacific.

Within Manufacturing Insights, Stephanie conducts supply chain, sustainability, and Industry 4.0 research that supports clients in areas such as global sourcing (profitable proximity and sustainable outcomes), risk management and resilience, transportation, logistics, warehousing, digital transformation, and automation.

After working in the industrial automation industry for over 15 years with various technology companies in multiple international locations, Abhijeet has become an advocate for Siemens' latest innovations in the logistics and intralogistics market.

He thinks that Australia's talent and market have the potential to "punch above its weight" on the global stage.

Abhijeet Verma
Head of Vertical – Intralogistics
Siemens

12.25pm – 12.45pm

Upskilling for the supply chain automation age

Supply chain automation gained significant momentum during the pandemic, advancements in automation technologies scope and function has opened a wide range of adoption possibilities, especially in the logistics sector. Coupled with the shortage of skilled labour and advances in supply chain digitalisation, the return on investments for automation have become more appealing.

There is an urgent need for firms to up-skill in this evolving field as supply chain automation gains pace. In consultation with a broad range of industrial experts five core capability were identified; analytics, best practice awareness, commercial acumen, systems perspective and articulation skills.

The logistics industry is adopting automation across the board, but the skills and capabilities needed to leverage these new opportunities is lagging. Workforce challenges, exemplified by a global shortage of professionals proficient in AI, machine learning, automation processes, and physical enablers such as robotics, pose a significant obstacle to the seamless integration of advanced technologies.

In response to this, RMIT has co-created a dedicated qualification with Toll, TMX and Linfox to upskill working professionals. The four course, one year part time, Graduate Certificate has been designed to extend experienced logisticians capabilities in the areas of digitisation, automation technology, analytics and technology adoption.

Find out how you can empower your people to take advantage of the technology that helps businesses thrive.

Paul Childerhouse

Head of Department,
Logistics and Supply
Chain Management
RMIT University

Professor Paul Childerhouse heads up the supply chain and logistics department at RMIT University. His current research focusses on supply chain network resilience and sustainability.

Dr Childerhouse is best known for his research into demand chain management, supply chain uncertainty and integration.

His auditing approach has provided him with first-hand experience across a range of sectors, including construction, pharmaceutical, retail, automotive, pulp and paper, health, 3PL and food processing.

Dr Shahrooz Shahparvari

Senior Lecturer
in Supply Chain
and Logistic
RMIT University

Dr Shahrooz Shahparvari is a senior lecturer in Supply Chain and Logistics at RMIT University. His research and teaching focus on soft and hard technological transformations in supply chain and logistics and their implications to improve decision-making in businesses and not-for-profit organisations.

His works focus as much on humanity as on developing cutting-edge technical and analytical practical robust solutions as resilient decision support systems to solve pressing contemporary supply chain problems.

12.45pm – 1.25pm Lunch

1.25pm – 1.50pm

PANEL

Intelligent intralogistics – experience the flow!

In the dynamic world of logistics and intralogistics, staying competitive necessitates embracing new technologies, namely generative AI, digitalisation, and the expanded use of autonomous guided vehicles and robotics. These innovations, while challenging, open doors for opportunities to tackle disruptive changes.

Robotics, when integrated with artificial intelligence, enable flexible automation solutions capable of handling thousands of unknown articles. Digitalisation leverages vast amount of data for efficient, sustainable solutions. The future of automation promises increased efficiency and addresses staff shortages in warehouses and distribution centres.

Join Siemens at CeMAT 2024 to experience how the company is redefining and supercharging the Intralogistics sector. Experience the power of leading technology in generative AI, digital enterprise, and sustainability in action.

Luis De Jesus
Managing Director
Mexx Engineering

Luis De Jesus is a distinguished engineering professional with over 26 years of experience in research and development, senior management, and project leadership. As the Founder and Director of Mexx Engineering Pty Ltd on the Gold Coast, he leads pioneering advancements in robotics and automation solutions, setting new industry standards.

With a proven track record in senior executive roles, Luis shapes strategic manufacturing and automation initiatives, specialising in electro-mechanical engineering consulting. His innovative contributions have earned him numerous honours and awards, establishing his reputation as a respected member of prestigious engineering organisations.

Martin Kramer
Head of Automation
Dexion Asia Pacific

CHAIRPERSON:

Abhijeet Verma
Head of Vertical –
Intralogistics
Siemens

Abhijeet is in a national role for Siemens, focusing on Intralogistics vertical with a demonstrated history of working in the Industrial Automation Field.

Abhijeet is skilled in Business Development, Industrial Engineering, Management, Leadership, Product Development, and Electronic System Design.

Having worked in multiple Siemens country units and in other large Technology conglomerate, Abhijeet brings his vast and intense knowledge in Automation and Digitalization to the team.

Darryl Kaufmann
Executive General
Manager
Siemens Digital
Industries Australia
& New Zealand

Darryl began his career at Siemens in South Africa over two decades ago before moving to Germany where he had responsibilities for process automation technology across Asia, the Middle East, Africa and Europe. He moved to Australia in 2008 where he now leads the business focused on industrial automation and digitalization.

He has been a driving force behind significant projects across industries such as water and waste-water, pharmaceutical, mining, pulp and paper and food and beverage – and is a strong proponent of rapid technology adoption to address the world's greatest challenges.

Martin Kramer leads the creation and design of Dexion's automated solutions to transform operational efficiency for warehouses and DCs. With well over 13 years' experience in the automation industry, he has a comprehensive understanding of Supply Chain Management, Logistics and Transport.

Martin is passionate about solving complex warehouse challenges to meet the needs of customers through automation technology. He is driven to orchestrate change and drive sustainable growth for customers by thinking out of the box.

Martin's greatest strength is the ability to listen and understand the needs of the customer, and create innovative automated solutions that will deliver desired outcomes with professionalism and integrity.

1.50pm – 2.30pm

PANEL

Future fuel: What the considerations for moving to lithium-ion – and to hydrogen fuel cells

Ian Christensen
Managing Director
iMove

Ian is the Managing Director of iMOVE, which is a Co-operative Research Centre focussed on transport and mobility. iMOVE undertakes industry-led research to help organisations in the transport sector solve problems and secure opportunities.

He is excited by the opportunities that new technology is creating in the transport sector. He is particularly keen to realise the promise of easier travel, improved network performance and greater sustainability.

CHAIRPERSON:

Allan Leibowitz
Editor at Large
Forkliftaction.com

Award-winning business writer Allan Leibowitz is Editor at Large at global materials handling portal Forkliftaction News. A respected subject expert, he regularly serves as a facilitator at materials handling/logistics events and a contributor to industry publications around the world.

Before joining Forkliftaction, Allan held senior editorial positions in various business media in Australia, and has reported on regional business, corporate travel, motoring and the automotive sector, procurement and global trade, for which he received three Queensland Premier's Export Awards.

Dan Goodfellow
Group Manager,
Products & Fleet
Trading
Coates

With over 25 years of dedicated industry experience spanning manufacturing, logistics, mining, engineering, product development and procurement, Dan has been privileged to contribute to various facets in and around Australia's construction industry.

Dan's passion for advancing the hire industry and shaping its trajectory toward sustainability and excellence is a priority and he remains focused on the challenges ahead and the opportunities to make a meaningful impact in this ever-evolving landscape.

Hans van Pelt
Director and
Principal
Affairs of State

Hans has extensive public and private sector leadership experience, including infrastructure, transport and crisis management experience.

He was CEO of Launceston Airport, a role that was part of the executive team at Melbourne Airport, and has also been an airline CEO and accountable manager.

Hans was the Access Director for Tasmania, during the time where destination demand strategies catapulted Tasmania.

Through Affairs of State Hans is currently an advisor to Hydrogen Fuels Australia and he is the interim CEO of Melbourne based Battery Energy Storage System provider Zenaji Pty Ltd.

Currently spearheading the international expansion of the Alta group, serving as Managing Director for Australia and Vice-President for the International Division, Roy Zou is a dynamic and visionary leader in the energy and finance sectors.

Under his leadership, the Group has ventured into global markets in mining, energy and rail, a pivotal landmark being the kick-off of the Battery Electric Tender project with Aurizon.

With a firm vision for a sustainable energy future, Roy is looking to expand the Alta Group's decarbonisation success throughout Australia's heavy industry.

3.00pm – 3.30pm

Upscale your warehouse: How will software be integral to driving your business innovations into the future?

Software is the key competitive advantage for your intralogistics. It is the main factor in reducing the complexity of, and optimising, your warehouse performance.

Software can be the central intelligence to any size of operation; it should fit the specific requirements for the operation of your warehouse, and should be able to grow with your operation into the future. Only when internal flows of goods and materials are displayed and processed transparently can your warehouse processes be configured optimally.

What are the key features and benefits when deploying a software solution in your warehouse? How to determine what your operation needs and what you should prioritise.

Thomas Elstner

Head of Product
Management
SSI SCHAEFER

Thomas Elstner started his career at SSI SCHAEFER in 2001 as a software developer - controls. Since 2020, he has been working as a Product Manager at SSI SCHAEFER IT Solutions and is responsible for the SSI Case Picking and SSI Piece Picking solutions for WAMAS Robotics.

Prior to his current position, he held various roles within the company, including team leader in IT sales for the Food Retail Market Sector. From 2008 to 2016, he worked in presales and as a technical Project Manager at Salomon Automation GmbH, which was later restructured into SSI SCHAEFER IT Solutions. With his comprehensive knowledge, Thomas Elstner makes a significant contribution to the success of product management at SSI SCHAEFER.

Brett Thirup

Managing Director
Australia and
New Zealand
SSI SCHAEFER

Brett has worked in the logistics automation industry for over 25 years. In his decade long career with SSI SCHAEFER, Brett has contributed strongly to the growth and success of the Australian business focusing heavily on sales and engineering management, project management, solution design & project implementation.

Working across both static storage and automated logistics solutions, Brett has been instrumental in deploying the advanced storage and automation solutions available through SSI SCHAEFER. Brett prides himself on taking the time to understand the customer's operation and work through different options and strategies to ensure the most efficient, cost effective and suitable solution is delivered.

Airyn Ong

Head of Software
APAC & MEA
SSI SCHAEFER

Airyn has 18 years' experience in the design and implementation of Logistics IT systems with a focus on WMS and WCS systems, and systems integration in Australia and New Zealand.

Airyn has been with SSI SCHAEFER since 2018. In that time, Airyn's area of responsibility has expanded geographically to include the whole APAC & MEA region where she now has leadership of the Software teams in Asia and MEA as well as Australia and New Zealand.

Jens Nikolai is the National Sales Manager for SSI SCHAEFER in Australia and New Zealand.

With 25+ years of experience in consulting, design, and integration of automated systems for intralogistics and end-to-end supply chain solutions, Jens is a passionate and highly knowledgeable industry professional. Throughout his career, Jens has designed, optimised and sold significant projects in ANZ, Europe and Southeast Asia. In his time with SSI SCHAEFER ANZ, Jens has led the local sales activities for automated systems, making the ANZ operation a significant contributor to SSI SCHAEFER's logistics solution success in the APAC & MEA region.

Jens focuses on working closely with customers and takes a partnership approach to lead them to design and fulfil the best solution for their business well into the future. Jens' knowledge of the SSI SCHAEFER offering, and of the intralogistics industry generally, is significant, and ensures the customer is given the most efficient and sustainable solution possible.

3.30pm – 3:50pm

How to slay the peak demand dragon

A fun and insightful journey of our hero, the warehouse manager, in his quest to slay (manage) peak demand by finding the right weapon (process / automation).

3 Key Learnings:

1. Overview of available automation solutions
2. Practical Processes for intralogistics problems
3. New ways to look at demand with help from A.I. & data science

Karl, originally from Austria, boasts a wealth of international experience in the intralogistics sector accumulated over his career. The ever-changing challenges in the industry have always kept him interested and passionate. Karl's expertise has been instrumental in providing solutions for prominent clients, including Natura Cosméticos in Brazil, Alshaya in the Middle East, and Office Depot in Europe. In recent years, his focus shifted to building next-generation automation solutions in Australia, with customers in the Retail, FMCG, and pharmaceutical sectors.

Karl's extensive experience has led him to the realisation that many solution providers remain entrenched in traditional approaches, prioritising the sale of their hardware over tailoring the ideal customer solution. Motivated to disrupt this pattern, Karl founded dereOida Pty Ltd, a venture that allowed him to collaborate with leading intralogistics suppliers, software architects, and consultants.

In September 2023, the significant development came when Ferag acquired dereOida. With this strategic move, Karl assumed the roles of Ferag APAC Managing Director and Head of the Region. The acquisition has enhanced Ferag's standing as a full-service integrator and supplier of comprehensive intralogistics solutions. These offerings are designed to provide customers with the tools to navigate new market conditions efficiently, facilitated by a unified interface system for enhanced information access and control.

Karl Friesenbichler
APAC Managing Director and Head of the Region
Ferag

3.50pm – 5.00pm Exhibition and end of Day 1

9.30am – 9.55am

KEYNOTE

AI is equal parts exciting and terrifying but how can it add real value to the logistics and warehousing industries?

In this session, David will introduce 'Private AI': an authority on your company, methods, assets and processes who captures the knowledge and experience of your best people and keeps it safe.

Private AI ingests all of your proprietary information, holds it in military-grade secure servers and makes it available to any worker, at any time, who might need information and assistance.

In addition, David will show how workers are being given 'AI vision', and are successfully augmenting their productivity and skillsets with 'superpowers' through smart glasses.

David Francis
Co-Founder and CEO
Virtual Method

Based out of Barangaroo, Sydney, David has been at the forefront of consumer-facing + operations-critical Augmented and Virtual Realities (collectively: 'XR') since 2011.

Working with US-based XR pioneer DAQRI initially and producing a number of the very first XR campaigns for global brands, he then became the first XR-dedicated enterprise senior-manager within Australia's largest print communications group, IVE.

In 2016 he co-founded Virtual Method with Carli Johnston, and is the current CEO.

Virtual Method is highly specialised-in the worlds of 3D visualisation, Digital Twin, Immersive Training, Wearable Computing and Metaverse Strategy.

David has been an invitation-keynote speaker at conferences around Australia, Europe and across Asia, and is a thought-leader on the application of XR to the enterprise.

9.55pm – 10.25am

Future Together: Collaborative Logistics for Australian Logistics Excellence

Geopolitical tensions, disruptions, restrictions on cross-border investments and trade, and issues accessing critical inputs require that Australian businesses deliver both efficiency and innovation; this session explores collaborative models and trends reshaping logistics practices to create a competitive advantage.

This presentation targets senior logistics, manufacturing, and distribution leaders, offering a deep dive into how shared commerce platforms, advanced warehousing solutions, and enhanced supply chain visibility can drive significant cost reductions and service improvements. Leveraging IDC data and predictions, actionable, collaborative logistics strategies will be explored, underscored by compelling case studies from Australia and the region.

Discover how these integrative approaches can position your operations at the forefront of the industry, improving your organisation's competitive position in a rapidly evolving market.

Stephanie Krishnan
Associate Vice
President,
Manufacturing, Retail,
and Energy Insights
IDC Asia/Pacifics

Stephanie Krishnan is an Associate VP responsible for producing, developing, and growing the IDC Manufacturing, Retail, and Energy Insights programs in Asia/Pacific.

Within Manufacturing Insights, Stephanie conducts supply chain, sustainability, and Industry 4.0 research that supports clients in areas such as global sourcing (profitable proximity and sustainable outcomes), risk management and resilience, transportation, logistics, warehousing, digital transformation, and automation.

10.25am – 10.45am

Revolutionising Food Retail Logistics

The journey of WITRON's Order Picking Machinery (OPM) system began with a simple idea at founder Walter Winkler's coffee table. Inspired by the ease with which a cake lifter picks up a piece of cake, he conceptualised the COM, the heart of the OPM system.

This innovation allows for fully automated, efficient, and error-free pallet and roll container loading for food retailers. Celebrating its 20th anniversary in 2023, the OPM system has become a cornerstone in food retail logistics, operating in nearly 100 locations and serving over 35,000 stores globally.

With its ability to automate approx. 95% of a full-range store's product scope, OPM has significantly lowered costs and increased efficiency for retailers across North America, Europe, and Australia. As WITRON continues to innovate, the OPM system is poised to further revolutionise supply chain logistics through intelligent networks and end-to-end retail platforms.

Win Tun

Director of Business Development APAC

WITRON

Win Tun leads all business development activities in the Asia Pacific region for WITRON, experts in designing, realising, and operating tailor-made smart intralogistics solutions.

Joining WITRON in 2008 as a technical support engineer, Win has since trained customers and onsite technicians, and successfully managed the commissioning of numerous automated distribution centres. He knows the logistics business from design, realisation and implementation, through to the after sales services, optimisations and operations.

10.45am – 11.10am Break

11.10am – 11.35am

The benefits of robotic picking and palletising

Robotic picking and palletising can enhance warehouse efficiency.

Picking and palletising make up to 60% of a warehouse's operational costs, and are the most time consuming processes in the warehouse.

Only a very high degree of automation and self-learning smart-data systems can meet today's diverse and growing demands.

Learn how robotic picking and palletising can increase efficiency, accuracy, availability and ergonomics.

3 Key Learnings:

1. With the right technology and software, you can reduce operational costs
2. Robotic picking can help meet customer requirements for goods diversity, individualisation, freshness, and delivery speed
3. Robots can support humans by carrying out activities that are harmful or inefficient for workers.

Steve Dimitrovski

Senior Sales Consultant, Retail and e-Commerce
Swisslog Australia and New Zealand

Steve Dimitrovski is a senior sales consultant at Swisslog Australia and New Zealand. Steve has more than 15 years' experience in the retail industry, including grocery, big box, automotive, hardware and pure play e-commerce channels.

Steve has a Bachelor of Commerce (Double Major in Economics and Marketing) from the University of Wollongong, and an MBA from the Australian Graduate School of Management (AGSM).

He has built up particular expertise focused on the alignment of operational and fulfillment requirements to automated Goods-To-Person systems for both B2B (warehouse distribution centre and direct-to-store) and B2C (e-Commerce). Steve strives to deliver exceptional solutions that combine data, robotics, and functionality, to achieve optimum results with outstanding ROI outcomes.

Zero Touch Fulfilment

Ensuring prompt and cost-effective delivery of products to clients is often regarded as a cornerstone of success in today’s business landscape. That’s why numerous companies globally are actively exploring innovative approaches to streamline their value chain processes.

In this session, we aim to introduce you to the concept of Zero Touch, explain its essence, raise some critical questions on the topic, and provide examples of technologies that can be implemented to reach Zero Touch fulfilment.

Tiago Oliveira
Business Development Manager
Knapp Australia

Tiago Oliveira is the Business Development Manager for KNAPP Australia with over 15 years’ experience in technical solutions selling for complex automated systems in South America and the ANZ region.

His automation engineering and business management background has allowed him to assist clients from the pharmaceutical, food, dairy and beverage as well as manufacturing and most recently value-chain intralogistics segments to access technologies and through them, improve processes and overcome their challenges.

1.45pm – 2.00pm

Cooling the Legal Heat of Work, Health and Safety Non-Compliance

In 2023, Australia enjoyed a 3.5% unemployment rate, continuing a downward trend since July 2020. Fourteen million Australians regularly leave their homes to work.

They may perform different functions but one thing that these employees have in common is their expectation that when they leave their homes to go to work, they will be kept safe.

3 Key Learnings:

1. What is Heat Stress?
2. Managing the Risks of working in Heat
3. Ramifications of ignoring Heat

Matt Wales
National Sales Manager
Big Ass Fans

Matt is on a mission to provide clients with effective airflow management solutions. Specialising in HVLS (High Volume, Low Speed) fans that provide more energy efficient, sustainable and cost-effective comfort solutions in commercial and industrial applications.

His expertise lies in:

- Tailored HVLS airflow solutions to improve thermal comfort
- Industrial and commercial projects
- Overhead and directional fans
- Improving comfort conditions in both indoor and covered outdoor spaces
- Advice on airflow design and application suited to all types of projects

He delivers effective, end-to-end airflow solutions for industrial and commercial environments using simple, plain-language explanations, and customised cost effective solutions.

Providing advice and product recommendations that address common airflow concerns, including:

- Maintaining consistent thermal comfort while reducing the emissions of buildings
- Creating safer, more productive work environments in industrial facilities
- Reducing project costs
- Improving Green Star & Nabers Ratings
- Reducing HVAC cooling energy
- Preference to use long lasting products and brands that offer multiple benefits to projects

With a passion for building trusting client relationships, Matt is a professional who focuses on the end user Education, Warehouse and Distribution applications.

For more than 20 years, Big Ass Fans have worked with warehouse and facility managers to create safe working conditions by incorporating high volume, low speed fans into warehouse spaces.

Their fans are backed by serious research, intensive engineering, and a continual drive to innovate and improve.

Decoding ESG: Compliance, Competitiveness, and the Catalyst for Business Success

This session dives into the complex area of Environmental, Social, and Governance (ESG) principles, offering valuable insights into why they matter in today's business landscape.

The session will highlight the crucial role of adhering to evolving compliance needs associated with ESG, not merely as a regulatory obligation but as a strategic necessity for companies striving to maintain their relevance and competitiveness.

By decoding the complexities of ESG, the presentation focuses how embracing these principles can serve as a driving force for enhancing business performance, encourage innovation, and ultimately unlocking sustainable success in today's business world.

3 Key Learnings:

1. Understanding Fundamentals of ESG and why embracing it is necessary for enhanced business performance.
2. ESG Compliance as Strategy: ESG compliance isn't just about rules; it's strategic for staying competitive.
3. How integrating ESG enhances efficiency, improve access to funding, aligns with market trends, and ensures long-term success by reducing costs, managing risks, and improving overall business performance.

Growing your commercial outcomes through opportunities in Australia's emerging social impact marketplace

Australia's social impact marketplace is in the early stages of forming, whilst globally it is worth trillions of dollars.

This presentation will look at the context of the impact market in Australia and globally, and share insights into the practicalities, pressures and opportunities for businesses to succeed in the emerging social impact marketplace.

3 Key Learnings:

1. Perfect for anyone already invested in Modern Slavery and/or Mandatory Climate Reporting.
2. Understand the difference between, and how best to apply, ESG, sustainability and social impact initiatives.
3. Learn how to build competitive advantage and grow commercial outcomes as part of a much larger, global social impact marketplace.

Toby Dawson
Principal
Tomorrow Together

Toby is the Principal at Tomorrow Together. Charismatic, passionate and committed to tackling the wicked problems that impact individuals, families and communities.

Complement this with two decades working within and consulting in business, public health, not-for-profit and social impact settings. Covering a range of roles across Boards, leadership, governance, strategy, innovation, investment and implementation. It's a comprehensive resume.

But it's Toby's collaborative and personable approach that sets him apart – simplifying the context, identifying business opportunities, and helping you leverage your business capabilities – always aligned to strategies and stakeholders. With a commercial lens over everything he does, Toby ensures doing good is also good for your business. Helping you deliver positive impact that also drives positive commercial outcomes.

His goal is simple. Bring more organisations into an ecosystem that delivers positive social impact to improve commercial outcomes.

His question to you: What could social impact mean for your business?

Order Fulfilment Automation: Navigating the Complexity

Automated picking presents a complex challenge, yet it offers significant opportunities for efficiency gains, cost reduction, and enhanced customer satisfaction.

In this overview, Pas will delve into the intricacies of designing an effective e-picking solution. He'll explore trade-offs, data science, business variables, and other critical factors to consider, plus compare the latest technologies and methodologies to help you implement the right solution.

Pas Tomasiello

Vice President
Sales — APAC
Dematic

Pas Tomasiello is Vice President of Sales at Dematic APAC and has been with the world's leading intralogistics innovator for over 23 years.

Pas' diverse career spans over 33 years in engineering, project management, business management and consulting fields. Having graduated with a Bachelor of Engineering from the University of New South Wales, he went on to complete a Master of Business Administration from the University of Technology, Sydney. Pas has been responsible for the design and development of some of the leading order fulfilment and logistics systems projects in the Asia Pacific region.

His diverse background and experience enable him to examine issues through both technical and managerial disciplines providing unique insights and solutions to critical issues facing business today.

10.35am – 11.00am

Aligning data, automation, and operations objectives in system design

Opportunities to apply automation to address business challenges in order fulfillment, process validation, and multi-carrier cost savings are abundant. Understanding that no process lives in a vacuum, mapping the decisions and data flows that happen throughout the process (WMS, order assembly, rate shopping, track-and-trace, returns processing, exceptions processing) will lead to a better understanding of how systems and processes interact.

This systems approach with the right automation partner can result in can lead to bigger gains to the business, and better solution business case.

1. First define the critical issues to address within the scope of the project: Capacity, Accuracy, Efficiency.
2. Then explore the processes feeding and resulting from the process scope.

Mapping physical and data flows can reveal hidden additional benefits that can be addressed in and through automation: Exception processing, better yield by incorporating external processes/data sources.

Look for processes where manual processes can be incorporated into a streamlined automation flow with little incremental cost to the project.

John P Thorpe

Director of Business Development
for Parcel Solutions
BlueCrest

J P Thorpe is responsible for leading solution development for BlueCrest's global parcel sortation business. He has driven the implementation of a wide variety of automated sortation solutions to global postal providers and private organisations.

His industry knowledge brings constant innovation to parcel sortation solutions needed in response to the continuous growth of e-commerce parcel volume.

PANEL

Is Automation the Key to Mastering Business Growth for SMEs?

Dive deep into the journey for seamless integration of automation into your warehouse. Wondering where to start and if it's even possible to blend automation with traditional storage systems?

Get answers, insights and experts' guidance with Arthur Dardoumbas and Francis Meier who will provide concrete examples and explain the challenges businesses go through in order to have a sustainable growth.

3 key things you will learn:

- Efficiency through automation: Explore the Douglas Customer Journey
- Suitability and Adaptability: Discover how automation can fit your SME's needs
- Continuous improvement and customer satisfaction: Learn Strategies to enhance business performance

CHAIRPERSON:

Grant Smith

ANZ Director of Business Development
AutoStore
Kardex

Grant has been in the intralogistics for over 30 years and is now the Sales Manager for Kardex, handling the ANZ region.

Based in Sydney, Grant has been working as consultant and warehouse managers and understands the challenges faced by small and medium businesses as they progress through their growth path.

Arthur Dardoumbas

Executive Director
ThreeSixty

Arthur is a supply chain and solutions professional with over 25 years' experience in the industry and with a key focus on delivering solutions that meet and exceed customers' requirements and expectations.

He has wide-ranging experience across senior management, sales management, solution development, consulting, DC design, warehouse automation and technology, commercials, contracts, and program and project management.

Francis Meier

Executive Director
Trios Consulting

Francis has over 40 years' experience in the intralogistics industry across multiple markets. Having worked for several major system integrators and material handling suppliers, he has worked in Europe, Asia as well as Australia.

Until the end of 2022 he was the ANZ Managing Director of Swisslog and currently provides consultancy services as an Executive Director of Trios Consulting Pty Ltd.

BONUS KEYNOTE

Debunking the Myths of Artificial Intelligence in Supply Chain Planning

Artificial Intelligence (AI) is changing the way we plan and optimise supply chains, but how much of it is hype?

Do we really need Machine Learning (ML) and Generative AI (GenAI)? Do we really need them to enable an exciting new supply chain planning paradigm?

Let's remove the hype and explore how companies are moving beyond conventional statistical forecasts to AI-first forecasting for greater accuracy with less effort.

Elton Brown

Senior Business Consultant
DMS

Elton is a Consultant, Speaker, Advisor, Author and Adjunct Lecturer specialising in AI technology for Supply Chain Planning and Optimisation. His latest projects bring digital transformation and best-practise to his clients in Retail, Distribution and Manufacturing across Medium and Large Enterprise.

He has over 25 years of supply chain experience including nine years as a practitioner and process consultant with international manufacturers and retailers across Europe and Asia.

Maximising G2P investment via the integration of robotic unit sortation

The modern robotics Goods to Person technologies offer much more efficient solutions than the legacy solutions, however the recent evolution of integrating robotic unit sortation to their pick ports to increase the picks per presentation is proving to deliver a multitude of benefits.

Learn how to identify if this evolution is a fit for your next fulfillment operation.

Integrated Robotics G2P and Unit sortation solutions deliver:

- Increased picker efficiency by 50+%
- Lowered investment by 25+%
- Significantly shorten cycle times

C. Thompson Brockmann
EVP Customer Operations
Tompkins Robotics

Thompson is an executive with Tompkins Robotics with 30+ years of managing multimillion-dollar supply chain and logistics projects in the Americas, Europe and ANZ across a diverse field of industries including retail, eCommerce, pharmaceuticals, medical devices, utilities, consumer products, and industrial products. Past and current clients include Nordstrom, Walmart, Target, Advanced Auto Parts, Medtronic, and Newell Brands.

Areas of expertise are sales and business development; strategic supply chain planning; distribution network design; facilities design; logistics; and transportation optimization; automated fulfillment operations; and robotics – the latter being the central design of all currently managed projects.

Thompson joined Tompkins Robotics in 2017 and help develop both the solution and the organization into a global leader in delivering robotic supply chain solutions. In his current role as EVP of Customer Operations, Thompson is responsible for all delivery and service-related aspects of the business while maintaining active roles in business development, sales, and account management.

Democratising Sorting + a case study of deployment in Regional Australia

Nexobot has spent the last year designing and developing its very own parcel and item sorting system right here in Melbourne.

Discover the innovative design that enables greater deployment speed, low activity based pricing and local manufacturing using 3D printing.

Case study: featuring a customer in Regional Victoria as an example of how a focus on simplicity democratises automation.

3 Key Learnings:

- That automation is now accessible to customers of all sizes
- The need for modularity to enable flexibility both in scope and price of the project life
- The value delivered to Nexobots first customer

Dominic Lindsay
CEO / Co-Founder
Nexobot

Dominic's career has seen him involved in numerous innovative automation projects using both robotics and fixed infrastructure to deliver real commercial value.

Taking these learnings Dominic co-founded Nexobot with Nicholas Hunt in 2023 with a goal of democratising sorting automation with a low cost and quick to deploy solution using Industry 4.0 methodologies to support local development and manufacturing.

2.15pm – 4.00pm Exhibition and end of Day 3

Abbe

Smart Intralogistics Solutions

Visit us at **Stand 400** for an immersive experience where you can discover the benefits of latest advancements in intralogistics efficiency and automation.

Featured Solutions:

AutoStore Solutions:

as a Global AutoStore partner we have developed the Intuitive Picking Assistant which was among the finalist of the Swiss Logistics Award. The benefits? Accelerated picking process, reduced picking errors and an ergonomic environment.

Wearable Task Assistant:

With functions such as a hands-free scanner, pick and place support, and a color-coded display on the operator's wrist, the WTA reduces the error rate to a minimum and improves the quality of the picking operation.

Panel Discussion:

Discuss with Arthur Dardoumbas, Francis Meier and Grant Smith at 12.15pm on the 25th to discover Douglas Automation Customer Journey and learn the key points to consider before diving in.

Ask your questions and get the recording by registering at www.kardex.com/askfrancis

WORLD DEBUT FPM - FLOW PICKING MACHINERY

THE PARADIGM SHIFT IN AUTOMATED FRESH FOOD LOGISTICS

Twenty years ago, WITRON presented the first OPM solution. Now, we are continuing the success story in fresh food logistics. The fully automated Flow Picking Machinery (FPM) uses all the advantages of the OPM technology, works without inventory, and builds store-friendly pallets just-in-time for customers in flow-through distribution centers, dynamically adapted to changing business conditions during ongoing operations.

FPM DELIVERS SIGNIFICANT CUSTOMER BENEFITS

- **High Performance**
- **Store friendly**
- **Error-free picking**
- **Sustainability, Flexibility**
- **For all assortments: ambient, fresh, frozen**

General contractor for the design, realization, and operation of storage and picking systems for retail business and industry.
