DESIGNED WITH **YOU** IN MIND

The Knight family started their sprayer business in 1984 driven by the need for a high quality, advanced trailed sprayer. This passion continues within the business today delivering these values to today's agribusinesses

Our latest Trailblazer machines bring you the very latest in spray application technology, incorporated into industry leading boom and chassis suspension system, machine strength and durability.

YOUR KEY TO SUCCESS!

Look out for these icons as a quick reference to how each Knight feature benefits YOU!

Accurate Application

Comfortable

Simple to Use

Saves you Money

Eco-friendly

High Output

KNIGHT TRAILED SPRAYER MODELS DESIGNED TO HELP YOU GROW.

TRAILBLAZER L

- Entry level machine with Gullwing boom & maximizer plumbing
- Smart 430 terminal
- Self-levelling air-suspension rear axle

TRAILBLAZER S

As per trailblazer Lite with

- Electro-hydraulics
- Touch 800 terminal

TRAILBLAZER PRO

As per trailblazer with

- Pro electro-hydraulic system
- Rear mounted hydraulically driven sprayer pump
- Sprung drawbar

SPRAYER FEATURES

DRAWBAR & CHASSIS

Knight sprayers have always led the field with their advanced chassis design. Our latest Trailblazer range continue in this vein with an air suspended axle and the following range of drawbar options.

- Cushioned drawbar
- Continental hi-hitch
- K80 ball coupling
- Linkage drawbar

REAR AXLE

STEERING

Trailblazers are available with rear axle steering which is gyroscopically controlled to ensure the sprayer perfectly tracks behind the tractor.

BRAKING

- Hydraulic braking is standard, with air braking available as an optional extra. A combination of both is also possible.
- High performance axles are fitted throughout the Trailblazer range
- High speed axles with ABS braking are available as an optional extra.

SUSPENSION

- All Trailblazer sprayers are fitted with load sensing air-suspension. This combination precisely maintains the machines working height and stability.
- For machines fitted with air-brakes, load sensing is also employed to ensure safe and accurate braking.

HILLSIDE ALIGNMENT

The sprayer automatically compensates when working on hill sides by steering the axle to ensure the wheels stay in the tramlines.

WHEEL EQUIPMENT

- Standard
- Optional

SPRAYER FEATURES

TANKS & STORAGE

We pride ourselves in being able to offer customers exactly what they require. Trailblazer sprayers can be ordered with rotational moulded or stainless-steel tanks with capacities from 3,600 litres up to 12,000 litres.

CLEAN WATER TANK

All Trailblazers are fitted with clean water tanks containing more than 10% of the spray tank. Clean water tanks are filled independently to avoid contamination from the chemical system. The optional clean water tank fill uses an independent pump which automatically tops up the wash tank whenever the operator is filling the main tank allowing them to focus on filling with product.

STORAGE LOCKERS FOR PPE CLOTHING AND SPARE PARTS

Trailblazers have storage lockers strategically located around the machine for maximum operator convenience. The all-important PPE locker is located by the chemical filling station and includes separate compartments for clean and used items. Parts can be stored in a removable toolbox and spare nozzles can be stored in on-boom storage boxes to minimize down time.

PUMPS & PRESSURE CONTROL

MAIN PUMP - STANDARD

All Knight sprayers use multi cylinder diaphragm pumps to supply the main spray system. We use this type of pump for their simplicity, reliability, and ability to deliver consistent pressure and flow, on a linear basis, ensuring accurate product applications at all times.

FAST FILL PUMP – OPTIONAL

For customers requiring a faster fill than the standard pump provides, we offer two alternative pumps to boost fill capacity.

- ➔ High capacity diaphragm pump
- ➔ High capacity, hydraulically driven centrifugal pump

RAMSEY VALVE – SYSTEM PRESSURE CONTROL

Knight sprayers use a Ramsey diaphragm valve to regulate application pressure. We have used this valve for many years because it significantly reduces the workload of the sprayers electronic application control system and improves the accuracy of product application.

SPRAYER FEATURES

CIRCULATION & FILLING

Knight were the first in the industry with full product circulation that produced an instant start in the field. They have continued to pioneer advanced sprayer control and circulation and today Knight sprayers use the patented MAXImizer fluid control system that keeps the entire fluid system moving during filling and agitation which prevents dead spots. This system also flushes the entire system with clean water during filling for the ultimate in machine cleaning.

TANK WASH SYSTEM

The spray tank has multiple wash heads for efficient cleaning at the end of the job. When incorporated with the Active Rinse system they can be operated independently of the chemical system for the ultimate in-field clean out including on-the-go rinsing to make sure the last drop of your chemical goes on the crop.

TANK AGITATION

All trailblazers feature two stage spray tank agitation that automatically selects high flow during product mixing and reduced flow when finishing the job. This gives the best possible use of expensive chemicals.

ACTIVE-RINSE

Active-Rinse is another plumbing and circulation innovation from Knight Sprayers. It features the addition of a high flow pump in the clean water system. During the fill cycle the system automatically fills the clean water tank and provides pressurised clean water at the induction hopper for rinsing containers. It can also be used for high-speed main tank filling. During spraying, as the tanks empties to its last few litres Active Rinse can be set to wash the tank walls, ensure residual chemical is kept to an absolute minimum. The system will also rinse the spray lines with clean water before folding and transport and returns the clean water to the spray tank ready for the next load.

BLOW-OUT – OPTIONAL EXTRA

Using the sprayers compressor system, we have the ability to clean out the product suction pipe from the cam-lock connection to the supply source tap. The compressed air pushes the product back up the supply line so the operator can have a much cleaner and safer disconnecting operation. The system also allows blow out of the sprayer pipe work when required.

MAXIMIZER PLUMBING

The MAXImizer pressurised circulation system ensures a continuous pressurised flow throughout the entire plumbing system to keep product in dilution. It ensures that the spray lines are always charged with dilute chemical at the target application pressure, ready for action.

SPRAYER FEATURES

INDUCTION HOPPERS

The Knight chemical induction system forms an integral part of MAXImizer fluid control which automatically rinses and cleans the induction hopper pipes and valves after use. The latest Whirlpool hopper provides continuous rinsing and agitation during chemical filling which always keeps the bowl as clean as possible. The press-on container rinsing nozzle will easily clean larger 20 litre containers even with stubborn chemicals.

STANDARD

- 25 litre capacity
- Stainless steel construction
- Hinged lid with can drain facility
- Hopper rinse ring
- Twin can wash heads
- Can wash hand lance

WHIRLPOOL - OPTIONAL

- 30 litre capacity
- Circular design for improved cleaning
- Hinged lid with can drain facility
- Continuous hopper rinsing
- Can wash head
- Can wash hand lance

BOOMS & BOOM HEIGHT CONTROL

At Knight Sprayers we cater for all customer requirements and pride ourselves on the quality and durability of our sprayer booms.

→ V-FOLD – UP TO 30M

Available as an option on the Trailblazer range

→ 4-SERIES – UP TO 28M

Standard on the Trailblazer Pro and optional on all Trailblazers sprayers up to 28m

→ TRI-FOLD – 24 TO 40M

Optional on all Trailblazers up to 28m and standard up to 40m

→ 4D BOOM SUSPENSION

The Knight 4D boom suspension system offers an extra dimension in boom stability by isolating a fourth dimension of sideways movement. The system also offers exceptional boom stability in roll and yaw.

→ AUTO BOOM LEVELLING

We offer a fully automatic boom levelling and height control integrated into the spray controller. All 4-series, V-fold and Tri-fold booms have the option of both negative and positive boom inclination.

→ AIR-SLEEVE BOOMS ARE ALSO AVAILABLE

→ OPTIONAL NOZZLE LIGHTING MAKES LONGER WORKING DAYS POSSIBLE

SPRAYER FEATURES

SPRAYER TECHNOLOGY

BOOM CONTROL

INDEPENDENT LEFT & RIGHT, VARIABLE GEOMETRY, BOOM LEVELLING

4-DIMENSIONAL DAMPENED BACK FRAME

TWO DC2 BOOM LEVELLING SENSORS ON LEFT AND RIGHT BOOM

The latest technology is always at the fore front of our thinking at Knight Sprayers. Whether it's chemical application related or machine and field management related, we have a precision farming system to deliver your particular requirements.

GPS STEERING & CONTROLLER OPTIONS:

Our fully integrated ISOBUS operating system will connect directly to your ISOBUS compatible tractor to form a fully integrated unit.

Trimble Topcon Ag Leader John Deere

SPRAYER TECHNOLOGY

NOZZLE BODY & SPRAY LINE OPTIONS:

- Single line – 25mm polished stainless-steel pipework
- Single nozzle
- Triple nozzle
- Quin nozzle
- Quad nozzles plus Vario-select switching
- PWM control
- Individual nozzle on/off

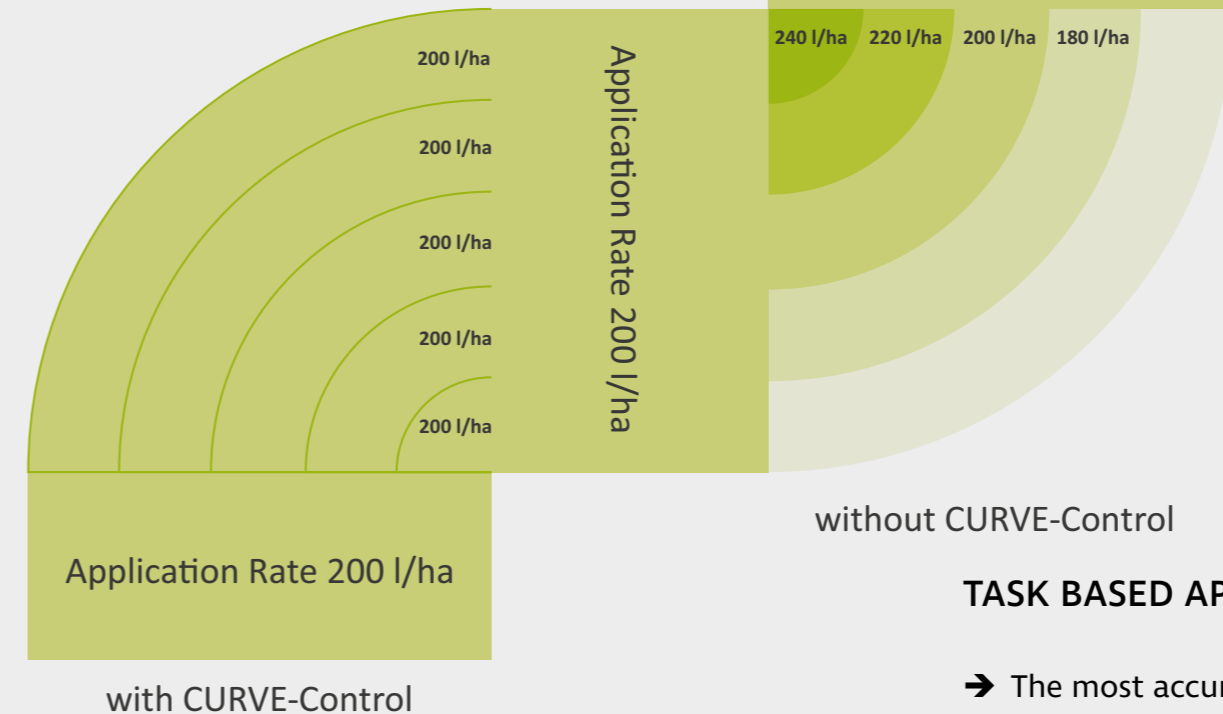

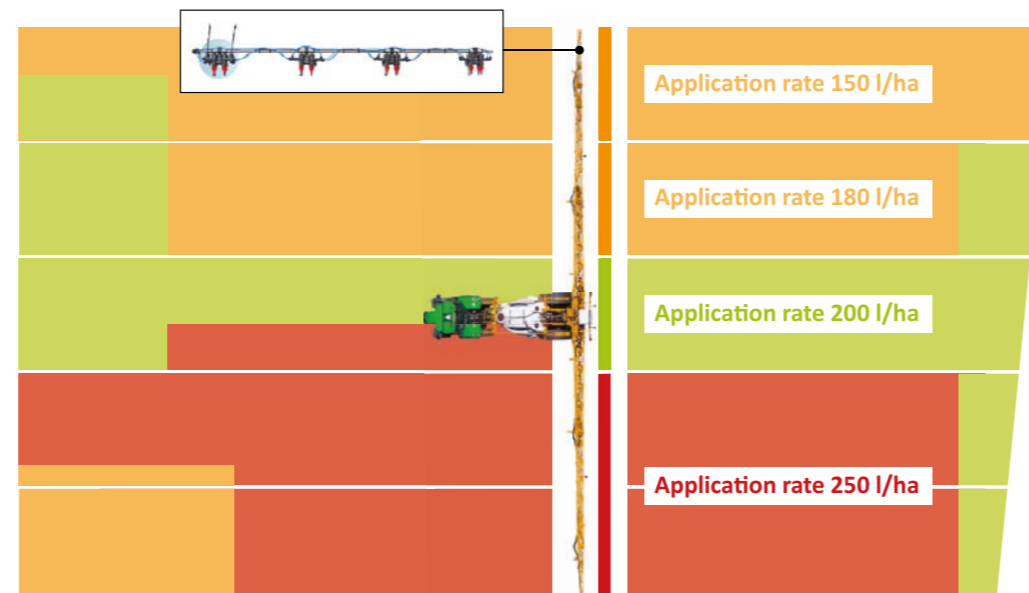

NOZZLE SWITCHING OPTIONS:

- **STANDARD**
Uses the sprayer controller to switch section on/off – can be GPS controlled

→ VARIO-SELECT – GPS CONTROLLED

Uses the sprayers controller for: -

- ⇒ Section on/off
- ⇒ Nozzle/cluster on/off
- ⇒ Variable rate of individual nozzle/cluster (+/-)
- ⇒ Execution of variable rate application maps from your Farm software package

CURVE CONTROL – GPS CONTROLLED:

- Automatically adjusts the cluster output (+/-) to account for the speed of the boom through a turn

Touch 800

Touch 1200

TASK BASED APPLICATIONS:

- The most accurate and efficient way to run your application programme – two-way data transfer with traceability record storage
- Create a work file in your farm management package
- Accept job information into the sprayer from your farm management package
- Return completed records from the sprayer back to your farm management package

NOZZLE TECHNOLOGY

SINGLE, TRIPLE, QUIN

VARIO-SELECT

PULSE WIDTH MODULATION (PWM)

SPRAYER SALES, SERVICE & SUPPORT

From choosing your new machine, to aftersales service and support you can always rely on the customer focused team at Knight Farm Machinery.

SALES

When purchasing your new Knight sprayer you can count on expert sales support and advice from our technical sales team and our specialist dealers. We can help you create a new machine specification to suit your exact needs.

From our purpose built headquarters in Rutland, UK we can custom build a machine to match your personal specification and with a visit to our factory, you can see your very own machine being built on our production line.

In conjunction with our preferred finance provider we can offer you a competitive way to purchase of your new sprayer including Higher Purchase and Contract Hire.*

*Finance provision is subject to status. Terms and conditions apply.

SERVICE

Knight understand the importance of keeping your sprayer up and running. With the help of our nationwide dealer network, we provide a complete service and maintenance program including full seven day support and NSTS testing.

Our team of fully trained engineers are available for onsite visits to your farm or field with their fully equipped mobile workshop.

PARTS

Our dedicated spare parts department can help you with parts identification and advice to ensure you get your parts quickly and efficiently. Guaranteed next day delivery is offered throughout mainland UK and an out of hours collection service from our factory is available.

KNIGHT
PARTS SHOP

A variety of parts are available to purchase from our online store:
