

Health & Safety

We do the paperwork.

You work safely

Managing health and safety is an essential part of any business strategy, regardless of industry, as it protects the wellbeing of employees, the employer and any related suppliers or contractors.

CXCS 

Our specialist team of health and safety experts provide a bespoke service to help you assess and manage the risks in your workplace.

By taking advantage of our cost-effective health and safety management packages, we can help you put a system in place which meets legal requirements and safeguards you, your employees, and your business.

Our services:

Risk Assessments

The first stage of the process which involves an in-depth audit of your business to understand the tasks you undertake and the environment you work in.

COVID-19 Risk Assessments

A specifically designed risk assessment to ensure guidelines are followed and your business remains COVID-19 free.

Action Plans

A prioritised action plan which is put into effect following the risk assessment to successfully implement and maintain the findings.

Policies & Procedures

Fully bespoke policies and procedures developed in line with your risk management plan to maintain standards for health, safety, and welfare matters.

COSHH Management

A dedicated COSHH risk assessment to ensure that the necessary precautions are being taken whilst handling and storing substances hazardous to health.

Toolbox Talks

A series of short talks provided free of charge to health and safety clients which give essential training on risks employees may face as they carry out their daily duties.

Fire Risk Assessments

A fire specific risk assessment which complies with the Regulatory Reform (Fire Safety) Order 2005.

Our services include a 24-hour telephone support line and dedicated advisors who are always available to provide answers to the toughest health and safety questions.
