Powered by InstaGroup experience

InstaGroup has an established reputation in renewable energy.

We've been trusted for quality for over 40 years, and we're known as a leader in the UK solar market through our manufacture of **InstaGen** solar PV panels.

Now we've built on our expertise in solar to develop **InstaGen** into a complete solar solution, with fully-compatible panels, energy storage batteries and inverters.

InstaGen offers everything an installer needs to grow their solar business.

Your one-stop shop for solar

-  Fully-integrated, all-in-one solar PV system
-  UK-based company, trusted **InstaGroup** quality
-  Expert technical support

InstaGen software makes it easy to see the savings

With its simple interface and clear, visual data, **InstaGen's** easy-to-use software is what every homeowner is looking for.

One tap on the mobile app or desktop browser is all it takes to see how the system is performing. Users can access as much (or as little) data as they want: track monthly energy production, see how much electricity has been generated since installation, and view the reduction of the home's carbon emissions.

24/7 real-time monitoring helps households to manage and optimise their energy savings, while the pro-active software will alert in the unlikely event there is an issue with any component.

Solar installs made smarter

The latest in solar technology and energy management in one complete kit, backed by the technical support and trusted assurance of the InstaGroup guarantee.

410/435W Solar Panels

3.6kW Inverter

Solar installs made simple

InstaGen's fully-integrated solar package makes system design, installation and connectivity simpler and more straightforward.

410/435W solar panels

- * Straightforward connection
- * Sleek design
- * 25-year minimum performance

3.6kW inverter

- * Fully-integrates with system
- * Hybrid inverters can be used without solar for battery energy storage

5kWh low voltage battery system

- * BMS and storage connects wire-free for easy installation or expansion
- * Minimalist, compact design ideal for domestic properties
- * Connects to user-friendly app via Wi-fi/Bluetooth for smart energy management
- * Software flags up any issues on the system and notifies the installer remotely
- * Customer can easily track outputs and carbon savings

5kWh Low Voltage Battery System
