

# NG LT System

*The next step in moving less soil...*

The NG LT provides a solution to anyone wanting to relieve compaction, whilst keeping soil zones separate, with minimal soil disturbance. The low draft design ensures you are only moving the soil you want to move, leaving the soil ready for drilling. The system is available on option 1 or option 2 shins and with a 100mm, 150mm or 200mm wing.

The point, shins, wing, and leg are all replaceable, with different options to suit individual conditions. The top bracket clamps onto 100mm box section or a weld on bracket is available. This makes retrofitting the system onto older machines simple, or the LT system can be fitted onto subsoilers, Cultivating Solutions, Grange Machinery, Ryetec or Weaving machines.
